(4) *Telegraphic requests.* Under emergency conditions, a request for amendment may be made by telegram, and the licensee may include therein a request that the amendment, if approved, be teletyped to the collector of customs. In such instances, the telegram must include the same information required to complete Form IT–763, and, in addition, full information as to the necessity for such type of service, including deadline dates. If the request is submitted by mail on Form IT–763, but emergency clearance by teletype is requested, a letter setting forth full details as to the necessity for such service, including deadline dates, must accompany the request.

NOTE: Requests for amendments by telephone or by letter will not be accepted.

1. *Licenses held by collectors—Amendment action by OIT, Washington, D. C.* On an approved request, the Office of International Trade will validate all copies of Form IT–763 by imprinting in the space headed "Validation" a facsimile of the Department of Commerce seal followed by a five-digit number representing the date of validation; the duplicate copy will be forwarded as the official notice of amendment to the collector of customs designated in item 11; the triplicate copy will be forwarded to the individual named in item 4 of IT–763. If the request is rejected, or returned without action, the reasons therefor will be indicated in the upper right-hand corner, and the triplicate copy returned to the applicant. Upon request, and where warranted, advice of an amendment action will be dispatched by collect wire to the applicant and (in the case of approved requests) by teletype to the collector of customs; copies of Form IT–763 then will be mailed in the usual manner and serve as confirmation of wire advices.

Amendment action by field offices. Amendments approved by field offices will be validated differently from those approved by the Washington office. In place of the facsimile of the Department of Commerce seal and a five-digit number representing the date of the validation, the name of the field office making the amendment will be inserted in the space headed validation. To complete the validation process, the amending officer will insert a serial number in the space provided, sign and date the IT–763, and check the space indicating approval. The original will then be forwarded to the Washington office of the Office of International Trade; the duplicate will be sent to the appropriate collector of customs as the official notice of amendment; and the triplicate (confirmation) copy will be sent to the individual named in item 4 of IT–763. On requests which are rejected or returned without action, the triplicate copy will be returned to the applicant.

2. *Licenses sent to OIT.* In those cases where the intended port of exit is unknown and the license accompanies Form IT-763, the Office of International Trade, on an approved request, will prepare a new license and forward it to the individual named in item 4 of Form IT-763. However, if the amendment requested is for an extension of validity period, such amendment will be made by typing a new expiration date on the face of the original license.

3. *Where to obtain Form IT-763.* Form IT-763 is set up in pads of quadruplicates so as to provide a copy for the applicant's file. Sets of the forms may be obtained by writing to any field office of the Department of Commerce.

(d) *Disclosure on amendment requests of prior action on the shipment*—(1) *Prior detention of commodities by customs.* Any exporter or his agent making application to the Office of International Trade for an amendment of an export license, who shall know or have reasonable cause to believe that a collector of customs has detained commodities which would be exportable under such license, as amended, shall disclose to the Office of International Trade at the time of applying for such amendment the fact that the collector of customs has detained the commodities. Any amendment obtained without full disclosure of that fact shall be deemed to have been obtained without disclosure of all facts material to the granting of the amendment, and the license and any amendment so obtained shall be void.

(2) *Prior exportation without a license.* No request for amendment to an export license shall be submitted to the Office of International Trade covering a shipment that is already laden aboard the exporting carrier or exported. In such cases where the shipment should have been authorized by a validated license, or amendment thereto, the exporter should send a letter or wire to the Exporters' Service Section, Office of International Trade, Department of Commerce, Washington 25, D. C., Attn: IT-1230, explaining why a validated license (or amendment thereto) was not obtained and disclosing all the facts concerning the shipment that would normally have been disclosed on the Request for and Notice of Amendment Action, Form IT-763. The Office of International Trade will inform the exporter of its action and instructions to him in the matter by letter. Any amendment obtained without such disclosure shall be deemed to have been obtained without disclosure of all facts material to the granting of the amendment, and the license and any amendment so obtained shall be void.

NOTE: See § 372.8 of this subchapter and § 380.4 (d) with respect to license applications and requests for extensions of validity periods of licenses to authorize shipments described in paragraph (d) of this section.

(e) *Price amendments*—(1) *Time for submission.* Request for amendment of a license to effect a change in price may be submitted at any time during the validity period of the license.

(2) *Necessary amendments to show price changes.* Export licenses must be amended to show any upward change in unit prices or total value on the license if the commodity covered by the license is at the time of export clearance subject to the general licensing policy set forth in § 373.1 of this subchapter, except:

(i) Where the licensee avails himself of permissible weight and volume tolerances. In such cases, the total value for the commodity shown on the shipper's export declaration may exceed the total value shown on the license. However, the unit value shown on the license may not be increased.

(ii) Where price increases can be justified before the collector of customs on the basis of changes in point of delivery, port of exit, or as a result of transportation costs, drayage, port charges, warehousing, etc.

(iii) Where unit or total price is not shown on the license but is based upon the market price at a specified date plus an exporter's mark-up, or like basis. In such cases, the unit or total price need only conform with the price statement on the license.

(3) *Price changes for which amendments are not required.* Export licenses need not be amended to show changes in unit or total price under the following circumstances:

(i) Where the license covers an R commodity; or

(ii) Where the license covers an RO commodity which at the time of export clearance is not subject to the general licensing policy set forth in § 373.1 of this subchapter; or

(iii) Where the change involves a reduction in prices:

Provided, That when commodities are licensed in quantities determined only by dollar value indicated on the license, the value shown on the shipper's export declaration shall not exceed the total value shown on the license. Shipments against such licenses will be charged in terms of dollars as shown on the shipper's export declarations.

NOTE: Where the Positive List does not indicate a unit of quantity for a specific commodity, the commodity shall be deemed to be licensed in quantities determined by dollar value only, even though a unit of quantity is shown on the license.

In such instances any increase in total dollar value must be made by amendment as provided for under § 380.2 (e) (2). Shipments against such licenses will be charged in terms of dollars as shown on the shipper's export declaration and the value shown on the shipper's export declaration shall not exceed the total value shown on the license.

When commodities are licensed in quantities determined only by the dollar value indicated on the license, price increases, transportation and warehousing charges, etc. occurring between the date of validation of the license and the date of the export declaration may have the effect of reducing the physical quantity which may be exported.

(f) *Intermediate consignee amendments.* Amendment of the export license is required if the intermediate consignee to be used or designated in the export transaction is not named on the export license, unless such new or different intermediate consignee is located in the country of ultimate destination as shown on the export license.

§ 380.3 *Price amendments on pending license applications.* Requests for amendment of a pending license application to effect a change in price may be submitted at any time, except that if a time schedule for submission of the license application has been established, the request may be submitted only during such period. The amendment procedure set forth in § 380.2 shall be followed with respect to these requests. Letters or telegrams requesting amendment of prices shall also state the applicant's reference number, date of application, commodity, country of destination, OIT application number (if known) for the purpose of identifying the application, the revised price, and reasons for the price change.

§ 380.4 *Extension of licenses*—(a) *Time for submission of requests.* Licensees may submit requests for extension of the validity periods of licenses which expire before shipment has been made. It is essential that the request for extension be submitted sufficiently in advance of the expiration date to allow the Office of International Trade to send an advice of amendment by regular mail to the licensee and the collector of customs holding the license before the license expires. However, where unusual circumstances have made it impossible for the licensee to submit his request for extension before the expiration date, requests for extension will be considered if received within 21 days after the expiration date shown on the license.

(b) *Procedure and justification for requesting extension.* Requests for extension of the validity period of licenses must be submitted in the same manner as provided in § 380.2, and shall be accompanied by the expiring license unless it has been filed with a collector of customs. Where the license has been deposited with a collector of customs, notification of the filing of such request shall be given to the collector with whom the license has been deposited. Where the expiring license does not accompany the request for extension, the applicant shall also include the following information on the face of Form IT-763:

(1) In item 10, state why shipment was not or will not be made before expiration date of license, stating facts to assure that shipment can be effected during the extended validity period requested. If partial shipment has been made, indicate quantity and value.

(2) In item 12, state whether license has been previously extended. If so, give date(s) and duration of such extension(s), and office by which extension was issued.

The foregoing information must also be included when request for extension is submitted by telegram in cases of extreme emergency as provided under § 380.2 (c) (4).

NOTE: If granted, the extension will be made in the same manner as other amendments. (See Note following § 380.2 (c).)

When a collector of customs who is holding an expiring license is notified that a request for extension of the license has been filed in accordance with the foregoing provisions, the collector will hold the license for an additional 30 days after the original expiring date. If the approved extension has not been received within 30 days, he will return the license to the Office of International Trade.

(c) *Disclosure of prior action on the shipment.* The provisions of § 380.2 (d) with respect to disclosure of prior action on the shipment in the case of requests for amendments to licenses shall apply equally to requests for extensions of validity periods of licenses.

PART 381—ENFORCEMENT PROVISIONS

Sec.
381.1 Violations.
381.2 Revocation of licenses.
381.3 Export control documents: Trafficking, advertising, misuse, and unauthorized amendment.
381.4 Destination control.
381.5 Return or unloading of cargo at direction of Department of Commerce.

AUTHORITY: §§ 381.1 to 381.5 issued under 63 Stat. 7, as amended; 50 U. S. C. App., 2023, E. O. 9630, Sept. 27, 1945, 10 F. R. 12245; 3 CFR 1945 Supp., E. O. 9919, Jan. 3, 1948, 13 F. R. 59; 3 CFR 1948 Supp.

§ 381.1 *Violations*—(a) *General*—(1) *Violations.* Violations, by any person, of the export-control law and any proclamation, order, rule, or regulation issued thereunder are punishable by a fine of not more than $10,000 or by imprisonment for not more than one year, or both. Violations are also subject to administrative action of suspension, revocation, or denial of licenses and licensing privileges granted pursuant to the authority of the export control law.

(2) *False or misleading statements.* The submission of false or misleading statements is a violation hereunder punishable under the export control law, and other applicable statutes. In addition, commodities attempted to be, or being, or intended to be, exported or shipped from or taken out of the United States in violation of the export control law or any proclamation, order, rule, or regulation issued thereunder are subject to seizure.

(3) *Licensee accountable.* With respect to licenses, the applicant to whom the license is issued becomes the licensee and will be held strictly accountable for use of the license.

(b) *Misrepresentations*—(1) *General provisions.* (i) All representations, statements, and certifications made by any licensee or any other person for the purpose of effecting or causing to be effected an exportation of any commodity or commodities from the United States shall be deemed to constitute representations, statements, and certifications made in respect of matters relating to the jurisdiction of the Office of International Trade and the Bureau of Customs under the statutes, proclamations, Executive orders, and regulations relating to export control and orders or licenses issued thereunder.

(ii) It shall be unlawful under Parts 370 to 399, inclusive, of this subchapter and the export control law, in addition to the provisions of any other law, for any person knowingly to make or cause to be made any false representation, statement or certification, or to falsify or conceal any material fact, for the purpose of effecting or causing to be effected an exportation of any commodity or commodities from the United States.

(2) *Persons liable.* Every person, whether or not situated in the United States, and whether or not the purchaser or ultimate consignee, who shall make any representation, whether directly to the Office of International Trade or any collector of customs or indirectly through any applicant for or holder of any export license, authenticated shipper's export declaration, or other export control document, for the purpose of effecting or inducing the issuance, or maintenance in effect, of any export license, shipper's export declaration, or other export control document, shall be subject to Parts 370 to 399, inclusive of this subchapter.

(3) *Types of misrepresentation.* Without limitation of the foregoing or of any other provisions of the law or Parts 370 to 399, inclusive, of this subchapter no such person shall:

(i) *Country of destination.* Falsely state the country of ultimate destination intended, or divert commodities in violation of the terms, provisions, and conditions of any export control document to any country other than that of the destination named in the document, or attempt or conspire to do the same.

(ii) *Consignee.* Falsely describe the true ultimate consignee or purchaser to, or conceal his true identity from, the applicant or licensee, or from the Office of International Trade or any collector of customs.

(iii) *Orders.* Submit any order for the purchase or importation from the United States of any commodity, or state in writing any commitment to purchase or import the same, with the intention not to abide by such order or commitment, or not perform the terms thereof, whether or not the applicant or licensee is aware of such intention. Unless notice of change in intention is communicated and received by the Office of International Trade prior to exportation, in time to permit revocation or amendment, all parties will be deemed to represent continuously to the Office of International Trade that the intention continues to be that of abiding by the order or commitment and of performing the same.

(iv) *End use.* Falsely state the end use to be served by the exportation in question.

(4) *Denial of licensing privileges.*[1] In addition to the application of other provisions of law and of Parts 370 to 399, inclusive, of this subchapter, any person who shall violate any of the foregoing provisions of this section may be declared ineligible by the Office of International Trade to be a party to any licensed exportations, and it shall be unlawful for any person knowingly to apply for or obtain any license, shipper's export declaration, or other export control document relating to any exportation of commodities to or for such person so declared ineligible without prior disclosure of such facts to, and specific authorization of, the Office of International Trade.

§ 381.2 *Revocation of licenses.* All export licenses are subject to revision, suspension, or revocation without notice.

§ 381.3 *Export control documents: Trafficking, advertising, misuse, and unauthorized amendments*—(a) *Unauthorized use and alterations.* Except as otherwise specifically authorized in Parts 370 to 399, inclusive of this subchapter, or in writing by the Office of International Trade, it shall be unlawful for any person, whether or not the licensee, to receive, use, alter, assist in or permit the use or alteration of, any export control document, for the purpose of facilitating or effecting any exportation other than that set forth in such document or except in accordance with all the terms, provisions and conditions thereof.

(b) *Trafficking and advertising.* Without limitation of the foregoing or of any other provisions of law or of Parts 370 to 399, inclusive, of this subchapter, it shall be unlawful without prior written approval of the Office of International Trade with respect to any exportation under any outstanding export control document:

(1) *Transfers or changes of ownership.* For the licensee to effect, or to attempt to effect, any transfer of, or other change of ownership in, such document whether by sale, gift, loan, or otherwise, to any other person, or to permit any other person to use the same otherwise than for the true account of and as true agent in fact for the licensee; or for any person not the licensee to receive or accept a transfer or other change of ownership of, or otherwise to use, an export control document, or to attempt the same, except for the true account of and as true agent in fact for the licensee.

(2) *Change in named parties.* To effect, or to attempt to effect, any change of, substitution for, or addition to, the parties named in an export control document, or any transfer, receipt or purchase, or creation of any interest or participation whatsoever in the transaction described in any export control document.

(3) *Unlawful advertising.* To offer or solicit by written advertisement or circular any transfer of an export control document or any interest therein hereinabove declared unlawful. An advertisement or circular shall be deemed unlawful:

(i) Even though coupled with a condition requiring approval by the Office of International Trade of a new consignor or consignee or other change in the export license, by way of transfer, amendment or otherwise;

(ii) Where, offering or soliciting the sale for exportation of any commodities the advertisement indicates that the proposed seller of such commodities holds or will furnish a license or other export control document for the exportation of such commodities;

(iii) Where, offering or soliciting the purchase for exportation of any commodities, such advertisement is addressed by the proposed buyer directly or indirectly to any person on the condition that such person as a seller then holds or will furnish a license or other export control document for the exportation of such commodities.

(4) *Agent for licensee.* For the licensee to permit any other person to facilitate or effect the exportation of any commodity described in the license, ex-

[1] See Part 382 of this subchapter, entitled "Denial or Suspension of License Privileges."

cept under the direction and responsibility of or as the true agent in fact for the licensee, regardless of the terms of sale or exportation or other contractual agreement between the licensee and the purchaser or ultimate consignee of such commodity.

INTERPRETIVE STATEMENT REGARDING §§ 381.1 AND 381.3

The purpose of the foregoing regulations is to state in detail those practices which are prohibited in the use of export control documents and to clarify the liabilities for false representations.

1. *Use of documents.* Section 381.3 emphasizes the fact that a license or authenticated shipper's export declaration or other export control document is not a subject for trafficking and that, except as specifically authorized by the Office of International Trade, no interest therein can be lawfully transferred or created. Particular attention is called to the fact that this regulation prohibits advertising of any nature whatever of offers or solicitations which might involve transfers of export control documents.

Where a licensed transaction has failed of accomplishment, the license cannot without special authorization be used for any other transaction. Amendments of consignors and consignees will be permitted only under the strict provisions of the regulations.

2. *Unlawful practices.* The regulation makes it unlawful for a licensee or other person holding an export control document to sell, or for any person to purchase, the commodities described in such document with the understanding that the document may be used by or for the benefit of the purchaser to effect exportation of the said commodities; for any person to effect exportation thereof for the benefit or for "account" of any person other than the licensee, regardless of the device or fiction employed; or for the licensee fictitiously to act as principal or agent of another person who actually is effecting the exportation, or for such other person fictitiously to act as the licensee's principal or agent for the same purpose or for the named consignee to act "for the account" of a new unlicensed consignee.

3. *Dock receipts, bills of lading, liens.* The regulation will not be construed to affect the transfer and other use of dock receipts, bills of lading, or other commercial documents necessary to complete a transaction authorized by the export license or impair the validity of liens or other security titles or interests created in good faith with respect to commodities or documents in the course of financing, warehousing, forwarding, or transporting commodities.

However, where the foreclosure of any lien or other security title or interest or the exercise of any rights by the holder of the lien or other security title or interest contemplates an exportation under the license, by someone other than the licensee or to someone other than the purchaser or ultimate consignee designated in the license, the holder of the lien or other security title or interest must apply for an amendment or for a new license as a new party in accordance with the regulation on amendments.

§ 381.4 *Destination control*—(a) *Scope and definitions.* (1) The provisions of this section apply to all shipments of cargo made under validated licenses and all shipments of Positive List commodities made under either validated or general licenses.

(2) The provisions of this section shall not apply with respect to shipments of cargo effected under General License GO to ports of ultimate destination in Country Group O (North or South America, as listed in Schedule C of the Bureau of the Census).

(3) As used in this section "bill of lading" means the contract of carriage and receipt for commodities issued by the carrier.

(b) *Country of ultimate destination.* (1) No carrier by water, land, or air, nor any other person on behalf of any carrier, shall issue a bill of lading which provides for delivery of cargo subject to the provisions of this section at any foreign port except a port located in the country of (i) the ultimate consignee, or (ii) the intermediate consignee, named in the authenticated shipper's export declaration.

(2) No carrier shall deliver such cargo at any other country at the request or option of either the shipper, consignor, exporter, purchaser, or ultimate consignee, or their agents, or any other person having custody or control of the shipment, without prior written authorization from the Office of International Trade to the carrier or its agent.

(3) No shipper, consignor, exporter, purchaser or ultimate consignee, or their agents, or any other person, shall, without prior written authorization from the Office of International Trade to the carrier or its agent: (i) divert any cargo to any country of ultimate destination other than that named in the authenticated shipper's export declaration or in the bill of lading described in paragraph (c) of this section; (ii) request or demand that any carrier or its agent divert such cargo from the country of ultimate destination named in any of such documents. In addition, no agent of any carrier shall instruct or authorize the master of the vessel to divert any such cargo to any other country of ultimate destination without such prior written authorization from the Office of International Trade.

(4) No carrier of such cargo shall issue a bill of lading providing for delivery to the ultimate consignee named in the authenticated shipper's export declaration at optional ports where one of such optional ports is in a country not named as the ultimate country of destination in the license or declaration, unless written authorization has been granted by the Office of International Trade. However, where the authenticated shipper's export declaration provides for delivery of cargo consisting of commodities subject to this section to optional intermediate consignees located in ports in different countries, the carrier may issue a bill of lading providing for delivery at such optional ports.

(c) *Statement regarding ultimate destination on declaration, bill of lading and commercial invoice.* (1) (i) No shipment of cargo subject to the provisions of this section may be made unless the licensee or his forwarding agent shall place the following statement (filling in the blank space with the name of the country of ultimate destination set forth in the shipper's export declaration) on all copies of the shipper's export declaration presented to the collector of customs at the port of exit for authentication:

These commodities licensed by U. S. for ultimate destination (name of country). Diversion contrary to U. S. law prohibited.

(ii) If the validated export license authorizes distribution or resale of the named commodities in a country or countries other than the named country of ultimate destination, the following statement (in lieu of the preceding statement) shall be set forth on all copies of the shipper's export declaration:

These commodities licensed by U. S. for ultimate destination (name of country) and for distribution or resale in (name of other approved countries as shown on validated license). Diversion contrary to U. S law prohibited.

(2) No carrier by water, land, or air shall issue, and no licensee, shipper, consignor, exporter or consignee, or their agents, or any other person, shall prepare or procure a bill of lading covering an exportation of a commodity with respect to which a shipper's export declaration has been authenticated by a collector of customs containing the statement set forth in subparagraph (1) of this paragraph, unless all copies of such bill of lading, including all non-negotiable and office copies, shall contain the same statement.

(3) No licensee, shipper, consignor, exporter, or agent thereof, or any other person shall prepare or issue any commercial invoice with respect to any shipment of commodities subject to the provisions of this section, unless such invoice or invoices, and all copies thereof, shall contain on the face thereof the statement set forth in subparagraph (1) of this paragraph.

(d) *Notice of prohibition against diversion.* (1) Whenever a commercial invoice shall be issued containing the statement prescribed in paragraph (c) of this section, the shipper or other person issuing such invoice shall promptly send copies thereof to (i) the ultimate consignee and the purchaser named in the authenticated shipper's export declaration, (ii) the intermediate consignee and (iii) any other persons named in the invoice who are located in a foreign country. Nothing herein contained shall be construed to limit the persons or classes of persons to whom such invoices and bills of lading are usually and customarily sent in the course of export trade. The shipper or other person issuing the commercial invoice may either omit all reference to price or sales commission from the copy of the invoice sent to any of the above-named persons, provided such invoice otherwise adequately identifies the shipment; or in lieu of a copy of the commercial invoice, may send a copy of the bill of lading containing the statement prescribed in paragraph (c) of this section.

(2) No person, including the ultimate consignee or intermediate consignee and any on-forwarding carrier, shall, after notification of the prohibition against diversion prescribed in paragraph (c) of this section, whether by such invoice or bill of lading or by any other means, divert or cause to be diverted any of the commodities described in such bill of lading to any country of ultimate destination other than that named in such notification.

(e) *Proof of notice.* In any administrative compliance proceeding brought by the Office of International Trade, evidence of the sending of such invoice or bill of lading or other form of notification of the prohibition against diversion to any person, shall constitute prima facie proof of his receipt thereof and of notification that the commodities have been licensed for a particular country of ultimate destination and may not be lawfully diverted to any other country. In addition, proof of the sending of such notice to the intermediate consignee shall be deemed notification of such prohibition to the ultimate consignee and purchaser.

(f) *Unloading of cargo at a port in other than intermediate or ultimate country of destination.* Nothing contained in the regulations in this part shall be deemed to prohibit a carrier from unloading cargo at a port in other than the intermediate or ultimate country of destination shown on the authenticated shipper's export declaration where, by reason of an act of God, perils of the sea, damage to the carrier, strikes, war, political disturbances, insurrection, or other causes beyond the control of the carrier set forth as standard provisions of the carrier's bill of lading, it is not feasible to deliver the cargo at the licensed port of destination. Whenever, because of the existence of any of the said causes, cargo is unloaded at a port in any other country:

(1) The carrier shall promptly, and within 10 days from the date of unloading such cargo, report the facts with respect thereto to the nearest American consul and to the agent of the carrier located in the United States. Within 10 days after the receipt of such notice by the agent of the carrier in the United States, such agent shall transmit a copy of the report to the Office of International Trade. This report shall consist of a copy of the manifest of such diverted cargo together with a statement of the place of unloading and the name and address of the person in whose custody the commodities were delivered.

(2) The exporter of such commodities shall, upon notice from the Office of International Trade of such diversion, promptly, and within 10 days, notify the Office of International Trade of the proposed disposition of the commodities.

(3) No person, including the exporter, the licensee, any consignee, or the carrier and any agent or person acting on its behalf, shall take any steps to effect delivery or entry of the commodities into the commerce of the country where unloaded without prior approval of the Office of International Trade. The carrier shall take steps to assure that such commodities are placed in custody under bond or other guaranty not to enter the commerce of such country or any country other than the countries of the ultimate and intermediate consignees shown on the authenticated shipper's export declaration without such prior approval

(g) *Indication of shipper's export declaration number on ship's manifest.* The carrier or its agent shall, on all copies of that manifest which is filed with the U. S. collector of customs, indicate thereon, with respect to each shipment, the applicable shipper's export declaration number assigned to each such shipment by the collector of customs.

INTERPRETATIONS

I. Q. Who other than the shipper is authorized to insert the ultimate destination control statement on the export declaration, the bill of lading and the commercial invoice, as provided by § 381.4?

A. The forwarding agent is deemed to have authority to insert the ultimate destination control statement required by § 381.4 (c) (1) on the bill of lading, shipper's export declaration, and commercial invoices, unless the forwarding agent's authorization prohibits him from so doing. If carrier prepares the bill of lading, the carrier must insert the statement on that document based upon information communicated to the carrier by the exporter or his authorized forwarding agent, i. e., an authenticated shipper's export declaration or a validated license, or a properly executed shipper's export declaration given to the carrier for submission to collectors for authentication containing the statement.

2. Q. If shippers or their agents located in inland cities forward to carriers at ports of exit export declarations, bills of lading, and commercial invoices without having inserted the ultimate destination control statement, is it necessary for the carrier to return the documents to the shipper or his agent?

A. If shipper's export declaration presented to the carrier does not contain the ultimate destination control statement, the carrier cannot add such statement to the declaration unless specifically authorized by exporter, nor can the carrier issue a bill of lading containing the statement until exporter or his authorized forwarding agent has placed the statement on the declaration and the declaration has been authenticated by the collector. The carrier may not insert the statement on any shipper's export declaration or commercial invoice accompanying the shipment, unless authorized by designation as provided in case of forwarding agents.

3. Q. Is the collector responsible for checking as to the ultimate destination control statement on the bill of lading and on invoices, as well as on the export declaration?

A. Collectors of customs have the responsibility for checking as to the ultimate destination control statement on all shipper's export declarations submitted for authentication, and should ascertain that the inscription has been placed on any bills of lading or invoices which they receive in the regular course of business or which otherwise come to their attention. In other cases, collectors may, wherever they deem it appropriate, to assure compliance with the regulations, check the bill of lading or commercial invoices as to the ultimate destination control statement or other matters.

4. Q. Do the destination control provisions apply to Positive List commodities exported under such general licenses as GLV, BAGGAGE and TOOLS OF TRADE?

A. The provisions of § 381.4 apply to GLV shipments and to shipment of Positive List commodities under any other general license where an export declaration is required. However, no ultimate destination control statement is required on declarations of commodities exported under general license BAGGAGE.

5. Q. Does this regulation apply to in-transit shipments?

A. The ultimate destination control statement is not required for shipments made under general license GIT, but is required for intransit shipments of commodities excepted from GIT (§ 371.9 (c) of this subchapter), and for commodities moving in transit to Subgroup A, Hong Kong, and Macao.

6. Q. Does paragraph 381.4 (g) apply only to ship's manifest?

A. The paragraph applies only to customs outward foreign manifest.

§ 381.5 *Return or unloading of cargo at direction of Department of Commerce*—(a) *Exporting carriers.* (1) Any exporting carrier which has departed from the United States with any commodity on board which has not been cleared for export in accordance with the provisions of § 379.1 (a) (1) of this subchapter, or with any commodity on board as to which any other violation of export control regulations (Parts 370 through 399 of this subchapter) has occurred, and which is in possession or control of such commodity, shall, as may be directed by the Office of International Trade, either (i) return such commodity to the United States or cause such commodity to be so returned, or (ii) unload such commodity at a port of call and take steps to assure that such commodity is placed in custody under bond or other guaranty not to enter the commerce of any foreign country without prior approval of the Office of International Trade.

(2) The provisions of § 381.4 (f) relating to reporting, notification to the Office of International Trade, and the prohibition against unauthorized delivery or entry of the commodity into a foreign country, shall apply also to commodities directed to be unloaded at a port of call, as provided in this section.

(b) *Agents of the carrier or vessel.* The agent of the carrier or vessel having such commodity aboard or which is in possession or control of such commodity, as provided in paragraph (a) of this section, shall notify the master of the vessel immediately upon discovery of such export control violation.

NOTE: This section in no wise relieves exporting carriers of their responsibilities under regulations of the Bureau of Customs (particularly under U. S. Code, title 46, sections 91 and 92).

Commodities returned to the United States pursuant to this section are required by customs regulations to be removed from the dock or pier where deposited within 48 hours, or the commodities will be placed in storage with charges leviable against the commodities.

PART 382—DENIAL OR SUSPENSION OF EXPORT PRIVILEGES

Sec.
382.1 Authority to deny export privileges.
382.2 Compliance Commissioners.
382.3 Institution of proceedings.
382.4 Default.
382.5 Answer.
382.6 Subpoenas.
382.7 Hearings.
382.8 Report of Compliance Commissioner.
382.9 Disposition.
382.10 Consent orders.
382.11 Temporary suspensions.
382.12 Rehearings.
382.13 Appeals.
382.14 Proceedings confidential.
382.51 Table of compliance orders currently in effect denying export privileges.

AUTHORITY: §§ 382.1 to 382.51 issued under 63 Stat. 7, as amended; 50 U. S. C. App., 2023, E. O. 9630, Sept. 27, 1945, 10 F. R. 12245; 3 CFR 1945 Supp., E. O. 9919, Jan. 3, 1948, 13 F. R. 59; 3 CFR 1948 Supp.

§ 382.1 *Authority to deny export privileges.* Any person who violates any law or regulation relating to export control may be denied the privilege of exporting, receiving, or otherwise participating in any exportation of any commodity, or of technical data, from the United States to any foreign destination, including Canada; and of financing, transporting, or other servicing of such exports. Such denial of export privileges shall take the form of an order issued in the name and under the authority of the Assistant Director for Export Supply of the Office of International Trade and shall be effective for such period of time and on such terms and conditions as may be deemed appropriate and prescribed therein. Such an order may be made applicable not only to persons named therein as having committed a violation but also, to the extent necessary to prevent evasion, to other persons with whom said named persons may be related by ownership, control, or other connection in the conduct of export trade. Any statute, proclamation, Executive order, regulation, or order applicable to any conduct involved in obtaining or using an export license or other export control document shall be deemed to be a "law or regulation relating to export control."

NOTE: This procedure in no way restricts the present practice of referring appropriate cases to the Department of Justice for criminal prosecution. Violations of export control regulations not only may result in denial of export privileges but also are punishable by a fine of not more than $10,000, or by imprisonment for not more than 1 year, or both. Any submission of false information, whether in connection with license applications, export declarations, investigations, compliance proceedings, appeals, or otherwise, is punishable by a fine of not more than $10,000, or by imprisonment for not more than 5 years, or both.

§ 382.2 *Compliance Commissioners.* The Director of the Office of International Trade will designate one or more persons to act as Compliance Commissioners, who shall have the powers and duties provided herein. Persons attached to the Export Supply Divisions or Investigation Staff of the Office of International Trade shall not be qualified to act as Compliance Commissioners.

§ 382.3 *Institution of proceedings.* The Chief, Export Control Investigation Staff, may, with the approval of the Office of the General Counsel, initiate proceedings for the denial of export privileges of any person who he has reason to believe has violated any law or regulation relating to export control. Such proceedings shall be initiated by sending a notification (to be known as a charging letter) either by telegraph or by registered mail to each person against whom proceedings are brought (to be known as a respondent) at his last known address. The charging letter shall set forth the specific violations charged, including reference to the particular regulatory or other provisions alleged to have been violated, and shall give notice that, if the respondent is found to have committed the alleged violations, his export privileges may be denied. The charging letter shall inform the respondent that he may submit his answer in writing or, if he so requests, may be accorded an oral hearing at a time and place to be subsequently fixed, but that, unless either his written answer or his written request for an oral hearing is received by the Chief, Export Control Investigation Staff, within 10 days after receipt of the charging letter by respondent, he will be held in default and an order denying his export privileges may be entered forthwith. Charges may be amended from time to time upon reasonable notice.

§ 382.4 *Default.* If the respondent does not answer the charges or request an oral hearing within the time prescribed in § 382.3, he shall be held in default. In such case the evidence of violation shall be informally presented to the Compliance Commissioner, but the proceedings shall otherwise be the same as in contested cases. Failure of a respondent to receive a charging letter addressed and transmitted to him as provided in § 382.3 shall not prevent or invalidate such default but a respondent who has not received the charging letter may at any time move to vacate or modify any order issued pursuant to such charging letter. Proceedings on such a motion, including a hearing if requested, shall be conducted as provided in § 382.11 (c) with respect to motions to vacate or modify a temporary suspension order.

§ 382.5 *Answer.* The respondent may answer the charges or request an oral hearing within the time prescribed in § 382.3 by submitting his written answer or request in duplicate to the Chief, Export Control Investigation Staff, Office of International Trade, Department of Commerce, Washington 25, D. C. If the respondent so desires, he may waive the oral hearing and have the case considered by the Compliance Commissioner on the basis of his written answer, in which event final disposition of the case shall be made without formal hearing. In lieu of such a hearing, the evidence of violation shall be informally presented to the Compliance Commissioner, who shall consider it, together with the answer, but the proceedings shall otherwise be the same as in other cases. If the respondent desires to present his answer at an oral hearing, he shall be accorded an opportunity to do so at a time and place to be fixed by the Director, Export Control Investigation Staff, on at least 10 days' notice, provided the respondent has requested such hearing within the time prescribed in § 382.3. The date of hearing may be advanced upon request, and hearings may be postponed or continued from time to time upon reasonable notice.

§ 382.6 *Subpoenas.* The Compliance Commissioner may issue subpoenas, returnable before him, at the request of any party to a proceeding before him, requiring the attendance of witnesses and the production of books, records, or other documentary or physical evidence determined by the Compliance Commissioner to be relevant and material to the proceedings, reasonable in scope, and properly obtainable by subpoena.

§ 382.7 *Hearings.* Hearings shall be conducted by the Compliance Commissioner in a fair and impartial manner. The exclusionary rules of evidence prevailing in courts of law shall not apply, but all evidence relevant and material to the inquiry shall be received and given appropriate weight. The Compliance Commissioner may administer oaths and affirmations. Respondent may be represented by counsel but need not be. The proceedings shall be taken by a reporter, transcribed, and filed with the Compliance Commissioner. Respondent shall have an opportunity of examining the transcript and of obtaining a copy upon payment of proper costs. Any party to the proceedings may file a bill of exceptions to the transcript with the Compliance Commissioner within 5 days after a copy of the transcript is made available to him, or within such other time as the Compliance Commissioner may prescribe. The Compliance Commissioner shall rule upon such exceptions in making the report for which provision is made in § 382.8. Any bill of exceptions so filed shall henceforth accompany the transcript.

§ 382.8 *Report of Compliance Commissioner.* The Compliance Commissioner shall consider the record, including any bill of exceptions filed thereto, and shall prepare a written report which shall include findings of fact, including a finding whether or not a violation has occurred, and recommendations. The report, transcript, exhibits, and bills of exceptions, if any, shall be transmitted to the Assistant Director for Export Supply.

§ 382.9 *Disposition.* The Assistant Director for Export Supply shall review the record, consider the report of the Compliance Commissioner, and determine the disposition of the case. If the Compliance Commissioner has found that a violation has been committed, his recommendations shall be advisory only, and the Assistant Director for Export Supply may issue such order as he deems appropriate. If the Compliance Commissioner has found that no violation has been committed, the Assistant Director for Export Supply shall enter an order dismissing the charges. A certified copy of the order, together with a copy of the Compliance Commissioner's report, shall be sent to the respondent by registered mail. Any such order denying export privileges shall be published in the FEDERAL REGISTER as soon as practicable after issuance.

§ 382.10 *Consent orders.* The Director, Export Control Investigation Staff, and the respondent may, after transmission of a charging letter, by agreement submit to the Compliance Commissioner a proposal for the issuance of a consent order. The Compliance Commissioner shall review the facts of the case and the proposal and for this purpose may conduct informal conferences with the parties and may require the informal presentation before him of the evidence in the case. If he does not approve the proposal, he shall so notify the respondent and the Director, Export Control Investigation Staff, and the case shall proceed to hearing. If he approves the proposal, he shall report the facts of the case with his recommendations to the Assistant Director for Export Supply. The Assistant Director for Export Supply may reject the proposal, in which event the case will proceed to hearing, or he may accept the proposal and issue an appropriate order.

§ 382.11 *Temporary suspensions*—(a) *Suspension by charging letter.* A charging letter may by its terms suspend, from and after the date of its issuance, the respondent's privilege to obtain or use validated export licenses and may revoke and require the return for cancellation of outstanding validated licenses but shall not otherwise suspend the respondent's export privileges. Such latter privileges, however, may be suspended as provided below in paragraph (b) of this section.

(b) *Temporary suspension orders.* (1) The export privileges of any person who is under investigation, or against whom administrative or judicial proceedings are pending, for violation of any law or regulation relating to export control, may be suspended summarily, without prior notice or opportunity for hearing, where and to the extent such suspension is found reasonably necessary to protect the public interest pending final disposition of the investigation or proceedings. Such a temporary suspension order shall be issued only for such limited time, ordinarily not exceeding 30 days, as may be required to complete the investigation or the proceedings, but may, on a showing of need for additional time, be extended in the same manner as originally issued.

(2) An application for such a temporary suspension order shall be made by the Director, Export Control Investigation Staff, to the Compliance Commissioner and shall include a brief recital of the facts of the case and a statement of the grounds for the application and the nature of the order sought. The compliance Commissioner shall review the application and for this purpose may require informal presentation of evidence before him. If he does not approve the application, he shall so notify the Director, Export Control Investigation Staff, by memorandum, and no further action shall be taken upon it; but if he approves it, he shall send his recommendation, together with the application and accompanying documents to the Assistant Director for Export Supply, who may issue such temporary suspension order as he shall deem appropriate. A certified copy of the order shall be sent to the respondent by registered mail.

(c) *Motions to vacate or modify.* The respondent may at any time move to vacate or modify any temporary suspension contained in any charging letter or order. Any such motion shall be filed with the Compliance Commissioner and an oral hearing thereon, if requested, shall be held before the Compliance Commissioner at the earliest possible date. The Compliance Commissioner shall consider the evidence presented and shall submit his report and recommendations thereon to the Assistant Director for Export Supply. The latter may issue such order disposing of the motion as he shall deem appropriate, and a certified copy thereof shall be promptly communicated to the respondent.

(d) *Deferment of action on license applications otherwise prohibited.* Except for the particular application or license which is itself the basis of any investigation or proceeding, and except pursuant to paragraph (a) of this section, no export license application filed by any person shall be returned without action, held without action, or rejected, by reason of the fact that such person is under investigation, or that proceedings against him are pending, otherwise than in accordance with the terms of a temporary suspension order issued under paragraph (b) of this section.

§ 382.12 *Rehearings.* The Compliance Commissioner may upon written request grant a rehearing or reopen a proceeding at any time for the purpose of hearing any relevant and material evidence which was not known or which was unobtainable at the time of the original hearing. The request for rehearing or reopening shall contain a summary of such evidence, the reasons why it is deemed relevant and material, and the reasons why it could not have been presented at the original hearing. The Compliance Commissioner shall give prompt notice of the time and place of any further hearing, if one is held, and shall conduct such hearing and submit his report and recommendations thereon to the Assistant Director for Export Supply for final action in the same manner as provided for the original proceedings.

§ 382.13 *Appeals*—(a) *Grounds of Appeal.* The respondent may appeal from a suspension or denial of export privileges upon the ground (1) that the findings of violation are not supported by any substantial evidence, (2) that prejudicial error of law was committed or (3) that the provisions of the order are arbitrary, capricious, or an abuse of discretion. The appeal must specify upon which of these grounds the appeal is based and must indicate from which provisions of the order the appeal is taken.

(b) *Filing of appeals.* An appeal must be in writing and must be filed with the Appeals Board, Bureau of Foreign and Domestic Commerce, Department of Commerce, Washington 25, D. C. An appeal from a temporary suspension by charging letter or order may not be filed unless the respondent has unsuccessfully moved to vacate or modify such temporary suspension as provided in § 382.11 (b) and, in addition, unless such temporary suspension has remained in effect for at least 60 days. An appeal from a final order denying export privileges must be filed within 10 days after receipt of a copy of the order. The provisions of Part 383 of this subchapter shall govern the procedure and disposition of appeals except as otherwise provided in this section.

(c) *Matters considered on appeal.* A hearing before the Appeals Board shall not constitute a trial *de novo*, but the appeal shall be considered upon the basis of the record, consisting of the charging letter, the transcript of the hearing before the Compliance Commissioner, including any bills of exceptions thereto, the report of the Compliance Commissioner, the order of the Assistant Director for Export Supply, and any other relevant documents involved in the proceedings before the Compliance Commissioner. If the respondent has requested and been denied a rehearing or reopening on the basis of new evidence, the Appeals Board may direct that such rehearing or reopening be granted if it finds that such new evidence is relevant and material to the issues and was not known or was not available to the respondent at the time of the original hearing. The Appeals Board shall not consider facts or arguments affecting the merits of the policy embodied in rules or regulations alleged to have been violated.

(d) *Effect of appeal.* The taking of an appeal shall not stay the operation of any order. The decision of the Appeals Board shall be final and shall be promptly transmitted to the respondent and published in the FEDERAL REGISTER.

§ 382.14 *Proceedings confidential.* All proceedings prior to the issuance of an order by the Assistant Director for Export Supply shall be confidential. Reports of the Compliance Commissioner and copies of transcripts of hearings shall be available only to parties to the proceedings and, to the extent of their own testimony as contained in transcripts, to witnesses therein. Any such matters may, however, be made available to any government agency having a proper interest therein.

§ 382.51 *Table of compliance orders currently in effect denying export privileges*—(a) *Contents.* (1) This table contains orders issued by the Office of International Trade which currently revoke, suspend, or deny export privileges. Suspension orders which by their terms have ceased to operate are not included. Temporary suspensions by order or charging letter are likewise not included. (Until a formal compliance order is issued the proceedings in compliance cases are kept confidential.)

(2) The Table of Compliance Orders will be amended to list additional compliance orders which may be issued and to delete listed orders whenever they expire.

(3) The Table contains the name and address of all United States and foreign persons, corporations, and firms denied export privileges by compliance orders based on findings of violations of the laws and regulations relating to export control, effective date of order, expiration date of order, export privileges affected and the volume and page of the FEDERAL REGISTER in which the complete text containing the factual and legal basis for each cited order can be found.

(4) Orders denying export privileges are issued not only for violations involving unauthorized transshipments of strategic commodities but also for other types of violations relating to export control. Therefore, to ascertain the grounds for any order, reference should be made to the cited issue of the FEDERAL REGISTER for the text of the order.

NOTE: License denial orders usually contain a provision making them applicable not only to persons named therein as having committed a violation but also, to the extent necessary to prevent evasion, to other persons with whom said named persons may be related by ownership, control, or other connection in the conduct of export trade. Accordingly, reference should be made to the text of the order in any particular case to ascertain whether it is applicable to related persons (see § 382.1).

Section 381.1 (b) (4) of this subchapter makes it unlawful for any person knowingly to apply for or obtain any license, shipper's export declaration, bill of lading or other export control document relating to any prohibited exportation of commodities to or for a suspended person, firm, or corporation without first disclosing this fact to the Office of International Trade and obtaining specific authorization where necessary.

(b) *Table of compliance orders:*

Name and address	Effective date order	Expiration date order	Export privileges affected	Federal Register citation
Ahern, C. F., 1 Wall St., New York, N. Y.	6-12-51	6-12-54	General and validated licenses, Positive List commodities, any destination.	16 F. R. 5845, 6-19-51.

PART 383—APPEALS

§ 383.1 *General procedure for appeals*—(a) *Purpose.* This section provides the general procedure for appeals, except as otherwise noted below.

(b) *Appealability of regulations and administrative actions.* Any person may appeal, upon the grounds set forth in paragraph (e) of this section, from:

(1) Any regulation issued by the Department of Commerce under the export control law or delegated authority relating thereto.

(2) Any administrative action of the Department of Commerce or duly authorized employees thereof, taken under the aforementioned authority, including appeals from compliance actions as provided for by § 382.13 of this subchapter.

Provided, That problems of an over-all nature, affecting exporters as a group, will not be considered within this appeals procedure, but may be referred to Commodity Advisory Panels and Commodity Advisory Committees as provided in § 384.1 of this subchapter.

(c) *Definitions.* For purposes of this section:

(1) "Regulation" means any provision of a regulation or order published in the FEDERAL REGISTER or announcement thereof in a Current Export Bulletin which is applicable generally to all persons or to a class of persons.

(2) "Administrative action" means any action taken by the Department of Commerce or duly authorized employees thereof under a regulation with respect to a particular person, and covers all actions taken on license applications, including return without action.

(3) "Appeal" means a request for relief as provided in this section from the provision of a regulation or of an administrative action, and includes an initial review.

(4) "Person" shall be construed to mean the singular or plural, an individual, corporation, partnership, association, company, or any other kind of organization whatsoever, including any government or agency thereof.

(5) "Appellant" means a person filing an appeal.

(d) *Establishment of appeals board.* The Appeals Board of the Bureau of Foreign and Domestic Commerce has been established as an impartial body to consider appeals. The Board consists of a Chairman, who is designated by the Assistant Secretary for Foreign and Domestic Commerce, and two other members.

(e) *Who may file and upon what grounds.* Any person affected by a regulation or administrative action of the kind described in paragraph (b) of this section may file an appeal on the ground that:

(1) The regulation or administrative action works an exceptional and unreasonable hardship upon him; or

(2) The regulation or administrative action improperly discriminates against him.

(f) *Preparation of appeals.* (1) Appeals must be in writing. All appeals and accompanying material shall be filed in triplicate, unless otherwise indicated below. If the submission of three copies of all accompanying documents or exhibits would place an undue burden on the appellant, waiver of this rule may be requested at the time the appeal is filed. Appeals must be clearly marked "Ref: Appeals," followed by a reference to the regulation (or administrative action thereunder) appealed from, and shall be in letter form.

(2) All appeals must clearly state (i) the provisions of the regulation or the administrative action appealed from, (ii) the grounds for the appeal, and (iii) the relief requested by the appellant. The various grounds for the appeal should be separately stated and numbered, with a clear and concise statement of all facts alleged in support of each ground.

(3) A request for an oral presentation before the Appeals Board, as provided in paragraph (h) (1) of this section, must be in writing and should be filed with the appeal.

(4) An appeal not prepared or filed substantially as provided in this section may be returned to the appellant without action.

(5) In addition to the above-described appeals letter, the following papers must be included with appeals of the kind hereinafter described in this paragraph.

(i) Appeals from rejection of license applications must include (*a*) the Notification of Rejection (Form IT-204A), (*b*) a new original copy of the license application (IT-419) on which should be entered the Department of Commerce old case number in the space provided, and (*c*) an acknowledgment card (IT-116) showing the old case number.

(ii) Appeals from license applications returned without action must include (*a*) the returned-without-action license application (IT-419), and (*b*) an acknowledgment card (IT-116) showing the old case number.

(iii) Appeals from multiple commodities or multiple consignee applications disallowed in part must include (*a*) a certified or photostatic copy of the original application, (*b*) a complete new application covering only the rejected items, and (*c*) the appropriate acknowledgment card.

(iv) Appeals from rejection of request for extension of licenses must include the license unless it has been previously surrendered to the Department of Commerce or a collector of customs.

(v) Appeals from denial of request to transfer export licenses must include (*a*) letters of request for transfer in triplicate from the transferor and transferee, and (*b*) the original license unless the license is on file with the Department of Commerce.

(vi) Appeals from rejection of unit-process applications must be for the group comprising such applications and must include (*a*) the Notification of Rejection (Form IT-204A), (*b*) new original copies of the license application (IT-419), on which should be entered the Department of Commerce old case numbers, and (*c*) an acknowledgment card (Form IT-116) showing the old case numbers.

(g) *When and where to file appeals other than appeals from suspension orders.*[1] Appeals may be filed not later than 20 days after the publication date of a regulation, or the date of transmittal of written notification of administrative action, or of a determination upon the initial review.[2] All appeals shall be filed with and addressed to the Department of Commerce, Washington 25, D. C.

(h) *Consideration of appeals.*[3] All appeals, except appeals from denial of the privilege of obtaining or using export licenses, will be considered and reviewed initially by appropriate officials of the Office of International Trade prior to submission of the appeals to the Appeals Board. The Appeals Board will consider only those appeals in which the appellant expressly requests in writing that his appeal be considered by the Appeals Board. An appellant may request consideration of his appeal by the Appeals Board at the time of original submission or after determination upon the initial review of his appeal by appropriate officials of the Office of International Trade as set forth in this paragraph.

(1) *Oral presentations.* In exceptional cases, where the Appeals Board believes it to be necessary to a proper determination, the appellant may be granted an opportunity to present orally further facts and argument. A date will be set and notice of the time and place (in Washington, D. C.) will be given the appellant by the Appeals Board at least 10 days before the date set for the oral presentation. Such presentation will be heard informally; generally no oaths will be administered to witnesses; and the Appeals Board will not necessarily abide by the rules of evidence. Appellants need not be represented by counsel unless they so wish.

(2) *Records.* Records concerning each appeal will be maintained by the Office of International Trade and may be made available for inspection and copying by persons properly concerned, upon written application. Such application must be addressed to the Appeals Board, and shall set forth the applicant's interest, a description of the material or information contained in the record to be inspected or copied, and the purpose for which it is sought.

(i) *Decisions.* All appeals will be considered and decided within a reasonable time after they are filed. An appeal may be granted or denied, in whole or in part. Determinations by the Appeals Board shall be final. The determination of an appeal will be communicated to the appellant in writing.

(63 Stat. 7, as amended; 50 U. S. C. App., 2023. E. O 9630, Sept. 27, 1945, 10 F. R. 12245; 3 CFR, 1945 Supp., E. O. 9919, Jan. 3, 1948, 13 F. R. 59; 3 CFR, 1948 Supp.)

[1] The procedure for filing appeals from suspension orders and denials of license privileges is set forth in § 382.13.

[2] A rejection of an export license application on the ground that the proposed exportation is contrary to the national interest may be appealed. Such an appeal is appropriate, for instance, if appellant believes he has not furnished sufficient information as to the nature, characteristics, and possible end-use of the commodity in question, and that an appeal may lead to favorable reconsideration. In such cases, upon request and the showing of sufficient justification, the Appeals Board may waive the time limitation.

[3] The basis for consideration of appeals from suspension orders and denials of licensing privileges is set forth in § 382.13 of this subchapter.

PART 384—GENERAL ORDERS

Sec.
384.1 Commodity advisory panels and committees.
384.2 Conduct of business and practice before Office of International Trade.
384.3 Order suspending licenses to North Korea.
384.4 Order revoking validated licenses to Manchuria and China.
384.5 Order revoking certain general licenses to Mainland of China (including Manchuria), Hong Kong and Macao.
384.6 Order extending validated license requirements to in-transit shipments to certain destinations.
384.7 Order suspending validated licenses to Hong Kong and Macao.
384.8 Orders modifying validity of certain export licenses.
384.9 Order revoking certain general licenses to Subgroup A destinations.
384.10 Deleted, effective March 31, 1952.
384.11 Deleted, effective March 31, 1952.
384.12 Order relating to certain licenses for steel.

AUTHORITY: §§ 384.1 to 384.12 issued under 63 Stat. 7, as amended; 50 U. S. C. App., 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245; 3 CFR 1945 Supp., E. O. 9919, Jan. 3, 1948, 13 F. R. 59; 3 CFR 1948 Supp.

§ 384.1 *Commodity advisory panels and committees*[1]—(a) *Purpose.* The purpose of this section is to establish a procedure whereby the export trade may consult with and give information and advice to the Office of International Trade of the Department of Commerce concerning export licensing policies and procedures under the export-control law.

(b) *Organization of the panels and committees*—(1) *Representation by commodities.* It is intended, for convenient operation and size, to provide representation of the export trade by commodities. Wherever practicable, segments of the export trade handling different commodities (or groups of commodities) will be represented by separate panels. To handle specific matters, committees will be organized from among the members of the commodity panel. The panels and committees are selected by the Office of International Trade.

(2) *Standards of selection.* As the purpose of such commodity advisory panels and commodity advisory committees thereof is to give advice to the Office of International Trade affecting segments of the export trade, the members of the panels and committees will be selected in an effort to obtain advice which will represent the viewpoint of all parts of the export trade involved. The panels will be formed of the minimum number of persons necessary to represent a fair cross-section of the export trade in the commodity (or groups of commodities) from the standpoints of (i) large, medium, and small companies, (ii) geographical distribution, (iii) trade association membership, and (iv) segments of the export trade involved—e. g., by levels of the export trade (such as manufacturers, suppliers of exporters, and various types of distributors, including independent or merchant exporters), by degrees of integration (such as manufacturing-exporters), by types of commodities, etc. The foregoing standards will be also adhered to in the formation of the committees.

(3) *Representation of small business.* In forming commodity advisory panels and committees the Office of International Trade will be governed by the principles of Senate Concurrent Resolution 14 (80th Congress) and the President's memorandum to heads of Executive departments and agencies of December 12, 1947 with respect to the representation of small business on Government committees.

(4) *No compensation allowed.* Members of the panels and committees pay their own expenses and are entitled to no compensation for their services.

(c) *Functions of the panels and committees*—(1) *Authorized.* The functions of a commodity advisory panel formed by the Office of International Trade under this section are to furnish information, to give advice and make recommendations through one or more commodity advisory committees to the Office of International Trade, at committee meetings, on export licensing policies and procedures affecting those parts of the export trade represented by the committee. Where deemed appropriate, in view of the nature of a specific licensing policy or procedure, the Office of International Trade will authorize the holding of full panel meetings.

(2) *Unauthorized activities.* No other activities by these commodity advisory panels and committees or by their members are sponsored or authorized by the Department of Commerce or the Office of International Trade under this section. The panels and committees are not authorized to determine policies for the export trade nor are they authorized to compel or coerce any person to comply with any request or order or regulation made by the Department of Commerce or Office of International Trade.

(d) *Meetings of the panels and committees*—(1) *Calling of meetings.* Commodity advisory panel meetings and commodity advisory committee meetings will be called by the Office of International Trade in connection with the promulgation of export licensing policies or procedures affecting the parts of the export trade represented by the panel or committee, as the case may be, except where the necessary timing or other public exigency does not permit such prior consultation.

(2) *Agenda and presiding officer.* The agenda of the meeting will be prepared by the Office of International Trade. Representatives of interested agencies of the Government will be invited by the Office of International Trade. A representative of the Office of International Trade will preside at every panel meeting and every committee meeting.

(3) *Minutes.* The Office of International Trade will keep minutes of each meeting and where practicable will make summaries available to members of the commodity advisory panel, the committee, the export trade, and the press.

§ 384.2 *Conduct of business and practice before the Office of International Trade*—(a) *Activities of persons appearing before the Office of International Trade in connection with export control matters*—(1) *Who may be excluded.* Any person, whether acting on his own behalf or on behalf of another, who shall be found guilty of engaging in any unethical activity or who shall be demonstrated not to possess the required integrity and ethical standards may be excluded from (denied) export privileges on his own behalf or may be excluded from practice before the Office of International Trade on behalf of another, in connection with any export control matter, or both, as provided in § 382.1 of this subchapter. Among the grounds for such exclusion are the following:

(i) Inducing or attempting to induce by gifts, promises, bribes, or otherwise any officer or employee of the Office of International Trade or any Customs or Post Office official to take any action with respect to the issuance of licenses or any other aspects of the administration of the export control law, whether or not in violation of any regulation.

(ii) Offering or making gifts or promises thereof to any such official or employee for any other reason.

(iii) Soliciting by advertisement or otherwise the handling of business before the Office of International Trade on the representation, express or implied, that such person, through personal acquaintance or otherwise, possesses special influence over any officer or employee of that Office.

(iv) Charging or proposing to charge for any service performed in connection with the issuance of any license any fee wholly contingent upon the granting of such license and the amount or value thereof. This provision will not be construed to prohibit the charge of any fee agreed to by the parties, provided that the out-of-pocket expenditures and the reasonable value of the services performed, whether or not the license is issued and regardless of the amount thereof, are fairly compensated.

(v) Knowingly violating or participating in the violation of, or an attempt to violate, any regulation with respect to the exportation of commodities, including the making of or inducing another to make any false representations to facilitate any exportation in violation of the export control law or any order or regulation issued thereunder.

(2) *Definition.* As used in this paragraph, the term "practice before the Office of International Trade" includes (i) the submission on behalf of another of applications for export license or other documents required to be filed with the Office of International Trade, or the execution of the same; (ii) conferences or other communications on behalf of another with officers or employees of the

[1] This section incorporates without change the provisions of "Order Establishing Commodity Advisory Panels and Commodity Advisory Committees" dated March 25, 1948 (13 F. R. 1616).

Office of International Trade for the purpose of soliciting or expediting approval by the Office of International Trade of applications for export licenses or other documents, or with respect to quotas, allocations, requirements or other export control actions, pertaining to matters within the jurisdiction of the Office of International Trade; (iii) participation on behalf of another in any proceeding pending before the Office of International Trade; (iv) the submission to a Customs official on behalf of another of a license or export declaration or other export-control documents.

(3) *Proceedings.* All proceedings under this section shall be conducted in the same manner as provided in Part 382 of this subchapter.

(b) *Former employees.* (1) No person shall appear or be permitted to appear before the Office of International Trade, Department of Commerce, as the agent, attorney, or representative of any individual, corporation, partnership, or any group or body of persons, other than the United States or agency thereof, or public international organizations, as designated by Executive Order (including the United Nations and its specialized agencies), if such person:

(i) Is, or at any time within one year prior thereto was, a full-time or part-time, compensated or uncompensated officer or employee of the Office of International Trade and such relationship or employment was terminated subsequent to May 24, 1951; or

(ii) Has at any time been officially associated with the specific transaction or matter to which such appearance relates, as a full-time or part-time, compensated or uncompensated officer or employee of the Office of International Trade or any of its predecessor or constituent agencies.

(2) Notwithstanding the prohibition contained in this paragraph, the Office of International Trade may, in exceptional cases and upon receipt of a sworn written application setting forth the facts, grant to a former officer or employee disqualified under this section, written permission to appear before the Office of International Trade on behalf of another person for a specific or limited purpose, where in its opinion such permission is necessary to prevent injustice or unnecessary hardship.

(3) As used in this paragraph, the term "appear before the Office of International Trade" shall have the same meaning as the definition in paragraph (a) (2) of this section.

§ 384.3 *Order suspending licenses to North Korea.* Effective 4:00 p. m., eastern daylight time, June 28, 1950, all export licenses, both validated and general, authorizing exportation of any commodity, whether or not included on the Positive List of Commodities (§ 399.1 of this subchapter), or technical data, to North Korea, are suspended.

This order shall not apply to exportations to that destination which have been laden aboard the exporting carrier prior to its effective date.

§ 384.4 *Order revoking validated licenses to Manchuria and China.* Effective 4:00 p. m., eastern daylight time, July 20, 1950, all outstanding validated licenses issued prior to the effective date hereof authorizing exportation of any commodity to Manchuria (including the Port Arthur Naval Base Area and Liaoning Province) and China (including the provinces of Suiyuan, Chahar, Ningsia and Jehol, sometimes referred to as Inner Mongolia; the provinces of Chinghai (Tsinghai) and Sikang; Sinkiang; Tibet; and Outer Mongolia), as described in Schedule C of the Bureau of the Census, are revoked.

Holders of such outstanding validated licenses shall immediately return them to the Office of International Trade, Department of Commerce, Washington 25, D. C.

This order shall not apply to exportations to the above destinations which have been laden aboard the exporting carrier prior to its effective date.

§ 384.5 *Order revoking certain general licenses to mainland of China (including Manchuria), Hong Kong, and Macao.* General licenses GRO, GLR, GMC, and GCC, authorizing exportation of any commodity, whether or not included on the Positive List of Commodities (§ 399.1 of this subchapter), are revoked to the following destinations: Manchuria (including the Port Arthur Naval Base Area and Liaoning Province), and China (including the provinces of Suiyuan, Chahar) Ningsia, and Jehol, sometimes referred to as Inner Mongolia; the provinces of Chinghai (Tsinghai) and Sikang; Sinkiang; Tibet; and Outer Mongolia), and Hong Kong and Macao, but excluding Taiwan (Formosa) as described in Schedule C of the Bureau of the Census.

This order also applies to shipments through United States foreign trade zones to the foregoing destinations. It shall apply to all shipments whether or not laden on exporting carrier. Validated licenses are required for all commodities to these destinations if exporting carrier has not obtained clearance from the final port of departure in the United States for a foreign port, or after receiving final clearance transits the Panama Canal Zone. Shipments not licensed must be off-loaded prior to final clearance or proceeding through Canal Zone.

However, exportations of fresh fruits, fresh vegetables, and cut flowers ultimately destined to Hong Kong and Macao may be made under General License GRO in accordance with § 371.8 of this subchapter.

NOTE: Shipment of all commodities under General License GRO may be transshipped at Hong Kong without the necessity of obtaining a validated license, *Provided* (1) Such transshipments are made under a through bill of lading to a destination outside of Subgroup A, Hong Kong, or Macao, and (2) the shipment is maintained in the custody of the originating or on-forwarding carrier at all times.

§ 384.6 *Order extending validated license requirements to in-transit shipments to certain destinations.* (a) Notwithstanding any other provision of the export regulations, except § 371.9 (b) (1) of this subchapter, shipments of Positive List commodities originating in any foreign country moving in transit through the United States, or using the facilities of a foreign trade zone, or manifested to the United States, may not be exported to any destination in Subgroup A (§ 371.3 of this subchapter), Hong Kong, or Macao, without a validated export license.

(b) Shipments of all commodities, whether or not on the Positive List, moving in transit through the United States, or using the facilities of a foreign trade zone, or manifested to the United States, may not be exported to China, Manchuria, Hong Kong, or Macao without a validated export license. This provision shall apply to in-transit shipments to such destinations if vessel has not obtained clearance from the final port of departure in the United States for a foreign port.

§ 384.7 *Order suspending validated licenses to Hong Kong and Macao.* Effective 9:00 p. m., eastern standard time, December 8, 1950, all outstanding validated export licenses authorizing exportation of any commodity to Hong Kong or Macao are suspended.

This order applies to commodities laden aboard the exporting carrier but not departed from final United States port of call.

§ 348.8 *Orders modifying validity of certain export licenses*—(a) *Raw cotton.* The validity period of all outstanding licenses authorizing the exportation of raw cotton, Schedule B Nos. 300005 through 300312, issued for shipment on and after August 1, 1951, except those which were "hand processed" (those which were issued with a validity period of 30 days or less), is extended through July 31, 1952.

(b) *Extension of validity period for exportations from Atlantic Coast ports.* [Deleted, effective March 31, 1952.]

(c) *Coal.* [Deleted, effective March 31, 1952.]

§ 384.9 *Order revoking certain general licenses to Subgroup A destinations.* (a) Effective 12:01 a. m., March 2, 1951, General Licenses GRO, GLR, GMC, GCC, GIT, and GTD, authorizing exportation of any commodity, whether or not included on the Positive List of Commodities (§ 399.1 of this subchapter), or technical data, are revoked for exports to Subgroup A destinations.

(b) This order also applies to shipments through United States foreign trade zones to Subgroup A destinations; and the provisions of § 384.6 concerning intransit shipments of Positive List commodities to Subgroup A destinations shall apply to shipments of non-Positive List commodities to such destinations.

(c) Shipments of any commodities removed from general license to Subgroup A destinations as a result of changes set forth in this order which were on dock, on lighter, laden aboard an exporting carrier, or in transit to a port of exit pursuant to actual orders for export prior to 12:01 a. m., March 2, 1951, may be exported under the previous general license provisions up to and including 12:00 midnight, March 31, 1951. Any such shipment not laden aboard the exporting carrier before 12:00 midnight, March 31, 1951, requires a validated license for export.

§ 384.10 *Revocation of certain licenses for copper, steel, and aluminum.* [Deleted, effective March 31, 1952.]

§ 384.11 *Revalidation of certain revoked licenses.* [Deleted, effective March 31, 1952.]

§ 384.12 *Order relating to certain licenses for steel.* (a) Effective 12:01 a. m., e. d. t., June 11, 1952, exportations under validated licenses of all steel commodities in the forms and shapes indicated in Schedule I of CMP Regulation No. 1 (those steel items on the Positive List identified by the Processing Code STEE and the letter C) may not be made where the steel to be exported was acquired on or after the effective date of this order by the exporter from a steel distributor, as defined in NPA Order M-6A (or is being exported by such a steel distributor) and, where it is to be used in the manufacture abroad of products identified by the DPA allotment symbol V followed by a digit, as set forth in the NPA "Official CMP Class B Product List and Product Assignment Directory", issued May 1, 1952, by the National Production Authority of the Department of Commerce (Section III, CMP Class B Product Class Codes—by NPA Divisions, Pages 32A through 36A). For export shipments not prohibited by the terms of this order, exporters shall make the following certification on the shipper's export declaration covering the proposed exportation of all commodities identified on the Positive List by the Processing Code STEE and the letter C:

I certify to the Office of International Trade that, to the best of my knowledge and belief, this exportation is in accordance with the terms of OIT Order, § 384.12.

(b) This order shall not apply to steel acquired by or from a steel distributor which was on dock, on lighter, laden aboard an exporting carrier, or in transit to a port of exit pursuant to actual orders for export prior to the effective date of this order.

(c) This order shall not apply to licenses bearing an OIT waiver of its requirements validated on the face of the license or on an amendment thereto after the effective date.

PARTS 385–397—[RESERVED]

PART 398—PRIORITY RATINGS AND SUPPLY ASSISTANCE

Sec.

398.1 DO (priority) ratings for foreign aircraft.
398.2 Serial numbers for mines, smelters and mineral processing plants abroad.
398.3 DO-MRO priority ratings for maintenance, repair, and operating supplies for export.
398.4 Special supply assistance for essential export requirements.
398.5 CMP. Export allocations and procedures.
398.6 Deleted, effective January 31, 1952.
398.7 Supply assistance for foreign mining operations: MRO and capital additions.
398.8 Supply assistance for foreign petroleum operations.

AUTHORITY: § 398.1 to 398.8 issued under 63 Stat. 7, as amended; 50 U. S. C. App., 2023, E. O. 9919, Sept. 27, 1945, 10 F. R. 12245; 3 CFR 1945 Supp., E. O. 9919, Jan. 3, 1948, 13 F. R. 59; 3 CFR 1948 Supp.

§ 398.1 *DO (priority) ratings for foreign aircraft*—(a) *Delegation of authority.* The Civil Aeronautics Administration has delegated to the Office of International Trade, Department of Commerce, the right to assign DO ratings to purchase orders covering replacement parts and materials as described in paragraph (b) of this section, for commercial transport aircraft of civil air carriers registered in foreign countries other than those listed in paragraph (c) of this section. This rating authority will be exercised in accordance with a program authorized by the National Production Authority, and limited in total dollar value for each calendar quarter.

(b) *Replacement parts and materials.* The Office of International Trade will consider requests to assign DO ratings to purchase orders for the following replacement parts and materials:

(1) Airframe fabricated parts, including structural parts.
(2) Airframe accessories and parts, including landing gear, wheels, brakes, shock struts, retract struts, radiators, superchargers, refrigeration equipment, batteries, hydraulic system, interior seats, heaters, and related equipment.
(3) Aircraft hardware and fittings.
(4) Engines and parts.
(5) Engine accessories and parts, including starters, generators, carburetors, magnetos, and fuel pumps.
(6) Propellers, propeller accessories, and parts.
(7) Aircraft instruments and parts.
(8) Tires and other aircraft rubber parts.
(9) Radio equipment and parts (airborne).
(10) Electrical supplies other than aircraft accessories (airborne), including wire, relays, circuit breakers, switches, bulbs, fuses, and conduit.
(11) Raw materials to repair and maintain aircraft, including aluminum, steel, copper, brass, textiles, lumber, and plastics.
(12) Ground equipment and supplies for aircraft maintenance, including starting equipment, ramps, and specialized hand tools.
(13) Paints and chemicals for aircraft maintenance.
(14) Miscellaneous airborne equipment, including emergency equipment, life rafts, life jackets, seat belts, blankets, and galley equipment.

(c) *Ratings not assigned by OIT.* Requests for DO ratings on purchase orders for delivery of replacement parts and materials to foreign civil air carriers registered in any of the following countries shall be submitted to the Mutual Security Agency, Washington 25, D. C.

(d) *Submission of requests for assignment of DO ratings.* Requests to the Office of International Trade to assign DO ratings to purchase orders shall be by letter, addressed to the Producers Equipment Division, Office of International Trade, Department of Commerce,

Washington 25, D. C. The following information and documents must be attached to the letter:

(1) Duplicate copies of the bill of materials or purchase order, containing the following information:

(i) The name of the foreign airline for which materials are required;

(ii) The supplier's name;

(iii) Purchase order number;

(iv) Class of materials according to the classes set forth in paragraph (b) of this section, by dollar value for each class;

(v) Total dollar value; and

(vi) End delivery date.

(2) A statement that the supplier will not be able to deliver the material without a DO rating and that the air carrier cannot obtain the material from any other source.

(3) A statement as to whether any of the material covered by the order requires a validated export license from either the Department of State or the Department of Commerce. (See § 370.5 of this subchapter.) If so, a statement as to whether such licenses have been applied for or granted, giving the application numbers or license numbers.

Suppliers may also request DO ratings on behalf of the air carrier or its representative by submitting the above information. In such case, the supplier must notify the air carrier or its representative, in writing, that request for DO rating has been made and send a copy of such notification to the Producers Equipment Division, Office of International Trade, Department of Commerce, Washington 25, D. C.

§ 398.2 *Serial numbers for mines, smelters and mineral processing plants abroad*—(a) *Delegation of authority.* Pursuant to Mineral Order 7 of the Defense Materials Procurement Agency (formerly Defense Minerals Administration), the Office of International Trade, Department of Commerce, is authorized to assist any person operating a mine (other than petroleum, solid fuels and natural gas), a nonferrous smelter, or mineral processing plant, located in any foreign country other than those listed in § 398.1 (c), to obtain a serial number therefor.

NOTE: The purpose of Mineral Order 7 of the Defense Materials Procurement Agency is to provide, by serialization of mines (other than petroleum, solid fuels and natural gas), non-ferrous smelters, and mineral processing plants, the requisite information to enable the Defense Materials Procurement Agency adequately to provide priority and allocation assistance under its programs relating to the maintenance and acquisition of facilities, machinery, equipment, and operating supplies by the mining industry. Serial numbers will be assigned to those mines, smelters and mineral processing plants which have a significant interest to the United States.

(b) *Definitions.* For purposes of this section:

(1) "Person" means any individual, corporation, partnership, or association, and includes any agency of the United States, or any other government or citizen thereof.

(2) "Producer" means any person operating a mine (other than petroleum, solid fuels and natural gas), a nonferrous smelter, or mineral processing plant.

(3) "Mine" means an operation (whether underground, open-pit, quarry, or dredging), conducted for the primary purpose of extracting minerals (except solid fuels, petroleum and natural gas), and includes prospecting enterprises for the discovery, exploration or development of new or additional mining projects.

(4) "Smelter" means a mill producing non-ferrous metals by smelting or refining.

(5) "Mineral processing plant" means a plant engaged in the beneficiation or concentration of ores.

(c) *Submission of requests, content.* Producers operating mines, smelters, and mineral processing plants located in foreign countries, except Canada and countries for which the Mutual Security Agency is claimant agency (listed in § 398.1 (c), shall file directly or through an exporter or other person in the United States, a request for serialization. The request for serialization need be submitted only once. The request shall consist of the following:

(1) The information described in Defense Materials Procurement Agency Form MF–100, in quadruplicate. In lieu of filing information required under items 8, 9, and 12 of Form MF–100, the producer may submit copies of his latest published financial report. Producers of 50 tons or less per week of crude ore need answer only items 1, 3, 10, and 16 in Form MF–100, or, in lieu thereof, may submit the following information by letter:

(i) What are the chief mine, mill, or smelter products? What are the by-products, if any?

(ii) For each mine, mill, smelter, refinery, pit, quarry, and drilling operation, give the distance and direction from nearest town and shipping point.

(iii) Production:

Item	Kind of product	1948 total	1949 total	1950 total	Present average monthly
Quantity of product mined or quarried (short, long, metric tons, barrels, pounds, etc.)					
Quantity of product processed (specify unit of measure and type of process)					
Quantity and grade of product sold or shipped (specify units of measure)					

(iv) State number and classes of labor (miners, muckers, millmen, etc.) of men employed during a recent representative payroll period.

(2) A statement, in quadruplicate, of the actual distribution, to the United States and to each foreign country (domestic deliveries within the country of origin and foreign shipments), of the production from the mine, smelter, or mineral processing plant, by plant, by weight, grade, metal or mineral content, or other specifications, for each product for the years 1949, 1950, and the first three months of 1951, and the estimated distribution during the last nine months of 1951.

(3) A statement, in quadruplicate, of the pertinent facts which determine why the production from the mine, smelter, or mineral processing plant has been so distributed and will be so distributed as set forth in subparagraph (2) of this paragraph. (For example: need for dollar exchange; international distribution or trade agreements; requirements of producing country for distribution of stated quantities therein; etc.)

NOTE: Persons exporting commodities to mines, smelters, and mineral processing plants are requested to notify such producers of DMA Mineral Order 7 and these provisions. To avoid duplication, the producers should be advised that they need submit this information only once, either directly or through one person in the United States.

Copies of DMA Mineral Order 7 and DMA Form MF–100 may be obtained from any field office of the Department of Commerce or the Bureau of Mines, Department of the Interior, or from such agencies in Washington 25, D. C., and from the Mutual Security Agency, Washington 25, D. C.

(d) *Where to submit requests.* Requests for serialization shall be filed with the Office of International Trade, Department of Commerce, Washington 25, D. C., if the mine, smelter, or mineral processing plant is located in a foreign country other than Canada and countries for which the Mutual Security Agency is claimant agency (listed in § 398.1 (c)). If located in a country for which MSA is the claimant agency, producers should consult with the Mutual Security Agency, Washington 25, D. C. If located in Canada, producers should consult with the Canadian Division of the National Production Authority, Department of Commerce, Washington 25, D. C.

(e) *Action on requests received by OIT.* Requests for serialization received by the Office of International Trade, Department of Commerce, will be presented to the Defense Material Procurement Agency, together with the recommendations of the OIT as to the appropriate action on the request. The Office of International Trade will notify persons requesting a serial number of the action taken on their requests. The Mutual Security Agency will take corresponding action for the area of its responsibility.

(f) *Serialization number required on export license applications.* As provided in § 373.28 of this subchapter, license applications filed for export of commodities to any foreign mine (other than petroleum, solid fuels, uranium and natural gas), a nonferrous smelter, or mineral prospecting operation that has had a serial number assigned thereto by the Defense Materials Procurement Agency, shall plainly show such serial number in the commodity description column of the license application, Form IT–419.

§ 398.3 *DO–MRO priority ratings for maintenance, repair, and operating supplies for export*—(a) *Authority.* The procedure described in this section is authorized by National Production Authority Order M–79 which sets forth the manner and extent to which exporters may apply the DO–MRO priority rating to assist them in securing certain maintenance, repair, and operating supplies for export and use abroad for stated purposes.

(b) *Manufacturing Exporters.* (1) The NPA order mentioned in paragraph (a) above assigns and establishes a quarterly MRO export quota for every manufacturer of maintenance, repair and operating supplies, as defined by such order, who, in 1950 [1] delivered for export (i. e., exported directly or through others or delivered to others for export) to any country, other than Canada and Subgroup A countries, a quantity of such supplies of his own manufacture having an aggregate sales value in excess of $10,000. This quarterly quota equals 30 percent of the dollar value of all such MRO supplies so delivered in the year 1950. However, if a manufacturer elects to figure his quota on a seasonal basis, his quota each quarter is 120 percent of the dollar value of all such MRO supplies so delivered during the corresponding season (quarter) of the year 1950. Every such manufacturer is required to make available for export during each calendar quarter the full amount of his MRO export quota. The manufacturer may make this MRO export quota available for export either by making direct export sales, by selling through one or more designated sales representatives, by selling to non-manufacturing exporters, or by any combination of these methods. NPA and OIT expect, however, that the manufacturer's customary pattern of distribution will be followed.

(2) On or before September 1, 1951, or within 30 days after this order (or any other NPA regulation or order mentioned in section 3 of M–79) is amended so as to first bring him under M–79, or so as to change the MRO items thereafter to be included in computing his MRO export quota, each manufacturer for whom a quarterly MRO export quota is assigned and established by NPA Order M–79 shall prepare and submit to the Office of International Trade a signed report in duplicate, on Form IT–833. Revised Forms IT–833 must be filed within the specified 30-day period whenever a manufacturer's quota under the order is so altered. If the change is such as to remove a manufacturer entirely from the scope of M–79, he shall within the 30-day period notify the Office of International Trade by letter to this effect. All the terms, conditions, provisions, and instructions, including the certification, contained in or issued in connection with such Form IT–833 are hereby incorporated as a part of this regulation with the same force and effect as if set forth in full herein.

Special note should be made that a manufacturer in computing his base period deliveries for export must not include any items delivered for use abroad for personal or household purposes or, insofar as replacement parts are concerned, any items delivered for use abroad for other than replacement purposes. Where precise knowledge as to foreign end-use is lacking, estimates may be made, but in such cases the manufacturer must include in his report a statement showing what estimates he has made, what were his total sales for export of the category in question, and the basis upon which his estimates are made. Each manufacturer should notice also that in computing his base period deliveries for export orders and in making charges currently against his M–79 quota, all export deliveries of the items listed in Sec. 2 (b) of M–79 must be included whether for replacement purposes or not.

(3) Under the terms of NPA Order M–79, effective August 9, 1951, any manufacturer for whom a quarterly MRO export quota is assigned and established under such order has the right to use the DO–MRO priority rating to the full dollar value of such quota each quarter without further authorization, unless and until notified to the contrary by the National Production Authority or the Office of International Trade. (Such notification may be by return to the manufacturer of his Form IT–833 revised by OIT, or by letter, or by amendment of the regulations.)

(c) *Exporters other than manufacturers.* The National Production Authority has authorized exporters who are not manufacturers (as defined in section 4 of the order), and who have obtained an order from a foreign customer for an MRO item which is demonstrably needed for other than personal or household purposes, but find that they are unable without a rating to secure such item from sources available to them, to apply to the Office of International Trade for priorities assistance. In such cases, the exporter shall prepare and submit to the Office of International Trade a Form IT–834, in duplicate. One copy will be returned to the exporter, indicating the action taken on his request. If approved, the authenticated form will assign to the exporter the right to apply a DO–MRO rating to procure the materials specified on the form up to the dollar value shown thereon. Section 7 of NPA Order M–79 explains the manner in which the DO–MRO rating is to be applied by the exporter. All the terms, conditions, provisions, and instructions, including the certification, contained in or issued in connection with such Form IT–834 are hereby incorporated as a part of this regulation with the same force and effect as if set forth in full herein.

(d) *Export license requirements.* Section 12 of NPA Order M–79 warns exporters that the authority granted by the Order to apply the DO–MRO rating to any item requiring an export license does not imply assurance that the needed license can be granted. Exporters and manufacturers are reminded that it is advisable to secure the license before use of the DO–MRO rating on export orders under the M–79 quota.

(e) *Requests by manufacturers for inclusion under the order.* A manufacturer who is excluded from the provisions of M–79 because his annual MRO export deliveries in the base period were not in excess of $10,000, may submit a request by letter in triplicate to the Office of International Trade, asking for the establishment of a quota under M–79. All pertinent facts justifying the request should be included.

(f) *Manufacturers may not exceed their M–79 quotas.* Attention of manufacturers is specially directed to section 8 of the Order, entitled "Manufacturers' quota not to be exceeded," which stipulates that manufacturers subject to Order M–79 quotas may not for a particular quarter make export MRO deliveries in excess of their M–79 quotas. This "ceiling limit" is effective whether or not the manufacturer applies the DO–MRO rating to export orders as permitted by M–79.

(g) *Requests by manufacturers for adjustments or exceptions.* A manufacturer requiring an increase in his M–79 quota, or other adjustment or exception to the order may, as provided in section 15 of the order, file such a request with the Office of International Trade. Each request shall be submitted by letter, in triplicate, and shall set forth all pertinent facts justifying the request in full detail.

(h) *Scope.* Attention of manufacturers and exporters is called to the fact that the definition of MRO supplies contained in NPA Order M–79 is somewhat different from the description of MRO set forth in National Production Authority's CMP Regulation 5. Sections 2, 3, and 10 of NPA Order M–79 explain specifically which items are included therein and also lists items which are specifically excluded. Special attention is called to the fact that the items are included only as far as the end-use abroad is for other than personal or household purposes. For the convenience of exporters, a listing of all items specifically excluded from the terms of the order as now written is given below. This list is, of course, subject to change from time to time. The order, among other things, excludes controlled materials; exporters desiring to export controlled materials or CMP Class A products for MRO use abroad should file applications for priority assistance as provided in § 398.5.

Many of the MRO end-items included under M–79 are, of course, CMP Class B products and may be included in a manufacturer's M–79 quota. However, it should be noted that the use of the DO–MRO rating granted to manufacturers is specifically limited under section 10 of the order. A manufacturer may not extend this rating to obtain:

(1) Class A or Class B products (as defined in CMP Regulation 1 of the National Production Authority) to be incorporated into the MRO item he is manufacturing for export; or

(2) Any production material for the manufacture of any MRO Class A or Class B product he is manufacturing for export under his M–79 quota; or

(3) Any controlled material.

[1] In the case of manufacturers of parts for machine tools under section 2 (a) of Order M–79, use of an alternative base period (the last six months of the calendar year 1951) is permitted. (Refer to section 4 (d) of M–79 as amended.)

These materials are secured by a manufacturer in accordance with his normal procedures (for domestic as well as export orders, for MRO as well as other end-uses) specified under CMP Regulation Nos. 1 and 3 of the National Production Authority. The DO–MRO rating may, however, be extended by the manufacturer to procure component materials other than those listed above.

EXCLUDED ITEMS (SPECIFICALLY LISTED IN NPA ORDER M–79)

All MRO supplies for personal or household use.

Materials listed in List A of NPA Reg. 2 as such list may be amended or supplemented from time to time.

Excluded items: List A, NPA Reg. 2 as amended September 13, 1951:

Communications services.
Crushed stone.
Gravel.
Sand.
Scrap.
Slag.
Steam heat, central.
Certain transportation services, as defined in List A.
Waste paper.
Water.
Wood pulp.
Solid fuels: All forms of anthracite, bituminous, sub-bituminous, and lignitic coals, and coke and its by-products.
Gas and gas pipelines: Natural gas, manufactured gas, and pipelines, for the movement thereof.
Petroleum and petroleum pipelines: Crude oil, synthetic liquid fuel, their products and associated hydrocarbons, including pipelines for the movement thereof.
Electric power: All forms of electric power and energy.
Radioisotopes, stable isotopes, source and fissionable materials.
Farm equipment.
Fertilizer, commercial: In form for distribution to users.
Food, except in certain cases where used industrially (refer to List A itself for further definition).
Transportation services (domestic) storage and port facilities.
Products (production and distribution) used in the petroleum industry and listed in NPA Delegation 9 (February 26, 1951) as follows:
(1) Tetraethyl lead fluid.
(2) Petroleum cracking catalysts.
(3) Special inhibitors used in gasoline.
(4) Lubricating oil additives.
(5) Fluids and additives made especially for oil and gas drilling, and demulsifiers.
Ores, minerals, concentrates, residues, and other products (until processing is completed) listed in NPA Delegation 5 (January 29, 1952).

Excluded Items: (Direction 3 to NPA Reg. 2, as amended January 8, 1952):

Chemicals.
Primary paper or paperboard.

Excluded items: Schedule I of CMP Reg. 5 as amended December 20, 1951:

All basic, organic, or inorganic chemicals, their intermediates and derivatives other than compounded end-products not customarily sold as chemicals.
Products appearing in List A of NPA Order M–47A, as that order may be amended from time to time (except in item 28 of sec. VIII of List A), or in List B of said order (except painters' and industrial brushes, as defined in NPA Order M–18, as that order may be amended from time to time).

NOTE: This very lengthy list encompasses mainly "consumers' goods" incorporating metals, and not does such items as Metal and Wood Household Furniture, Store Fixtures, Office Furniture, Partitions, Shelving, Lockers and Fixtures, Household Appliances, Machines and Equipment, Utensils and Cutlery, Radios, Television, and Phonographs, Transportation equipment, etc.

Nylon fibers and yarns.
Packaging materials and containers except steel nails, steel wire and steel strapping used for packaging purposes.
Paint, lacquer, and varnish.
Paper and paper products.
Paperboard and paperboard products.
Printed matter.
Photographic film.
Pneumatic tires and tubes.
Waterfowl feathers.

Controlled materials as defined in section 2 (c) of CMP Reg. No. 1 as such regulation may be amended or supplemented from time to time. (For specific listing, refer to items coded "C" in the column of the Positive List headed "Community Lists.")

Farm equipment.
Parts and accessories for aircraft or for ground equipment for servicing aircraft, and any components of either.
Parts and assemblies of parts, and accessories, for automotive vehicles, including all passenger carriers, trucks (on or off the highway), truck trailers, and motorized fire equipment.

Repair and replacement parts for construction machinery given in List A of NPA Order M–43, as such list may be amended or supplemented from time to time.

Items made wholly of rubber, leather, textiles, or any combination of such materials.

Excluded items: List A of M–43 as amended March 2, 1951:

Bituminous equipment:
Asphalt plants.
Bituminous mixing plants.
Dryers.
Patching plants.
Pavers.
Distributors.
Spreaders and finishers.
Compressors: Portable air compressors.
Crushing equipment:
Crushers.
Conveyors.
Screens.
Concrete equipment:
Batching plants.
Mixers.
Truck mixers.
Pavers.
Spreading and finishing machines.
Cranes, shovels, and excavators (commercial sizes, from ⅜ cubic yard to 2½ cubic yards):
Large shovels.
Dredges.
Hoists and derricks.
Buckets.
Trenchers.
Drills:
Air.
Portable well.
Earth-boring machines.
Deep-well drills.
Loaders:
Bucket.
Front end.
Motor graders: Any and all.
Pumps: Pumps, contractors.
Rollers and compactors: Any and all.
Scrapers: Scrapers, hauling.
Tractors: All tractors for construction.
Tractor allied equipment:
Dozers.
Front-end attachments.
Power control units.
Snow plows.
Trucks and trailers: Trucks and trailers, off-highway hauling equipment.

NOTE: 1. Attention of manufacturers is especially called to section 8 of NPA Order M–79, which establishes the rules for making charges against their quarterly MRO export quotas. Section 9 explains the manner in which a manufacturer may apply the DO–MRO rating authorized by the order.

2. Copies of all forms of the Office of International Trade may be obtained from the Department of Commerce Field Offices and from the Office of International Trade, Washington 25, D. C.

3. The procedure described in § 398.4 may be employed to apply for supply or priorities assistance with regard to certain maintenance, repair, and operating supplies that are excluded from NPA Order M–79, until such time as specific programs may be established to meet export needs for certain of the excluded items. Special provisions are contained in § 298.2 for MRO supplies for foreign serialized mines, and in § 3681 for foreign civil-commercial aircraft.

QUESTIONS AND ANSWERS ON MRO UNDER ORDER M–79

1. Q. How do manufacturers proceed to handle their foreign orders when their aggregate export sales for 1950 were $10,000 or less?

A. A manufacturer whose exports of products of his own manufacture in 1950 amounted to $10,000 or less may ship freely—subject only to OIT's export licensing restrictions—without using a rating and without establishing a quota; or, if he desires to establish a quota under M–79 (presumably in order to qualify for a DO–MRO rating), he may file IT–833 with the Office of International Trade, accompanied by a letter in triplicate giving full explanation and justification for his request.

2. Q. May a non-manufacturing exporter establish a quarterly quota with OIT in order to avoid repeated filings of IT–834 to cover many different orders?

A. No. It should be noted that the entire approach of M–79 is quite different from the Direction 2 formerly in effect. It contemplates that manufacturers, being obliged under the order to "make available" for export 120 percent of their 1950 shipments, will accept orders filed by non-manufacturing exporters; and under Sec. 9 of the order the manufacturer may apply the DO–MRO rating to such orders, himself, and must charge them to his quota. Only on rare occasions need an IT–834 be filed by a non-manufacturing exporter because he could not locate a supplier who had not yet filled his current M–79 quota; or because, perhaps, he needed material of particular specification made only by one manufacturer, who did not have a quota under M–79, and who had so many domestically-rated orders that he could not accept the export order proffered without a rating.

The Office of International Trade may be of assistance to a non-manufacturing exporter in locating suppliers who may not have their current quotas filled, as the quarterly quotas of manufacturers are on file with the Office of International Trade.

3. Q. Are replacement parts delivered with new equipment counted by the manufacturer as part of his base period shipments and also chargeable to his current quotas?

A. No.

4. Q. Under section 3 (d), (e), (f) and (g), which exclude parts for automotive vehicles, construction machinery, etc., it is the intention to exclude general-purpose parts which may be used equally well in the excluded types of machines and in various other machines still included under M–79?

A. No. It was intended to exclude from the order only specially-fabricated replacement parts manufactured especially to go into automotive vehicles, construction machinery and the other excluded items listed. It would not be practical to require manufacturers of general-purpose parts to distinguish among foreign end uses in this way.

5. Q. May a manufacturer ship additional MRO supplies above and beyond his M–79 quota in the event his production is not fully taken up by rated orders?

A. No; the quota established by section 4 and as specifically explained in section 8 (fourth sentence) is both a minimum and a maximum. A manufacturer falling under the jurisdiction of the order may not accept export orders in excess of his quota.

6. Q. How may a manufacturer who finds his quota as established by M–79 to be inadequate to take care of his current MRO orders file a request for increase?

A. He may file his IT–833 with OIT, accompanied by letter in triplicate, as specified in section 15, giving full explanation of why the increase is needed. It may be helpful if he will state how much of his total business is rated, what his position in regard to production materials is, describe the nature of his export business, the end-use of his product, principal markets by country, and also, he may wish to state his total annual MRO export shipments (as defined by M–79) for each of the years 1946–1949. A five year base period may be more representative in his case than the calendar year 1950. NPA is consulted on these requests for increases, and action taken as expeditiously as possible.

7. Q. May a manufacturer apply the DO–MRO rating, within his quarterly quota, to items not included in the Positive List?

A. Yes; the question whether or not a product is on the Positive List is irrelevant, under M–79.

8. Q. How does a manufacturer compute his quota under section 4 if he himself makes some of the MRO items which he exports, but he also purchases some of his MRO exports from outside manufacturers?

A. In figuring his M–79 quota, he includes only the items which he himself manufactures. However, if he purchases on the outside MRO items (as defined in M–79) or any other components but incorporates them (in his plant) into a fabricated MRO item (as defined in M–79), then the manufacturer does include the assembled MRO product in calculating his M–79 quota.

For example, hand pump replacement parts for a hand pump which a manufacturer purchases on the outside are not counted, to the extent that he merely purchases them and ships them as parts for the pumps. (In this case the "outside" parts manufacturer includes this indirect export sale in figuring his quota.)

But if the manufacturer assembles the hand pump himself, he does include all exports of the pumps in arriving at his quota; the outside parts manufacturer should figure his deliveries of the parts as a domestic sale, in this case.

9. Q. If a manufacturer does not receive sufficient rated orders to fill his quota during a particular quarter, must he add the unfilled amount to his quota for the subsequent quarter and thus fill a larger export quota during the second quarter?

A. No, he need not "carry over" the unfilled portion; and in fact may not do so.

10. Q. Can a manufacturer charge to his quota rated export orders which he receives which have been rated under NPA Orders M–46A, M–70, and M–78?

A. To the extent those items fall under his M–79 quota he must charge such deliveries to his quota. However, if a manufacturer receives orders rated under M–46A, M–70 and M–78 after his quota is exhausted and for items chargeable to his M–79 quota, he must accept those rated orders in accordance with the rules applicable generally to rated orders.

11. Q. Are pipe fittings included under M–79?

A. Yes, to the extent used for commercial maintenance and repair purposes. (Items are never MRO when used as production material or a component in manufacturing a product.)

12. Q. Should an exporter file an IT–834 to secure a DO–MRO rating when his supplier states he cannot fill the exporter's order unless it is a DO–MRO rated order to enable him to secure additional amounts of steel?

A. No. If the manufacturer makes B products, he secures all his controlled material for both domestic and export orders via his quarterly filing with NPA of his CMP Form 4–B. He should include on his 4–B his materials requirements for both export and domestic orders. The production schedule approved by NPA for him is his total authorized production schedule, and there is no provision for him to secure additional controlled material in any other way. He may, however, self rate his export orders whether they come from abroad or from an exporter in this country, and may show this as rated business on his CMP 4–B forms.

13. Q. May the DO–MRO ratings assigned under M–79 be extended by the manufacturer to secure component materials other than controlled materials to be incorporated into his MRO product?

A. Yes; except that they may not be extended to secure an A or B product for incorporation into the MRO item. They may be extended to secure materials and items not containing steel, copper, or aluminum.

14. Q. Are export orders placed by operators of non-serialized mines (not covered by M–78) chargeable to a manufacturer's M–79 quota?

A. Yes, to the extent provided by the order. (Refer to Question 11.)

15. Q. How many IT–834's have been approved to date?

A. Only a few. Under the basic concept of the order it is anticipated that, with self-rating of export orders by a manufacturer within his quota, non-manufacturing exporters should in most cases be able to place their MRO orders without difficulty.

16. Q. If a non-manufacturing exporter must place his order with a particular manufacturer (say, for a specially-made part available from only one firm) and that manufacturer has no M–79 quota, should the exporter file an IT–834?

A. Yes; unless the manufacturer intends to request establishment of a quota under M–79 in a manner similar to that described in the answer to question 1.

17. Q. May a company file two separate IT–833's if it has two different departments which operate more or less independently?

A. Yes. OIT would for certain cases agree to separate submissions although it would point out that a single submission would allow much greater flexibility and "freedom of movement" to the company.

18. Q. Might a manufacturer with a quota established under M–79 ever file an IT–834 to secure a rating on MRO supplies which it purchases on the outside?

A. Yes, if the MRO supplies are shipped as such, and under the exceptional conditions alluded to under (11) and (15) above.

19. Q. May a manufacturer charge shipments of "minor capital equipment" of value up to $750 to his quota and may he include such shipments in calculating his quota?

A. Sec. 2 states what the order covers. These items are included regardless of whether they are carried as MRO or as a capital item for accounting purposes.

20. Q. Are repair parts for ships included under M–79?

A. Where the MRO supplies as defined in M–79 are exported as such for foreign-flag or U. S. vessels for installation abroad, yes.

Ratings to secure MRO items for foreign-flag or U. S. vessels to be repaired in a U. S. port are not covered by M–79 but by M–70.

21. Q. Are Class B products which are defined as MRO under M–79 excluded from the order (see Sec. 9)?

A. No. Section 10 does not make the DO–MRO inapplicable to export orders for Class B products, but merely prevents the manufacturer from extending a rating to obtain Class A or Class B products or steel, copper and aluminum to be incorporated therein.

22. Q. Must a manufacturer wait until receiving an approved IT–833 from OIT before he may use the DO–MRO rating under his M–79 quota?

A. No. Immediately upon filing the IT–833 with OIT, the manufacturer may apply the DO–MRO rating to export orders within his quota. OIT will not return or take any action on the IT–833 unless it is found necessary to revise the quota reported therein, in which case OIT will notify the manufacturer.

23. Q. If a manufacturer does not require a rating on his export orders, is he bound to adhere to the M–79 quota?

A. Yes. Regardless of whether the manufacturer qualifying under Sec. 4 needs or applies a DO–MRO rating as permitted by the order, he is required to establish his quota, file IT–833 with OIT and make the required quantities available to fill export orders each quarter. The quota also is binding upon him as a ceiling on his exports of the items covered by the order.

24. Q. If a manufacturer of replacement parts for machine tools had filed his IT–833 with OIT under M–79 as originally issued last August—and he does not elect to use the alternative base period permitted such manufacturers by M–79 as amended March 6th—must he now file a new IT–833?

A. M–79 as amended March 6th (section 5) stipulates that whenever M–79 or other NPA order as mentioned in section 3 is amended so as to affect a manufacturer's M–79 quota in any way, he must file a new IT–833 with OIT within 30 days after issuance of the amended order. However, in this case if the manufacturer's original quota still stands, OIT would be willing to accept a letter from the manufacturer which reinstates his original M–79 quota on machine tool parts.

25. Q. May a manufacturer of chucks, die heads, grinding wheels and cutting tools (as defined in section 2 (b) of M–79) avail himself of the alternate base period permitted by section 4 (d)?

A. No. This section applies only to manufacturers of replacement parts for machine tools as covered in section 2 (a). The items listed above are considered to be accessories, and fall into a different category.

26. Q. Is wire rope still included under section 2 (b) of M–79?

A. No. It was automatically excluded from M–79 on the day CMP Reg. 1 (see section 3 (c) of M–79) was amended to include wire rope as a controlled material. This of course applies to all similar changes, and it should be noted that no specific amendment to M–79 is required.

It should also be noted that when a manufacturer's M–79 quota is altered—not only by reason of amendment to M–79 itself but also by amendment of any of the orders referred to in section 3—he is required to file a revised IT–833 within 30 days, with OIT.

If CMP Reg. 1 should be amended to delete a certain item from the list of controlled materials, it might then become a Class B Product; and to the extent it is exported for MRO use as defined in M–79, would then have to be included in the manufacturer's M–79 quota—again requiring recomputing of his quota and re-filing of a new IT–833 with OIT.

§ 398.4 *Special supply assistance for essential export requirements.*—(a) *Establishment of procedure.* This action establishes a procedure whereby exporters may request special supply assistance to meet essential export requirements of friendly foreign countries other than Canada, where priority assistance is not provided for otherwise in this part.

(b) *Essentiality of end use.* Requests for supply assistance submitted under this section will be considered for approval on the basis of whether and to what extent the commodities involved will contribute to the following programs or objectives:

(1) Military production of the free world, and direct support for the expansion or improvement thereof;

(2) Promotion of increased supplies of all materials essential to strengthening the free world, and in particular the production and acquisition of those materials required for the current mobilization effort of the United States (including military reserves and immediately necessary additions to stockpiles) and for similar mobilization efforts of nations actively associated with the United States in the defense of the free world;

(3) Maintenance and necessary expansion of essential services and production facilities, and maintenance of minimum essential civilian consumption requirements, in the free nations and in areas which they control;

(4) Direct progress toward reduced future dependence upon military and economic assistance from the United States;

(5) Lessened dependence of the free nations upon supplies from areas or countries within the Soviet bloc;

(6) Prevention of political deterioration in nations or areas essential to the combined strength of the free world.

(c) *Submission of requests; copies.* Requests for supply assistance submitted under this section shall be made on Form IT–835. Requests submitted to the Office of International Trade shall be submitted in quadruplicate; two copies shall be signed by the applicant. Requests covering a proposed exportation for which a validated license is required must include a license application prepared in accordance with Parts 370 through 399 of this subchapter unless a license application has been submitted already or an export license is outstanding covering the exportation. (For requests submitted to the Office of International Trade the request shall be accompanied by the license application; for requests submitted to the Mutual Security Agency, the applicant shall submit the license application to the Office of International Trade at the same time he submits the request to MSA.)

NOTE: Requests submitted to the Mutual Security Agency for special supply assistance described in this section shall be made on Form IT–835; nine copies should be submitted, two copies of which should be signed.

(d) *Where to submit requests.* (1) Where the exportation is to be made to a foreign country other than a country listed in § 398.1 (c), the request for supply assistance should be addressed to the Office of International Trade, Department of Commerce, Washington 25, D. C.:

(i) Where the request is submitted directly to the Office of International Trade by the exporter, it should be addressed to the attention of the licensing division responsible for the commodity on which supply assistance is requested; in case the exportation is to a project or program covered by an outstanding project license, to the attention of the Projects and Technical Data Division or the Petroleum Division. If the responsible licensing division is unknown, requests may be addressed to the attention of the processing code for such commodities. (Processing codes for all commodities are set forth in § 399.3, Appendix C of this subchapter.)

(ii) Where the request is submitted to the Office of International Trade through a representative of the foreign government or agency thereof, the request should be addressed to the attention of the geographic division having responsibility for the foreign country in question.

(2) Where the exportation is to be made to a country for which the Mutual Security Agency is claimant agency (listed in § 398.1 (c)), the request for supply assistance should be submitted through the Washington mission of the country of destination to the Mutual Security Agency, Washington 25, D. C.

(3) Where the exportation is to be made to Canada, the request for supply assistance should be submitted through the Priorities Division, Department of Defense Production, Ottawa, Canada, to the National Production Authority, Department of Commerce, Washington 25, D. C. (Ref. NPA Reg. 3), in accordance with National Production Authority Regulation 3.

§ 398.5 *CMP: Export allocations and procedures*—(a) *Controlled Materials Plan as applied to exports*—(1) *Controlled Materials Plan.* A Controlled Materials Plan (CMP) governing the distribution of certain metals has been established by the National Production Authority, effective July 1, 1951. This Plan operates under a series of NPA regulations identified as "CMP Regulations"[1] (numbered serially as "CMP Regulation 1," "CMP Regulation 2," etc.).

(2) *Applicability of CMP to exports.* CMP regulations govern the distribution of controlled materials to all consumers, i. e., exporters as well as domestic United States producers using controlled materials. This section sets forth the supplementary rules and procedures which will be followed by the Office of International Trade and exporters in connection with exports of controlled materials (including controlled materials for the manufacture of CMP Class A products as defined in paragraph (a) (2) (iii) of this section) to all destinations except Canada.

Most of the provisions of Controlled Materials Plan regulations are applicable to exports, and a full understanding of these regulations is essential to any exporter handling materials affected by the Controlled Materials Plan. It is especially important that each exporter understand the following terms, which are constantly referred to in connection with CMP:

(i) "Controlled material" means steel, copper and aluminum in the shapes identified on the Positive List by a "C" in the column headed "Commodity Lists." (Schedule I to CMP Regulation 1[1] specifies the shapes of steel, copper and aluminum designated as controlled materials. This information is translated into Schedule B and Positive List terms through the "C" notation referred to in this subdivision.)

(ii) "Class B product" means any product so designated in the current "Official CMP Class B Product Lists"[1] issued by the National Production Authority.

(iii) "Class A product" means any product containing steel, copper and aluminum which is not designated as a Class B product.

(3) *Allotment symbol for controlled materials.* In order to assure, as nearly as possible, maximum fulfillment of essential export demand for controlled materials within established quotas, the Office of International Trade assigns exporters the right to apply allotment symbols for the procurement of controlled materials and Class A products licensed for export.

The authority to assign allotment symbols is delegated to the Office of International Trade by the National Production Authority, and is limited to quantities not in excess of established export quotas. The manner of assignment of such allotment symbols is set forth in detail in § 398.5 (b) (3) and (4). While the Office of International Trade has authority to assign allotment symbols to the limit of the applicable export quota, no allotment symbol is assigned in connection with a licensed exportation of controlled materials already in the possession of the exporter, since the allotment symbol is granted only to assist in procurement. (However, licenses issued for material available to the exporter without an allotment also are charged against export quotas.)

(4) *Export quotas for controlled materials.* The total amounts of controlled materials moving into export (to destinations other than Canada) are limited by quarterly export quotas announced in Current Export Bulletins. Charges are made against controlled materials quotas when licenses are granted for the export of controlled materials and for controlled materials required for the manufacture of Class A products licensed for export.

Established export quotas are ceilings on exports of controlled materials. The Office of International Trade cannot approve export license applications beyond the limits of such quotas. Thus, in general, when the quota for a particular quarter has been exhausted, the Office of International Trade cannot approve further applications for export in such quarter even though the controlled materials are available to the exporter and no supply assistance is required.

[1] CMP regulations are issued by the NPA and may be obtained from Department of Commerce field offices and from the Distribution Office, National Production Authority, Department of Commerce, New GAO Building, Fourth and G Streets NW., Washington 25, D. C.

[1] The "Class B Product List" is issued by the National Production Authority, and is subject to change from time to time. It is suggested that exporters become acquainted with this document; copies may be secured for 15 cents each from the same sources indicated in footnote 1 above.

(b) *Procedures governing applications to export controlled materials*—(1) *Identification of controlled materials.* As indicated in paragraph (a) (2) (i) of this section, controlled materials are identified in the Positive List by a "C" in the column headed "Commodity Lists." The provisions of this paragraph relate exclusively to applications for licenses to export controlled materials in the shapes thus identified in the Positive List.

(2) *How and when to apply for export licenses.* Application for license to export controlled materials will be filed in accordance with the provisions prescribed in Parts 370 to 399, inclusive, of this subchapter. Applications must be filed in accordance with time schedules for filing established in § 373.51 of this subchapter.

(3) *Assignment of allotment symbols.* On all licenses approved for commodities designated as controlled materials under the NPA Controlled Materials Plan, the Office of International Trade assigns to the applicant the right to apply a specified allotment number and symbol to procure the material covered by the license. The CMP allotment symbols designated by the National Production Authority for export are as follows:

CMP allotment symbol	*Claimant agency*
W–2	OIT
W–4	MSA

The allotment symbol will be assigned by the Office of International Trade by endorsing the validated license (or other appropriate document) with the following or similar legend:

By authority of the NPA, the exporter herein named is assigned the right to apply the symbol (e. g. W–2–4Q52) to procure the above described materials.

(4) *Requests for conversion of CMP allotments.* If a licensee holding a validated license for controlled materials is unable to place his order during the quarter specified on the face of the license, or for any other reason requires a change in his allotment symbol, he may request conversion of his CMP allotment symbol to a symbol valid for a subsequent quarter (re-allotment), by submitting to the Office of International Trade, Washington 25, D. C., Form IT–763, "Request for and Notice of Amendment Action," in accordance with the provisions of § 380.2 of this subchapter. In addition to the information required on Form IT–763, each request for conversion of the allotment symbol shall include:

(i) The statement "CMP Re-Allotment from _____ to _____ quarter."

(ii) The amount of material for which conversion of allotment symbol is requested.

(iii) If applicable, a request for extension of expiration date of the export license.

(iv) A list of suppliers with whom the licensee has attempted unsuccessfully to place his order during the quarter specified on the export license, with a statement describing such attempts, including dates thereof, with respect to each such supplier, or copies of correspondence with such suppliers which substantiates the licensee's unsuccessful attempts to place his order during such period.

NOTE: Quantities of controlled materials covered by those re-allotment requests which are approved by OIT must be charged against current quotas. A reserve may be held by OIT for consideration of these requests, but no assurance can be given that all such requests will be approved. Such re-allotment requests as the licensee must file should be submitted to OIT as soon as it becomes evident that the order cannot be delivered in the quarter originally authorized.

(5) *Exceptions to time schedules for commodities with the processing code STEE.* Section 373.51 of this subchapter establishes time schedules for submission of applications for licenses to export controlled materials. Under the conditions set forth herein, an exception to these time schedules is granted. If an applicant has in his possession or at his command controlled materials with the processing code STEE that he wishes to export and they are ready for prompt shipment, or will be ready within the current or immediately succeeding quarter, an application may be submitted to the Office of International Trade at any time. In each such instance, the applicant must clearly indicate on the face of his application (i) that the material is ready for export and that an allotment is not required or (ii) that there is mill space which will be made available to the applicant upon issuance of a CMP allotment on a mill schedule for the current or next succeeding quarter. Applicant must submit appropriate documentary evidence (letters, telegrams, invoices, bills of sale, mill notice of availability, or other documents, as may be applicable) to substantiate the statements that (i) the material is in his possession or at his command and is ready for export or will be ready for export within the current or immediately succeeding quarter and that an allotment is not required or (ii) that there is mill space which will be made available to the applicant upon issuance of a CMP allotment on a mill schedule for the current or next succeeding quarter. Acceptance of applications meeting these conditions is not to be construed as assurance of approval by the Office of International Trade, since quota considerations or end-use restrictions may make this impossible.

(c) *Applications for exportation of Class B products.* As indicated in paragraph (a) (2) (ii) of this section, a Class B product means any product so designated in the current "Official Class B Product List" issued by NPA. Manufacturers of Class B products obtain allotments for controlled materials for the manufacture of such products in accordance with the procedures prescribed in CMP Regulations issued by the National Production Authority. Such allotments cover the manufacturer's requirements for Class B products to be consumed domestically, and Class B products to go into export. Applications for licenses to export Class B products are handled in accordance with the procedures covering the products themselves. No special procedures with regard to applications for licenses are established in this section for the export of Class B products.

(d) *Applications for exportation of Class A products.*—(1) *Definition of Class A products.* As noted in paragraph (a) (2) (iii) of this section, Class A products are any products containing steel, copper and aluminum not designated as a Class B product.

(2) *How and when to apply for license.* Applications for licenses to export Class A products will be filed in accordance with the provisions prescribed in Parts 370 to 399, inclusive, of this subchapter. These applications may be filed at any time.

License applications for Class A products must be accompanied by four copies of CMP Form 4A[2] signed by the manufacturer and prepared in accordance with the NPA "Instructions for Preparing Form CMP–4A," with these modifications:

(i) Item 2: Show name of customer (normally, this will be the applicant for the accompanying export license).

(ii) Item 3: Show customer's purchase order number.

(iii) Item 4: Name and address of manufacturer (whether or not he is also the exporter).

(iv) Section 1: Show proposed production schedule only for the order covered by the license application.

In the event an exporter requires supply assistance for a Class A product for which a validated license is not required for export to the proposed foreign country of destination, the CMP Form 4A should be filed in accordance with the instructions outlined above, accompanied by a letter of transmittal from the exporter, but without an export license application.

(3) *Assignment of allotment symbols.* On all licenses approved for commodities designated as Class A products under the NPA Controlled Materials Plan, the Office of International Trade assigns, on Form CMP–10 or other appropriate document, to the manufacturer who signed the Form CMP–4A, the right to apply a specified allotment number and symbol to procure the controlled material needed to manufacture the "A" product covered by the export license. The CMP allotment symbols designated by the National Production Authority for export are as follows:

CMP allotment symbol	*Claimant agency*
W–2	OIT
W–4	MSA

The allotment symbol authorizing procurement of the controlled material needed to manufacture the Class A product will be assigned to the manufacturer directly on CMP Form 10. In addition, the manufacturer will be given the right to apply a DO rating to secure production materials (other than controlled materials) needed in the manufacture of the Class A product in accordance with section 21 of CMP Regulation 1. The legend entered on CMP Form 10

[2] CMP Form 4A may be obtained from Department of Commerce field offices and from the Distribution Office, National Production Authority, Department of Commerce, New GAO Building, Fourth and G Streets NW., Washington 25, D. C.

assigning this right to the manufacturer will be similar to the following:

By authority of the NPA, the manufacturer herein named is assigned the right to apply the rating (e. g. DO–W–2) for the procurement of other production materials and components as defined in section 21 of CMP Regulation 1, including containers and packaging materials, required for the manufacture of the Class A product referred to herein.

(4) *Replacement of lost CMP–10.* Where Form CMP–10 has been validated and issued to manufacturer and becomes lost, a duplicate of such Form CMP–10 may be obtained by the manufacturer by submitting to the Office of International Trade a letter certifying:

(i) That the validated CMP–10 covering export application submitted by (name and address of applicant) and bearing OIT case No. ------, has been lost or destroyed;

(ii) As to the circumstances under which it was lost or destroyed;

(iii) That if the originally validated Form CMP–10 is found, the manufacturer agrees to return the original or duplicate of such Form CMP–10 to the Department of Commerce.

(5) *Requests for conversion of allotments—CMP Class A products.* If a licensee holding a validated license and NPA Form CMP–10 is unable to place his order for CMP Class A products for delivery during the quarter specified by the Office of International Trade (on Form CMP–10 or other appropriate document), or for any other reason requires a change in his allotment symbol, and a conversion of that right or allocation to a subsequent quarter is desired, the exporter or the manufacturer shall return the validated Form CMP–10 or other appropriate document to the Office of International Trade, accompanied by a letter stating why a conversion is necessary. If request is granted, a new validated NPA Form CMP–10 will be issued.

(e) *Special procedures in connection with project licenses.* The procedures laid down in paragraphs (a) through (d) of this section relate to applications for export licenses filed on Form IT–419 in accordance with Part 372 of this subchapter. Applications for controlled materials for Class A products under project licenses will be subject to the same special procedures, except that CMP Form 4A is not required for petroleum project licenses and the application forms prescribed for project licenses and requests for conversion of allotment (IT–375, IT–824, and PAD–26A) will be used rather than IT–419 or IT–763 for submission of applications. Further, applications for petroleum project licenses will be filed in accordance with the time schedules established for such applications in § 398.8 (e) rather than the special time schedules prescribed in § 373.51 of this subchapter.

(f) *Controlled materials used as MRO.* The procedure granting supply assistance for the export of maintenance, repair and operating supplies (§ 398.3) based upon NPA Order M–79 specifically excludes controlled materials. License applications for any controlled materials identified in the Positive List by a "C" in the column headed "Commodity Lists," or for CMP Class A products, shall be filed in accordance with the provisions of this section, whether intended for use abroad as MRO or for other purposes. However, in the case of controlled materials or Class A products destined for MRO use in foreign commercial aircraft, application should be filed in accordance with § 398.1.

§ 398.6 *DO (priority) assistance by Office of International Trade for dichlorodiphenyl trichloroethane (DDT).* [Deleted, effective January 31, 1952.]

§ 398.7 *Supply assistance for foreign mining operations: MRO and capital additions*—(a) *Authority.* Pursuant to National Production Authority's Order M–78, the Office of International Trade, Department of Commerce, is authorized to assist producers of metals and minerals whose mines (1) have received serial numbers under DMA Order MO–7, and (2) are located in a foreign country other than those listed in 398.1 (c), by securing allotment numbers and priority ratings to permit the procurement of needed materials in quantities greater than the established quotas for MRO purposes and for capital additions.

(b) *Scope.* Supply assistance is available pursuant to this section and as authorized by NPA Order M–78 to meet the requirements of foreign serialized mines for the following commodities and purposes:

(1) Maintenance; repair and operating supplies, as defined in section 2 (b), (c), and (d) of the Order M–78;

(2) Minor capital additions not in excess of $2,000, as set out in section 2 (e) of the Order M–78;

(3) Major capital additions (costing over $2,000) as defined in section 2 (i) and section 15 of NPA Order M–78 for which application may be made to secure limited supply assistance as set forth in paragraph (f) of this section.

Under the terms of the order, the allotment symbol W–2 may be used to obtain controlled materials, and the rating DO–W–2 for materials other than controlled materials required by foreign serialized mines. However, the allotment symbol and rating may not be applied to obtain any of the materials listed in Schedule I of CMP Regulation No. 5 as it may be amended from time to time (except those products listed as items 1 and 10 of Schedule I) or in List A of NPA Regulation No. 2. (Refer to § 398.3 for complete listing of such excluded items.)

In addition, the allotment symbol and rating may not be applied by a producer to obtain, in any quarter (calendar or fiscal), materials for minor capital additions exceeding, in the aggregate, 10 percent of his quarterly MRO quota, or $2,000, whichever is greater.

In his use of the allotment symbol to procure rails and in his use of the rating to procure track accessories and chemicals, the producer is limited to an amount not to exceed the ratio of consumption by weight to his production by weight for the average of the three years 1948 through 1950.

(c) *Who may apply.* "Foreign producers" whose mines have been assigned serial numbers under § 398.2 and are located in: (1) Countries other than Canada and (2) other than countries for which the Mutual Security Agency acts as claimant agency, must submit requests for supply assistance under this section to the Office of International Trade, Washington 25, D. C. A "foreign producer" is defined in NPA Order M–78 as any person actually engaged, outside the United States, its territories and possessions in the activities mentioned in paragraph (h) of Order M–78, who is under the jurisdiction of the United States and who has been assigned a serial number pursuant to the provisions of § 398.2. Foreign producers not subject to the jurisdiction of the United States may file through an authorized agent under U. S. jurisdiction.

NOTE: Producers whose mines are located in countries for which the Mutual Security Agency is claimant agency shall file requests for supply assistance described in this section with the Mutual Security Agency, Washington, D. C., in accordance with instructions issued by that agency. (For a list of such countries, refer to § 398.1 (c).)

Producers located in Canada should consult with the Canadian Division of the National Production Authority, Department of Commerce, Washington 25, D. C.

(d) *Establishment of quarterly quotas to cover MRO and minor capital additions and required report to OIT.* (1) Any foreign producer, as defined in Order M–78, may, without the necessity of filing any applications, establish his quarterly MRO quota amounting to 120 percent of the dollar value of all MRO expenditures made by him in the United States in the calendar year 1950 (or at his election, his last fiscal year ending prior to March 1, 1951, if he operated on a fiscal year basis prior to that date). He must exclude from his calculation materials listed in List A of NPA Reg. 2 and capital additions. Section 7 (e) of Order M–78 describes the manner in which a seasonal quota may be established by a producer if he so elects.

(2) However, any producer who establishes a quarterly MRO quota in excess of $10,000 must, within 30 days after he first applies the relevant allotment symbol or the rating under the quota, as permitted by Order M–78, notify the Office of International Trade in writing of the quota he has established, the base period he has used, the method he used in computing his quota, and the corrections he made for seasonal or other factors. Such notification shall be filed in quadruplicate on DMA Form MF–460.

(3) Section 8 of Order M–78 explains how charges are made by the producer against his quota.

(e) *Submission of requests for increased quotas to cover MRO supplies and minor capital additions.* (1) In cases where a foreign producer's essential needs for MRO supplies and minor capital additions cannot be met within his established quarterly quota described in paragraph (d) of this section, for the reason that production in his mines has increased, he may file application in quadruplicate on DMA Form MF–400, with the Office of International Trade, Washington, D. C., requesting the necessary increase in his quota. In such cases, producers shall set forth in an accompanying letter (also in quadruplicate) all pertinent facts and justification to support the request for increase.

(2) Where such requests for increases are approved, the OIT will return one authenticated copy of the Form MF–400, on which the producer will be assigned the right to use the allotment number and to apply the priority rating to the full extent of the increased quota.

(3) When a foreign producer's quarterly quota is thus increased, he may continue to operate with the increased quota as his established quota unless the increase is granted on a temporary or seasonal basis or is otherwise restricted by the terms of the authorization. Any increase granted shall not be retroactive.

(f) *Requests for supply assistance in obtaining materials for major capital additions (costing over $2,000).* Requests of foreign producers for supply assistance in obtaining major capital additions may be filed from time to time with the Office of International Trade, Washington 25, D. C., but for the present these requests must be limited to requests for assistance in obtaining Class B products listed in NPA's Official CMP Class B Product List consisting of machinery and equipment comprising major capital additions. Application shall be made by letter in triplicate giving the following information:

(1) Serial number assigned pursuant to § 398.2;

(2) Description of machinery and equipment required;

(3) Manufacturer or supplier; model, purchase order number (if any); required delivery date; and approximate dollar value;

(4) Need for machinery or equipment and expected results.

Applications for assistance on Class B products for major capital additions which the Office of International Trade feels should be recommended will be referred to the Defense Materials Procurement Agency and/or the National Production Authority for their consideration and action.

(g) *Application for CMP Class A products.* In the event any CMP Class A products are included in the foreign producer's request, he should attach to his application four copies of the relevant Form CMP 4A, signed by the manufacturer, for each Class A product required.

Definition of Class A product and method of filing Form CMP 4A are described in § 398.5.

(h) *Assignment and use of allotment symbols and DO ratings.* (1) Upon establishing his quarterly quota as described in paragraph (d) of this section, a foreign producer automatically—without filing any request—has the right, under the terms of Order M–78, and within the quota as established, to use the allotment symbol W–2 to procure controlled materials and to apply the priority rating DO–W–2 to procure other than controlled materials intended for use as MRO or for minor capital additions, for export to countries for which OIT is claimant agency. (For purposes of applying this allotment symbol and priority rating, OIT is considered to be claimant agency for all foreign countries other than Canada and countries for which MSA is claimant.) This right is

subject, however, to the limitations set out in paragraph (b) of this section and in sections 6 and 11 of Order M–78.

(2) To the extent increased quotas for MRO and minor capital additions are approved on the Form MF–400, the Office of International Trade will specifically assign to the applicant the right to use the allotment symbol W–2 to obtain controlled materials, and the right to apply the rating DO–W–2 to obtain materials other than controlled materials, subject to the limitations set out in paragraph (b) of this section. Instructions as to the manner in which the producer places his delivery order, and the certification which he must make are contained in sections 3, 4 and 14 of NPA Order M–78.

(3) The method for using the allotment number and for applying the priority rating together with the required certification is described in section 14 of Order M–78.

(i) *Relation to other NPA orders.* Rated orders filled by a manufacturer under this regulation, for MRO supplies as defined in NPA Order M–79, are chargeable to his quarterly MRO export quota established in Order M–79, if M–79 applies to him.

§ 398.8 *Supply assistance for foreign petroleum operations*—(a) *Authority.* National Production Authority Order M–46A and Delegation 12 assist operators of foreign petroleum projects by authorizing allotment symbols and priority ratings to expedite the procurement of materials needed for these projects.

(b) *Definitions.* (1) "Construction operation" means, for the purposes of this section, any use of material for construction, expansion, improvement or reconstruction, incident to any branch of the petroleum industry other than production but shall include, however, the following uses of material incident to production:

(i) A use of material for a vacuum plant or facility; a cycling plant or facility; a plant or facility used for stabilizing of crude oil; a plant or facility for the accumulation and storage of crude oil; a plant or facility for the extraction or recovery of natural gasoline or associated hydrocarbons; or for other treatment, processing, or compression of natural gas; (ii) a use of material in a secondary recovery production operation by water flooding or by utilization of gas; or (iii) a use of material for production offices or camp and related facilities.

(2) "Large construction operation" means, for the purposes of this section, a complete construction operation in which the total cost of controlled materials from the United States to be used is $10,000 or more, or in which the total cost of all materials from all sources to be used is $50,000 or more.

(c) *Scope.* Order M–46A applies to any persons who are engaged in the petroleum industry (as defined in section 2 of the order) outside of the United States, its territories or possessions, or the Dominion of Canada; such persons will hereafter be referred to as "operators." Two procedures are established by the order, whereby priority assistance is made available to petroleum operators, to cover the following requirements:

(1) Materials to be used in a "large construction operation";

(2) Material required for any other use than in a large construction operation; that is, for use in production, small construction operations, maintenance, repair, operating supplies, and laboratory equipment.

(d) *Who may apply.* Any operator or his authorized agent who qualifies under the provisions of § 372.2 of this section may file applications for priority assistance or export licenses or both under this section.

(e) *When to apply.* Form PAD–26A (revised March 1952) should be filed as far as possible in advance of the time an allotment of controlled materials and priority assistance is required by an operator; this applies also to any amendments filed on Form PAD–26A. No specific dates are fixed for filing in either case.

The following filing dates for Form IT–824 are hereby established:

(1) For controlled materials only: 180 days prior to the first day of the quarter in which the materials are required as indicated in item 10 of the form;

(2) For all other materials: In accordance with the time schedules set forth in § 373.51 (Supplement 1: Time schedules);

(3) For emergency or interim assistance as defined in section 7 of Order M–46A, or for any other special purpose, no submission date is stipulated.

NOTE: Form IT–824 may be obtained from the Office of International Trade, Department of Commerce, Washington 25, D. C., or from the Department of Commerce field offices. Form PAD–26A may be obtained from the Petroleum Administration for Defense, Washington 25, D. C.

(e) *Instructions for Forms PAD–26A and IT–824.* (1) All of the terms, conditions, provisions and instructions contained in Forms PAD–26A and IT–824 are hereby incorporated as a part of the regulations in Parts 370 to 399, inclusive, of this subchapter, as though set forth in this subchapter.

(2) In filling out Sections III–B and III–C of Form PAD–26A covering controlled materials and Class A products respectively, applicants should omit the OIT Reference Code. However, with regard to Class A products, Section III–C of the form must identify the controlled material components by furnishing the appropriate Schedule B numbers (instead of OIT Reference Code) for the component material. Thus, both the Class A product and each CMP component required to manufacture the Class A product must be identified by Schedule B numbers.

(3) Similarly, in item 11 (a) of Form IT–824, exporters should omit the OIT Reference Code in filing for controlled materials and Class A products. Items 11 (d), (e), and (f) are to be filled in only with respect to controlled materials (identified on the Positive List by the letter "C" in the column headed "Commodity Lists"). The inventory information required under item 11 (d) of Form IT–824 is to be as of 30 days prior to the deadline date for the submission of Forms IT–824 covering controlled

materials. (See § 398.8 (e) for filing dates.)

(4) Item 11 (e) calling for the quantity of the materials used is to be filled in to show the quantity used by the project or program during the three-month period beginning 10 months prior to the beginning of the calendar quarter specified in item 10 of Form IT–824.

(5) Items 18 and 19 on Form IT–824 calling for license number and amendment number, respectively, are to be filled in by the applicant when Form IT–824 is filed against an outstanding SP or other validated license.

(g) *Large construction operations.* (1) A petroleum operator desiring priority assistance for materials required for use in a large construction operation for a foreign project located in a country other than Canada must file five (5) copies of Form PAD–26A with the Office of International Trade.

(2) Where the Form PAD–26A is approved, one copy will be returned to the applicant, bearing the authentication of the Office of International Trade and authorizing the use of an appropriate allotment symbol and rating (as explained in paragraph (j) of this section) for the procurement of specific amounts and types of materials listed in the form and attachments. Rated orders or authorized controlled materials orders may *not* be placed by the applicant for materials needed for the large construction operation until he has received the approved copy of the PAD–26A.

(3) Simultaneously with the Form PAD–26A, the operator must, when appropriate, apply for an SP license on Form IT–419, in accordance with instructions set forth in § 374.3 (a), (b), and (c) of this subchapter; except that instead of certifying the materials requirements for a period of one year, they should be certified for the particular single project for which application is being filed. Accompanying the Form IT–419 (or Form PAD–26A where Form IT–419 is not required) the applicant must file the OIT acknowledgement card, Form IT–116, prepared in accordance with § 372.3 of this subchapter, except that under the space for Schedule B number on the card, applicant should show "PAD–26A"; under the space for processing code, "PETR"; and under the space for commodity description, the name of the project.

(4) Form PAD–26A should not be used by applicants requiring:

(i) Materials for use in any one complete construction operation in which the total cost of controlled materials from the United States is less than $10,000, or in which the total cost of all materials from all sources to be used is less than $50,000.

(ii) Oil country tubular goods or other materials for use in drilling and completing oil and gas wells; and

(iii) MRO materials.

(5) Form IT–824 must be used for such purposes pursuant to NPA Order M–46A and as explained in paragraph (h) of this section.

(6) Form PAD–26A should not be used to apply for assistance in procuring used material or equipment, or any materials or equipment obtainable without priority assistance.

(7) Where the Form PAD–26A includes materials not obtainable through the allotment symbols and priority ratings authorized in Order M–46A (e. g., items which are under specific allocation control of NPA or some other Government agency), the applicant (in addition to itemizing the material in Section IV–A of Form PAD–26A) should file with the form executed copies of the individual application forms required to secure the material in accordance with special instruction (usually an M– order issued by NPA) promulgated by the agency. As part of the project approval, arrangements for processing the special applications with the appropriate agency will be made.

NOTE: The special provisions for including controlled materials and "A" products, which are contained in the instructions for filing Form PAD–26A, should be carefully observed by applicants, who should in this connection review the provisions of § 398.5.

(h) *Other Than Large Construction Operations (Materials for Use in Production, Small Construction Operations, Maintenance, Repair, Operating Supplies, and Laboratory Equipment)*—(1) *General.* A petroleum operator desiring priority assistance for materials required for use in other than a large construction operation as outlined in paragraph (g) of this section must file, for each quarter, five (5) copies of Form IT–824 with the Office of International Trade. Application is to be filed in accordance with paragraph (f) of this section and instructions printed on the form. Included on the form will be all materials requirements of the operator for the quarter for which the form is filed, except materials covered in separate applications filed on PAD–26A as explained in paragraph (g) of this section.

In the event an applicant holds no validated export license at the time he seeks priority assistance for materials on the Positive List, the five copies of Form IT–824 must be attached to the Form IT–419. If the commodities for which supply assistance is requested have already been licensed, this fact shall be shown on the face of Form IT–824 with reference to the export license number and the amendment number.

The Office of International Trade will return one copy of the Form IT–824, indicating the extent of its approval and the appropriate allotment symbol and priority rating for the procurement of specific amounts and types of materials as listed in the form and attachments.

However, any applicant holding a program letter from the Petroleum Administration for Defense may automatically, and without securing prior approval of his Form IT–824 from the Office of International Trade, use the appropriate priority rating to obtain any materials other than those listed in Schedule II of Order M–46A. (A "program letter" means a letter from the Petroleum Administration for Defense to an applicant, approving an operating program to be carried out by the applicant.) To obtain items listed in Schedule II of the order, the applicant may not use an allotment symbol or a priority rating until his Form IT–824 has been returned to him by the Office of International Trade indicating the extent of its approval and specifically authorizing the use of the appropriate symbols on the Schedule II items. A listing of all items included in Schedule II of Order M–46A is shown in § 398.51 (Supplement 1). An applicant not holding the program letter may not use a priority rating in advance of his receipt of the approved IT–824 from OIT.

Even if an applicant has a program letter and no Schedule II items are involved, he must obtain an export license, where required by Parts 370 through 399 of this subchapter. SP or DL license holders must file on Form IT–824, since this form, validated by OIT, is an export license. Other applicants must file for an export license on Form IT–419.

NOTE: It should be noted that Schedule II is subject to amendment from time to time, and that, in advance of formal amendment of Order M–46A, the Petroleum Administration for Defense may give notice by letter of such prospective amendment to all operators to whom a program letter has been issued. Operators receiving such notice may not, after the effective date specified in the notice, use priority ratings to secure any items being added to Schedule II, until and unless specific approval has been obtained through receipt of an approved Form IT–824.

(2) *Special provisions for applying for supply assistance for oil country tubular goods on Form IT–824.* When oil country tubular goods (casing, tubing, and drill pipe), Schedule B Nos. 606210, 606230, 606240, and 606260, are to be included in the IT–824, the following specific information must be furnished by the applicant. This is in addition to the information required by the instructions printed on the form itself. Supplemental sheets may be attached to the form as required.

(i) In Item 11 (d), Quantity in Transit and in Inventory: By individual Schedule B number, list separately all casing, tubing, and drill pipe, showing quantity of each size and grades. In the case of drill pipe, show new drill pipe separately, and immediately below this entry, list used drill pipe that has drilled less than 50,000 feet of hole.

These in-transit and in-inventory figures must be stated as of the date 30 days prior to the deadline date for submission of Form IT–824; state the exact calendar date.

(ii) In Item 11 (e), Quantity Used: Show by Schedule B numbers and by sizes and grades, the quantities of casing and tubing used during the quarter immediately preceding the date on which the application is submitted; state specifically the quarter covered. In addition, show the wells completed, by fields, where the casing was used.

(If this information has been submitted previously to any other U. S. Government agency, the same form and terminology used in this prior submission should be continued.)

(iii) In Item 12, Quantity Required: Supply the following information for each Schedule B number:

(a) Requirements of casing, tubing, and drill pipe, by size and grade;

(b) Number of wells, by fields, where this casing, tubing, and drill pipe is to be used;

(c) Surface acres of well and tonnage per well;

(d) State whether each well is a wildcat or exploitation well; if exploitation, indicate the MER.

(3) *Special provisions for applying for supply assistance for seamless line pipe and welded line pipe on Form IT–824.* When seamless line pipe, Schedule B No. 606270, and welded line pipe, Schedule B No. 606280, are to be included in the IT–824, the following information must be furnished by the applicant. This is in addition to the information required by the instructions printed on the form itself. Supplemental sheets may be attached to the form as required. For new construction only, where size information is requested in this subparagraph, line pipe sizes may be grouped into two categories: "16 inches and over," and "under 16 inches."

(i) In Item 11 (d), Quantity in Transit and in Inventory: By individual Schedule B number, show separately quantity of all pipe in stock and in transit by sizes as of 30 days prior to the date of submission of Form IT–824; show exact calendar date used.

(ii) In item 11 (e), quantity used: By Schedule B number and by size, show quantities of line pipe used during the quarter immediately preceding the date on which the application is submitted; state specifically the quarter covered.

(iii) In item 12, quantity required: For each Schedule B number, state quantity required, by size; and as nearly as possible, where the pipe is to be used.

(4) *Special requirement for oil country tubular goods, Schedule B Nos. 606210, 606230, 606240, and 606260.* Within forty-eight (48) hours after placing orders covering oil country tubular goods, Schedule B Nos. 606210, 606230, 606240, and 606260, bearing allotment symbols issued pursuant to authorization received on Form IT–824 from the Office of International Trade, applicant must submit to the Petroleum Division of OIT one legible copy of each purchase order. In addition, at least 60 days prior to the beginning of the quarter for which use of the allotment symbol was authorized, each operator must advise the Petroleum Division of OIT by letter, in duplicate, of any quantities authorized for which purchase orders have not been placed and accepted for delivery during the designated quarter.

(i) *Amendments.* Form PAD–26A need be filed only once for a complete operation although it may be used as an amendment form to effect changes in delivery dates or quantities of material required for use in the project covered by the original form. Where the form is used as an amendment, reference must be made to the original authorized document and requested adjustments must be specifically set forth.

In addition to the quarterly required filing of Form IT–824, this form may also be used to request priority assistance where the operator requires materials not included on his current Form IT–824 or requires material in greater quantities or on earlier dates than shown on his current Form IT–824. In filing this form for such emergency or interim assistance, the operator need itemize only those items in these quantities on which assistance is being requested. Reference must be made in this supplemental request to the current Form IT–824 which the operator holds.

(j) *Assignment and use of allotment symbols and DO ratings.* (1) Upon returning an approved Form PAD–26A or Form IT–824, the Office of International Trade will authorize the applicant to use the following allotment symbols and priority ratings to purchase the quantities and types of materials specifically listed in the forms and their attachments:

	MSA countries[1]	Other (except Canada)
Controlled materials and "A" products	W–4	W–2
Other	DO–W–4	DO–W–2

[1] Listed in § 398.1 (c).

(2) The allotment symbol for controlled materials and "A" products, as authorized, will include a quarterly designation (e. g. W–4–1Q52) and will be used in this form by the applicant in placing his purchase order. This quarterly designation represents the calendar quarter of the year during which the operator is permitted to take delivery in the United States of authorized quantities of controlled material, as set forth in section 2 (d) of Order M–46A.

(3) In order to use any of the four symbols listed in subparagraph (1) of this paragraph, the applicant must endorse on or attach to each delivery order the appropriate symbol as well as a certification in the following form:

Certified under NPA Order M–46A.

(4) The priority ratings DO–W–4 and DO–W–2, for the appropriate countries as designated above, may be used by holders of program letters to procure material other than that listed in Schedule II of Order M–46A as amended from time to time without securing prior approval of his Form IT–824 from the Office of International Trade as set forth in paragraph (h) of this section. However, this advance authority does not exist for large construction operations referred to in paragraph (g) of this section.

(5) Any operator who is eligible to obtain priority assistance under the provisions of Order M–46A is not permitted to use any form of priority assistance otherwise made available, to the extent that such assistance is available through M–46A. (This provision of the order, however, does not prevent the re-rating of any delivery pursuant to applicable regulations or procedures, or the use of priority assistance otherwise granted where specific directions to this effect have been issued.)

(k) *Revocation or denial.* If an export license is revoked or an application for a license is denied, any symbol authorized by M–46A for material covered by such export license or license application is simultaneously revoked. The operator must then notify his supplier(s) of the revocation or denial and may take no delivery of material ordered by use of such symbol. The operator must also promptly notify the Office of International Trade and the Petroleum Administration for Defense of the cancellation of any orders for any affected Schedule II item or any item designated as a Schedule II item.

NOTE: The National Production Authority has ruled that orders rated under this regulation, for MRO supplies as defined in NPA Order M–79, which are filled by a manufacturer having a quota established under M–79, must be charged to his M–79 quota to the extent provided in that order.

§ 398.51 *Supplement 1: Items included in Schedule II of NPA Order M–46A.*

ITEMS INCLUDED IN SCHEDULE II OF NPA ORDER M–46A

Controlled materials as defined in Section 2 (c) of CMP Regulation No. 1 as such regulation may be amended or supplemented from time to time (for specific listing, refer to items coded "C" in the column of the Positive List headed "Commodity Lists"; and Class A products.

Any item the procurement of which by the use of rating symbols is limited by NPA Regulation 2, as the same may be amended from time to time. List A of NPA Regulation 2 is reprinted below:

Communications services.
Crushed stone.
Gravel.
Sand.
Scrap.
Slag.
Steam heat, central.
Certain transportation services, as defined in List A.
Waste paper.
Water.
Wood pulp.
Solid fuels: All forms of anthracite, bituminous, subbituminous, and lignitic coals, and coke and its byproducts.
Gas and Gas pipelines: Natural gas, manufactured gas, and pipelines for the movement thereof.
Petroleum and petroleum pipelines: Crude oil, synthetic liquid fuel, their products and associated hydrocarbons, including pipelines for the movement thereof.
Electric power: All forms of electric power and energy.
Radioisotopes, stable isotopes, source and fissionable materials.
Farm equipment.
Fertilizer, commercial: In form for distribution to users.
Food, except in certain cases where used industrially (Refer to List A itself for further definition).
Transportation services (domestic) storage and facilities.
Products (production and distribution) used in the petroleum industry and listed in NPA Delegation 9 (February 26, 1951) as follows:
(1) Tetraethyl lead fluid.
(2) Petroleum cracking catalysts.
(3) Special inhibitors used in gasoline.
(4) Lubricating oil additives.
(5) Fluids and additives made especially for oil and gas drilling, and demulsifiers.
Ores, minerals, concentrates, residues, and other products (until processing is completed) listed in NPA Delegation 5 (January 29, 1952)

Items on Schedule I to CMP Regulation No. 5, as such Schedule may be amended from time to time:

(1) All basic, organic, or inorganic chemicals, their intermediates and derivatives other than compounded end products not customarily sold as chemicals.

(2) Products appearing in List A of NPA Order M-47A, as that order may be amended from time to time (except in item 28 of Section VIII of List A), or in List B of said order (except painters' and industrial brushes, as defined in NPA Order M-18, as that order may be amended from time to time).
(3) Nylon fibers and yarns.
(4) Packaging materials and containers, except steel nails, steel wire, and steel strapping used for packaging purposes.
(5) Paint, lacquer, and varnish.
(6) Paper and paper products.
(7) Paperboard and paperboard products.
(8) Printed matter.
(9) Photographic film.
(10) Pneumatic tires and tubes.
(11) Waterfowl feathers.

Items listed in Exhibit A of NPA Order M-41 (metal-working machines) as such exhibit may be amended from time to time:

Ammunition machinery.
Balancing machines.
Beading machines.
Boring machines.
Brakes.
Broaching machines.
Buffing machines.
Centering machines.
Chamfering machines.
Cut-off machines.
Die-sinking machines.
Drilling machines.
Duplicating machines.
Extruding machines.
Filing machines.
Forging machines.
Forging rolls.
Gear-cutting machines.
Gear-finishing machines.
Grinding machines.
Hammers.
Headers.
Key-seating machines.
Lapping machines.
Lathes.
Levelers.
Marking machines.
Measuring and testing machines.
Milling machines.
Nibbling machines.
Oil-grooving machines.
Pipe flanging-expanding machines.
Planers.
Polishing and buffing machines.
Presses.
Profiling machines.
Punching machines.
Reaming machines.
Rifle and gun working machines.
Riveting machines.
Rolling machines.
Sewing machines.
Screw and bar machines.
Shapers.
Swagers.
Tapping machines.
Threading machines.
Shearing machines.
Slotters.
Upsetters.

Items on List A of NPA Order M-43 (construction machinery), as such list may be amended from time to time:

Bituminous Equipment:
  Asphalt plants.
  Bituminous mixing plants.
  Dryers.
  Patching plants.
  Pavers.
  Distributors.
  Spreaders and finishers.
Compressors:
  Portable air compressors.
Crushing Equipment:
  Crushers.
  Conveyors.
  Screens.
Concrete Equipment:
  Batching plants.
  Mixers.
  Truck mixers.
  Pavers.
  Spreading and finishing machines.
Cranes, Shovels, and Excavators (commercial sizes, from three-eighths cubic yard to two and one-half cubic yards):
  Large shovels.
  Dredges.
  Hoists and derricks.
  Buckets.
  Trenchers.
Drills:
  Air.
  Portable well.
  Earth-boring machines.
  Deep well drills.
Loaders:
  Bucket.
  Front end.
Motor Graders:
  Any and all.
Pumps:
  Pumps, contractors.
Rollers and Compactors:
  Any and all.
Scrapers:
  Scrapers, hauling.
Tractors:
  All tractors for construction.
Tractor Allied Equipment:
  Dozers.
  Front-end attachments.
  Power control units.
  Snow plows.
Trucks and Trailers:
  Trucks and trailers, off-highway hauling equipment.

Items on Schedule A of NPA Order M-44 (power and electric equipment), as such Schedule may be amended from time to time (see Schedule A for precise definition):

Coal pulverizers.
Electric generators.
Oil circuit breakers.
Air circuit breakers.
Power switchgear.
Metal-clad switchgear.
Transformers.
Reactors.
Rectifiers.
Steam turbines.
Hydraulic turbines.
Synchronous condensers.
Internal combustion engines.
Steam turbine generator sets.
Steam condensers.
Gas turbines.
Gas turbine generator sets.
Gears, turbine.
Hydraulic turbine generator.
Steam generators.

PART 399—POSITIVE LIST OF COMMODITIES AND RELATED MATTERS

Sec.
399.1 Appendix A—Positive List of Commodities.
399.2 Appendix B—Commodity Interpretations.
399.3 Appendix C—Commodity Processing Codes.

AUTHORITY: §§ 399.1 to 399.3 issued under 63 Stat. 7, as amended; 50 U. S. C. App., 2203. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245; 3 CFR 1945 Supp., E. O. 9919, Jan. 3, 1948, 13 F. R. 59; 3 CFR 1948 Supp.

§ 399.1 *Appendix A—Positive List of Commodities.*

GENERAL NOTES TO APPENDIX A

(a) *Commodity description.* Where the commodity description of a Schedule B number on the Positive List of Commodities mentions only a part of the commodities covered by the Schedule B listing, only the commodity or commodities specifically mentioned are included on the Positive List.

Example. The commodity description in Schedule B under No. 385900 reads "Man-made (synthetic) textile manufactures, n. e. c." On the Positive List, nylon rope is the only commodity shown under this Schedule B number. Other man-made (synthetic) textile manufactures classified under this number in Schedule B are, therefore, not on the Positive List.

(b) *Quantity classifications.* The quantity classification given for each commodity in the column headed "Unit" must be shown on export license applications. If there is no entry in the Unit column, the application should show the unit of quantity commonly used in the trade.

(c) *GLV dollar-value limits.* The column headed "GLV Dollar-value Limits" has reference to the value limits under the general license. Shipments of Limited Value GLV, established by § 371.10 of this subchapter.

(d) *Commodity processing codes.* The commodity processing codes, referred to in the column headed "Processing Code and Related Commodity Group," are used to facilitate the routing and processing of export license applications. Related commodities are commodities which have the same processing code symbol and the same number following such symbol.

(e) *Abbreviation "n. e. c."* The abbreviation "n. e. c." appearing in the various entries on the Positive List of Commodities means "not elsewhere classified."

(f) *Validated license required.* The column headed "Validated License Required" is used to indicate whether a commodity is identified as an R or RO commodity. A validated license is required for the exportation of RO commodities to destinations in both Country Groups R and O. A validated license is required for exportations of R commodities to Country Group R destinations only. However, a validated license is not required if the exportation can be made under one of the general licenses, as set forth in Part 371 of this subchapter, or under other provisions permitting the exportation without license.

(g) *Definitions.* As used in the Positive List of Commodities, the term "corrosion-resistant materials" means (1) metals or alloys containing 10 percent or more of chromium and/or nickel and/or silicon; 75 percent or more of copper; 85 percent or more of aluminum; or 90 percent or more of zinc, tin, cadmium, indium, lead, silver, titanium, molybdenum, tantalum, or zirconium, either separately or in combination; (2) glass, ceramics, carbon, graphite, or other nonmetallic materials of mineral origin; (3) rubber (natural or synthetic), plastics, or synthetic resins; and (4) any other newly developed corrosion-resistant materials.

NOTE: The Positive List of Commodities includes all commodities which require a validated export license from the Department of Commerce for shipment to any destination, whether to Country Group R and O destinations or to Country Group R destinations only. (All commodities, whether or not on the Positive List, require validated licenses for export to Subgroup A, Hong Kong, and Macao. See Part 384 of this subchapter.) (Commodities licensed by other agencies of the Government are described in §§ 370.5, 370.6, and 370.7 of this subchapter.)

Each commodity is identified (in the column headed "Validated License Required") either as an R or an RO commodity, indicating the respective country groups for which

validated licenses must be obtained, as explained in paragraph (f) of the "General Notes to Appendix A."

Commodities are listed in numerical order by Schedule B numbers, which appear in the first column of the table. These numbers correspond with those shown in the Department of Commerce publication, Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported From the United States, and must be shown on all export license applications.

The column headed "Commodity Lists" is used to identify, by code letters, commodities for which license applications are subject to special requirements. The letter "A" in this column, for example, indicates that applications covering commodities in the entry so identified must conform with the requirements of § 373.34 of this subchapter regarding import certificate and delivery verification. The letter "B" in the column indicates that the commodities so identified are restricted for shipment under a Dollar-Limit (DL) license without prior approval (see § 374.2 (e) of this subchapter). The letter "C" indicates that the commodities so identified are controlled materials (see § 398.5 of this subchapter).

Section references are given in the Commodity column where other special provisions apply to the item regarding the submission of applications, quantities available for export, information to be shown on the application, and special licensing policies.

For each commodity there is a four-letter code index (GIEQ, STEE, TRAN). This processing code, followed by a dash and the letters "RO" must be shown on all license applications covering RO commodities on the Positive List. Applications for licenses to export R commodities must show the appropriate processing code for each commodity, followed by a dash and the letter "R."

RO commodities may not be entered on the same license application with R commodities.

A number follows the processing code in many instances. It is the related commodity group number and indicates that all commodities having the same processing code and number may be entered on a single application for individual export license when they are destined to one consignee. For example, all commodities coded RUBR 2 may be entered on one application. Those having different codes (RUBR 2 and RUBR 3 or RUBR 2 and ELME 2) must be listed on separate applications. (See § 372.2 (c) of this subchapter for complete information on the export of related commodities on individual license).

(specify by name): Cable paper; electrical paper and cloth, gummed; paper sleeving, treated; rope paper tape, electrical insulating; and paper, paperboard, and tissue for dielectric use, coated or uncoated, n. e. c. (formerly 489200 and 489900).	Lb.	PULP	None	RO	---
	Coal and related fuels					
500400	Coke, except petroleum coke (report petroleum coke, including petroleum coke flour, in 504800).	S. ton	COAL 1	100	RO	B
	Petroleum and products					
	(See Special Provisions, §§ 373.1, 373.8, 373.34)					
501100	Petroleum, crude (bbl. of 42 gal.)	Bbl.	PETR 1	1,000	RO	A
501200	Natural gasoline (bbl. of 42 gal.)	Bbl.	PETR	[1] 25	RO	A
501350	Unfinished oils for further refining: Topped crude (bbl. of 42 gal.)	Bbl.	PETR	1,000	RO	A
501390	Other unfinished oils for further refining (bbl. of 42 gal.).	Bbl.	PETR	1,000	RO	A
501400	Refined oils: Motor fuel and gasoline (report octane rating): Blending agents or antiknock compounds, of petroleum origin (specify by name) (report antiknock compounds, except of petroleum origin, in 829910).	Gal.	PETR 1	100	RO	A
501610★	Aviation motor fuels (report jet fuels in 829920): 100 or over octane number (bbl. of 42 gal.)	Bbl.	PETR 1	[1] 25	RO	A B
501620★	Under 100, not under 90 octane number (bbl. of 42 gal.).	Bbl.	PETR 1	[1] 25	RO	A B
501640★	Under 90 octane number (bbl. 42 gal.)	Bbl.	PETR 1	[1] 25	RO	A B
501700	Automotive and other motor fuels and gasoline (bbl. of 42 gal.).	Bbl.	PETR 1	[1] 25	RO	A
501900	Cyclohexane; and isooctanes (formerly 501400) (bbl. of 42 gal.).	Bbl.	PETR	100	RO	A
501900	Normal heptane; normal hexane; and Sovasol formerly 505900) (bbl. of 42 gal.).	Bbl.	PETR	25	RO	A
501900	Napthn, mineral spirits, solvents and other finished light products, n.e. c. (bbl. of 42 gal.).	Bbl.	PETR	[1] 25	RO	A
502700	Kerosense, except distillate fuel oil (bbl. of 42 gal.) (Report jet fuel in 829920)	Bbl.	PETR 1	[1] 25	RO	A
503000	Gas oil and distillate fuel oil (bbl. of 42 gal.)	Bbl.	PETR 1	[1] 25	RO	A
503100	Residual fuel oil (bbl. of 42 gal.)	Bbl.	PETR 1	1,000	RO	A

★The commodities described in this Positive List entry are excepted from the provisions of General In-Transit License GIT. See § 371.9 (c).

[1] This GLV dollar-value limit is applicable to all Country Group R destinations, except those in Subgroup A, Hong Kong, and Macao; and to all Country Group O destinations, except Mexico. The GLV dollar-value limit for shipments to Mexico is $1,000.

[A = Import certificate. B = DL restrictions. C = Controlled material. Note following "General Notes to Appendix A" for explanation of symbols in this column]

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Petroleum and products—Continued					
	Refined oils—Continued					
	Lubricating oils, except hydraulic (report hydraulic oils of petroleum origin in 503900; hydraulic oils, except of petroleum origin in 829984) (see § 373.8):					
	Industrial, except cutting oils (report cutting oils in 504095):					
503300	Red and pale oils (including all red or pale lubricating oils, except those oils intended for use in internal combustion engines) (see 503910 and 504030) (bbl. of 42 gal.).	Bbl.	PETR 23	25	RO	A
503400	Black oils (including all black and dark green oils, except those intended for use in steam cylinders) (bbl. of 42 gal.).	Bbl.	PETR 24	25	RO	A
503510	Cylinder, bright stock (including bright stock and industrial lubricating oils which are predominantly bright stock and have a Saybolt Universal Viscosity at 210° F. of 95 seconds or more) (bbl. of 42 gal.).	Bbl.	PETR 24	25	RO	A
503520	Cylinder, steam-refined stocks (including cylinder stock, steam cylinder oil, gear, and other lubricating oils consisting principally of such stock) (bbl. of 42 gal.).	Bbl.	PETR 24	25	RO	A
503800	Insulating or transformer oils	Gal.	PETR 24	25	RO	A
503910	Industrial engine lubricating oils: Diesel engine lubricating oils (report diesel fuel oil in 503900) (bbl. of 42 gal.) (formerly 503950).	Bbl.	PETR 23	25	RO	A
503920	Turbine lubricating oil (bbl. of 42 gal.) (formerly 503960).	Bbl.	PETR 23	25	RO	A
503940	Other industrial engine lubricating oil (bbl. of 42 gal.) (specify by name) (formerly 503950).	Bbl.	PETR 23	25	RO	A
503990	Industrial lubricating oils, n.e.c. (bbl. of 42 gal.) (specify by name) (formerly 503950).	Bbl.	PETR 24	25	RO	A B
504005★	Aviation engine lubricating oils (bbl. of 42 gal.) (formerly 504001 and 504003).	Bbl.	PETR 24	25	RO	A
504030	Automotive engine lubricating oils (bbl. of 42 gal.) (formerly 504020).	Bbl.	PETR 24	25	RO	A
504050	Automotive gear oils (bbl. of 42 gal.) (specify by kind and grade) (formerly 504020).	Gal.	PETR 24	25	RO	A
504060	Lubricating oils, n.e.c., except in containers of 4 oz. or less (specify by name).	Gal.	PETR 23	25	RO	A
504095	Cutting oils and compounds, petroleum base (report cutting oils and compounds, except petroleum base in 825000) (specify by name) (formerly 503900).	Lb.	PETR	25	RO	A
504100	Lubricating greases, except graphite lubricants (report graphite lubricants in 548098).	Lb.	PETR	25	RO	
504200	Petrolatum and petroleum jelly (all grades)	Lb.	PETR	100	RO	
504400	Microcrystalline wax	Lb.	PETR	25	RO	
504500	Emulsion wax, chief value paraffin wax; Indrolatum; and slop wax (formerly 505900).	Lb.	PETR	25	RO	
504600	Benowax; and Pennwax (formerly 504200); Cabax Wax; Diax—O—Wax; and Velatrum wax (formerly 505900).	Lb.	PETR	25	RO	
	Petroleum asphalt (report natural asphalt in 547000 and 547100):					
504710	Unmanufactured	L. ton	PETR	100	RO	A
504720	Manufactures, n.e.c. (report asphalt tile in 546000) (specify by name).		PETR	100	RO	A
504800★	Petroleum coke, including petroleum coke flour	L. ton	COAL 1	100	RO	A B
505900	Petroleum products, n.e.c., (specify by name) (report finished petroleum sprays in 829590 and 829600; finished blended gasolines in 501610–501700, and jet fuels in 829620).	Lb. or Gal.	PETR	25	RO	A

★The commodities described in this Positive List entry are excepted from the provisions of General In-Transit License GIT. See § 371.9 (c).

	Glass and products					
	(See Special Provisions, § 373.34)					
521700	Bullet-proof glass		BLDG	None	R	
523110	Optical instrument glass and glass blanks, except synthetic crystals.	No. and Lb.	SATE 52	100	RO	A
523130	Ophthalmic glass and glass blanks	No. and Lb.	SATE	250	R	
529300	Glass tubing for acid-resisting tanks, tanks, vats, kettles, piping, and fixtures.		CDGS	25	RO	A
	Clay and products					
	Pottery (china, porcelain, earthenware, and stoneware included):					
533510	Electrical porcelain, dry process, for 6600 volts and over (formerly 533600).	Lb.	ELME 1	500	R	
533610	Electrical porcelain, wet process, for 6600 volts and over (formerly 533600).	Lb.	ELME 1	500	R	
	Refractories, except graphite (report graphite refractories in 548050):					
536100	Chrome and chrome-magnesite brick and shapes	M	BLDG 31	25	R	
536200	Magnesite and magnesite-chrome brick and shapes	M	BLDG 31	25	R	
536650	High alumina brick and shapes, 50% Al_2O_3 and over, (report fused alumina in 536810).	M	BLDG 31	100	R	
536810	Firebrick and shapes, except plastic, n. e. c. (specify by name).	M	BLDG 31	100	R	
536830	High-temperature refractory cements or bonding mortars, except of chrome; magnesite; silica; or of fireclay composition of less than 50% Al_2O_3.	Lb.	BLDG 31	100	R	
536856	Plastic refractories (including firebrick shapes, and ramming mixtures), except of chrome; magnesite; silica; or of fireclay composition of less than 50% Al_2O_3.	Lb.	BLDG 31	100	R	
536890	Refractories, n. e. c. (specify by name) except of chrome; magnesite; silica; or of fireclay composition of less than 50% Al_2O_3.		BLDG 31	100	R	
	Other nonmetallic minerals (precious included)					
	(See Special Provisions, §§ 373.1, 373.11, 373.34, 373.37)					
	Abrasives:					
540905★	Diamond grinding wheels, sticks, hones, and laps (see §§ 373.1, 373.9).	Lb.	TOOL 1	None	RO	A B
540910★	Diamond powder (see §§ 373.1, 373.9)	Carat	CDGS 2	None	RO	A B
540940	Corundum	Lb.	MINL	100	R	A
541110	Fused aluminum oxide, crude and in grains	Lb.	MINL	100	RO	A
541120	Fused silicon carbide, crude and in grains	Lb.	MINL	100	RO	A
541140	Manufactured abrasives, n. e. c.		MINL	100	RO	A
541210	Abrasive products: Manufactured grinding wheels, of silicon carbide or aluminum oxide composition, including corundum.	Lb. or No.	TOOL	250	R	
542010	Iron and steel shot, chilled (see § 373.2)	Lb.	STEE	100	RO	B
	Asbestos:					
545110	Unmanufactured: Crude asbestos and spinning fibers (specify by grade) (see § 373.16).	L. ton	MINL	100	RO	A B
545120	Non-spinning fibers	L. ton	MINL	100	RO	
545150	Waste and refuse	Lb.	BLDG	100	R	
545510	Textiles and yarn	Lb.	TRAN	500	R	
545600	Brake lining, molded and semimolded	Lin. ft.	TRAN	500	R	
545700	Brake lining, woven	No.	TRAN	500	R	
545800	Clutch facing, molded, semimolded and woven including clutch lining.					
	Graphite, natural:					
547210★	Amorphous (specify carbon content and country of origin).	Lb.	MINL	100	RO	B
547220	Crystalline flake, lump, or chip	Lb.	MINL	100	RO	
547290	Other natural graphite					

[A = Import certificate. B = DL restrictions. C = Controlled material. Note following "General Notes to Appendix A" for explanation of symbols in this column]

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Other nonmetallic minerals (precious included)—Con.					
	Carbon or graphite products (natural and artificial):					
547300★	Electrodes for furnace or electrolytic work (specify size).	Lb.	MINL	None	RO	A B
547400★	Carbon brushes for motors, and for starting, lighting, and ignition equipment (see § 373.71.		ELME 2	50	RO	A B
547490★	Other brushes and brush stock in the form of blocks, plates, and rods, carbon and artificial graphite.		ELME 2	None	RO	A B
547800	Lighting carbons	No.	FILM	25	RO	
548050★	Refractory crucibles, retorts, and stoppers	No.	MINL	None	RO	A B
548098	Graphite greases and lubrints, including, but not limited to, alemite, aquadag, grelag, and oildag.	Lb.	PETR	25	RO	A
548098★	Carbon or artificial graphite electrodes other than for furnace or electrolytic work (specify size) (report electrodes for furnace or electrolytic work in 547300).	Lb	MINL	None	RO	A B
548098★	Carbon and graphite products (including artificial), n. e. c. (specify by name).	Lb.	MINL	None	RO	A B
	Mica:					
551000	Unmanufactured (muscovite and phlogopite): Block, film and splittings, which conform to ASTM or India—Calcutta standards.	Lb.	MINL	100	RO	A
551300	Manufactures, n. e. c., except peep hole covers, stove windows, and elements for heating appliances (specify by process and item) (report ground or pulverized in 551200).	Lb.	MINL	100	R	
571410	Sulfur, crude (containing 85 percent or more sulfur) (formerly 571400) (report sulfur ores or crude sulfur of less than 85 percent sulfur content in 596098). (See § 373.16).	L. ton	SALT 36	25	RO	A B
571500	Sulfur, crushed, ground, refined, sublimed and flowers (See § 373.16).	Lb.	SALT 36	25	RO	A B
573600	Magnesium silicate (talc, steatite and soapstone), crude and ground.	L. ton	MINL	100	RO	A
573700	Magnesium silicate (talc, steatite, and soapstone) manufactures, except soapstone slabs.	Lb.	MINL	100	RO	A
595050	Quartz crystal, raw		RARA	10	RO	A
595090	Quartz crystal plates (See § 399.2)		RARA	10	RO	A
596012	Cryolite, natural and artificial (See § 373.37)	Lb.	MINL	100	R	B
596065	Kyanite and allied minerals, crude, ground or calcined	L. ton	MINL	100	RO	B
596098	Iron pyrites		MINL	None	R	
596098	Cuprous pyrites		MINL	None	R	
596098	Crude sulfur, of less than 85 percent sulfur content; and sulfur ores (formerly 571400).	L. ton	SALT 36	25	RO	A
596005★	Diamonds suitable only for industrial use n. e. c. (See §§ 373.1, 373.9).	Carat	CDGS 1	None	RO	A B
596010★	Diamonds, rough or uncut, suitable for cutting into gem stones. (See §§ 373.1, 373.9.)	Carat	CDGS 1	None	RO	A B
596098★	Diamond bearings (See §§ 373.1, 373.9)		CDGS 1	None	RO	A B
596098	Jewel bearings, except diamond		CDGS	None	R	
	Pig iron					
	(See Special Provisions, §§ 373.2, 373.16)					
600700	Pig iron, all grades (specify grade)	S. ton	STEE	1,000	RO	B
	Iron and steel scrap					
	(See Special Provisions, §§ 373.1, 373.2, 373.16, 373.24, 373.34)					
	Scrap, except tin plate and terne plated scrap:					
601010	Melting steel scrap (No. 1 heavy and No. 2) (formerly 601020 and 601030).	S. ton	STEE 19	100	RO	A B
601040	Baled sheet melting scrap	S. ton	STEE 19	100	RO	A B
601050	Borings, shovelings, axle turnings (steel melting scrap) (formerly 601060)	S. ton	STEE 19	100	RO	A B
601070	Iron scrap	S. ton	STEE 19	100	RO	A B
601090	Other scrap (specify type)	S. ton	STEE 19	100	RO	A B

★The commodities described in this Positive List entry are excepted from the provisions of General In-Transit License GIT. See § 371.9 (c).

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Iron and steel scrap—Continued					
601150	Tin plated scrap (not detinned) except tin cans, old, crushed (formerly 601100) (report detinned or rusted scrap in 601040 and 601090).	S. ton	TNPL	1,000	RO	A B
601170	Rerolling material (formerly 601550) report relaying rails in 605300)	S. ton	STEE	1,000	RO	A B C
	Iron bars, skelp and pipe					
	(See §§ 373.2, 373.16, 373.24, 373.33)					
601201	Iron bars (formerly 602100)	Lb.	STEE	1,000	RO	B C
601203	Skelp, wrought iron (formerly 603200)	Lb.	STEE	1,000	RO	B C
	Iron pipe:					
601205	Wrought iron pipe, welded, black (formerly 607100)	Lb.	STEE 18	100	RO	B C
601207	Wrought iron pipe, welded, galvanized (formerly 607300).	Lb.	STEE 18	1,000	RO	B C
601211	Cast iron pressure pipe (formerly 606705)	Lb.	STEE 20	1,000	R	
	Steel mill products—semifinished					
	(See Special Provisions, §§ 373.2, 373.16, 373.24, 373.33, 373.34)					
	Steel ingots, blooms, billets, slabs, sheet bars, and tin-plate bars:					
	Carbon steel:					
601602	Ingots (formerly 601605)	S. ton	STEE 2	1,000	RO	B C
601604	Billets, projectile and shell steel (formerly 601606)	S. ton	STEE 2	1,000	RO	B C
601608	Billets (except projectile and shell steel), blooms, slabs, sheet bars, and tin plate bars (formerly 601606 and 601609).	S. ton	STEE 2	1,000	RO	B C
	Alloy steel including stainless:					
601702	Ingots, alloy steel, except stainless (formerly 601705).	S. ton	STEE	100	RO	A B C
601702	Ingots, stainless steel (formerly 601705)	S. ton	STEE	100	RO	A B C
601704	Billets, projectile and shell steel (formerly 601706)	S. ton	STEE	100	RO	A B C
601708	Billets (except projectile and shell steel), blooms, slabs, sheet bars and tin-plate bars, alloy steel, (except stainless) (formerly 601706 and 601709.	S. ton	STEE	100	RO	A B C
601708	Billets, blooms, slabs, and sheet bars, stainless steel (formerly 601706 and 601799).	S. ton	STEE	100	RO	A B C
601810	Tube rounds, carbon steel (formerly 601800)	S. ton	STEE	100	RO	B C
601810	Other semi-finished material for seamless pipe tubing, carbon steel (formerly 601606).	S. ton	STEE 2	1,000	RO	B C
601810	Semi-finished material for seamless pipe and tubing, alloy steel, except stainless (formerly 601706 and 601800).	S. ton	STEE	100	RO	A B C
601810	Semi-finished material for seamless pipe and tubing, stainless steel (formerly 601706 and 601800).	S. ton	STEE	100	RO	A B C
601910	Wire rods, carbon steel (formerly 602900)	Lb.	STEE	100	RO	B C
601910	Wire rods, alloy steel, except stainless (formerly 602900).	Lb.	STEE	100	RO	A B C
601910	Wire rods, stainless steel (formerly 602900)	Lb.	STEE	100	RO	A B C
601950	Skelp, carbon steel (formerly 603200) (report skelp, wrought iron in 601203).	Lb.	STEE	1,000	RO	B C
601950	Skelp, alloy steel, except stainless (formerly 603200)	Lb.	STEE	1,000	RO	A B C
601950	Skelp, stainless steel (formerly 603200)	Lb.	STEE	1,000	RO	A B C
	Steel mill products, rolled and finished					
	(See Special Provisions, §§ 373.2, 373.16, 373.24, 373.32, 373.33, 373.34)					
	Steel bars, including bar size shapes:					
	Bars, cold finished (all cold drawn or cold rolled):					
	Bars, rounds, or special sections in coils or cut lengths):					
602010	Die steel bars, carbon steel	Lb.	STEE 10	100	RO	B C
602010	Other carbon steel bars	Lb.	STEE 10	1,000	RO	B C
602050	Stainless	Lb.	STEE 10	100	RO	A B C
602090	Alloy, except stainless	Lb.	STEE 10	100	RO	A B C

A = Import certificate. B = DL restrictions. C = Controlled material. Note following "General Notes to Appendix A" for explanation of symbols in this column]

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Steel mill products, rolled and finished—Continued					
602210	Bars, concrete reinforcement (all concrete reinforcing bars, whether plain, deformed, round, or square and rolled from new billet steel, rail steel, or axle steel, in coils of cut lengths) (formerly 602100, 602200 and 602300).	Lb.	STEE	1,000	RO	B C
	Bars, hot-rolled, except tool and hollow drill steel bars (all regular bars and special sections and bar shapes under 3 inches) (report tool steel bars in 602650 and hollow drill steel bars in 602670):					
	Carbon steel:					
602310	Bars, projectile and shell steel (formerly 602300)	Lb.	STEE	1,000	RO	B C
602350	Die steel bars (formerly 602300)	Lb.	STEE 7	100	RO	B C
602330	Other carbon steel bars (formerly 602300)	Lb.	STEE	1,000	RO	B C
602500	Stainless steel	Lb.	STEE	100	RO	A B C
	Alloy steel, except stainless:					
602610	Bars, projectile and shell steel (formerly 602600)	Lb.	STEE	100	RO	A B C
602630	Bars, except projectile and shell steel (formerly 602600).	Lb.	STEE	100	RO	A B C
	Tool steel bars:					
602650	Carbon steel (formerly 602300)	Lb.	STEE 7	1,000	RO	B C
602650	Alloy steel (formerly 602600)	Lb.	STEE	100	RO	A B C
	Hollow drill steel bars:					
602670	Carbon steel (formerly 602300)	Lb.	STEE 7	1,000	RO	B C
602670	Alloy steel (formerly 602600)	Lb.	STEE	100	RO	A B C
	Steel plates, including boiler plate (hot or cold-rolled), not fabricated: [1]					
603125	Carbon steel (formerly 603120 and 603130)	Lb.	STEE 5	1,000	RO	B C
603135	Stainless steel (include stainless-clad plates) (formerly 603140 and 603160).	Lb.	STEE 9	100	RO	A B C
603145	Alloy steel, except stainless (formerly 603170 and 603180).		STEE 9	100	RO	A B C
	Steel sheets, black, ungalvanized (including painted):					
	Carbon steel (including black iron sheets) (report tin-mill black plate in 603910):					
603525	Hot-rolled (formerly 603520 and 603600)	Lb.	STEE 8	1,000	RO	B C
603535	Cold-rolled (formerly 603530 and 603600)	Lb	STEE 8	1,000	RO	B C
	Stainless steel:					
603540	Hot-rolled	Lb.	STEE 3	100	RO	A B C
603560	Cold-rolled	Lb.	STEE 3	100	RO	A B C
	Alloy steel, except stainless:					
603570	Hot-rolled	Lb.	STEE 3	100	RO	A B C
603580	Cold-rolled	Lb.	STEE 3	100	RO	A B C
	Steel sheets, galvanized (all steel grades):					
603591	Corrugated and formed galvanized sheets, including roofing, corrugated, V-crimp, and channel drain; ridge roll, valley, and flashing (except flat); siding, corrugated and brick (formerly 603350, 603390, 603450 and 603490).	Lb.	STEE 6	1,000	RO	B C
603592	Flat galvanized sheets, including flashing (formerly 603390 and 603490).	Lb.	STEE	1,000	RO	B C
603594	Steel sheets, coated, except galvanized (all steel grades) (formerly 603520, 603530 and 604200).	Lb.	STEE	1,000	RO	B C
603595	Electrical (steel) sheets, and strip, transformer grades	Lb.	STEE	100	RO	A B C
603595	Other electrical (steel) sheets, and strip	Lb.	STEE	1,000	RO	A B C
603595	Steel sheets for enameling (all steel grades) (formerly 603520 and 603530).	Lb.	STEE 8	1,000	RO	B C
	Steel strip, coated or uncoated, except electrical (report electrical steel strip in 603595):					
603710	Cold-rolled carbon steel strapping	Lb.	STEE	100	RO	B
603710	Other cold-rolled carbon steel, gilding metal clad	Lb.	STEE	100	RO	A B C
603710	Other cold-rolled carbon steel	Lb.	STEE 11	100	RO	B C
603730	Cold-rolled stainless steel	Lb.	STEE	100	RO	A B C
603790	Cold-rolled alloy steel, except stainless	Lb.	STEE	100	RO	A B C
603810	Hot-rolled carbon steel strapping	Lb.	STEE	100	RO	B
603810	Other hot-rolled carbon steel, gilding metal clad	Lb.	STEE	100	RO	A B C
603810	Other hot-rolled carbon steel	Lb.	STEE 11	100	RO	B C
603850	Hot-rolled stainless steel	Lb.	STEE	100	RO	A B C
603890	Hot-rolled alloy steel, except stainless	Lb.	STEE	100	RO	A B C

[1] Armor plate, classified in Schedule B No. 603165, requires export authorization from the Department of State. See § 370.5, Note 1.

[A = Import certificate. B = DL restrictions. C = Controlled material. Note following "General Notes to Appendix A" for explanation of symbols in this column]

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Steel mill products, rolled and finished—Continued					
603910	Tin mill black plate (formerly 603520 and 603530)	Lb.	STEE 5	1,000	RO	B C
	Tin mill products:					
	Tin plate (see §§ 373.1, 373.16, 373.32):					
604010	Secondary tinplate (formerly 604000, 604110, and 604150).	Lb.	TNPL	1,000	RO	A B C
604020	Circles, cobbles, strip, and scroll shear butts (formerly 601300).	Lb.	TNPL	1,000	RO	A B C
604110	Hot dipped	Lb.	TNPL	1,000	RO	A B C
604150	Electrolytic coated	Lb.	TNPL	1,000	RO	A B C
604170	Tinplate, decorated, embossed, lithographed, lacquered, or otherwise advanced, including lithographic misprints.	Lb.	STEE	1,000	RO	B C
604180	Short terneplate (formerly 604200 and 620098) (report long terne sheets in 603594).	Lb.	STEE	1,000	RO	C
604190	Terneplate, decorated, embossed, lithographed, lacquered, or otherwise advanced, including lithographic misprints (formerly 604200).	Lb.	STEE	1,000	RO	C
	Structural shapes and piling:					
	Structural shapes, not fabricated:					
604510	Carbon steel (formerly 604500)	S. ton	STEE	1,000	RO	B C
604530	Stainless steel (formerly 604500)	S. ton	STEE	1,000	RO	A B C
604580	Alloy steel, except stainless (formerly 604500)	S. ton	STEE	1,000	RO	B C
605000	Sheet piling (all steel grades)	Lb.	STEE	1,000	RO	B C
	Rails, trackwork and track accessories:					
	Standard tee rails, over 60 pounds per yard (report relaying rails in 605300):					
605110	Carbon steel (formerly 605100)	S. ton	STEE 18	1,000	RO	A B C
605110	Alloy steel (formerly 605100)	S. ton	STEE 18	1,000	RO	A B C
	Rails except standard tee rails (report relaying rails in 605300):					
605210	Carbon steel (formerly 605200)	S. ton	STEE 18	1,000	RO	A B C
605230	Alloy steel, including stainless (formerly 605100 and 605200).	S. ton	STEE	1,000	RO	A B C
605300	Relaying rails (report rerolling rails in 601170; rail scrap in 601060).	S. ton	STEE	1,000	RO	A B C
	Rail joints and splice bars:					
605420	Carbon steel (formerly 605410)	Lb.	STEE 14	100	RO	B C
605430	Alloy steel, including stainless (formerly 605410)	Lb.	STEE 14	100	RO	B C
605450	Tie plates	Lb.	STEE 14	100	RO	B C
	Switches, frogs, and crossings:					
605510	Carbon steel (formerly 605500)	Lb.	STEE	100	RO	B
605530	Alloy steel, including stainless (formerly 605500)	Lb.	STEE	100	RO	B
605800	Track spikes	Lb.	STEE	100	RO	B C
605900	Railway bolts, nuts, washers, and lock nuts	Lb.	STEE	100	RO	B
	Trackwork and track accessories, n.e.c.:					
605950	Rail bonds, wire (formerly 609198)	Lb.	STEE	500	RO	B
605950	Other trackwork and track accessories, n.e.c. (formerly 605490 and 620909).	Lb.	STEE 14	100	RO	B
	Pipe, tubes, and tubing, n. e. c. (pipe assemblies specially fabricated for particular machines or equipment should be reported as parts of such machines or equipment:					
	Pressure tubes and tubing (including boiler tubes and tubing):					
606010	Carbon steel, seamless (formerly 606000 and 607705).	Lb.	STEE 12	100	RO	A B C
606030	Carbon steel, welded (formerly 606100 and 607705)	Lb.	STEE 12	100	RO	B C
606110	Alloy steel, except stainless, seamless (formerly 606000 and 607705) (report stainless in 607800).	Lb.	STEE 12	100	RO	A B C
606130	Alloy steel, except stainless, welded (formerly 606100 and 607705) (report stainless in 607500).	Lb.	STEE 12	100	RO	A B C
	Oil country pipe (including drill pipe, casing and tubing) (see § 399.2):					
606210	Seamless, carbon steel (formerly 606250)	Lb.	STEE 15	100	RO	A B C
606230	Seamless, alloy steel, except stainless (formerly 606250).	Lb.	STEE 15	100	RO	A B C
606240	Welded, carbon steel (formerly 606350)	Lb.	STEE 16	100	RO	A B C
606260	Welded, alloy steel, except stainless (formerly 606350).	Lb.	STEE 16	100	RO	A B C

A = Import certificate. B = DL restrictions. C = Controlled material. Note following "General Notes to Appendix A" for explanation of symbols in this column]

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Steel mill products, rolled and finished—Continued					
	Pipe, tubes, and tubing, n. e. c. (pipe assemblies specially fabricated for particular machines or equipment should be reported as parts of such machines or equipment—Continued					
	Line pipe, carbon and alloy steel, except stainless (See § 399.2):					
606270	Seamless, carbon steel (formerly 606200)	Lb.	STEE 15	100	RO	A B C
606270	Seamless, alloy steel, except stainless (formerly 606200).	Lb.	STEE 15	100	RO	A B C
606280	Welded, carbon steel (formerly 606350)	Lb.	STEE 16	100	RO	A B C
606280	Welded, alloy steel, except stainless (formerly 606350).	Lb.	STEE 16	100	RO	A B C
	Standard pipe, carbon and alloy steel, except stainless.					
606310	Seamless, black (formerly 606400)	Lb.	STEE	100	RO	B C
606370	Seamless, galvanized (formerly 607705)	Lb.	STEE 17	100	RO	B C
606360	Welded, black (formerly 607000)	Lb.	STEE	100	RO	B C
606380	Welded, galvanized (formerly 607300)	Lb.	STEE	1,000	RO	B C
607410	Mechanical tubing, carbon steel (formerly 607400)	Lb.	STEE 17	100	RO	B C
607430	Mechanical tubing, alloy steel, except stainless (formerly 607300)	Lb.	STEE 17	100	RO	A B C
607500	Pipe and tubing, stainless steel	Lb.	STEE 17	100	RO	A B C
607710	Pipe and tubing, carbon steel, n. e. c. (formerly 607705 and 630698)	Lb.	STEE 17	100	RO	B C
607710	Pipe and tubing, alloy steel, except stainless, n. e. c. (formerly 607705 and 630698).	Lb.	STEE 17	100	RO	A B C
	Steel wire, n.e.c. (all round, shaped, and flat wire regardless of use) (report electrical insulated wire and cable in 709810–709885)					
608120	Uncoated wire, carbon steel (formerly 608100)	Lb.	STEE	100	RO	B C
608130	Uncoated wire, alloy steel, except stainless (formerly 608100)	Lb.	STEE	100	RO	A B C
608150	Uncoated wire, stainless steel (formerly 608100)	Lb.	STEE	100	RO	A B C
608200	Galvanized wire (all steel grades) (report fencing and netting in 619047, barbed and twisted wire in 608300; and wire strand in 619065).	Lb.	STEE	100	RO	B C
	Coated wire, except galvanized (all steel grades):					
608210	Carbon steel (formerly 609109)	Lb.	STEE	1,000	RO	B C
608210	Alloy steel, except stainless (formerly 609109)	Lb.	STEE	100	RO	A B C
608210	Stainless steel (formerly 609109)	Lb.	STEE	100	RO	A B C
608300	Barbed and twisted wire	Lb.	STEE	100	RO	B C
	Steel wire, n.e.c.:					
609190	Musical instrument wire; and spring wire, piano grade (formerly 609198)	Lb.	STEE	100	RO	B C
609190	Other steel wire, n.e.c. (formerly 609198)	Lb	STEE	500	RO	B C
	Casting and forgings					
	(See Special Provisions, §§ 373.2, 373.16, 373.24, 373.34)					
	Castings, iron and steel, rough and semifinished:					
610350	Locomotive wheel tires (formerly 610518)	Lb.	STEE 13	500	RO	B C
610350	Other railway car wheels (chilled iron wheels) (formerly 610515).	Lb.	STEE 13	100	RO	B C
610410	Cast carbon steel grinding balls	Lb.	STEE	500	RO	B
610410	Other carbon steel castings	Lb.	STEE	500	RO	B C
610491	Cast alloy steel grinding balls, except stainless (formerly 610490).	Lb.	STEE	100	RO	A B
610491	Other alloy steel castings, except stainless (formerly 610490)	Lb.	STEE	100	RO	A B C
610492	Stainless steel grinding balls (formerly 610490)	Lb.	STEE	100	RO	A B
610492	Other stainless steel castings (formerly 610490)	Lb.	STEE	100	RO	A B C
	Forgings, rough and semi-finished:					
610493	Carbon steel grinding balls, rough or polished (formerly 610500)	Lb.	STEE 1	100	RO	B
610493	Other carbon steel (formerly 610700)	Lb.	STEE 1	100	RO	B C
610495	Alloy steel grinding balls, rough or polished, including stainless (formerly 610860).	Lb.	STEE 1	100	RO	A B
610495	Other alloy steel, including stainless (formerly 610800).	Lb.	STEE 1	100	RO	A B C

[A = Import certificate. B = DL restrictions. C = Controlled material. Note following "General Notes to Appendix A" for explanation of symbols in this column]

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Railway car and locomotive wheels, tires, and axles (rolled and forged)					
	(See Special Provisions, §§ 373.2, 373.16, 373.24, 373.34)					
	Wheels, without axles (if alloy, specify and give analysis) (report chilled iron wheels in 610050):					
610516	Railway car wheels, including trolley, carbon steel (formerly 610515).	Lb.	STEE 13	100	RO	B C
610516	Railway car wheels, including trolley, alloy steel, (formerly 610515).	Lb.	STEE 13	100	RO	B C
610516	Railway car wheels, including trolley, iron (formerly 610515).	Lb.	STEE 13	100	RO	B
610518	Locomotive wheels, carbon steel	Lb.	STEE	500	RO	A B C
610518	Locomotive wheels, alloy steel	Lb.	STEE	500	RO	A B C
	Axles, without wheels (if alloy, specify and give analysis):					
610525	Railway car axles, without wheels, carbon steel	Lb.	STEE 13	100	RO	B C
610525	Railway car axles, without wheels, alloy steel	Lb.	STEE 13	100	RO	B C
610528	Locomotive axles, without wheels, carbon steel	Lb.	STEE	500	RO	A B C
610528	Locomotive axles, without wheels, alloy steel	Lb.	STEE	500	RO	A B C
	Wheels and axles, mounted (if alloy, specify and give analysis):					
610535	Railway car axles, fitted with carbon steel wheels; and railway car axles, carbon steel, fitted with iron wheels.	Lb.	STEE 13	100	RO	B C
610535	Railway car axles, fitted with alloy steel wheels; and railway car axles, alloy steel, fitted with iron wheels.	Lb.	STEE 13	100	RO	B C
610538	Locomotive axles, fitted with carbon steel wheels	Lb.	STEE	500	RO	A B C
610538	Locomotive axles, fitted with alloy steel wheels	Lb.	STEE	500	RO	A B C
	Metal manufactures					
	(See Special Provisions, §§ 373.1, 373.2, 373.16, 373.24, 373.34, 373.35, 373.38)					
	Table flatware and specially fabricated parts, n. e. c.:					
611930	Platinum and platinum allied metals (specify type of metal) (formerly 692905 and 692998).	----------	CDGS	None	RO	----------
611940	Aluminum, copper, brass and bronze (specify type of metal) (formerly 630998, 643998, and 647998).	----------	CDGS	100	RO	B
611940	Other nonferrous metals, except precious (specify type of metal) (formerly 699198).	----------	CDGS	25	RO	----------
	Hollow ware, solid or plated, and specially fabricated parts, n. e. c.:					
611970	Platinum and platinum allied metals (specify type of metal) (formerly 692905 and 692998).	----------	CDGS	None	RO	----------
611990	Aluminum (formerly 630700)	Lb.	CDGS	100	RO	B
611990	Copper, brass and bronze (specify type of metal) (formerly 643998 and 647998).	----------	CDGS	100	RO	B
611990	Other metals, except iron, steel, and precious (specify type of metal) (formerly 699198).	----------	CDGS	25	RO	B
	Cooking, kitchen, and hospital utensils, and specially fabricated parts, n. e. c.:					
	Stamped and spun:					
612050	Aluminum (formerly 630700)	Lb.	CDGS	100	RO	B
612150	Copper, brass and bronze (specify type of metal) (formerly 643998 and 647998).	Lb.	CDGS	100	RO	B
612150	Other nonferrous metals, except precious (specify type of metal) (formerly 699198).	Lb.	CDGS	25	RO	----------
612380	Tin cans (packers or cannery type) finished or unfinished, and specially fabricated parts, n. e. c. (formerly 612300)	Lb.	TNPL	1,000	R	----------
	Wire springs (all steel grades):					
613810	Bed and cushion springs, except complete bed springs (formerly 609198).	Lb.	STEE	500	RO	B
613830	Wire springs, n. e. c., and specially fabricated parts n. e. c. (formerly 609198). (See § 399.2)	Lb.	STEE	500	RO	B

[A = Import certificate. B = DL restrictions. C = Controlled material. Note following "General Notes to Appendix A" for explanation of symbols in this column]

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Metal manufactures—Continued					
	Tools (all metals) n. e. c.:					
617450	Hacksaw blades, power (formerly 744381)	No.	TOOL	100	O	A
617920	Diestocks, brass and bronze; and bushings, brass and bronze, specially fabricated for hand-operated tools (formerly 647901).	Lb.	CDGS	200	RO	
617000	Drills and bits, hard-surfaced steel and tungsten-carbide types (formerly 617720) (report types for power-driven tools in 744381).		CDGS	None	R	A
617898	Jacks, hand-operated, and parts, with lifting capacity of 10 tons or more (including hand-operated hydraulic jacks) (report jacks for construction and maintenance in 722045; jacks for garage use in 793185).		CDGS	25	R	
617901★	Tools incorporating industrial diamonds, n. e. c. (include slugs containing diamonds) (formerly 615405 and 617891). (See §§ 373.1, 373.7, 373.9).	No.	TOOL	None	RO	A B
	Tool bit blanks:					
617903	Containing tungsten carbide (formerly 663900)	Lb.	MINL	25	RO	A
617905	Molybdenum tool bit blanks (formerly 669198)	Lb.	MINL	25	RO	A
617905	Other tool bit blanks, not ground (formerly 620907)	Lb.	STEE	100	RO	A B C
	Basic hardware:					
	Hinges and butts:					
18150	Aluminum; copper; and zinc (formerly 630998, 643998 and 658998).	Doz. pr.	BLDG	100	RO	
618150	Brass and bronze (formerly 646900)	Doz. pr.	BLDG	300	RO	
618150	Other metals, except iron and steel (formerly 669198).	Doz. pr.	BLDG	25	RO	
	Wood screws:					
618230	Brass and bronze (formerly 646900)	Gross	BLDG	300	RO	
618230	Other copper-base alloy (formerly 669198)	Gross	BLDG	25	RO	
618230	Copper (formerly 633998)	Gross	BLDG	100	RO	
618230	Other nonferrous metal except aluminum (specify type of metal) (formerly 669198) (report iron and steel wood screws in 618210).	Gross	BLDG	25	RO	
	Bolts, screws, nuts, rivets, and washers, n.e.s., not specially fabricated for particular machines or equipment (specify by name):					
618261	Iron and steel (formerly 606900) (report railway track construction and maintenance hardware 605900).	Lb.	STEE	300	RO	B
618263	Brass and bronze (formerly 647998)	Lb.	BLDG	100	RO	
618263	Phosphor bronze and other copper-base alloys (formerly 669198).	Lb.	BLDG	25	RO	
618265	Aluminum, except wire bolts, wire screws, and wire rivets (formerly 630900 and 630998) (include aluminum explosive rivets).	Lb.	BLDG	100	RO	A B
618265	Copper; lead; and zinc (formerly 643998, 651598, and 658998).	Lb.	BLDG	100	RO	B
618265	Other nonferrous metals (formerly 669198)	Lb.	BLDG	25	RO	
	Nails, staples, spikes, and tacks:					
618267	Wire nails, staples, and spikes (all nails, staples and spikes made from wire): Iron and carbon steel, except staples for office use (formerly 606900).	Lb.	STEE 20	100	RO	B C
618267	Other steel, except staples for office use (formerly 606900).	Lb.	STEE 20	100	RO	B C
618269	Copper, brass and bronze, except staples for office use (formerly 643998 and 647998).	Lb.	BLDG	100	RO	B
618269	Other nonferrous metals, except staples for office use, and except aluminum and aluminum-base alloy nails, staples and spikes (formerly 669198).	Lb.	BLDG	25	RO	B

★The commodities described in this Positive List entry are excepted from the provisions of General In-Transit License GIT. See § 371.9 (c).

618273	Copper, brass and bronze (formerly 643998 and 647998).	Lb.	BLDG	25	RO	
618273	Other nonferrous metals (formerly 669198)	Lb.	BLDG	100	RO	
618274	Tacks, copper, brass and bronze, except thumbtacks (formerly 643998 and 647998).	Lb.	BLDG	25	RO	
618274	Tacks, other nonferrous metals, except thumbtacks (formerly 669198).					
	Builders' hardware, n.e.c., and specially fabricated parts, n.e.c. (specify by name):					
618310	Copper-base alloys except brass and bronze (formerly 669198).		BLDG	25	RO	
618350	Aluminum; copper; lead; and zinc (formerly 630998, 643998, 651598 and 658998).		BLDG	100	RO	
618350	Other nonferrous metals (specify type of metal) (formerly 669198) (report iron and steel builders' hardware, n.e.c., in 618360).		BLDG	25	RO	
	Furniture hardware and specially fabricated parts, n.e.c. (specify by name):					
618430	Brass and bronze (formerly 646900)		BLDG	300	RO	B
618430	Other copper-base alloys (formerly 669198)		BLDG	25	RO	
618460	Aluminum; copper; lead; and zinc (formerly 630998, 643998, 651598 and 658998).		BLDG	100	RO	
618460	Other nonferrous metals (specify type of metal) (formerly 669198).		BLDG	25	RO	
	Car and marine hardware, n.e.c., and specially fabricated parts, n.e.c. (specify by name):					
618630	Brass and bronze anchor units and cabin hooks (formerly 647998).		BLDG	100	RO	B
618630	Other copper-base alloy car and marine hardware, n.e.c., (including brass and bronze) (formerly 646900).		BLDG	300	RO	
618650	Car and marine hardware, n. e. s., of: aluminum; copper; lead; and zinc (formerly 630998, 643998, 651598, and 658998).		BLDG	100	RO	
618650	Other nonferrous metal car and marine hardware, n. e. c. (formerly 669198) (report iron and steel car and marine hardware, n. e. c. in 618610).		BLDG	25	RO	
618830	Hardware, n. e. c. (specify by name): Brass and bronze cable clamps; eyelets (except shoe and clothing); plumbers' furnaces; section brackets; turnbuckles; and valve gaskets (formerly 647998).		BLDG	100	RO	B
618830	Other brass and bronze hardware, n. e. c. (formerly 646900).		BLDG	300	RO	
618830	Other copper base alloy (formerly 669198)		BLDG	25	RO	
618840	Aluminum; copper; and zinc (formerly 630998, 643998, and 658998).		BLDG	100	RO	
618840	Other nonferrous metals (formerly 669198) (report iron and steel hardware, n. e. c. in 618610).		BLDG	25	RO	
618857	Copper-base alloy (including brass and bronze) plumbing fixtures and fittings (including pipe valves with working pressure not exceeding 125 PSI W. O. G. rating), and specially fabricated parts, n. e. c. (specify by name) (formerly 646900, 646900, and 669198) (report pipe valves with working pressures over 125 PSI W. O. G. rating in 774460) (see §§ 373.16, 373.35).	Lb.	CDGS	25	RO	B
618859	Zinc plumbing fixtures and fittings, and specially fabricated parts, n. e. c. (formerly 658998).		CDGS	100	RO

	Metal manufactures—Continued					
	Chains, n. e. c., and specially fabricated parts, n. e. c.:					
618096	Brass and bronze (formerly 647998) (report iron and steel chains in 618604 and 618695).	Lb.	CDGS	100	RO	
	Shipping containers for oil, gas, and other liquids and solids (all metals) (report storage tanks in 618967 and 618971):					
	Filled shipping containers of any size capable of withstanding internal pressures over 300 pounds per square inch and filled shipping containers with a capacity of 5 or more gallons, fabricated of, or lined with, any corrosion-resistant materials (report only quantity and value of such containers under 619011 and 619012; include weight with gross weight of their contents) (the gross weight and value of other filled metal shipping containers should be included under the Schedule B number applicable to the contents):[1][2]					
619011	Gas cylinders (formerly 620520)	No.	STEE	100	RO	A B
619012	Other (formerly 620520)	No.	STEE	100	RO	A B
619021	Unfilled gas cylinders capable of withstanding pressures over 300 lbs. per square inch; not including drums and containers fabricated of, or lined with, any corrosion-resistant materials as defined in the "General Notes to Appendix "A" (see §§ 371.18, 373.2) (formerly 620540).[2]	Lb.	STEE	100	RO	A B
619021	Unfilled gas cylinders of 5 or more gallons capacity, fabricated of, or lined with, any corrosion-resistant materials as defined in the "General Notes to Appendix A" (see §§ 371.18, 373.2) (formerly 620540).[2]	Lb.	STEE	100	RO	A B
619022	Unfilled steel drums and containers capable of withstanding pressures over 300 lb. per square inch; not including drums and containers fabricated of, or lined with, any corrosion-resistant materials as defined in the "General Notes to Appendix A" (see §§ 371.18, 373.2) (formerly 620540).[2]	Lb.	STEE	100	RO	A B
619022	Unfilled steel drums and containers of 5 or more gallons capacity, fabricated of, or lined with, any corrosion-resistant materials as defined in the "General Notes to Appendix A" (see §§ 371.18, 373.2) (formerly 620540).[2]	Lb.	STEE	100	RO	A B
619022	Unfilled shipping containers, metal other than steel (formerly 630998).	Lb.	NONF	100	RO	A
	Welding rods and wires:					
619031	Covered tubular steel electrodes or ceramic electrodes infused with steel (chief value steel) for underwater cutting (formerly 620998).	Lb.	STEE	None	RO	B
619031	Iron and steel, electric (formerly 608800)	Lb.	STEE	100	RO	A B
619033	Iron and steel, nonelectric (formerly 608900)	Lb.	STEE	100	RO	A B
619034	Brazing solder (spelter type) (formerly 643998)	Lb.	NONF	100	RO	
619034	Brass and bronze welding electrodes and welding rods (including phosphor bronze) (formerly 645700).	Lb.	NONF	25	RO	B
619034	Phosphor copper brazing rods and wires (formerly 669198).	Lb.	NONF	25	RO	A B
619037	Manganese (formerly 669198)	Lb.	MINL	25	RO	B
619038	Molybdenum (formerly 664945)	Lb.	MINL	None	RO	A B
619039	Cobalt (containing 15 percent or more cobalt by weight) (formerly 663900 and 669925).	Lb.	NONF	None	RO	B
619039	Tin (formerly 656998)	Lb.	NONF	25	RO	B
619039	Copper (formerly 612500)	Lb.	NONF	50	RO	A B
619039	Tungsten, including tungsten carbide (formerly 663900).	Lb.	MINL	None	RO	A B
619039	Other welding rods and wires (formerly 630910, 651200, 654998, and 658998).	Lb.	NONF	100	RO	A

†Applicable to containers only and not to contents.

[1] Corrosion resistant materials are defined in the "General Notes to Appendix A," § 399.1.

[2] The pressure ratings stamped on metal drums and containers are the working pressures, which nearly allow maximum safety margins. The actual pressure capacity is approximately five times the working pressure. (Any containers under this Schedule B number which do not have a pressure rating stamped thereon are not pressure containers and are not subject to the validated license control imposed by this Positive List entry.)

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Aluminum ores, concentrates, scrap, and primary forms (See Special Provisions, §§ 373.1, 373.11, 373.16, 373.24)					
	Aluminum ores and concentrates:					
630010	Bauxite and other aluminum ores (formerly 629000)	L. ton	NONF	1,000	RO	B
630010	Bauxite concentrates, alumina included (formerly 629500)	L. ton	NONF	500	RO	B
630050	Aluminum scrap (new and old) (formerly 630110 and 630070)	Lb.	NONF	25	RO	B
630070	Aluminum metal and alloys in crude form (including ingots, pigs, blooms, and slabs) (formerly 630000)	Lb.	NONF	25	RO	A B C
630301	Aluminum sheets, corrugated	Lb.	NONF	50	RO	A B
630301	Other aluminum plates and sheets, flat and coiled, including strips (.006 inch and over in thickness) (see § 373.24)	Lb.	NONF	50	RO	A B
630310	Aluminum bars and rods, rolled or drawn (¾ inch and over) (report extruded bars and rods in 630320) (formerly 630305)	Lb.	NONF	100	RO	A B C
630320	Aluminum extruded shapes and tubes (drawn and extruded) (specify by name) (formerly 630500)	Lb.	NONF	100	RO	A B C
630340	Aluminum castings and forgings, rough and semifinished (formerly 630500)	Lb.	NONF	100	RO	A B C
630610	Aluminum wire and cable, bare (including aluminum cable, steel reinforced—ACSR) except welding rods and wire (specify by name) (formerly 639000) (report welding rods and wire in 619620)	Lb.	NONF	100	RO	A B C
630650	Aluminum primary forms, n.e.c. (specify by name) (formerly 630500)	Lb.	NONF	100	RO	A B
	Copper ores, concentrates, scrap and primary forms (See Special Provisions, §§ 373.1, 373.11, 373.16, 373.24, 373.29, 373.34, 373.38)					
640100	Copper matte, regulus, unrefined copper as blister or converter copper (copper content)	Lb.	NONF	100	RO	A B
640100	Copper ore and concentrates (copper content)	Lb.	NONF	500	RO	A
641200	Refined copper in cathodes, billets, ingots wire bars and other crude forms (include anodes, formerly 640100) (report copper bars except wire bars in 642400.)	Lb.	NONF	100	RO	A B
641300	Copper scrap (new and old) (see § 373.11 (e))	Lb.	NONF	100	RO	A B
642200	Copper pipe and tubing	Lb.	NONF	100	RO	A B C
642300	Copper plates, sheets, and strips, including nickel-plated	Lb.	NONF	100	RO	A B C
642400	Copper rods and bus bars (report copperweld rods in 642510; and wire bars in 641200.)	Lb.	NONF	100	RO	A B C
642510	Copper wire and cable, bare, for electrical conduction only (formerly 642500) (report electrical insulated copper wire in 709810 to 709885)	Lb.	NONF	50	RO	A B C
642510	Copper wire and cable, bare, other than for electrical conduction (formerly 642500) (report welding rods and electrodes in 619620)	Lb.	NONF	50	RO	A B C
642900	Copper primary forms rough forgings and castings (formerly 649200)	Lb.	NONF	100	RO	A C
64290	Other copper primary forms, n. e. c. (specify by name) (formerly 649998)	Lb.	NONF	100	RO	A
	Copper base alloys (including brass and bronze), scrap, and primary forms (See Special Provisions, §§ 373.1, 373.11, 373.16, 373.24, 373.29, 373.34, 373.38)					
644000	Copper-base alloy scrap (new and old) (formerly 644000, 661000, 669198, and 664998). (See § 373.11 (e).)	Lb.	NONF	100	RO	A B
644100	Brass, bronze and nickel silver, or German silver, ingots (formerly 644100 and 661000)	Lb.	NONF	100	RO	A B

[A = Import certificate. B = DL restrictions. C = Controlled material. Note following "General Notes to Appendix A" for explanation of symbols in this column]

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Copper-base alloys (including brass and bronze), scrap, and primary forms—Continued					
644100	Other copper-base alloy ingots (formerly 664998)	Lb.	NONF	50	RO	A B
644900★	Beryllium copper bars, rods, and other crude shapes (extruded, rolled and drawn) (specify copper content) (formerly 664905)	Lb	NONF	None	RO	A B C
644900	Phosphor copper rods and bars (specify copper content) (formerly 669198)	Lb.	NONF	25	RO	A B C
644900	Brass, bronze and nickel silver, or German silver, bars, rods, and other crude shapes (extruded, rolled and drawn) (formerly 644900 and 661000)	Lb.	NONF	100	RO	A B C
644900	Other copper-base alloy bars, rods, and other crude shapes (extruded, rolled and drawn) (formerly 664998)	Lb.	NONF	50	RO	A B C
645000	Brass and bronze blanks (formerly 647998)	Lb.	NONF	100	RO	B C
645000	Brass and bronze circles (formerly 647998)	Lb.	NONF	100	RO	B C
645000★	Beryllium copper plates, sheets, and strips (specify copper content) (formerly 664905)	Lb.	NONF	None	RO	A B C
645000	Phosphor copper plates, sheets, and flat or coiled strip; and cupro-nickel strip (specify copper content) (formerly 669198)	Lb.	NONF	25	RO	A B C
645000	Brass, bronze and nickel silver, or German silver, plates, sheets, and strips (formerly 645000 and 661000)	Lb.	NONF	100	RO	A B C
645000	Other copper-base alloy plates, sheets, and strips (formerly 664998)	Lb.	NONF	50	RO	A B C
645300	Brass and bronze pipes and tubes (pipe coils included)	Lb.	NONF	100	RO	A B C
645300	Phosphor copper pipes and tubes (specify copper content) (formerly 669198)	Lb.	NONF	25	RO	A B C
645300★	Beryllium copper pipes and tubes (specify copper content) (formerly 669198)	Lb.	NONF	None	RO	A B C
645300	Seamless cupro-nickel pipes and tubes (specify copper content) (formerly 669198)	Lb.	NONF	25	RO	A B C
645300	Other copper-base alloy pipes and tubes (pipe coils included) (formerly 664998)	Lb.	NONF	25	RO	A B C
645700	Cupro-nickel resistance wire; Dumet wire; and thermocouple wire (specify copper content) (formerly 669198)	Lb.	NONF	25	RO	A B C
645700	Phosphor copper wire; cupro-nickel wire other than resistance wire; and nickel-silver wire (specify copper content) (formerly 669198)	Lb.	NONF	25	RO	A B C
645700★	Beryllium copper wire, bare (specify copper content) (formerly 664905)	Lb.	NONF	None	RO	A B C
645700	Brass and bronze wire, bare (including phosphor bronze)	Lb.	NONF	25	RO	A B C
647913	Brass and bronze castings and forgings, rough and semi-finished	Lb.	NONF	100	RO	A C
647913★	Beryllium copper castings, rough and semi-finished (specify copper content) (formerly 669198)	Lb.	NONF	None	RO	A B C
647913	Other copper-base alloy castings and forgings, rough and semi-finished (specify copper content) (formerly 669198)	Lb.	NONF	25	RO	A B C
647950	Brass and bronze in primary forms, n.e.c. (specify by name) (formerly 647998)	Lb.	NONF	100	RO	A B
647950	Other copper-base alloy primary forms, n. e. c. (specify by name) (formerly 664998)	Lb.	NONF	50	RO	A B
	Lead ores, concentrates, scrap, and primary forms (See Special Provisions, §§ 373.1, 373.11, 373.16, 373.24, 373.29, 373.34)					
650106	Lead ore, concentrates, matte, and base bullion (lead content)	C. lb.	NONF	200	RO	A
650500	Lead scrap (new and old)	Lb.	NONF	100	RO	A
650580	Lead pigs, bars and anodes (include blocks and ingots)	Lb.	NONF	100	RO	A B

★The commodities described in this Positive List entry are excepted from the provisions of General In-Transit License GIT. See § 371.9 (c).

[A = Import certificate. B = DL restrictions. C = Controlled material. Note following "General Notes to Appendix A" for explanation of symbols in this column]

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Lead ores, concentrates, scrap, and primary forms—Continued					
650800	Lead sheets, strips, and pipe (include bends)	Lb.	NONF	100	RO	B
650810	Lead plate, including battery plate, not assembled as complete battery units (formerly 651537).	Lb.	NONF	100	RO	B
651510	Type metal	Lb.	NONF	100	RO	B
651515	Antimonial lead	Lb.	NONF	25	RO	B
651517	Babbitt metal (except scrap and dross) (formerly 662000).	Lb.	NONF	100	RO	A B
651519	Lead and lead base alloy primary forms, n.e.c. (specify by name) (formerly 651598).	Lb.	NONF	100	RO	A B
	Nickel ores, concentrates, scrap, and primary forms					
	(See Special Provisions, §§ 373.1, 373.11, 373.16, 373.24, 373.34)					
654501	Nickel ore, concentrates, and matte	Lb.	NONF	300	RO	A B
654503	Nickel metal in ingots, bars, rods, sheets, strips, and other crude forms, including scrap (formerly 654509).	Lb.	NONF	None	RO	A B
654507	Nickel alloy metals in ingots, bars, rodes, sheets, strips, and other crude forms, including scrap (report nickel silver in 644000–645000) (formerly 654505).	Lb.	NONF	100	RO	A B
654508	Nickel-chrome electric resistance wire (formerly 663000).	Lb.	NONF	None	----------	A B
654509	Nickel and nickel alloy primary forms, n. e. c. (specify by name and nickel content) (formerly 654998 and 669198) (report cupro-nickel wire in 645700).	Lb.	NONF	25	RO	A B
	Tin ores, concentrates, scrap, and primary forms					
	(See Special Provisions, §§ 373.1, 373.11, 373.16, 373.24, 373.29)					
656501	Tin ore (formerly 664598)	Lb.	NONF	25	RO	B
656504	Tin alloy scrap (new and old) (including babbitt metal dross and scrap) (formerly 655508 and 664598).	Lb.	NONF	25	RO	----------
656507	Tin metal in ingots, pigs, bars, blocks, anodes, cathodes, slabs, and other crude forms (see § 373.1).	Lb.	NONF	25	RO	B
656519	Tin pipe, plates, sheets, tubes, and other primary forms (specify by name) (formerly 656502 and 656598) (report collapsible tubes in 619950).	Lb.	NONF	25	RO	B
	Zinc ores, concentrates, scrap, and primary forms					
	(See Special Provisions, §§ 373.1, 373.11, 373.16, 373.24, 373.29)					
657010	Zinc ore and concentrates (zinc content) (see § 373.11 (f))	C. lb.	NONF	500	RO	----------
657050	Zinc scrap (zinc content)	C. lb.	NONF	100	RO	B
657070	Zinc dust (zinc content) (formerly 658600) (see § 373.11 (f)).	C. lb.	NONF	25	RO	B
657101	Zinc cast in slabs, pigs, or blocks: Special high grade, containing not over 0.007% lead, not over 0.005% iron, not over 0.005% cadmium, no aluminum, and at least 99.99% zinc.	Lb.	NONF	300	RO	B
657103	High grade, containing not over 0.07% lead, not over 0.02% iron, not over 0.05% cadmium, no aluminum, and at least 99.90% zinc.	Lb.	NONF	300	RO	B
657105	Prime western, containing not over 1.60% lead and not over 0.08% iron.	Lb.	NONF	300	RO	B
657198	Other zinc cast in slabs, pigs, or blocks (formerly 657106, 657111, 657129, and 657198).	Lb.	NONF	100	RO	B
657208	Zinc rolled in sheets, plates, and strips (formerly 657206 and 657209).	Lb.	NONF	100	RO	B
657305	Zinc alloys, except brass and bronze	Lb.	NONF	100	RO	B
657307	Zinc die castings, unfinished	Lb.	NONF	100	RO	B
658801	Battery shells, and parts, unassembled	Lb.	NONF	100	RO	B
658905	Zinc and zinc alloy primary forms, n. e. c. (excluding zinc-coated iron and steel products) (specify by name) (formerly 658998).	----------	NONF	100	RO	B

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Other nonferrous ores, concentrates, scrap and primary forms (except precious)—Continued					
	Molybdenum—Continued					
664553	Molybdenum wire (formerly 669108)	Lb.	MINL	None	RO	A B
664554	Primary forms, n. e. c. (specify by name) (formerly 664945).	Lb.	MINL	None	RO	A B
664557★	Radium metal (radium content) (formerly 664950)	C. mgm	MINL	None	RO	B
	Tantalum:					
664561★	Ores, concentrates, metals and alloys in crude form, and scrap (formerly 664560 and 664960).	Lb.	MINL	None	RO	A B
664563	Tantalum rings and tantalum wire (formerly 669198)	Lb.	MINL	None	RO	A B
664565★	Other primary forms, n. e. c. (specify by name) (formerly 664960).	Lb.	MINL	None	RO	A B
	Titanium, ilmenite, and rutile:					
664570	Ores and concentrates	Lb.	MINL	None	RO	B
664571	Metal and alloys in crude form, and scrap (formerly 664998).	Lb.	MINL	None	RO	A B
664573	Primary forms, n. e. s. (specify by name) (formerly 664998).	Lb.	MINL	None	RO	A B
	Tungsten:					
664580	Ores and concentrates	Lb.	MINL	None	RO	B
664581	Tungsten metal and alloys in crude form, and scrap (specify by name and tungsten content) (formerly 663900).	Lb.	MINL	None	RO	A B
664583	Tungsten carbide die inserts (specify tungsten content) (formerly 663900).	Lb.	TOOL	35	RO	A B
664585	Other tungsten metal and alloys in primary forms, n. e. c. (specify by name and tungsten content) (formerly 663900).	Lb.	MINL	None	RO	A B
	Vanadium:					
664584	Ores and concentrates, vanadic oxide (pentoxide V_2O_5 content) (formerly 663700) (see § 373.11).	C. lb.	MINL	None	RO	A B
664585	Vanadium flue dust (formerly 669198)	Lb.	MINL	25	RO	A B
664585	Metal and alloys in other crude form, and scrap (formerly 664960).	Lb.	MINL	None	RO	A B
664589	Primary forms, n. e. c. (specify by name) (formerly 664960).	Lb.	MINL	None	RO	A B
	Zirconium:					
664595★	Ores and concentrates (including sand)	Lb.	MINL	None	RO	B
664596★	Metal and alloys in crude form, and scrap (formerly 664995).	Lb.	MINL	None	RO	A B
664597★	Primary forms, n. e. c. (specify by name) (formerly 664995).	Lb.	MINL	None	RO	A B
	Nonferrous ores and concentrates, n. e. c. (specify by name) (report radium ore concentrates for industrial use in 839000):					
664598	Strontium	Lb.	MINL	None	RO	A B
664598	Selenium (specify selenium content and grade)	Lb.	MINL	10	RO	B
664598★	Europium rare earth	Lb.	MINL	None	RO	B
664598★	Gadolinium rare earth	Lb.	MINL	None	RO	B
664598★	Lanthanum rare earth	Lb.	MINL	None	RO	B
664598★	Praseodymium rare earth	Lb.	MINL	None	RO	B
664598★	Samarium rare earth	Lb.	MINL	None	RO	B
664598★	Other rare earths, n. e. c.	Lb.	MINL	None	RO	B
664598	Other ores and concentrates, n. e. c. (except rare earths).	Lb.	MINL	None	RO	
	Nonferrous metal and alloys in primary forms, n. e. c. (specify by name):					
664998	Selenium metal (specify selenium content and grade).	Lb.	MINL	10	RO	B
664998	Calcium metal	Lb.	MINL	10	RO	A
664998★	Gallium metal	Lb.	MINL	None	RO	B
664998	Germanium metal	Lb.	MINL	None	RO	A
664998★	Hafnium metal	Lb.	MINL	None	RO	B
664998★	Lanthanum metal	Lb.	MINL	None	RO	B
664998★	Indium metal	Lb.	MINL	None	RO	B
664998★	Rubidium metal	Lb.	MINL	None	RO	B
664998	Strontium metal	Lb.	MINL	10	RO	A
664998	Other rare metals, n. e. c.	Lb.	MINL	None	RO	A
664998	Other metals and alloys in primary forms, n. e. c.	Lb.	MINL	None	RO	A

★The commodities described in this Positive List entry are excepted from the provisions of General In-Transit License GIT. See § 371.9 (c).

692205	Platinum and alloys in ingots, bars, sheets, anodes and other forms, including scrap.	T. oz.	MINL	None	RO	A B
692209	Palladium, rhodium, iridium, osmiridium, ruthenium, and osmium metal, and alloys.	T. oz.	MINL	None	RO	B
692950	Platinum manufactures, n. e. c. (including platinum-plated manufactures and platinum catalysts) (specify by name and platinum content) (formerly 692905).	T. oz.	MINL	None	RO	A B
692990	Platinum allied metal manufactures, n. e. c. (including plated) (specify by name and platinum allied metal content) (formerly 692998).	T. oz.	MINL	None	RO	A
	Electrical machinery and apparatus					
	(See Special Provisions, §§ 373.7, 373.34)					
	Generators, n. e. c. and parts, n. e. c. (report aircraft, automobile, bus, truck, tractor, and industrial engine generators in 709210–709220; generators for electric propulsion motors in 704330):					
700000	Direct current generators, n. e. c.	No.	ELME 1	None	R	A
700100	Alternating current generators, n. e. c.	No.	ELME 2	None	RO	A A
700150	Parts and accessories, n. e. c., specially fabricated for generators (specify by name) (formerly 700000).	----------	ELME 1	100	R	A
	Steam turbine generator sets (turbogenerators):					
700610	Under 500 kilowatts	No.	ELME 1	None	R	A
700805	500 kilowatts up to and including 7,500 kilowatts	No.	ELME 1	None	R	A
700807	Over 7,500 kilowatts	No.	ELME 1	None	R	A
	Welding sets:					
701012	Arc welders: Rotating generator type	No.	ELME 1	None	R	A
701022	Nonrotating type	No.	ELME 1	None	R	A
701032	Resistance welding sets	No.	ELME 1	None	R	A
701105	Electrical generating sets powered by Diesel engines (report switchgear equipment in 703110–703900).	No.	ELME 2	None	RO	A
701140	Self-contained generating sets, except Diesel, ¾ kilowatt and under.	No.	ELME 1	None	R	----------
701150	Self-contained generating sets, except Diesel, over ¾ kilowatt.	No.	ELME 1	None	R	----------
701300	Automotive storage batteries, 6- and 12-volt, lead-acid type.	No.	TRAN	500	R	----------
701910	Power capacitors (static condensers) for power factor corrections (formerly 701900 and 709998).	No.	ELME 1	100	R	----------
	Transforming and converting apparatus, n. e. c., and parts, n. e. c.:					
	Power and distribution transformers:					
702110	Over 100, but not over 500 kilovolt amperes (formerly 702200).	No.	ELME 1	None	R	----------
702150	Over 500 kilovolt amperes (formerly 702100)	No.	ELME 1	None	R	----------
702300	Instrument transformers (specify by name)	No.	ELME 1	None	R	----------
702320	Regulators (specify by name) (formerly 702410)	No.	ELME 1	100	R	----------
702380	Specialty transformers n. e. c. (specify by name) (formerly 702410).	No.	ELME 1	100	R	----------
702420	Parts and accessories, n. e. c., specially fabricated for transformers and regulators included on the Positive List under Schedule B Nos. 702110 through 702380 (formerly 709098).	----------	ELME 1	None	R	----------
702600	Mercury power rectifiers (50 kilowatts and over) (report mercury rectifiers under 50 kilowatts in 702810).	No.	ELME 1	None	R	----------
	Rotating converters:					
702718	Under 150 kilowatts (formerly 702710)	No.	ELME 1	None	R	----------
702725	150 kilowatts and over (formerly 702710 and 702720).	No.	ELME 1	None	R	----------
702810	Selenium battery chargers and other selenium rectifiers, except automotive shop types of 12-volt capacity or less.	No.	ELME 1	None	R	----------

[1] See § 370.6 (a) for exportations of gold requiring authorization from the Treasury Department.

[1] Export authorization for thorium metals and alloys and uranium metal classified under Schedule B No. 664998 is under the exclusive jurisdiction of the Atomic Energy Commission. See § 370.7.

740212	Turret lathes, n. e. c., except bench type (specify by name) (formerly 740200).	No.	TOOL	None	RO	A B
740305	Automatic chucking and between-center lathes	No.	TOOL	None	RO	A B
740308	Gun-boring lathes; cartridge-case trimming lathes; cartridge-head finishing lathes; and shell lathes (specify by name).	No.	TOOL	None	RO	A B
740308	Special spinning lathes for bombs (formerly 740307)	No.	TOOL	None	RO	A
740315	Automatic screw (bar) machines (formerly 740600)	No.	TOOL	None	RO	A B
740325	Vertical boring and turning mills, except vertical turret lathes (formerly 740407).	No.	TOOL	None	RO	A B
740390	Lathes, n. e. c. (specify by name) (formerly 740311)	No.	TOOL	500	RO	A B
740909	Jig boring machines; special boring machines for aircraft bomb nose and tail; and all precision boring machines.	No.	TOOL	None	RO	A B
740409	Cylinder reboring machines, and other reboring machines for garage use (formerly 793180).	No.	TOOL	100	R	
740604	Shell tappers	No.	TOOL	500	RO	A B
740607	Pipe and/or nipple-threading machines	No.	TOOL	None	RO	A B
740607	Tapping machines, vertical multiple spindle, adjustable joint.	No.	TOOL	500	RO	A B
740700	Knee-type milling machines	No.	TOOL	None	RO	A B
740800	Milling machines, n. e. c.:					
	Bed-type milling machines	No.	TOOL	None	RO	A B
740803	Combination miller and planer, with double housing and open side, 48 inches and over.	No.	TOOL	None	RO	A B
740805	Die-sinking machines	No.	TOOL	None	RO	A B
740809	Plano-milling machines, n. e. c.	No.	TOOL	None	RO	A B
740809	Profiling and duplicating machines, except propeller.	No.	TOOL	None	RO	A B
740809	Propeller-profiling machines (cutter and grinder)	No.	TOOL	500	RO	A B
740809	Spar-milling machines	No.	TOOL	500	RO	A B
740809	Thread-milling machines	No.	TOOL	None	RO	A B
741100	Gear cutting machines: All straight-tooth type gear-cutting and/or generating machines.	No.	TOOL	None	RO	A B
741100	Gear generators and gear-cutting machines, spiral bevel.	No.	TOOL	None	RO	A B
741100	Gear hobbers	No.	TOOL	None	RO	A B
741100	Gear shapers	No.	TOOL	None	RO	A B
742000	Drilling machines, upright type, multiple spindle	No.	TOOL	250	R	A B
742100	Radial drilling machines, plain and traversing type, 15-inch column or over.	No.	TOOL	None	RO	A B
742300	Drilling machines, n. e. c. (specify by name) (report rifle drilling machines in 744310): Other deep-hole drills and drilling machines; automatic multiple spindle drilling and/or tapping machines (consisting of a cluster of spindles driven from one power unit); and armor-plate-drilling machines.	No.	TOOL	None	RO	A B
742303	Drilling machines, unit head and way type or vertical, inverted spindle type.	No.	TOOL	None	RO	A B
742600	Planers, over 72 inches	No.	TOOL	None	RO	A B
742680	Plate planers, double housing and open side, 48 inches and over, and rotary planers, double housing and open side, 48 inches and over.	No.	TOOL	None	RO	A

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Machine tools—Continued					
	Power-driven metalworking machine tools (nonportable), and parts—Continued					
742600	Plate edge planers	No.	TOOL	None	RO	A B
742700	Shapers (including slotters) (report gear shapers in 741100).	No.	TOOL	500	RO	A B
743500	Surface grinding machines, gap gauge	No.	TOOL	None	RO	A
743500	Automatic single spindle surface grinders	No.	TOOL	None	RO	A B
743500	Surface grinding machines, multiple spindle type	No.	TOOL	None	RO	A B
743900	External cylindrical universal grinding machines (formerly 744207) (report universal tool and cutter grinders in 744305).	No.	TOOL	None	RO	A B
744000	External cylindrical grinding machines, except universal. (Report universal in 743900.)	No.	TOOL	None	RO	A B
744100	Internal grinding machines	No.	TOOL	None	RO	A B
744205	Broach grinders; and gear-cutter grinders	No.	TOOL	None	RO	A B
744303	Gear-tooth grinding machines	No.	TOOL	None	RO	A B
744305	Honing and lapping machines, except gear	No.	TOOL	250	RO	A B
744306	Thread-grinding machines	No.	TOOL	None	RO	A B
744308	Automatic oscillating race radial grinders; cam grinders; contour profile grinders; jig grinders; and spline grinders.	No.	TOOL	None	RO	A B
744308	Other metal-grinding machines, except bench-type and pedestal grinders valued under $250.	No.	TOOL	None	RO	B
744313	Horizontal boring-drilling-milling machines (combination units).	No.	TOOL	None	RO	A B
744315	Broaching machines	No.	TOOL	None	RO	A B
744316	Rifle drilling machines; and gun reaming and drilling machines (formerly 742300).	No.	TOOL	None	RO	A B
744316	Other rifling and rifle-working machines (formerly 744310).	No.	TOOL	250	RO	A B
744317	Gear-honing, lapping and gear-finishing machines, n. e. c. (specify by name).	No.	TOOL	None	RO	A B
744319	Contour bandsawing and/or filing machines	No.	TOOL	None	R	A
744319	Shaving machines (except gear)	No.	TOOL	250	RO	A B
744319	Other power-driven metalworking machine tools, n.e.c.	No.	TOOL	250	R	
744340	Parts for metalworking machinery included on the Positive List, classified in Schedule B numbers 740005 through 744319, for which validated license is required to R and O country destinations.		TOOL	250	RO	▲
744340	Parts for metalworking machinery included on the Positive List, classified in Schedule B numbers 740005 through 744319, for which validated license is required to R country destinations only.		TOOL	250	R	▲
	Metalworking machines, n. e. c., parts and accessories (including accessories and attachments for machine tools)					
	(See Special Provisions, §§ 373.7, 373.9, 373.16, 373.34)					
	Accessories and attachments, n. e. c., for power-driven nonportable machine tools, n. e. c.:					
744371	Chucks for machine tools	No.	TOOL	100	RO	A B
744381	Metal-cutting tools and specially fabricated parts, n. e. c., for machine operation (not incorporating industrial diamonds) (specify by name) (report metal-cutting dies incorporating industrial diamonds in 745703): Broaching-cutting; gear-cutting; lapping; forming roll sets; all carbide, carbide-tipped, hard-surface steel, and tungsten carbide types; and all other metal-cutting tools (not incorporating industrial diamonds) for use on machines included on the Positive List and classified in Schedule B numbers 740005 through 744319.		TOOL	100	RO	A B

[A = Import certificate. B = DL restrictions. C = Controlled material. Note following "General Notes to Appendix A" for explanation of symbols in this column]

	Accessories and attachments, n. e. c., for power-driven nonportable machine tools, n. e. c.—Continued					
	Accessories and attachments, n. e. c., for machine tools and specially fabricated parts, n. e. c.:					
744383	Collets; arbors; boring bars 4 inches in diameter and over; screw machine tool holders; indexing face plates; and dividing heads.		TOOL	100	RO	A B
744383	Jigs and fixtures, military type		TOOL	None	RO	A B
744383	Parts for military-type jigs and fixtures		TOOL	None	RO	A B
744383	Other accessories and attachments for use on machine tools machinery included on the Positive List and classified in Schedule B numbers 740005 through 744319 except bench centers; parallels; vee blocks; tool holders; miscellaneous centers; drill pads and crotch centers; work driving dogs; tee bolts; clamps; and mandrels.		TOOL	100	RO	A B
744410	Metalworking presses, and specially fabricated parts, n. e. c., except hand-powered presses (formerly 744405).		TOOL	None	RO	A
744450	Sheet and plate metalworking machines (except presses), n. e. c., and specially fabricated parts, n. e. c. (formerly 744405 and 744498).		TOOL	100	RO	A B
	Forging machinery, and specially fabricated parts, n. e. c.:					
744700	Forging presses, heavy-duty		TOOL	None	RO	A B
744700	Forging rolls; and swaging machines		TOOL	None	RO	A B
744700	Drop hammers, and forging hammers, air, steam, or mechanical.		TOOL	None	RO	A B
744700	Headers and forging machines (upsetters)		TOOL	None	RO	A B
744700	Nut-forging machinery		TOOL	100	RO	A B
744700	Special forging machines, bomb nose and tail		TOOL	None	RO	A B
744700	Parts for special forging machines, bomb nose and tail, and heavy-duty forging presses.		TOOL	None	RO	A B
744700	Parts for other forging machinery included on the Positive List under Schedule B No. 744700.		TOOL	None	RO	A
744800	Rolling mill machines, and specially fabricated parts, n. e. c.		TOOL	None	RO	A B
744850	Automatic continuous electrolytic tinning units and specially fabricated parts (formerly 775098).		TOOL	50	RO	A
744850	Electroplating equipment, and specially fabricated parts (formerly 775098).		TOOL	100	R	
	Foundry equipment, and parts:					
745000	Molding machines: rollover type; or jolting and jarring type.	No.	TOOL	None	R	
745000	Core-making machines (formerly 745298)	No.	TOOL	250	R	
745050	Die-casting machines, and specially fabricated parts, n. e. c. (formerly 745505).		TOOL	25	RO	A
745060	Centrifugal casting machines, and specially fabricated parts, n. e. c. (formerly 745298).		TOOL	50	RO	A
745110	Blast cleaning and tumbling machines for castings (formerly 745100).	No.	TOOL	300	R	
745298	Machinery, and parts, for continuous casting of semi-finished steel.		TOOL	250	RO	A
745298	Parts and accessories for: Molding machines, rollover type; or jolting and jarring type; and core-making machines.		TOOL	250	R	
745503★	Diamond dies for power-driven metalworking machines (state size). (See §§ 373.1, 373.9.)	No.	TOOL 1	None	RO	A B
745509	Machinery for drawing wire and tubing		TOOL	None	RO	A
745509	Parts and accessories for machinery for drawing wire and tubing.		TOOL	250	RO	A
745805	Gas welding machines, except hand-operated		TOOL	None	R	
745805	Parts and accessories for gas welding machines		TOOL	250	R	
745805	Machines for flame hardening		TOOL	None	RO	A
745990	Automatic balancing and correcting machines (formerly 745501).	No.	TOOL	None	RO	A B
745990	Dynamic balancing machines for balancing metal parts (formerly 745501).	No.	TOOL	None	RO	A B

★The commodities described in this Positive List entry are excepted from the provisions of General In-Transit License GIT. See § 371.9 (c).

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Metalworking machines, n. e. c., parts and accessories (including accessories and attachments for machine tools)—Continued					
746010	Parts for dynamic balancing machines for balancing metal parts (formerly 745598).		TOOL	250	RO	A
746010	Horizontal multiple-slide wire and strip forming machines, and specially fabricated parts, n. e. c. (formerly 745598).		TOOL	25	RO	A
746010	Portable machine tools so designed that they must be attached to the work to operate (formerly 745598).		TOOL	None	R	A
746010	Specially fabricated parts and accessories, n. e. c. for portable machine tools so designed that they must be attached to the work to operate (formerly 745598).		TOOL	250	R	A
	Textile, sewing, and shoe machinery					
	(See Special Provisions, §§ 373.7, 373.34)					
	Textile machinery:					
750800	Spinning and twisting machinery, rayon yarn (report filament spinning machinery and spinnerettes for synthetic fibers in 750850).		GIEQ	None	R	A
750850	Rayon filament extrusion and spinning machines; and spinning pumps (formerly 754800).		GIEQ	None	RO	A
750850	Other rayon filament and band forming machinery, and parts, except spinnerettes (formerly 754800).		GIEQ	50	R	A
750850	Spinnerettes for yarns of 150 denier and greater (formerly 754800).		GIEQ	None	RO	A
	Other industrial machines and parts					
	(See Special Provisions, §§ 373.7, 373.34)					
	Food and beverage processing machines, and parts:					
	Cannery machines, and specially fabricated parts, n. e. c.:					
761250	Piping specially fabricated for cannery machines, and made of or lined with any corrosion-resistant material as defined in the "General Notes to Appendix A."		GIEQ	25	RO	A
	Vegetable-oil mill machines, and specially fabricated parts, n. e. c.:					
761600	Piping specially fabricated for vegetable-oil mill machines, and made of or lined with any corrosion-resistant material as defined in the "General Note to Appendix A."		GIEQ	25	RO	A
	Food-processing machinery, and parts, n. e. c.:					
761950	Piping specially fabricated for food and beverage processing machines, n. e. c., and made of or lined with any corrosion-resistant material as defined in the "General Notes to Appendix A."		GIEQ	25	RO	A
763030	Rubber tire and tube building machines (specify by name) (formerly 763000).	No.	GIEQ	500	RO	A
763040	Rubber tire repairing, recapping and retreading machines, n. e. c. (specify by name) (formerly 763000).	No.	GIEQ	500	RO	
763050	Parts, n. e. c., specially fabricated for rubber tire and tube building, tire repairing, recapping and retreading machines (specify by name) (formerly 763000).		GIEQ	500	RO	A
763060	Rubber insulating machines, and specially fabricated parts, n. e. c. (formerly 775098).		GIEQ	100	R	
763060	Other rubber processing, rubber-working, and rubber products manufacturing machines, n. e. c., and specially fabricated parts, n. e. c. (specify by name) (formerly 763000).		GIEQ	500	RO	A
	Air-conditioning and refrigerating equipment, n. e. c., and parts, n. e. c. (electric, gas, gasoline and kerosene operated):					
764650	Reciprocating compressor units, over 10 HP, fabricated of or lined with any corrosion-resistant materials as defined in the "General Notes to Appendix A."	No.	GIEQ	None	RO	A
764650	Reciprocating compressor units, over 10 hp., designed for delivery pressure greater than 150 pounds per square inch, gauge reading, and/or with intake capacity greater than 190 cubic feet per minute.	No.	GIEQ	None	RO	A

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required	Commodity lists (see headnote)
	Other industrial machines and parts—Continued					
	Air-conditioning and refrigerating equipment, n. e. c., and parts, n. e. c. (electric, gas, gasoline and kerosene operated)—Continued					
764710	Centrifugal refrigerating units incorporating compressors, rotary blowers, exhausters or fans fabricated of or lined with any corrosion-resistant materials as defined in the "General Notes to Appendix A."	No.	GIEQ	None	RO	A
764710	Centrifugal refrigerating units designed for delivery pressure of 2 atmospheres or more.	No.	GIEQ	None	RO	A
765710	Self-contained air conditioners, under 2-ton capacity, except window-mounted types.	No.	GIEQ	100	RO	A
765750	Self-contained air conditioners, 2-ton capacity or over.	No.	GIEQ	100	RO	A
766010	Auxiliary and accessory equipment, commercial, n. e. c. *except humidifiers*, and specially fabricated parts, n. e. c.		GIEQ	100	R	A
766030	Parts, n. e. c., specially fabricated for types of air-conditioning and refrigerating equipment included on the Positive List under Schedule B Nos. 764650 through 765650—for foreign assembly or manufacture of air conditioning and refrigeration equipment.		GIEQ	100	RO	A
766050	Parts, n. e.c., specially fabricated for types of air-conditioning and refrigerating equipment included on the Positive List under Schedule B Nos. 764650 through 765750—for replacement in air conditioning and refrigeration equipment.		GIEQ	25	RO	A
	Controls, regulators, indicators, meters, and timers, n. e. c., and specially fabricated parts, n. e. c., for commercial and domestic central and space heating, ventilating, air conditioning and air cooling equipment (specify by name):					
766950	Temperature regulators, electric (formerly 709098)		GIEQ	100	R	
766950	Temperature regulators, except electric; and specially fabricated parts (formerly 774098).		GIEQ	None	R	
766950	Thermometers, bimetallic and glass remote bulb; and specially fabricated parts (formerly 774098).		GIEQ	None	R	
766950	Controls, regulators, indicators, meters, and timers, for ventilating, air conditioning and air cooling equipment; and specially fabricated parts, n. e. c. (formerly 766010).		GIEQ	100	R	
	Industrial process indicating (measuring) recording, and/or controlling instruments, n. e. c., and specially fabricated parts, n. e. c. (for measuring and/or controlling temperatures, pressure, level, flow, humidity, moisture, motion, rotation, gas analysis, chemical properties, and variables) (specify by name):					
766970	Gauges for measuring pressures in excess of 100 atmospheres (gauge pressures of 1,470 pounds per square inch or 103 kilograms per square centimeter) (formerly 774098).		GIEQ	25	RO	A
766970	Parts specially fabricated for gauges for measuring pressures in excess of 100 atmospheres (gauge pressures of 1,470 pounds per square inch or 103 kilograms per square centimeter) (formerly 774098).		GIEQ	None	RO	A
766970★	Impulse registers or counters (over 20 counts per second), and specially fabricated parts (formerly 919098).		GIEQ	None	RO	A B
766970	Optical pyrometers (formerly 919098)		GIEQ	None	RO	A
766970	Radiation pyrometers (formerly 919098)		GIEQ	None	RO	A
766970	Stroboscopes, electronic (formerly 919098)		GIEQ	None	RO	
766970	Thermocouples manufactured from platinum or platinum alloys (formerly 919098).		GIEQ	None	RO	A
766970★	Vacuum gauges, ionization types, for laboratory use (formerly 919098).		GIEQ	None	RO	B
766970	Vacuum gauges, ionization types, except for laboratory use (formerly 774098).		GIEQ	None	RO	

★The commodities described in this Positive List entry are excepted from the provisions of General In-Transit License GIT. See § 371.9 (c).

775055	Sulfur burners (formerly 775050)	----------	GIEQ	None	RO	A
775055	Piping specially fabricated for chemical and pharmaceutical processing and manufacturing machines and made of or lined with any corrosion-resistant material as defined in the "General Notes to Appendix A" (formerly 775050).	----------	GIEQ	None	RO	A
775055	Vacuum stills (report operating vacuum in millimeters mercury pressure absolute) (formerly 775050).	----------	GIEQ 1	None	R	A
	Other industrial machines and parts—Continued					
775055	Chemical and pharmaceutical processing and manufacturing machines, n. e. c., and specially fabricated parts, n. e. c. (report spinning pumps in 775030; report furnaces under appropriate Schedule B No. according to type of furnace, e. g., electric melting and refining furnaces for the production of chemicals, 707415)—Continued Other chemical and pharmaceutical processing and manufacturing machines, and specially fabricated parts, n. e. c. (formerly 775050).	----------	GIEQ 1	100	RO	A
775075	Concrete block machines, high speed (capacity of 200 blocks or more per hour), and specially fabricated parts (formerly 721100).	----------	CONS	100	R	----------
775080	Industrial water-treatment equipment	----------	MINE	100	RO	A
775090	Lubrication equipment, n. e. c., and specially fabricated parts, and accessories, n. e. c.: Grease cups, lubricators, nozzles and oil cups, brass and bronze (formerly 647998).	----------	GIEQ	100	RO	----------
775100	Nonelectric industrial furnaces, kilns, lehrs, and ovens, and parts (report electric furnaces, kilns and ovens in 702415 707402): Sintering furnaces (formerly 733105)	No.	MINE	None	RO	A
775115	Metal melting furnaces, nonelectric, industrial type, for laboratory use (formerly 775022).	No.	MINE	100	R	----------
775120	Metal heat treating furnaces, nonelectric, industrial type, for laboratory use (specify type) (formerly 775022).	No.	MINE	100	R	----------
775140	Nonelectric industrial furnaces, n. e. c., industrial type, for laboratory use (specify by name) (formerly 775025).	No.	MINE	100	R	----------
775140	Horizontal rotary cylindrical kilns (formerly 775025).	No.	MINE	100	R	----------
775140	Rotary kilns, for original cement- and lime-making machinery installations (formerly 775027).	No.	MINE	1,000	R	----------
775150	Pressure top equipment for blast furnaces (formerly 775098).	----------	TOOL	None	RO	A
775150	Parts specially fabricated for rotary kilns, for original cement- and lime-making machinery installations (formerly 775027).	----------	MINE	1,000	R	----------
775150	Parts spcally fabricated for horizontal rotary cylindrical kilns (formerly 775025).	----------	MINE	100	R	----------
775310	Mixing machines, n. e. c., and specially fabricated accessories and parts, n. e. c. (specify by name): Colloid mills (formerly 775050)	----------	GIEQ	100	R	----------
775330	Processing vessels, non-agitated, n. e. c., and specially fabricated accessories and parts, n. e. c. (specify by name): Processing vessels, non-agitated, n. e. c., for laboratory use, operating at pressures over 500 pounds per square inch (formerly 919998).	----------	GIEQ	100	RO	A
775330	Pressure vessels and vacuum vessels, for industrial use (formerly 775098).	----------	GIEQ	100	RO	A
775330	Tanks, vats, kettles and allied fixtures made of or lined with any corrosion-resistant material as defined in the "General Notes to Appendix A" (formerly 761250, 761900, 761950, 775050 and 775098).	----------	GIEQ	None	RO	----------
775330	Distillation equipment made of copper, and designed for gauge pressures of less than 50 pounds per square inch or vacuums less than 50 mm. of mercury absolute (formerly 775098).	----------	GIEQ	100	R	A
775330	Other processing vessels, non-agitated, n. e. c., for industrial use, operating at pressures over 200 psi, and specially fabricated parts, n. e. c. (formerly 761250, 761900, 775050, and 775098).	----------	GIEQ	None	RO	A
775360	Separators and collectors, industrial process type, n. e. c., and specially fabricated accessories and parts, n. e. c. (specify by name): Centrifugal counter-current solvent extractors, and specially fabricated parts, n. e. c. (formerly 761950, 775050, and 775098).	----------	GIEQ	None	RO	A

★The commodities described in this Positive list entry are excepted from the provisions of General In-Transit License GIT. See § 371. (e

	Other industrial machines and parts—Continued					
	Separators and collectors, industrial process type, n. e. c., and specially fabricated accessories and parts, n. e. c. (specify by name)—Continued					
775360★	Centrifuge bowls, stainless steel (formerly 620998, 759300, 761100, 761400, 761600, 761950, 775050, and 775098).	----------	GIEQ	None	RO	B
775360★	Centrifuges, electric, stainless steel, solid-bowl types (formerly 761100, 761400, 761600, 761950, 775050, and 775098).	----------	GIEQ	None	RO	B
775360	Electromagnetic separators of the following types: (a) cross-belt types; (b) revolving disc or ring types; (c) induced roll types, either induced or primary; (d) magnetic pulleys or drums 30 inches in diameter and over, either induced or primary; and specially fabricated parts, n. e. c. (formerly 775070 and 775098).	----------	GIEQ	100	RO	----------
775360★	Electrostatic precipitators, for blowing and ventilating machinery, and specially fabricated parts, n. e. c. formerly 764100).	----------	GIEQ	None	RO	A B
775360	Electrostatic precipitators, except for blowing and ventilating machinery, and specially fabricated parts, n. e. c. (formerly 709998, 762500, and 775050).	----------	GIEQ	None	RO	A
775360	Electrostatic separators having a voltage of more than 1,000 volts across the air gap; and specially fabricated parts, n. e. c. (formerly 775098).	----------	GIEQ	None	RO	A
775360	Filters, acid-resisting, and chemical (formerly 775050).	----------	GIEQ 1	100	R	----------
775360	Liquid solvent extraction equipment for processing chemicals and pharmaceuticals, except centrifugal counter-current solvent extractors; and specially fabricated parts, n. e. c. (formerly 775050).	----------	GIEQ 1	100	R	----------
775360	Solvent-recovery machinery for vegetable-oil mills; and specially fabricated parts, n. e. c. (formerly 761960).	----------	GIEQ	None	R	----------
775360	High vacuum freeze-drying equipment, and specially fabricated parts, n.e.c. (formerly 775098).	----------	GIEQ	100	RO	A
775380	Crushing, pulverizing and screening machines, n. e. c., and specially fabricated accessories and parts, n. e. c. (specify by name): Crushers and grinders (formerly 775027, 775050, 775070, and 775098).	----------	GIEQ	100	R	----------
775380	Specially fabricated parts for crushers and grinders for cement- and lime-making machinery installations (formerly 775027).	----------	GIEQ	25	R	----------
775380	Specially fabricated parts for other crushers and grinders (formerly 775050, 775070, and 775098).	----------	GIEQ	100	R	----------
775400	Variable speed transmissions (formerly 775098)	----------	GIEQ	100	R	----------
775998	Industrial manufacturing and service-industries machines, n. e. c., and specially fabricated parts, n. e. c. (specify by name): Tablet machines (for compressing tablets and pills (formerly 775050).	----------	GIEQ 1	100	R	----------
775998	Piping specially fabricated for industrial manufacturing and service-industries machines, n. e. c., and made of or lined with any corrosion-resistant material as defined in the "General Notes to Appendix A."	----------	GIEQ	None	RO	A
775998	Fertilizer-manufacturing machinery and specially fabricated parts, n. e. c. (formerly 775098).	----------	GIEQ	100	R	----------
	Agricultural machines, implements, and parts					
	Insecticide sprayers and dusters (report parts in 787190):					
780730	Power sprayers, including traction type (formerly 780800).	No.	AGMT	100	R	----------
780770	Power dusters, including traction type (formerly 780800).	No.	AGMT	100	R	----------
787005	Portable and semi-portable irrigation systems, farm type (including specially fabricated pipe, sprinklers, nozzles, and connections), and specially fabricated parts, n. e. c. (formerly 787150 and 787190) (report pumps in 770900–770980) (see § 399.2, Int. 5).	----------	AGMT	100	RO	B
	Tractors, parts, and accessories					
	(See Special Provisions, §§ 373.7, 373.16, 373.34)					
	Tractors (except contractors' wheel type, and industrial type) (report horsepower rating according to Nebraska Maximum Test or manufacturers' equivalent) (report contractors' wheel type in 722024; industrial type in 725020):					
	Tracklaying tractors, new:					
787310	Under 35 drawbar horsepower	No.	CONS 1	None	R	----------
787440	35 under 50 drawbar horsepower	No.	CONS 1	None	RO	A
787490	50 under 70 drawbar horsepower	No.	CONS 1	None	RO	A B
787540	70 under 95 drawbar horsepower	No.	CONS 1	None	RO	A B
787560	95 and over drawbar horsepower					
	Track-laying tractors, used and rebuilt:					
787593	Under 50 drawbar horsepower	No.	CONS 1	None	R	----------
787593	50 under 95 drawbar horsepower	No.	CONS 1	None	RO	A
787597	95 and over drawbar horsepower	No.	CONS 1	None	RO	A
	Wheel-type tractors, new:					
	Row-crop type tractors, new:					
787610	8 under 15 belt horsepower	No.	AGMT	None	R	----------
787630	15 under 25 belt horsepower	No.	AGMT	None	R	----------
787660	25 under 30 belt horsepower	No.	AGMT	None	R	----------
787680	30 under 35 belt horsepower	No.	AGMT	None	R	----------
787700	35 under 60 belt horsepower	No.	AGMT	None	RO	A
787709	60 and over belt horsepower					
	Standard wheel type tractors, new:					
787710	8 under 20 belt horsepower	No.	AGMT	None	R	----------
787740	20 under 25 belt horsepower	No.	AGMT	None	R	----------
787760	25 under 35 belt horsepower	No.	AGMT	None	R	----------
787790	35 under 45 belt horsepower	No.	AGMT	None	R	----------
787795	45 under 60 belt horsepower	No.	AGMT	None	RO	A
787795	60 and over belt horsepower					
	Row-crop and standard wheel type tractors, used:					
787890	Under 60 belt horsepower	No.	AGMT	None	RO	A
787890	60 and over belt horsepower	No.	CONS 1	250	R	----------
788901	Parts and accessories, n. e. c., specially fabricated for track-laying tractors (report engines in 714320–714360 and 714710–714910; attachments in 722030).	----------	AGMT	250	R	----------
788905	Parts and accessories, n. e. c., specially fabricated for wheel type tractors, except garden tractors (report engines in 714320–714360 and 714710–714910; attachments in 722030; contractors' and industrial type tractor parts in 722025 and 725050).	----------	AGMT	250	R	----------

	Aircraft, parts, and accessories					
	(See Special Provisions, §§ 373.2, 373.7, 373.34)					
794960	Landing mats, aircraft (see § 373.2)	----------	STEE	100	RO	A
794960	Test kits for aircraft instruments	----------	ELME 1	100	R	----------
794960	Test sets for ignition harnesses	----------	ELME 1	100	R	----------
794960	Other aircraft training, ground handling and maintenance equipment.[1]	----------	TRAN	100	R	----------
	Watercraft					
	(See Special Provisions, §§ 373.7, 373.34)					
795155	Parts specially fabricated for recreational watercraft, whether or not engine-equipped, 18 feet in length and over; and parts specially fabricated for other watercraft, 18 feet in length and over (including but not limited to tankers, tank barges, and whaling factories) (formerly 799998).	----------	TRAN	100	RO	A
795165	Parts and accessories, n. e. c., specially fabricated, for military watercraft, except converted (formerly 795899).[2]	----------	TRAN	25	R	----------
795170	Propeller shafts (formerly 715900)	Lb.	TRAN	250	R	----------
795170	Boat propellers, brass or bronze, of 12 inch diameter and over, and blades for such propellers (formerly 799983).	Lb.	TRAN	None	RO	▲
795170	Boat propellers, metal, except brass or bronze, for watercraft 18 feet in length and over, and blades for such propellers (formerly 799988).	Lb.	TRAN	100	RO	▲
	Railway transportation equipment					
	(See Special Provisions, §§ 373.7, 373.34)					
	Locomotives, railroad service, except switching type (include combination road and switching type) (report electrical mining and industrial locomotives in 705560):					
796102	Steam, new (formerly 711400)	No.	TRAN	None	RO	A B
796104	Straight electric, new (formerly 704520)	No.	TRAN	None	RO	A B
796106	Diesel, nonelectric, new (formerly 714100)	No.	TRAN	None	RO	A B
796108	Diesel-electric, new (formerly 714100)	No.	TRAN	None	RO	A B
796109	Other, new (specify type) (formerly 714000)	No.	TRAN	None	RO	A B
796111	Locomotives, railroad service, switching type, new (formerly 704520, 711400, 714000, and 714100).	No.	TRAN	None	RO	A B
796112	Locomotives, industrial, including surface mine (except electric), new (formerly 711400, 714000, and 714100).	No.	MINE	None	RO	A B
796114	Underground mine locomotives, steam, new (formerly 711400).	No.	MINE	None	R	A
796114	Other underground mine locomotives (except electric) new (formerly 733910).	No.	MINE	None	R	A
796117	Used and rebuilt underground mine locomotives, except steam and electric (formerly 733910).	No.	TRAN	None	RO	A
796117	Other used and rebuilt locomotives, n. e. c. (formerly 704520, 711400, 714000, and 714100).	No.	TRAN	100	R	----------
796124	Self-propelled street, rapid transit, and interurban cars, new, n. e. c. (specify type) (formerly 796110) (report passenger cars, electric, in 796118; and trackless trolley coaches in 796122).	No.	TRAN	100	R	----------
796126	Railway motor coaches, self-propelled, new (formerly 796110).	No.	TRAN	100	R	----------

[1] Link-type trainers and two targets and parts require export authorization from the Department of State. See § 370, Note 1.

[2] Turrets for naval vessels; armor plate for naval vessels, mine layer parts and accessories; mine sweeper parts and accessories; and mine trawler parts and accessories require export authorization from the Department of State. See § 370.5, Note 1.

999960	Miscellaneous military and naval equipment, n. e. c., and specially fabricated parts, n. e. c. (specify by name).	----------	CDGS	None	RO	----------

§ 399.2 *Appendix B—commodity interpretations.*

The commodity interpretations set forth herein are for use in determining (1) the appropriate Schedule B number under which certain commodities are classified, or (2) the validated license requirements for these commodities. They are intended to clarify the question of control where it has been demonstrated that such clarification may prove helpful to the export community, and where such control is not apparent from the Positive List and the regulations.

INTERPRETATION 1: PIPE: OIL COUNTRY OR LINE FOR PUMP INSTALLATION PURPOSES

A maximum of 250 feet of oil country pipe or line pipe, classified in Schedule B Nos. 606210–606280, may be exported under general license, except to Subgroup A, Hong Kong, and Macao (see Parts 371 and 384 of this subchapter); provided such pipe accompanies the pump requiring its use for installation purposes, and also provided such pipe is of appropriate size and type for use with that pump. A validated license is required for any quantity in excess of 250 feet. If, however, the pipe is being shipped separately from the pump, a validated license is required for the full amount of the shipment if it exceeds the GLV value of the commodity.

INTERPRETATION 2: EXPORT OF MACHINES CONTAINING A TOOL OR DEVICE INCORPORATING DIAMONDS

(1) Machines containing as an integral part thereof a tool or device incorporating diamonds are included on the Positive List, and a validated license is required for export of such a machine to any foreign destination.

(2) This interpretation in no way changes the special provisions for diamonds set forth in § 373.9 of this subchapter.

INTERPRETATION 3: BALL AND ROLLER BEARINGS AND SPECIALLY FABRICATED PARTS

(1) A ball or roller bearing physically incorporated in a segment of a machine or in a complete machine prior to shipment loses its identity as a bearing and the machine or segment of machinery containing the bearing is the item subject to export license requirements.

(2) A ball or roller bearing not incorporated in a segment of a machine prior to

shipment but shipped as a component of a complete unassembled (knocked-down) machine is considered a component of the machine, and the complete machine is the item subject to export license requirements.

(3) Ball and roller bearings shipped as spares or replacements are classified in Schedule B Nos. 769100–769315 (ball and roller bearings and specially fabricated parts). This applies to separate shipments of ball and roller bearings and ball and roller bearings shipped with machinery or equipment for which they are intended to be used as spares or replacement parts.

INTERPRETATION 4: THERMOMETERS

[Deleted April 1, 1952.]

INTERPRETATION 5: PORTABLE AND SEMI-PORTABLE IRRIGATION SYSTEMS, FARM TYPE

Commodity	Schedule B No.
Portable and semiportable irrigation systems, farm type, including specially fabricated pipe [1] (not to exceed 8 inches in diameter) and specially fabricated fittings.	787005
Pipe as spares or replacements:	
Specially fabricated [1]	787005
Not specially fabricated	Report in tubular products according to material (e. g., aluminum, 630320).
Fittings as spares or replacements:	787005
Specially fabricated for irrigation systems	Report as "pipe fittings," according to type and material (e. g., aluminum, 618959).
Not specially fabricated for irrigation systems:	
If identifiable as pipe fittings	Report as "manufactures," according to material (e. g., aluminum, 619950).
If not identifiable as pipe fittings	Report in appropriate pump classification (770900–770980).
Pumps, whether or not shipped with the irrigation system	

[1] At least one of the following descriptions shall be applicable in describing portable and semiportable irrigation pipe in order to consider it "specially fabricated": (1) Permanently attached handles for easy handling; (2) attached quick-action couplings; (3) punched, drilled, beaded and/or cupped pipe ends for special adapters; (4) 10 percent or more of pipe area perforated.

INTERPRETATION 6: MACHINERY AND PARTS

(1) *Where an assembled machine or unit of equipment is being exported.* Where one or more assembled machines or units of equipment are being exported, the individual component parts which are physically incorporated into the machine or equipment do not require a separate validated export license. The validated license or the general license under which the complete machine or unit of equipment is exported will also cover its component parts, provided that: No special provisions or interpretations obtain (for example, as in the case of certain tools containing diamonds); that the parts are normal and usual components of the machine or equipment being exported; or the physical incorporation is not used as a device to evade the requirement for a validated export license.

(2) *Where parts are exported as spares, replacements, for resale, or for stock.* Where parts are exported as spares, replacements, for resale, or for stock, a validated export license is required if the particular part is on the Positive List to the intended destination.

INTERPRETATION 7: PARACHUTES, PARTS, AND FITTINGS

Parachutes, parts and fittings are considered implements of war and exportations thereof are controlled by the Department of State and not the Department of Commerce (see § 370.5 of this subchapter). These include complete parachutes, canopies (parachutes with the shroud lines removed), shroud lines, pilot chutes, containers, harnesses, or parts and fittings therefor. Export licenses issued by the Secretary of State are required for such exportations, including those sent as gifts.

INTERPRETATION 8: QUARTZ CRYSTAL PLATE

Quartz crystal plate is a piece of quartz crystal cut in such a way as to be active piezo-electrically. It may or may not be mounted with metal electrodes applied to its surfaces.

All quartz crystal plates, mounted or unmounted, are classified under Schedule B No. 595090, and are subject to the export control regulations applicable thereto.

INTERPRETATION 9: STEEL SPRINGS

Commodity	Schedule B No.
Steel springs, specially fabricated: [1]	
Spare or replacement parts for a machine	Report in Schedule B class provided for "parts" for the specific machine.
Spare or replacement parts for an article other than a machine.	Report in Schedule B class provided for "parts" of the specific commodity. If no such class is provided, report in 613839.

[1] A "specially fabricated" spring is one which has been so constructed as to be usable with only one machine or type of machine for which a single classification is provided in Schedule B, or for a well-defined group of the same type of machines, involving more than one Schedule B classification.

§ 399.3 *Appendix C — Commodity Processing Codes.*

The following commodity processing code symbols shall be used by applicants in preparing applications for export licenses:

Schedule B No.	Commodity group	Processing Code

(processing code TNFL), the tolerance of 10 percent, and, in the case of raw cotton, except linters, a tolerance of two percent, is allowed on the basis of the actual quantity stated in the license. Where an amount equivalent to the quantity stated on the license has been shipped, no further shipment may be made under the license.

c. The note following paragraph (e) *Partial shipments* remains unchanged.

This part of the amendment shall become effective as of June 12, 1952.

2. Section 373.1 *Export licensing general policy* is amended in the following particular:

Paragraph (b) *Commodities subject to this export licensing policy*, subparagraph (2) is amended by deleting therefrom the following entry:

Commodity:	Schedule B No.
Core drills, mounted or unmounted	730840

This part of the amendment shall become effective as of June 12, 1952.

3. Section 373.9 *Special provisions for diamonds*, paragraph (c) *Application requirements* is amended in the following particular:

Subdivision (iii) of subparagraph (3) *Tools incorporating industrial diamonds* of paragraph (c) is amended to read as follows:

(iii) Applications for licenses to export diamond grinding wheels, sticks, hones and laps, Schedule B No. 540905, must state the quantity and size of each commodity, the carat weight of the diamond content of each unit, the size of the grit or grain, the type of bond, and the concentration.

This part of the amendment shall become effective as of June 19, 1952.

4. Section 373.23 *Special provisions for exportations to Sweden and the Belgian Congo* is amended to read as follows:

§ 373.23 *Special provisions for exportations to Austria, the Belgian Congo or Sweden.* Each applicant for a license to export commodities to Austria, the Belgian Congo or Sweden, shall show in the space provided on the application, Form IT–419, the number of the import certificate or other import authorization upon which the application is based.

This part of the amendment shall become effective as of August 4, 1952.

5. Section 373.24 *Statement of past participation in exports for certain commodities* is amended in the following particular:

Paragraph (b) *Commodities requiring statement of past participation*, subparagraph (3) *All controlled materials and certain additional commodities with processing code NONF* is amended by adding thereto the following entry:

Commodity	Submission dates	
	Third quarter 1952	Fourth quarter 1952
Other nonmetallic minerals (precious included)		
Sulfur, crushed, ground, refined, sublimed and flowers.	July 1–July 31, 1952	Oct. 1–Oct. 31, 1952.
Industrial chemicals		
Sulfuric acid, all grades	do	Do.

6. Section 373.35 *Special provisions for plumbers' brass goods* is hereby deleted.

This part of the amendment shall become effective as of June 19, 1952.

7. Section 373.51 *Supplement I: Time schedules for submission of applications for licenses to export certain Positive List commodities* is amended in the following particulars:

a. The following entries and related submission dates for the Third and Fourth Quarters 1952 are added thereto:

Dept. of Commerce Schedule B No.	Commodity	Submission dates	
		Third quarter 1952	Fourth quarter 1952
	Other nonmetallic minerals (precious included)		
571500	Sulfur, crushed, ground, refined, sublimed and flowers.	July 1–July 31, 1952	Oct. 1–Oct. 31, 1952.
	Industrial chemicals		
839900	Sulfuric acid, all grades	do	Do.

[1] For exportations to Austria, the applicant must show the Austrian Import identification number.

KARL L. ANDERSON,
Acting Director,
Office of International Trade.

JULY 7, 1952.

[F. R. Doc. 52–7579: Filed, July 14, 1952; 8:45 a. m.]

[6th Gen. Rev. of Export Regs., Amdt. 1[1]]

PART 372—PROVISIONS FOR INDIVIDUAL AND OTHER VALIDATED LICENSES

PART 373—LICENSING POLICIES AND RELATED SPECIAL PROVISIONS

PART 382—DENIAL OR SUSPENSION OF EXPORT PRIVILEGES

PART 384—GENERAL ORDERS

MISCELLANEOUS AMENDMENTS

1. Section 372.12 *Weight and volume tolerance* is amended in the following particulars:

a. Paragraph (c) *Maximum tolerance allowed* is amended by adding thereto the following unnumbered subparagraph:

Where an amount equivalent to the quantity stated on the license has been shipped, no further shipment may be made under the license.

b. Paragraph (e) *Partial shipments* is amended to read as follows:

(e) *Partial shipments.* Whenever one or more partial shipments of the licensed commodity have been made, the 10 percent tolerance is allowed only on the unshipped balance, except that in the case of shipments of iron and steel products (processing code STEE), and tin plate

[1] Parts 1, 2, 5, and 8 of this amendment were published in Current Export Bulletin No. 670, dated June 12, 1952. Parts 3, 4, 6, and 9 in Current Export Bulletin No. 671, dated June 19, 1952. Part 7 was published partly in Current Export Bulletin No. 670 and partly in No. 671.

Kong" as port of discharge or "Hong Kong in-transit to Singapore", or any other similar designation indicating Hong Kong as port of discharge, may not be cleared without a validated export license specifically authorizing transshipment at Hong Kong.

Thereafter, effective February 14, 1952, the above instructions were modified to provide that shipment of all commodities under General License GRO may be transshipped at Hong Kong without the necessity of obtaining a validated license, provided (1) such transshipments are made under a through bill of lading to a destination outside of Subgroup A, Hong Kong, or Macao, and (2) the shipment is maintained in the custody of the originating or on-forwarding carrier at all times.

Effective June 19, 1952, the instructions are further modified to provide that, subject to the provisions shown above in (1) and (2), commodities shipped under a license validated for an ultimate destination other than Hong Kong may be transshipped at Hong Kong without the necessity of obtaining specific authorization from the Office of International Trade on the validated license.

For purposes of this note, a through bill of lading includes a contract of carriage with a carrier for transportation from the United States of the commodities to the country of ultimate destination named on the authenticated shipper's export declaration. The actual transportation may be made by more than one carrier and may involve more than one transportation document.

This part of the amendment shall become effective as of June 19, 1952.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245, 3 CFR 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59, 3 CFR 1948 Supp.)

b. The following corrected entry is substituted for the corresponding entry presently shown:

Name and address	Effective date of order	Expiration date of order	Export privileges affected	Federal Register citation
Stuyvadorp, Opslag, Controle en Expeditiebedrijf "Symhoven N.V.", Veerhaven 14-16, Rotterdam, Netherlands.	9-24-51	Duration	General and validated licenses, all commodities, any destination (formerly related to Leopold L. Kolisch, which see).	16 F. R. 10085, 10-5-51.

9. The note following § 384.5 *Order revoking certain general licenses to mainland of China (including Manchuria), Hong Kong, and Macao* is amended to read as follows:

NOTE: The Office of International Trade issued instructions to collectors of customs, effective January 5, 1951, as follows: General and validated license shipments, which are manifested for Singapore or other ports outside Subgroup A, Hong Kong, and Macao and which proceed through Hong Kong only for the purpose of exchanging bills of lading so as to obtain a bill of lading from Hong Kong to Singapore, etc., but which are not to be discharged, offloaded, or transshipped at Hong Kong, may proceed without the necessity of bonding such shipments against discharge in Hong Kong provided they are manifested to and Singapore, etc. Bills of lading called for discharge at Singapore, etc. to permit discharge only at an unrelated port by the use of a statement to be cleared without bond. However, shipments which are either manifested or under bills of lading calling for "Hong Kong" as port of discharge or "Hong Kong in-transit to Singapore", or any other similar designation indicating Hong Kong as port of discharge, may not be cleared without a validated export license specifically authorizing transshipment at Hong Kong.

Thereafter, effective February 14, 1952, the above instructions were modified to provide that shipment of all commodities under General License GRO may be transshipped at Hong Kong without the necessity of obtaining a validated license, provided (1) such transshipments are made under a through bill of lading to a destination outside of Subgroup A, Hong Kong, or Macao, and (2) the shipment is maintained in the custody of the originating or on-forwarding carrier at all times.

Effective June 19, 1952, the instructions are further modified to provide that, subject to the provisions shown above in (1) and (2), commodities shipped under a license validated for an ultimate destination other than Hong Kong may be transshipped at Hong Kong without the necessity of obtaining specific authorization from the Office of International Trade on the validated license.

For purposes of this note, a through bill of lading includes a contract of carriage with a carrier for transportation from the United States of the commodities to the country of ultimate destination named on the authenticated shipper's export declaration. The actual transportation may be made by more than one carrier and may involve more than one transportation document.

This part of the amendment shall become effective as of June 19, 1952.

b. The following orders are added:

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and resulting commodity group	GLV dollar value limits	Validated license required
	Secondary research laboratory apparatus and equipment, n. e. s., and specially designed parts, accessories, and subassemblies thereof, n. e. s.:				
900980★	Laboratory glassware (except optical glass) and specially fabricated parts, n. e. s.	----------	64PB	None	RO

★ The commodities described in the Positive List entry are exempted from the provisions of General In-Transit License GIT, section 371.9 (c), of this chapter.

The commodities covered by this Positive List entry require import certificate (see § 373.34 of this chapter.)

[1] Part 1 of this amendment was published in Current Export Bulletin No. 670, dated June 12, 1952. Parts 2 and 3 were published in Current Export Bulletin No. 671, dated June 19, 1952.

This part of the amendment shall become effective as of 12:01 a. m., June 26, 1952. Shipments of any commodities removed from general license to Country Group R or Country Group O destinations as a result of changes set forth in Parts 2 and 3 of this amendment, which were on dock, on lighter, laden aboard an exporting carrier, or in transit to a port of exit pursuant to actual orders for export prior to 12:01 a. m., June 26, 1952, may be exported under the previous general license provisions up to and including July 19, 1952. Any such shipment not laden aboard the exporting carrier on or before July 19, 1952, requires a validated license for export.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245, 3 CFR 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59, 3 CFR 1948 Supp.)

KARL L. ANDERSON,
Acting Director,
Office of International Trade.

TITLE 5—ADMINISTRATIVE PERSONNEL

Chapter I—Civil Service Commission

PART 24—FORMAL EDUCATION REQUIREMENTS FOR APPOINTMENT TO CERTAIN SCIENTIFIC, TECHNICAL, AND PROFESSIONAL POSITIONS

SCHOOL SUPERINTENDENT, INSTRUCTOR, SCHOOL ACTIVITIES, ARMY AND NAVY CIVILIAN SCHOOLS

Section 24.13 is amended to read as follows:

§ 24.13 *School Superintendent, GS-1710-12, Instructor, School Activities (Principal, GS-9; High School Teacher, GS-5-7; Elementary Teacher, GS-5), GS-1710-5-9, Army and Navy Civilian Schools*—(a) *Educational requirement.* The educational requirements for these positions are the current educational requirements of the States in which the positions are located.

(b) *Duties.* The duties of these positions are to serve as school superintendent or principal or as elementary or high school teacher in Army or Navy schools for children or personnel of the armed forces.

(c) *Knowledge and training requisite for performance of duties.* The enrollment in schools maintained by the Army and the Navy Departments is extremely transient because of the frequent shifting of Army and Navy personnel from one assignment to another. In order that students may transfer from these schools without loss of educational credits, the Army and Navy schools must have approval or certification from the State Board of Education in which the school is located. (There is reciprocity between the States in the acceptance of students from an approved or certified school.) Qualifications of superintendents, principals, and teachers in these schools must, therefore, be the current requirements of the State in which the school is located.

(Sec. 11, 58 Stat. 390; 5 U. S. C. 860. Interprets or applies sec. 5, 58 Stat. 388; 5 U. S. C. 853)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] ROBERT RAMSPECK,
Chairman.

TITLE 6—AGRICULTURAL CREDIT

Chapter IV—Production and Marketing Administration and Commodity Credit Corporation, Department of Agriculture

Subchapter C—Loans, Purchases, and Other Operations

PART 619—FRUITS AND BERRIES, CANNED

SUBPART—CANNED SOUR CHERRY PURCHASE PROGRAM TMP 96A1

§ 619.1 *Canned sour cherries, program TMP 96a1.* In order to encourage the domestic consumption of sour cherries by diverting them from the normal channels of trade and commerce in accordance with section 32, Public Law 320, 74th Congress, approved August 24, 1935, as amended, the Production and Marketing Administration will offer to purchase canned sour cherries from United States processors on the offer and acceptance basis and will accept offers to the extent that industry marketing needs require, subject to limitations imposed by the capacity of available outlets to utilize supplies without waste and by the amount of funds available for such purchases. Specifications of the purchase will be contained in announcements which will be issued by the Fruit and Vegetable Branch, Production and Marketing Administration, Department of Agriculture, Washington 25, D. C., during the period July 7, 1952, to and including July 30, 1952.

(Sec. 32, 49 Stat. 774, as amended; 7 U. S. C. and Sup. 612c)

Done at Washington, D. C., this 9th day of July 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

TITLE 7—AGRICULTURE

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Plum Order 5, Amdt. 1]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

a. *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta Peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of Tragedy plums grown in the State of California.

b. It is therefore ordered as follows: The provisions of paragraph (b) (2) of § 936.427 (Plum Order 5; 17 F. R. 5635) are hereby amended to read as follows:

(2) During each day of the aforesaid period, however, any shipper may ship from any shipping point a quantity of such plums, by number of packages or containers, which are of a size smaller than a size that will pack a 5 x 6 standard pack, as aforesaid, but are not of a size smaller than a size that will pack a 6 x 6 standard pack in a standard basket if said quantity does not exceed fifty (50) percent of the number of the same type of packages or containers of plums which are of a size that will pack a 5 x 6 standard pack, as aforesaid. The aforesaid 5 x 6 standard pack and 6 x 6 standard pack are defined more specifically in subparagraphs (4) and (5), respectively, of this paragraph.

c. Nothing contained herein shall be construed (1) as affecting or waiving any right, duty, obligation, or liability which has arisen or which, prior to the effective time hereof, may arise in connection with any provisions of said Plum Order 5; or (2) as releasing or extinguishing any violation of said Plum Order 5 which has occurred or which, prior to the effective time hereof, may occur.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 9th day of July 1952, to become effective at 12:01 a. m., P. s. t., July 10, 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[F. R. Doc. 52-7690; Filed, July 14, 1952; 8:47 a. m.]

[Plum Order 7, Amdt. 1]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

a. *Findings.* 1. Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta Peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitations of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended, is insufficient; and this amendment relieves restrictions on the handling of Duarte plums grown in the State of California.

b. It is, therefore, ordered as follows: The provisions in paragraph (b) (2) of § 936.429 (Plum Order 7; 17 F. R. 5636) are hereby amended to read as follows:

(2) During each day of the aforesaid period, however, any shipper may ship from any shipping point a quantity of such plums, by number of packages or containers, which are of a size smaller than a size that will pack a 4 x 5 standard pack, as aforesaid, but are not of a size smaller than a size that will pack a 5 x 5 standard pack in a standard basket if said quantity does not exceed fifty (50) percent of the number of the same type of packages or containers of plums which are of a size not smaller than a size that will pack a 4 x 5 standard pack, as aforesaid. The aforesaid 4 x 5 standard pack and 5 x 5 standard pack are defined more specifically in subparagraphs (4) and (5), respectively, of this paragraph.

c. Nothing contained herein shall be construed (1) as affecting or waiving any right, duty, obligation, or liability which has arisen or which, prior to the effective time of the provisions hereof, may arise in connection with any provision of Plum Order 7; or (2) as releasing or extinguishing any violation of said Plum Order 7 which has occurred or which, prior to the effective time of the provisions hereof, may occur.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 9th day of July 1952, to become effective at 12:01 a. m., P. s. t., July 10, 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[F. R. Doc. 52-7691; Filed, July 14, 1952; 8:48 a. m.]

[Plum Order 8, Amdt. 1]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

a. *Findings.* 1. Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice and engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of Burbank plums grown in the State of California.

b. It is therefore ordered as follows: The provisions of paragraph (b) (1) (i) of § 936.430 (Plum Order 8; 17 F. R. 5637) are hereby amended to read as follows:

(i) such plums grade at least U. S. No. 1 with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

c. Nothing contained herein shall be construed (1) as affecting or waiving any right or liability which has arisen or which, prior to the effective time of the provisions hereof, may arise in connection with any provisions of said Plum Order 8, or (2) as releasing or extinguishing any violation of said Plum Order 8, which has occurred or which, prior to the effective time of the provisions hereof, may occur.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 9th day of July 1952, to become effective at 12:01 a. m., P. s. t., July 10, 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[F. R. Doc. 52-7692; Filed, July 14, 1952; 8:48 a. m.]

[Plum Order 10, Amdt. 1]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

a. *Findings.* 1. Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of Gaviota plums grown in the State of California.

b. It is therefore ordered as follows: The provisions of paragraph (b) of § 936.432 (Plum Order 10; 17 F. R. 5638) are hereby amended to read as follows:

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., July 10, 1952, and ending at 12:01 a. m., P. s. t., November 1, 1952, no shipper shall ship from any shipping point during any day any package or container of Gaviota plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) Such plums are of a size not smaller than a size that will pack a 4 x 5 standard pack in a standard basket. The aforesaid 4 x 5 standard pack is defined more specifically in subparagraph (2) of this paragraph.

(2) As used in this section, the aforesaid 4 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{15}/_{16}$ inches in diameter, (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{9}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{7}/_{16}$ inches in diameter.

(3) During the period set forth in subparagraph (1) of this paragraph, each shipper shall, prior to making each such shipment of plums, have the plums inspected by a duly authorized representative of the Federal-State Inspection Service, heretofore designated by the Plum Commodity Committee and hereby approved: *Provided*, That, in case the following conditions exist in connection with any such shipment:

(i) A written request for inspection is made to the Federal-State Inspection Service not later than 5:00 p. m., of the day before the fruit will be available for inspection;

(ii) The shipper designates in such request the date and hours when the fruit will be available for inspection; and

(iii) The Federal-State Inspection Service furnishes the shipper with a signed statement that it is not practicable, under such conditions, for the Federal-State Inspection Service to make the inspection within the necessary time;

the shipper, by submitting, or causing to be submitted, promptly such signed statement to the Plum Commodity Committee, may make the particular shipment without inspection; but such shipper shall comply with all grade and size regulations applicable to such shipment.

(4) Terms used in this section shall have the same meaning as when used in the amended marketing agreement and order; the terms "U. S. No. 1," "standard pack," "serious damage," and "diameter" shall have the same meaning as set forth in the revised United States Standards for plums and prunes (fresh), 7 CFR 51.360; and the term "standard basket" shall have the same meaning as set forth in paragraph numbered 1 of section 828.1 of the Agricultural Code of California.

c. Nothing contained herein shall be construed (1) as affecting or waiving any right, duty, obligation, or liability which has arisen or which, prior to the effective time hereof, may arise in connection with any provisions of said Plum Order 10; or (2) as releasing or extinguishing any violation of said Plum Order 10 which has occurred or which, prior to the effective time hereof, may occur.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 9th day of July 1952, to become effective at 12:01 a. m., P. s. t., July 10, 1952.

[Plum Order 12, Amdt. 1]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

a. *Findings.* 1. Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta Peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended, is insufficient; and this amendment relieves restrictions on the handling of Wickson plums grown in the State of California.

b. It is, therefore, ordered as follows: The provisions in paragraph (b) (2) of § 936.434 (Plum Order 12; 17 F. R. 5806) are hereby amended to read as follows:

(2) During each day of the aforesaid period, however, any shipper may ship from any shipping point a quantity of such plums, by number of packages or containers, which are of a size smaller than a size that will pack a 4 x 5 standard pack, as aforesaid, but are not of a size smaller than a size that will pack a 5 x 5 standard pack in a standard basket if said quantity does not exceed fifty (50) percent of the number of the same type of packages or containers of plums which are of a size not smaller than a size that will pack a 4 x 5 standard pack, as aforesaid. The aforesaid 4 x 5 standard pack and 5 x 5 standard pack are defined more specifically in subparagraphs (4) and (5), respectively, of this paragraph.

c. Nothing contained herein shall be construed (1) as affecting or waiving any right, duty, obligation, or liability which has arisen or which, prior to the effective time of the provisions hereof, may arise in connection with any provision of Plum Order 12; or (2) releasing or extinguishing any violation of said Plum Order 12 which has occurred or which, prior to the effective time of the provisions hereof, may occur.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 9th day of July 1952, to become effective at 12:01 a. m., P. s. t., July 10, 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[Plum Order 13]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.436 *Plum Order 13*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than July 15, 1952. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until July 8, 1952, recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on July 8, 1952, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about July 15, 1952, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation there-

for which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., July 15, 1952, and ending at 12:01 a. m., P. s. t., November 1, 1952, no shipper shall ship from any shipping point during any day any package or container of Sugar plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) The plums are, except to the extent otherwise specified in this paragraph, of a size not smaller than a size that will pack a 5 x 5 standard pack in a standard basket.

(2) During each day of the aforesaid period, however, any shipper may ship from any shipping point a quantity of such plums, by number of packages or containers, which are of a size smaller than a size that will pack a 5 x 5 standard pack, as aforesaid, but are not of a size smaller than a size that will pack a 5 x 6 standard pack in a standard basket if said quantity does not exceed thirty-three and one-third (33⅓) percent of the number of the same type of packages or containers of plums which are of a size not smaller than a size that will pack a 5 x 5 standard pack, as aforesaid. The aforesaid 5 x 5 standard pack and 5 x 6 standard pack are defined more specifically in subparagraphs (4) and (5), respectively, of this paragraph.

(3) If any shipper, during any two (2) consecutive days of the aforesaid period, ships from any shipping point less than the maximum allowable quantity of such plums that may be of a size smaller than a size that will pack a 5 x 5 standard pack, as aforesaid, the aggregate amount of the undershipment of such plums may be shipped by such shipper only from such shipping point during the next succeeding calendar day in addition to the quantity of such plums of a size smaller than a size that will pack a 5 x 5 standard pack, as aforesaid, that such shipper could have shipped from such shipping point on such succeeding calendar day if there had been no undershipment during the two (2) preceding days.

(4) As used in this section, the aforesaid 5 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{9}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{7}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{5}/_{16}$ inches in diameter.

(5) As used in this section, the aforesaid 5 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{5}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{3}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{3}/_{16}$ inches in diameter.

(6) During the period set forth in subparagraph (1) of this paragraph, each shipper shall, prior to making each such shipment of plums, have the plums inspected by a duly authorized representative of the Federal-State Inspection Service, heretofore designated by the Plum Commodity Committee and hereby approved: *Provided*, That, in case the following conditions exist in connection with any such shipment:

(i) A written request for inspection is made to the Federal-State Inspection Service not later than 5:00 p. m. of the day before the fruit will be available for inspection;

(ii) The shipper designates in such request the date and hours when the fruit will be available for inspection; and

(iii) The Federal-State Inspection Service furnishes the shipper with a signed statement that it is not practicable, under such conditions, for the Federal-State Inspection Service to make the inspection within the necessary time;

the shipper, by submitting or causing to be submitted promptly such signed statement to the Plum Commodity Committee, may make the particular shipment without inspection, but such shipper shall comply with all grade and size regulations applicable to such shipment.

(7) Terms used in this section shall have the same meaning as when used in the amended marketing agreement and order; the terms "U. S. No. 1," "standard pack," "serious damage," and "diameter" shall have the same meaning as set forth in the revised United States Standards for Plums and Prunes (fresh), 7 CFR 51.360; and the term "standard basket" shall have the same meaning as set forth in paragraph numbered 1 of section 828.1 of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 11th day of July 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[Plum Order 14]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.437 *Plum Order 14*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta Peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than July 15, 1952. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until July 8, 1952, recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on July 8, 1952, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about July 15, 1952, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., July 15, 1952, and ending at 12:01 a. m., P. s. t., November 1, 1952, no shipper shall ship from any shipping point during any day any package or container of Late Tragedy plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerance permitted for such grade: *Provided*, That gum spots which do not cause serious damage shall not be considered a grade defect with respect to such grade; and

(ii) The plums are, except to the extent otherwise specified in this paragraph, of a size not smaller than a size that will pack a 5 x 6 standard pack in a standard basket.

(2) During each day of the aforesaid period, however, any shipper may ship from any shipping point a quantity of such plums, by number of packages or containers, which are of a size smaller than a size that will pack a 5 x 6 standard pack, as aforesaid, but are not of a size smaller than a size that will pack a 6 x 6 standard pack in a standard basket if said quantity does not exceed twenty-five (25) percent of the number of the same type of packages or containers of plums which are of a size not smaller than a size that will pack a 5 x 6 standard pack, as aforesaid. The aforesaid 5 x 6 standard pack and 6 x 6 standard pack are defined more specifically in subparagraphs (4) and (5), respectively, of this paragraph.

(3) If any shipper, during any two (2) consecutive days of the aforesaid period, ships from any shipping point less than the maximum allowable quantity of such plums that may be of a size smaller than a size that will pack a 5 x 6 standard pack, as aforesaid, the aggregate amount of the undershipment of such plums may be shipped by such shipper only from such shipping point during the next succeeding calendar day in addition to the quantity of such plums of a size smaller than a size that will pack a 5 x 6 standard pack, as aforesaid, that such shipper could have shipped from such shipping point on such succeeding calendar day if there had been no undershipment during the two (2) preceding days.

(4) As used in this section, the aforesaid 5 x 6 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{7}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{5}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{3}/_{16}$ inches in diameter.

(5) As used in this section, the aforesaid 6 x 6 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{5}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{3}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{1}/_{16}$ inches in diameter.

(6) During the period set forth in subparagraph (1) of this paragraph, each shipper shall, prior to making each such shipment of plums, have the plums inspected by a duly authorized representative of the Federal-State Inspection Service, heretofore designated by the Plum Commodity Committee and hereby approved: *Provided*, That, in case the following conditions exist in connection with any such shipment:

(i) A written request for inspection is made to the Federal-State Inspection Service not later than 5:00 p. m. of the day before the fruit will be available for inspection;

(ii) The shipper designates in such request the date and hours when the fruit will be available for inspection; and

(iii) The Federal-State Inspection Service furnishes the shipper with a signed statement that it is not practicable, under such conditions, for the Federal-State Inspection Service to make the inspection within the necessary time;

the shipper, by submitting or causing to be submitted promptly such signed statement to the Plum Commodity Committee, may make the particular shipment without inspection, but such shipper shall comply with all grade and size regulations applicable to such shipment.

(7) Terms used in this section shall have the same meaning as when used in the amended marketing agreement and order; the terms "U. S. No. 1," "standard pack," "serious damage," and "diameter" shall have the same meaning as set forth in the revised United States Standards for Plums and Prunes (fresh), 7 CFR 51.360; and the term "standard basket" shall have the same meaning as set forth in paragraph numbered 1 of section 828.1 of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. Sup. 608c)

Done at Washington, D. C., this 11th day of July 1952.

[Plum Order 15]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.438 *Plum Order 15*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta Peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than July 15, 1952. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until July 8, 1952; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on July 8, 1952, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about July 15, 1952, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., July 15, 1952, and ending at 12:01 a. m., P. s. t., November 1, 1952, no shipper shall ship from any shipping point during any day any package or container of Sharkey plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) Such plums are of a size not smaller than a size that will pack a 4 x 5 standard pack in a standard basket. The aforesaid 4 x 5 standard pack is defined more specifically in subparagraph (2) of this paragraph.

(2) As used in this section, the aforesaid 4 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{11}/_{16}$ inches in diameter (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{9}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{7}/_{16}$ inches in diameter.

(3) During the period set forth in subparagraph (1) of this paragraph, each shipper shall, prior to making each such shipment of plums, have the plums inspected by a duly authorized representative of the Federal-State Inspection Service, heretofore designated by the Plum Commodity Committee and hereby approved: *Provided*, That, in case the following conditions exist in connection with any such shipment:

(i) A written request for inspection is made to the Federal-State Inspection Service not later than 5:00 p. m., of the day before the fruit will be available for inspection;

(ii) The shipper designates in such request the date and hours when the fruit will be available for inspection; and

(iii) The Federal-State Inspection Service furnishes the shipper with a signed statement that it is not practicable, under such conditions, for the Federal-State Inspection Service to

make the inspection within the necessary time;

the shipper, by submitting, or causing to be submitted, promptly such signed statement to the Plum Commodity Committee, may make the particular shipment without inspection; but such shipper shall comply with all grade and size regulations applicable to such shipment.

(4) Terms used in this section shall have the same meaning as when used in the amended marketing agreement and order; the terms "U. S. No. 1," "standard pack," "serious damage," and "diameter" shall have the same meaning as set forth in the revised United States Standards for Plums and Prunes (fresh), 7 CFR 51.360; and the term "standard basket" shall have the same meaning as set forth in paragraph numbered 1 of section 828.1 of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 11th day of July 1952.

[Plum Order 16]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.439 *Plum Order 16*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta Peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than July 15, 1952. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until July 8, 1952; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on July 8, 1952, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about July 15, 1952, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., July 15, 1952, and ending at 12:01 a. m., P. s. t., November 1, 1952, no shipper shall ship from any shipping point during any day any package or container of Diamond plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) Such plums are of a size not smaller than a size that will pack a 5 x 5 standard pack in a standard basket. The aforesaid 5 x 5 standard pack is defined more specifically in subparagraph (2) of this paragraph.

(2) As used in this section, the aforesaid 5 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{9}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{7}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{5}/_{16}$ inches in diameter.

(3) During the period set forth in subparagraph (1) of this paragraph, each shipper shall, prior to making each such shipment of plums, have the plums inspected by a duly authorized representative of the Federal-State Inspection Service, heretofore designated by the Plum Commodity Committee and hereby approved: *Provided*, That, in case the following conditions exist in connection with any such shipment:

(i) A written request for inspection is made to the Federal-State Inspection Service not later than 5:00 p. m. of the day before the fruit will be available for inspection;

(ii) The shipper designates in such request the date and hours when the fruit will be available for inspection; and

(iii) The Federal-State Inspection Service furnishes the shipper with a signed statement that it is not practicable, under such conditions, for the Federal-State Inspection Service to make the inspection within the necessary time;

the shipper, by submitting, or causing to be submitted, promptly such signed statement to the Plum Commodity Committee, may make the particular shipment without inspection; but such shipper shall comply with all grade and size regulations applicable to such shipment.

(4) Terms used in this section shall have the same meaning as when used in the amended marketing agreement and order; the terms "U. S. No. 1," "standard pack," "serious damage," and "diameter" shall have the same meaning as set forth in the revised United States Standards for plums and prunes (fresh), 7 CFR 51.360; and the term "standard basket" shall have the same meaning as set forth in paragraph numbered 1 of section 828.1 of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 11th day of July 1952.

[Plum Order 17]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.440 *Plum Order 17*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta Peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is herefy further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than July 15, 1952. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until July 8, 1952; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on July 8, 1952, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about July 15, 1952, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., July 15, 1952, and ending at 12:01 a. m., P. s. t., November 1, 1952 no shipper shall ship from any shipping point during any day any package or container of Late Santa Rosa plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of fifteen (15) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) Such plums are of a size not smaller than a size that will pack a 5 x 5 standard pack in a standard basket. The aforesaid 5 x 5 standard pack is defined more specifically in subparagraph (2) of this paragraph.

(2) As used in this section, the aforesaid 5 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{9}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{7}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{5}/_{16}$ inches in diameter.

(3) During the period set forth in subparagraph (1) of this paragraph, each shipper shall, prior to making each such shipment of plums, have the plums inspected by a duly authorized representative of the Federal-State Inspection Service, heretofore designated by the Plum Commodity Committee and hereby approved: *Provided*, That, in case the following conditions exist in connection with any such shipment:

(i) A written request for inspection is made to the Federal-State Inspection Service not later than 5:00 p. m. of the day before the fruit will be available for inspection;

(ii) The shipper designates in such request the date and hours when the fruit will be available for inspection; and

(iii) The Federal-State Inspection Service furnishes the shipper with a signed statement that it is not practicable, under such conditions, for the Federal-State Inspection Service to make the inspection within the necessary time;

the shipper, by submitting, or causing to be submitted, promptly such signed statement to the Plum Commodity Committee, may make the particular shipment without inspection; but such shipper shall comply with all grade and size regulations applicable to such shipment.

(4) Terms used in this section shall have the same meaning as when used in the amended marketing agreement and order; the terms "U. S. No. 1," "standard pack," "serious damage," and "diameter" shall have the same meaning as set forth in the revised United States Standards for plums and prunes (fresh), 7 CFR 51.360; and the term "standard basket" shall have the same meaning as set forth in paragraph numbered 1 of section 828.1 of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 11th day of July 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[Plum Order 18]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.441 *Plum Order 18*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta Peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than July 15, 1952. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until July 8, 1952; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on July 8, 1952, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about July 15, 1952, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., July 15, 1952, and ending at 12:01 a. m., P. s. t., November 1, 1952, no shipper shall ship from any shipping point during any day any package or container of Kelsey plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of fifteen (15) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) The plums are, except to the extent otherwise specified in this paragraph, of a size not smaller than a size that will pack a 4 x 4 standard pack in a standard basket.

(2) During each day of the aforesaid period, however, any shipper may ship from any shipping point a quantity of such plums, by number of packages or containers, which are of a size smaller than a size that will pack a 4 x 4 standard pack, as aforesaid, but are not of a size smaller than a size that will pack a 4 x 5 standard pack in a standard basket if said quantity does not exceed thirty-three and one-third ($33^{1}/_{3}$) percent of the number of the same type of packages or containers of plums which are of a size not smaller than a size that will pack a 4 x 4 standard pack, as aforesaid. The aforesaid 4 x 4 standard pack and 4 x 5 standard pack are defined more specifically in subparagraphs (4) and (5), respectively, of this paragraph.

(3) If any shipper, during any two (2) consecutive days of the aforesaid period, ships from any shipping point less than the maximum allowable quantity of such plums that may be of a size smaller than a size that will pack a 4 x 4 standard pack, as aforesaid, the aggregate amount of the undershipment of such plums may be shipped by such shipper only from such shipping point during the next succeeding calendar day in addition to the quantity of such plums of a size smaller than a size that will

pack 4 x 4 standard pack, as aforesaid, that such shipper could have shipped from such shipping point on such succeeding calendar day if there had been no undershipment during the two (2) preceding days.

(4) As used in this section, the aforesaid 4 x 4 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{13}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{11}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{9}/_{16}$ inches in diameter.

(5) As used in this section, the aforesaid 4 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{11}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{9}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{7}/_{16}$ inches in diameter.

(6) During the period set forth in subparagraph (1) of this paragraph, each shipper shall, prior to making each such shipment of plums, have the plums inspected by a duly authorized representative of the Federal-State Inspection Service, heretofore designated by the Plum Commodity Committee and hereby approved: *Provided*, That, in case the following conditions exist in connection with any such shipment:

(i) A written request for inspection is made to the Federal-State Inspection Service not later than 5:00 p. m. of the day before the fruit will be available for inspection;

(ii) The shipper designates in such request the date and hours when the fruit will be available for inspection; and

(iii) The Federal-State Inspection Service furnishes the shipper with a signed statement that it is not practicable, under such conditions, for the Federal-State Inspection Service to make the inspection within the necessary time;

the shipper, by submitting or causing to be submitted promptly such signed statement to the Plum Commodity Committee, may make the particular shipment without inspection, but such shipper shall comply with all grade and size regulations applicable to such shipment.

(7) Terms used in this section shall have the same meaning as when used in the amended marketing agreement and order; the terms "U. S. No. 1," "standard pack," "serious damage," and "diameter" shall have the same meaning as set forth in the revised United States Standards for Plums and Prunes (fresh), 7 CFR 51.360; and the term "standard basket" shall have the same meaning as set forth in paragraph numbered 1 of section 828.1 of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 11th day of July 1952.

[Plum Order 19]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.442 *Plum Order 19*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta Peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than July 15, 1952. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until July 8, 1952; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on July 8, 1952, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about July 15, 1952, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., July 15, 1952 and ending at 12:01 a. m., P. s. t., November 1, 1952, no shipper shall ship from any shipping point during any day any package or container of Ace plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of fifteen (15) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) The plums are, except to the extent otherwise specified in this paragraph, of a size not smaller than a size that will pack a 4 x 4 standard pack in a standard basket.

(2) During each day of the aforesaid period, however, any shipper may ship from any shipping point a quantity of such plums, by number of packages or containers, which are of a size smaller than a size that will pack a 4 x 4 standard pack, as aforesaid, but are not of a size smaller than a size that will pack a 4 x 5 standard pack in a standard basket if said quantity does not exceed one hundred (100) percent of the number of the same type of packages or containers of plums which are of a size not smaller than a size that will pack a 4 x 4 standard pack, as aforesaid. The aforesaid 4 x 4 standard pack and 4 x 5 standard pack are defined more specifically in subparagraphs (4) and (5), respectively, of this paragraph.

(3) If any shipper, during any two (2) consecutive days of the aforesaid period, ships from any shipping point less than the maximum allowable quantity of such plums that may be of a size smaller than a size that will pack a 4 x 4 standard pack, as aforesaid, the aggregate amount of the undershipment of such plums may be shipped by such shipper only from such shipping point during the next succeeding calendar day in addition to the quantity of such plums of a size smaller than a size that will pack a 4 x 4 standard pack, as aforesaid, that such shipper could have shipped from such shipping point on such succeeding calendar day if there had been no undershipment during the two (2) preceding days.

(4) As used in this section, the aforesaid 4 x 4 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{13}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{11}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{9}/_{16}$ inches in diameter.

(5) As used in this section, the aforesaid 4 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{11}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{9}/_{16}$ inches in diamter; and (iii) no plums contained in such pack measure less than $1^{7}/_{16}$ inches in diamter.

(6) During the period set forth in subparagraph (1) of this paragraph, each shipper shall, prior to making each such shipment of plums, have the plums inspected by a duly authorized representative of the Federal-State Inspection Service, heretofore designated by the Plum Commodity Committee and hereby approved: *Provided*, That, in case the following conditions exist in connection with any such shipment:

(i) A written request for inspection is made to the Federal-State Inspection Service not later than 5:00 p. m. of the day before the fruit will be available for inspection;

(ii) The shipper designates in such request the date and hours when the fruit will be available for inspection; and

(iii) The Federal-State Inspection Service furnishes the shipper with a signed statement that it is not practicable, under such conditions, for the Federal-State Inspection Service to make the inspection within the necessary time;

the shipper, by submitting or causing to be submitted promptly such signed statement to the Plum Commodity Committee, may make the particular shipment without inspection, but such shipper shall comply with all grade and size regulations applicable to such shipment.

(7) Terms used in this section shall have the same meaning as when used in the amended marketing agreement and order; the terms "U. S. No. 1," "standard pack," "serious damage," and "diameter" shall have the same meaning as set forth in the revised United States Standards for Plums and Prunes (fresh), 7 CFR 51.360; and the term "standard basket" shall have the same meaning as set forth in paragraph numbered 1 of section 828.1 of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 11th day of July 1952.

[Plum Order 20]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.443 *Plum Order 20*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta Peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum

Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than July 15, 1952. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until July 8, 1952; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on July 8, 1952, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about July 15, 1952, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., July 15, 1952, and ending at 12:01 a. m., P. s. t., November 1, 1952, no shipper shall ship from any shipping point during any day any package or container of Emily plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) The plums are, except to the extent otherwise specified in this paragraph, of a size not smaller than a size that will pack a 4 x 5 standard pack in a standard basket.

(2) During each day of the aforesaid period, however, any shipper may ship from any shipping point a quantity of such plums, by number of packages or containers, which are of a size smaller than a size that will pack a 4 x 5 standard pack, as aforesaid, but are not of a size smaller than a size that will pack a 5 x 5 standard pack in a standard basket if said quantity does not exceed thirty-three and one-third ($33\frac{1}{3}$) percent of the number of the same type of packages or containers of plums which are of a size not smaller than a size that will pack a 4 x 5 standard pack, as aforesaid. The aforesaid 4 x 5 standard pack and 5 x 5 standard pack are defined more specifically in subparagraphs (4) and (5), respectively, of this paragraph.

(3) If any shipper, during any two (2) consecutive days of the aforesaid period, ships from any shipping point less than the maximum allowable quantity of such plums that may be of a size smaller than a size that will pack a 4 x 5 standard pack, as aforesaid, the aggregate amount of the undershipment of such plums may be shipped by such shipper only from such shipping point during the next succeeding calendar day in addition to the quantity of such plums of a size smaller than a size that will pack a 4 x 5 standard pack, as aforesaid, that such shipper could have shipped from such shipping point on such succeeding calendar day if there had been no undershipment during the two (2) preceding days.

(4) As used in this section, the aforesaid 4 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{11}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{9}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{7}/_{16}$ inches in diameter.

(5) As used in this section, the aforesaid 5 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{9}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{7}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{5}/_{16}$ inches in diameter.

(6) During the period set forth in subparagraph (1) of this paragraph, each shipper shall, prior to making each such shipment of plums, have the plums inspected by a duly authorized representative of the Federal-State Inspection Service, heretofore designated by the Plum Commodity Committee and hereby approved: *Provided*, That, in case the following conditions exist in connection with any such shipment:

(i) A written request for inspection is made to the Federal-State Inspection Service not later than 5:00 p. m. of the day before the fruit will be available for inspection;

(ii) The shipper designates in such request the date and hours when the fruit will be available for inspection; and

(iii) The Federal-State Inspection Service furnishes the shipper with a signed statement that it is not practicable, under such conditions, for the Federal-State Inspection Service to make the inspection within the necessary time;

the shipper, by submitting or causing to be submitted promptly such signed state-

ment to the Plum Commodity Committee, may make the particular shipment without inspection, but such shipper shall comply with all grade and size regulations applicable to such shipment.

(7) Terms used in this section shall have the same meaning as when used in the amended marketing agreement and order; the terms "U. S. No. 1," "standard pack," "serious damage," and "diameter" shall have the same meaning as set forth in the revised United States Standards for Plums and Prunes (fresh), 7 CFR 51.360; and the term "standard basket" shall have the same meaning as set forth in paragraph numbered 1 of section 828.1 of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 11th day of July 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

TITLE 32—NATIONAL DEFENSE

Chapter VI—Department of the Navy

Subchapter C—Personnel

PART 713—NAVAL RESERVE

MISCELLANEOUS AMENDMENTS

1. Section 713.4106 is amended to read as follows:

§ 713.4106 *Transfers of enlisted personnel between classes of naval reserve.* (a) Commandants of Naval Districts, Potomac River Naval Command, and the Chief of Naval Air Reserve Training are authorized to transfer enlisted personnel from one class to another for which qualified subject to the following restrictions:

(1) Transfers to Class 01, 02, V1, and V2 shall be made only within authorized allowances and quotas.

(2) Enlisted men of Classes 02 and V2 must qualify by physical examination for aviation duties as required by the Manual of the Medical Department for unclassified personnel ordered to duty involving flying.

(3) Personnel of other classes whose computed age (see § 713.2402 (d)) is over the age limit for enlistment in Classes 01, 02, V1, or V2 shall not be transferred to these classes unless they have had previous active Naval or Coast Guard service, and their calendar age is under 40 years.

(4) Personnel originally enlisted in another class in a rate higher than that normally authorized for first enlistment in the Organized Reserve may be transferred to Classes 01, 02, V1, or V2 with the condition that retention in the Organized Reserve is dependent upon satisfactory completion of substantiating examinations in military and professional requirements for the rate held within a period of one year. Personnel who were enlisted in Class V8 under provisions of § 713.2411 and who are transferred to the Organized Reserve before their rates have been substantiated by examination shall be required to fulfill this condition except that they may be examined for advancement to a rate within the limits prescribed in § 713.2411.

(b) Enlisted personnel of the Fleet Reserve and Merchant Marine Reserve shall not be transferred to other classes of the Reserve without special authority from the Bureau of Naval Personnel.

2. Section 713.5401 (a) is amended to read as follows:

§ 713.5401 *U. S. Naval Correspondence Course Center.* (a) The U. S. Naval Correspondence Course Center is established by the Secretary of the Navy to administer naval correspondence courses and to assist the Bureau of Naval Personnel in the preparation and evaluation of correspondence courses.

(Sec. 9, 52 Stat. 1177, as amended; 34 U. S. C. 853g)

DAN A. KIMBALL,
Secretary of the Navy.

PART 720—PROCEEDINGS IN CIVIL COURTS

REVISION

Part 720 is revised to read as follows:

Sec.
720.1 Delivery when personnel beyond territorial limits of the State.
720.2 Delivery when personnel within territorial limits of the State.
720.3 Agreement required prior to delivery to State authorities.
720.4 Form of agreement as to expenses.
720.5 Delivery of personnel to Federal authorities.
720.6 Agreement not required of Federal authorities.
720.7 Personnel released by civil authorities on bail.
720.8 Naval prisoners as witnesses or parties in civil courts.
720.9 Service of subpoena or other civil process upon persons in the Navy.
720.10 Leave of absence to be granted persons subpoenaed or otherwise served with process.

AUTHORITY: §§ 720.1 to 720.10 issued under R. S. 161; 5 U. S. C. 22.

NOTE: §§ 720.1 to 720.10 are also contained in Chapter VII Naval Supplement to the Manual for Courts Martial, United States, effective May 31, 1951.

§ 720.1 *Delivery when personnel beyond territorial limits of the State.* In all cases in which the delivery of any person in the Navy or Marine Corps is wanted by State or Local civil authorities for trial, and such person is not attached to or serving at a Naval or Marine Station or other Naval or Marine place within the State, or aboard a ship within the territorial waters of said State, a requisition for the delivery of the person must be made by the Governor or Chief Executive of such State, addressed to the Secretary of the Navy, showing that the person desired is charged with a crime in that State for which he could be extradited under the Constitution of the United States, the enactments of Congress, or the laws of the State desiring his delivery. Such requisition should be forwarded to the Secretary of the Navy (Judge Advocate General) for examination, together with the appointment of the agent of the State to whom delivery is to be made. If the papers allege that the person is a fugitive from the justice of that State and that he is charged with an extraditable crime, as aforesaid, and the papers are otherwise found to be in due form, the Secretary of the Navy will send the necessary authorization to the designated agent permitting him to take the person into custody upon compliance with § 720.3.

§ 720.2 *Delivery when personnel within territorial limits of the State.* In cases in which the delivery of any person in the Navy or Marine Corps is requested by civil authorities within the Continental United States, Alaska, Hawaii, the Canal Zone or Puerto Rico, and such person is attached to or serving at a Naval or Marine Station or other Naval or Marine place within a State, Territory or Possession, or aboard a ship within the territorial waters of such State, Territory or Possession, commanding officers are authorized to deliver such person when a proper warrant is presented. Warrants reciting that the individual is a fugitive from another State or jurisdiction (commonly known as fugitive warrants) are considered an attempt to circumvent the procedure described in § 720.1 and are not "proper warrants" within the meaning of this section; delivery will be refused upon presentation thereof.

§ 720.3 *Agreement required prior to delivery to State authorities.* In every case in which the delivery of any person in the Navy or Marine Corps to the civil authorities of a State, for trial, is authorized, such person's commanding officer will, before making such delivery, obtain from the Governor or other duly authorized officer of such State a written agreement that he will be informed of the outcome of the trial and that the person so delivered will be returned to the naval authorities at the place of his delivery or issued transportation to the nearest receiving ship or station (or marine barracks in the case of Marines) without expense to the United States or to the person delivered immediately upon the completion of his trial for the alleged misconduct which occasioned his delivery to the civil authorities, in the event that he is acquitted, or immediately upon satisfying the sentence of the court in the event that he is convicted and a sentence imposed, or upon other disposition of his case: *Provided*, That the naval authorities shall then desire his return.

§ 720.4 *Form of agreement as to expenses.* (a) The following is suggested as a form of agreement acceptable to the Department in the cases referred to in § 720.3:

In consideration of the delivery of _____, United States Navy (or United States Marine Corps), to _____, at _____, for trial upon the charge of _____, I hereby agree, pursuant to the authority vested in me as _____, that the commanding officer of the _____ will be informed of the outcome of the trial and that said _____ will be returned to the naval authorities at the aforesaid place of his delivery or issued transportation to the nearest receiving ship or station (or marine barracks, in the case of Marines) without expense to the United States or the person delivered immediately upon the completion of his trial, or immediately upon satisfying the sentence of the court in the event that he is convicted and a sentence imposed, or upon other disposition of his case, provided that the naval authorities shall then desire his return.

(b) The Department considers this agreement substantially complied with when the man is furnished transportation back to his station and necessary cash to cover his incidental expenses en route thereto, and the Navy Department so informed.

§ 720.5 *Delivery of personnel to Federal authorities.* Commanding officers are authorized to deliver personnel to Federal authorities on presentation of a proper warrant in all cases except where disciplinary proceedings are pending or the person is undergoing a sentence of a court martial or when in the opinion of the commanding officer unusual circumstances exist which warrant reference of the matter to the Secretary of the Navy (Judge Advocate General).

§ 720.6 *Agreement not required of Federal authorities.*—(a) *Expenses when personnel are delivered to Federal authorities.* An agreement as to expenses will not be exacted as a condition to the delivery of personnel to Federal authorities for trial. Men desired by Federal authorities for trial will be called for and taken into custody by a United States marshal or deputy marshal. If the man is not convicted, or if the case if dismissed, or, provided naval authorities desire his return, immediately upon satisfying the sentence of the court in the event he has been convicted and sentenced, the man will be returned to the naval service and the necessary expenses paid from an appropriation under the control of the Department of Justice.

(b) *Payment of expenses of witnesses appearing in Federal court under official orders.* When naval personnel are required to appear as witnesses in Federal court, under official orders, the charge for this type of temporary additional duty travel will be borne by the activity to which the serviceman is attached. If the required witness is to appear in a case where the Department of the Navy is not a party in interest, the Navy will be reimbursed by the Department of Justice upon submission of reimbursement form 1080 prepared in accordance with NAVCOMP Notice 710 of May 9, 1951. Payments to witnesses will be as provided by the Joint Travel Regulations and U. S. Navy Travel Instructions.

§ 720.7 *Personnel released by civil authorities on bail.* Where a person in the Navy or Marine Corps is arrested by Federal or State authorities for trial and returns to his ship or station on bail, the commanding officer shall normally grant him leave of absence to appear for trial on the date set, upon verification of the attending facts, date of trial and approximate length of time that should be covered by the leave of absence; provided, such absence will not prejudice the interest of the naval service.

§ 720.8 *Naval prisoners as witnesses or parties in civil courts.* If Federal or State authorities desire the attendance of a naval prisoner as a witness in a criminal case pending in a civil court, upon the submission of such a request to the Secretary of the Navy, authority will be given in a proper case for the production of the man in court without resort being had to a writ of habeas corpus ad testificandum. The Department, however, will not authorize the attendance of a naval prisoner in a Federal or State court, either as a party or as a witness in private litigation pending before such court, as in such cases the court may grant a postponement or a continuance of the trial; but the Department will allow the deposition of such naval prisoner to be taken in the case.

§ 720.9 *Service of subpoena or other civil process upon persons in the Navy.*—(a) *Within the jurisdiction.* Commanding officers afloat or ashore are authorized to permit, and under normal conditions shall permit, service of subpoena or other civil process of Federal, State, Territorial or Local courts upon naval personnel or civilians named therein and located within the jurisdiction of the court out of which the process issues, but such service should not be allowed without the permission of the commanding officer first being obtained. (Personnel serving aboard vessels located within the territorial waters of the State out of which the process issues are considered within the jurisdiction of the court for the purpose of service of process.) In cases wherein the exigencies of the service would jeopardize or limit personnel from defending themselves in litigation, service of process will not be allowed until conditions permit. The commanding officer shall permit the service of process except in unusual cases where compliance with the mandate of the process would seriously prejudice the public interest. Where service is refused, reports of such refusal and the reasons therefor shall be forwarded by letter to the Office of the Judge Advocate General. Where practicable, commanding officers will require that the process be served in their presence, or that of an officer designated by them. Where service of process by mail is legally sufficient, however, the process may be mailed to the person named therein. In all cases commanding officers will insure that the nature of the process is explained to the man concerned.

(b) *Beyond the jurisdiction.* Where a person in the naval service, or a civilian, is beyond the jurisdiction of the court issuing process against him, the commanding officer will permit service or delivery of the process under the same conditions as noted in paragraph (a) of this section for whatever legal effect it may have. At the same time he will advise the person being served that he is not required to indicate acceptance of service in writing, or otherwise, although he may do so voluntarily, and further advise him to consult legal counsel. Where process is forwarded to a commanding officer with the request that it be delivered to a person within his command, he may deliver it to the person named therein provided he voluntarily accepts it. In such cases the commanding officer will insure that the serviceman or civilian is informed that he is not required to accept service of the process but may do so voluntarily. The commanding officer is not required to act as a process server, and when the person named in the process does not voluntarily accept the process it should be returned to the forwarder with advice that the person named therein refuses to accept it.

(c) *Suits against the United States.* Where it appears that a subpoena relates to a suit against the United States under the Public Vessels Act dispatch advice shall be requested of the Judge Advocate General in view of the requirements of section 784, Title 46, U. S. Code. Similar action shall be taken in case of suit against the United States under any other act.

§ 720.10 *Leave of absence to be granted persons subpoenaed or otherwise served with process.* In such cases the commanding officer is authorized and will normally grant leave of absence to the person subpoenaed or upon whom the process is served in order to permit him to obey the same, unless the public interest would be seriously prejudiced by his absence, in which case full report of the matter should be made to the Department.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[General Overriding Regulation 7, Amdt. 2 to Revision 1]

GOR 7—Exemptions and Suspensions of Certain Food and Restaurant Commodities

STATUTORY DECONTROL

Pursuant to the Defense Production Act of 1950, as amended, and Economic Stabilization Agency General Order No. 2, this Amendment 2 to General Overriding Regulation 7, Revision 1, is hereby issued.

STATEMENT OF CONSIDERATIONS

The Congress of the United States has enacted the Harrison Amendment to the Defense Production Act which exempts fruits and vegetables in fresh or processed form from price controls. This amendment to General Overriding Regulation 7 adds a new article to that regulation which will be used to implement this mandate of Congress.

In respect of certain products, the decontrol amendment has a clear and unequivocal meaning. The exact limits of the amendment, however, are not clearly defined and questions have arisen as to the point at which Congress intended to draw the line of decontrol. The Office of Price Stabilization is currently studying the decontrol amendment in order to ascertain its scope. In the meantime, and for the convenience of those who are affected by the decontrol amendment, the Office of Price Stabilization has decided to add an article to GOR 7 by this amendment which contains a list of products clearly and unequivocally within the coverage of the decontrol amendment.

For the sake of clarity and in order to avoid any misunderstanding, it was deemed necessary to repeat in this list certain products which have been decontrolled in part by earlier amendments to GOR 7. For example, all canned plums, except purple prune plums, were decontrolled by Amendment 1 to GOR 7, Revision 1. Rather than list purple prune plums alone in this amendment, it was decided to list all canned plums with no exceptions.

The inclusion of products in the list of this Article IV to GOR 7 does not relieve sellers of their responsibility to maintain the records they have established for these products for the period of time specified in the regulations which formerly governed them.

It is realized that this action may result in higher prices for a number of items which play an important part in the cost of living, but, under the terms of the Harrison Amendment, the agency has no alternative but to remove ceilings from the products covered.

Special circumstances have made it impracticable to consult with industry representatives, including trade association representatives, before the issuance of this amendment. In the judgment of the Director of Price Stabilization, this amendment is necessary to comply with the provisions of the Defense Production Act of 1950, as amended.

AMENDATORY PROVISIONS

General Overriding Regulation 7, Revision 1, is amended by adding Article IV to read as follows:

ARTICLE IV—STATUTORY DECONTROL

SEC. 30. *Processed fruits and vegetables removed from price control pursuant to section 402 (d) (3) of the Defense Production Act of 1950, as amended.* On and after July 1, 1952, no ceiling price regulation issued by the Office of Price Stabilization shall apply to the following processed fruits and vegetables which are removed from price control in accordance with the provisions of section 402 (d) (3) of the Defense Production Act of 1950, as amended. This section applies to sales of the products listed which were heretofore subject to price control at the manufacturing or processing level under the specific ceiling price regulation listed below, the General Ceiling Price Regulation and supplementary regulations thereto, or under the Manufacturers' General Ceiling Price Regulation (CPR 22). This section also applies to all sales of the listed products at wholesale or retail governed by Ceiling Price Regulations 14, 15 or 16, the General Ceiling Price Regulation and supplementary regulations thereto. Finally, it also applies to all sales of the commodities listed below and governed by Ceiling Price Regulations 31 and 61.

(a) The following canned vegetable products covered by Ceiling Price Regulation 42:

(1) Canned asparagus.

(b) The following canned vegetable products covered by Ceiling Price Regulation 55:

(1) Canned beans, lima.
(2) Canned beans, snap (green and wax).
(3) Canned beets.
(4) Canned carrots.
(5) Canned corn, sweet.
(6) Canned fresh field peas and fresh shelled beans (all varieties).
(7) Canned mixtures of vegetables.
(8) Canned mushrooms.
(9) Canned okra.
(10) Canned onions.
(11) Canned peas, fresh green.
(12) Canned peppers.
(13) Canned pimientos.
(14) Canned potatoes, white.
(15) Canned potatoes, sweet.
(16) Canned pumpkin.
(17) Canned spinach.
(18) Canned squash.
(19) Canned succotash.
(20) Canned tomatoes.
(21) Canned turnip greens.
(22) Canned vegetable juices and mixtures thereof.

(c) The following canned fruits and berries (including mixtures of fruits) covered by Ceiling Price Regulation 56:

(1) Canned apples.
(2) Canned applesauce.
(3) Canned apricots.
(4) Canned berries (all varieties).
(5) Canned cherries, sweet.
(6) Canned cherries, sour.
(7) Canned cranberries.
(8) Canned figs.
(9) Canned fruit cocktail.
(10) Canned fruit for salad (including canned fruit mixtures).
(11) Canned fruit and berry juices and mixtures thereof.
(12) Canned peaches (all varieties).
(13) Canned pears (all varieties).
(14) Canned plums.
(15) Canned prunes (fresh).

(d) The following frozen vegetables covered by Ceiling Price Regulation 81:

1. All frozen vegetables, including frozen cooked squash and frozen cooked pumpkin, but excluding French fried, diced or whipped white potatoes. (As to French fried, diced or whipped white potatoes, see paragraph (g) of this section.)

(e) The following frozen fruits and berries covered by Ceiling Price Regulation 82:

1. All frozen fresh fruits or berries but excluding frozen citrus fruits. (As to frozen citrus fruits, see paragraph (f) of this section.)

(f) The following fruits, berries and vegetables covered by the General Ceiling Price Regulation or supplementary regulations thereto:

1. All of the products listed under paragraphs (b) and (c) of this section for which the processor has previously elected, under section 1 (a) of CPRs 55 or 56, to remain under the General Ceiling Price Regulation.
2. All canned and frozen citrus fruits, juices and concentrates (including mixtures thereof) and all other frozen fruit and berry concentrates.
3. All dried fruits (including mixtures thereof).
4. Canned pineapple and pineapple juice.
5. The following canned baby or junior foods:
(i) Applesauce.
(ii) Apricot-applesauce.
(iii) Beets.
(iv) Carrots.
(v) Green beans.
(vi) Peas.
(vii) Peaches.
(viii) Pears.
(ix) Pears and pineapple.
(x) Prunes.
(xi) Spinach.
(xii) Squash.
(xiii) Sweet potatoes.

(g) The following fruits, berries and vegetables covered by the Manufacturers' General Ceiling Price Regulation (CPR 22):

1. Frozen French fried, diced or whipped white potatoes.
2. Peeled, whole or sliced chemically treated white potatoes.
3. Shoestring and julienne potatoes and potato chips.
4. Sauerkraut and sauerkraut juice.
5. Cherries in brine.

(h) The following fruits, berries and vegetables covered by Ceiling Price Regulation 31:

1. Pineapple.
2. Cherries in brine.

(Sec. 704, 64 Stat. 816, as amended, 50 U. S. C. App. Sup. 2154)

Effective date. This amendment shall become effective as of July 1, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 14, 1952.

[Ceiling Price Regulation 9, Revision 1, Correction]

CPR 9—Territories and Possessions

CORRECTION

Reference is made in paragraph (c) (2) of section 3 of Ceiling Price Regulation 9, Revision 1, to "section 15" in which the term "category" is defined. This is a clerical error. Reference should be to "section 16", so that the last line of the first paragraph of paragraph (c) (2) of section 3 should read: "The term 'category' is defined in section 16 of this regulation."

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

ELLIS ARNALL,
Director of Price Stabilization.

[Ceiling Price Regulation 22, Supplementary Regulation 30]

CPR 22—Manufacturers' General Ceiling Price Regulation

SR 30—TRANSLATION OF F. O. B. INTO DELIVERED CEILING PRICES FOR CERTAIN CONSUMER DURABLE GOODS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Supplementary Regulation to Ceiling Price Regulation 22 is hereby issued.

STATEMENT OF CONSIDERATIONS

This supplementary regulation to Ceiling Price Regulation 22 provides a method whereby manufacturers of certain consumer durable goods items may apply to have ceiling prices established under CPR 22 for sales on an f. o. b. shipping point basis translated into ceiling prices for sales on a delivered basis.

The need for this supplementary regulation has arisen from the fact that under Ceiling Price Regulation 22, which is the Manufacturers' General Ceiling Price Regulation, each manufacturer is frozen to the terms and conditions of sale he had in effect during his base period. His base period is the period April 1 through June 24, 1950, or any previous calendar quarter ended not earlier than September 30, 1949 which he elects to use. This means that if a manufacturer prior to Korea sold exclusively on an f. o. b. shipping point basis he must continue to do so under CPR 22. This requirement has meant that manufacturers who, for reasons totally unrelated to price control, had shifted from an f. o. b. shipping point basis to a delivered basis in the long interval between the outbreak of hostilities in Korea and the time CPR 22 became effective as to them were forced by CPR 22 to revert to the method of doing business which they had deliberately discarded. It has also meant that other manufacturers who may have desired to make a change from an f. o. b. shipping point basis to a delivered basis have not been able to do so. Particularly in those industries where sales on a delivered basis are the most common this restriction has been productive of considerable hardship.

In order that the manufacturer's freedom of action shall be limited to the least extent compatible with price control this regulation provides a method whereby manufacturers of certain consumer durable goods items who have established ceiling prices under CPR 22 or under one of the supplementary regulations to CPR 22 may calculate and apply for ceiling prices for sales made on a delivered basis. This regulation is limited at present to those areas where relief appears to be most greatly needed and where the method of calculation provided by this regulation can be used. New areas will be included within this supplementary regulation as need for relief in such areas is shown and as additional methods of calculation are developed.

Any application under this supplementary regulation must cover all commodities within a single category.

A manufacturer who wishes to convert f. o. b. ceiling prices to delivered ceiling prices under this supplementary regulation first calculates what it would have cost him per hundredweight during a previous twelve month period to ship the category for which he is applying to the particular zone or area in which he wishes to establish a uniform delivered price. If the number of points to which he shipped within the zone or area are so numerous as to make this calculation too difficult he is permitted to use a sampling technique.

If the manufacturer has established his ceiling prices under CPR 22 he makes his calculations on the basis of the freight rates in effect on March 15, 1951. This date is used because sellers who sold on a delivered basis during the CPR 22 base period may reflect in their ceiling prices increases in transportation cost only up to that date. Consequently, if a later date were employed, the seller who was now first applying for delivered ceiling prices under CPR 22 would be placed in a better position than sellers who had already established delivered ceiling prices. If the applicant, however, has established his f. o. b. ceiling prices under either SR 17 to CPR 22 or SR 18 to CPR 22 (the Capehart regulations), he makes his calculations upon the basis of the freight rates in effect on July 26, 1951. He is permitted this later date to place him in an equal position with sellers who have already established delivered ceiling prices under these regulations.

After the manufacturer has calculated what his freight bill would have been for a twelve month period preceding the application, on the basis of the rates in effect on whatever date he is required to use, he divides this amount by the weight of the commodities in the category sold during the period. This will give him a dollar-and-cents amount per hundredweight. He multiplies this amount by the weight of the commodity for which he is establishing a ceiling price to find the amount which, when added to his f. o. b. ceiling price for the commodity, will convert it to a delivered ceiling price.

If a manufacturer elects to avail himself of the relief provided by this supplementary regulation he must thereafter make all sales of commodities in the same category on a delivered basis.

FINDINGS OF THE DIRECTOR

In formulating this regulation, the Director of Price Stabilization has consulted with industry representatives to the extent practicable, and has given full consideration to their recommendations. In his judgment, the provisions of this regulation are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended.

Every effort has been made to conform this regulation to existing business practices, cost practices or methods, or means or aids to distribution. Insofar as any provisions of this regulation may operate to compel changes in the business practices, cost practices or methods, or means or aids to distribution, such provisions are found by the Director to be necessary to prevent circumvention or evasion of this regulation.

So far as practicable, the Director of Price Stabilization gave due consideration to the national effort to achieve maximum production in furtherance of the Defense Production Act of 1950, as amended, and to relevant factors of general applicability.

REGULATORY PROVISIONS

Sec.
1. What this supplementary regulation does.
2. How you apply for delivered ceiling prices.
3. How you calculate delivered ceiling prices.
4. Alternate method for calculating delivered ceiling prices.
5. Modification of ceiling prices by the Director of Price Stabilization.
6. Application.
7. Records.

AUTHORITY: Sections 1 to 7 issued under sec. 704, 64 Stat. 816 as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101-2110, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.

SECTION 1. *What this supplementary regulation does.* This supplementary regulation provides a method by which you may calculate and apply for delivered ceiling prices to replace your present f. o. b. ceiling prices established under CPR 22, or under any supplementary regulation to CPR 22, for the consumer durable goods items listed in Appendix A. After you have sold any commodity at a delivered ceiling price exceeding your former f. o. b. ceiling price, you may not thereafter sell any commodity in the same category on an f. o. b. shipping point basis.

SEC. 2. *How you apply for delivered ceiling prices.* (a) You apply for delivered ceiling prices under this supplementary regulation by making the calculations described in section 3, or those approved under section 4, and by mailing the application required by section 6 to the Consumer Durable Goods Division, Office of Price Stabilization, Washington 25, D. C. Your application must cover a category. A "category" is defined in

section 5 of CPR 22. This application must be sent by registered mail, return receipt requested.

(b) Thirty days after the Office of Price Stabilization has received your report, as shown by your return postal receipt, you may sell at the delivered ceiling prices you have calculated unless the Office of Price Stabilization has notified you not to do so or has asked for additional information. If, within this thirty day period, OPS has asked you for more information you may not sell at your delivered ceiling prices until thirty days after the Office of Price Stabilization has received the requested information. You must mail the information by registered mail, return receipt requested.

(c) The Director of Price Stabilization may, in writing, permit you to use your delivered ceiling prices before the expiration of the thirty day waiting period after receipt of your application.

SEC. 3. *How you calculate delivered ceiling prices.* (a) You calculate delivered ceiling prices under this section upon the basis of your sales experience during a past twelve month period. For convenience, the period is referred to as your "transportation base period." Use as your transportation base period the last twelve month period preceding your application (ending not earlier than December 31, 1950) for which you have records. You will be unable to use this section for any category not dealt in by you during the entire transportation base period. If you wish to establish delivered ceiling prices for a category which is different from any dealt in by you during the entire transportation base period you will have to establish delivered ceiling prices under section 4.

(b) The first step in calculating a uniform delivered ceiling price is to determine each zone or area within which you wish to establish a uniform delivered price. A zone or area is a single integrated geographical area. It may encompass the entire United States or any part thereof. You will have to repeat the calculations outlined in the next paragraph for each zone or area within which you wish to establish a uniform delivered price.

(c) If all the commodities in the category have the same rate of transportation you perform the following steps only once for each zone or area. However, if the commodities in the category have different rates of transportation you will have to make a calculation for each group of commodities within the category which carries the same rate of transportation.

(d) The second step, after you have determined an area or zone within which you wish to establish a uniform delivered price, is to find the total number of receiving points within the zone or area to which you sent shipments during the transportation base period of commodities having the same rate of transportation per hundredweight in the category for which you wish to establish a delivered ceiling price. A "receiving point" is the city, town or village in which is located the unloading terminal of the common carrier which received the shipment. If the total number of these receiving points is 25 or less you have completed this second step. If the total number of these points is 26 or more you may, for ease of calculation, if you so desire, drop some of these receiving points from your calculations. You do so as follows: List and number these points in alphabetical order. If the total number of receiving points is between 26 and 50, inclusive, strike from the list every fifth receiving point starting with the number 5. If the total number of receiving points is between 51 and 100, inclusive, strike every other receiving point starting with the number 2. If the total number is between 101 and 300, inclusive, leave on the list every third receiving point starting with the number 1 and strike all other receiving points. If the total number is between 301 and 500, inclusive, leave on the list every fifth receiving point starting with the number 1 and strike all other receiving points. If the total number is more than 500 leave on the list every tenth receiving point starting with the number 1 and strike all other receiving points.

(e) The third step, after you have made your list of receiving points under Step 2, is to find the total weight of the commodities having the same rate of transportation per hundredweight, which you sent to each receiving point on the list during the transportation base period, in the category for which you wish to establish a delivered ceiling price.

(f) You are now ready for the fourth step. If you have established your ceiling price under CPR 22, multiply the weight sent to each receiving point on your list during the transportation base period by the lowest common carrier rate per hundredweight, including transportation tax, in effect on March 15, 1951, between that receiving point and the plant or warehouse used by you as a shipping point which has the lowest rate of transportation to that receiving point. If you have established your ceiling prices under either SR 17 to CPR 22 or SR 18 to CPR 22, make the same calculation but substitute July 26, 1951 for March 15, 1951. In making this calculation exclude any charge for services, such as consolidation, breaking, bulk, loading, unloading, warehousing, or any other service in connection with or identical to the transportation. Add the amounts calculated under this paragraph.

(g) For the fifth step, divide the total dollar-and-cents amount found under the preceding paragraph by the total weight sent to all the receiving points on your list. This will give you a dollar-and-cents amount. This dollar-and-cents amount is your adjustment per hundredweight for all commodities having the same rate of transportation per hundredweight in the category for which you wish to establish delivered ceiling prices.

(h) You are now ready for the last step. Find your CPR 22 ceiling price (or your SR 17 or your SR 18 ceiling price, if you are using one of these regulations to establish your ceiling prices) f. o. b. shipping point for the commodity for which you wish to establish a delivered ceiling price. Use the shipping point which has the lowest transportation cost to the zone or area within which you are establishing a uniform delivered price. Multiply the dollar-and-cents amount found under the preceding step by the number of hundredweight or fraction thereof of the commodity. Add this amount to the f. o. b. ceiling price of the commodity. The result is a uniform delivered ceiling price for that commodity within the zone or area for which you are establishing a uniform delivered price.

Example. You wish to calculate delivered ceiling prices for the category "refrigerators". You have established adjusted ceiling prices under SR 17 to CPR 22. Your first step is to find the area or zone within which you wish to establish a uniform delivered ceiling price. In this example the zone is the entire United States. The following table shows how you determine your adjustment per hundredweight for refrigerators.

Second step: Receiving points in United States (A)	Third step: Total hundredweight sent each receiving point (B)	Carlot freight rate per hundredweight as of July 26, 1951, including transportation tax (C)	Fourth step: (B×C)
Atlanta	15,000	$1.39	$22,[illegible]
Chicago	25,000	[illegible]	24,[illegible]
Dallas	20,000	2.11	42,200
Los Angeles	20,000	2.95	295,200
New York	65,000	1.73	112,450
Total	195,000		408,200

Fifth step: $\frac{\$408.200}{195,000 \text{ cwt.}} = \$2.09$ per cwt.

Sixth step: Your ceiling price for Model 100, a new model refrigerator, calculated under section 17 of SR 17 to CPR 22, f. o. b. your factory, which is your only shipping point in the United States, is $150. This model weighs 300 pounds. Three times $2.09 is $6.27. Therefore, the uniform delivered ceiling price for your Model 100 refrigerator throughout the United States is $156.27.

SEC. 4. *Alternate method for calculating delivered ceiling prices.* (a) If you find that you are unable to calculate delivered ceiling prices under the previous section for any commodity covered by this supplementary regulation you may apply to the Consumer Durable Goods Division, Office of Price Stabilization, Washington 25, D. C., for permission to use another method. Your application should be sent by registered mail and should be identified as filed under this supplementary regulation and this section.

(b) State in your application the reasons why you cannot calculate delivered ceiling prices under this supplementary regulation and describe in detail the method by which you propose to calculate delivered ceiling prices. Do not use the proposed method until you are notified in writing by the Director of Price Stabilization that you may do so. Before approving or disapproving your proposed method, the Director of Price Stabilization may request additional information.

SEC. 5. *Modification of ceiling prices by the Director of Price Stabilization.* The Director of Price Stabilization may at any time disapprove or revise ceiling prices proposed to be used or being used under this supplementary regulation so as to bring them in line with the level of ceiling prices otherwise established by CPR 22, by any regulation supplementary thereto, or by any other applicable regulation.

SEC. 6. *Application.* (a) An application for delivered ceiling prices calculated under section 3 must contain the following information:

(1) The names of the commodity or commodities for which you are calculating delivered ceiling prices.

(2) A description of the geographical limits of each zone or area within which you wish to establish uniform delivered ceiling prices.

(3) Your ceiling price f. o. b. each plant or warehouse having the lowest rate of transportation on the cut-off date (March 15 or July 26, 1951) to each zone or area named in subparagraph (2) of this paragraph, for each commodity covered by your application, to your largest buying class of purchaser. This term is defined in section 47, CPR 22.

(4) The period you have used as the transportation base period.

(5) Your calculations under section 3 shown in the detail given in the example at the end of that section.

(6) Your delivered ceiling price, to your largest buying class of purchaser, in each zone or area for each commodity covered by your application.

(b) If you have applied under section 4 for an alternate method to calculate delivered ceiling prices and have received approval of that method from the Director of Price Stabilization, your application must contain all the information called for in subparagraphs (1), (2), (3) and (6) of paragraph (a) of this section and your calculations of your delivered ceiling prices.

(c) Applications filed under either paragraph (a) or (b) of this section must be filed by the person subject to the ceiling price regulation, personally, if an individual; if a partnership, by a partner; or if an association or corporation, by a duly authorized officer. The person signing the application must certify that the information contained therein is true to the best of his knowledge or of his information and belief.

SEC. 7. *Records.* In addition to all records required by CPR 22 and other applicable OPS regulations, every manufacturer who establishes a delivered ceiling price under the provisions of this supplementary regulation shall keep for inspection by the Director of Price Stabilization for a period of two years the worksheets showing how he calculated his delivered ceiling prices.

Effective date. This supplementary regulation is effective July 14, 1952.

NOTE: The record-keeping and reporting requirements of this supplementary regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 14, 1952.

CPR 24—CEILING PRICE OF BEEF SOLD AT WHOLESALE

CORRECTION

Due to a clerical error, Amendment 11 to CPR 24 issued June 12, 1952, contains a misprint in Appendix 11, at page 3.

Accordingly, Appendix 11 is corrected by substituting the numerals 0.70 for the symbol (1) in the column headed Commercial, Utility, Canner, and Cutter, for St. Louis, and St. Louis County, Missouri.

ELLIS ARNALL,
Director of Price Stabilization.

[Ceiling Price Regulation 34, Supplementary Regulation 21]

CPR 34—SERVICES

SR 21—POWER LAUNDRIES IN THE GREATER CINCINNATI, OHIO, TRADING AREA

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Supplementary Regulation 21 to Ceiling Price Regulation 34 is hereby issued.

STATEMENT OF CONSIDERATIONS

This Supplementary Regulation 21 to Ceiling Price Regulation 34 permits an increase in ceiling prices for power laundry services supplied by power laundries situated in the Greater Cincinnati, Ohio, Trading Area. This supplementary regulation does not permit the increase to be applied to the diaper supply, linen supply and dry cleaning services of such laundries.

An OPS study of the operating costs and profit margins of a representative number of the power laundries in the Greater Cincinnati, Ohio, Trading Area accounting for over 88 percent of the total sales of these services which, it is estimated, amounted to about 5 million dollars in 1951, reveals that increased labor and material costs incurred between June 24, 1950 and January 1, 1952 have impaired the pre-Korean earnings of such laundries. In addition, in April 1952 a one year wage contract was entered into with labor unions representing the employees of these laundries granting substantial wage increases to production workers. These wage increases all have received WSB approval or are within the formula of Wage Stabilization Board regulations; with the result that the earnings of the laundries will be further impaired. The increase in ceiling prices granted herein has been determined to be the minimum necessary to maintain the financial stability of these laundries and to assure a continued supply of these essential services. The action taken herein with respect to the group of power laundry operators gives effect to the standards for individual adjustments of section 20 (a) of CPR 34.

Under the provisions of this supplementary regulation, ceiling prices of such power laundries may be increased by not more than 7 percent, such adjustment to be applied to the total amount of each invoice rendered to the customer and identified as the "OPS permitted price increase." If this method is used to apply the amount of the increase, the seller need not make the supplementary filing required by section 18 (c) of CPR 34. At the option of the individual laundry, however, the ceiling price for each article may be increased by not more than 7 percent. Adjusted ceiling prices must within ten days after their determination be filed with the appropriate Office of Price Stabilization district office.

In the future, power laundries subject to this supplementary regulation may not obtain an adjustment of their ceiling prices for power laundry services under section 20 of CPR 34. In addition, adjustments previously granted any of them under that section are automatically revoked by this supplementary regulation.

In the formulation of this supplementary regulation, the Director has consulted insofar as practicable with representative suppliers of these services, including representatives of trade associations, and consideration has been given to their recommendations. In the judgment of the Director of Price Stabilization the increase permitted by this supplementary regulation is generally fair and equitable and necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended.

REGULATORY PROVISIONS

Sec.
1. Purpose.
2. Relationship to Ceiling Price Regulation 34.
3. Adjustment of ceiling prices.
4. Application of section 20 of Ceiling Price Regulation 34.
5. Definitions.

AUTHORITY: Sections 1 to 5 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101–2110, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR 1950 Supp.

SECTION 1. *Purpose.* This supplementary regulation permits power laundries whose plants are located in the Greater Cincinnati, Ohio, Trading Area to increase their ceiling prices for power laundry services by 7 percent. This supplementary regulation shall not apply to the diaper supply, linen supply and dry cleaning services of power laundries.

SEC. 2. *Relationship to Ceiling Price Regulation 34.* All provisions of Ceiling Price Regulation 34, as amended, except as affected by the provisions of this supplementary regulation, shall remain in effect.

SEC. 3. *Adjustment of ceiling prices.* You may, to the extent you supply power laundry services from plants located in the Greater Cincinnati, Ohio, Trading Area, increase your ceiling prices by 7 percent for power laundry services, except diaper supply, linen supply and dry cleaning services, thus supplied, by either of the following methods:

(a) You may apply such an adjustment to the total amount of each invoice rendered to the customer, provided you

shall clearly write or stamp on each such invoice the words "OPS permitted price increase". If you use this method of applying your price increase, you need not make the supplementary filing required by section 18 (c) of Ceiling Price Regulation 34.

(b) You may, in lieu of the method provided in paragraph (a) of this section, increase by 7 percent the ceiling prices of each power laundry services article, except a diaper supply, linen supply and dry cleaning services article. Within ten days after your prices are established under this paragraph you must prepare and file with your district office of the Office of Price Stabilization a supplemental statement as required under section 18 of Ceiling Price Regulation 34. You may not establish prices under paragraph (a) of this section once you have elected to establish prices under this paragraph.

(c) If the price increase computed in paragraphs (a) or (b) of this section results in a fraction of a cent, the price increase must be decreased to the next lower cent if the fractional cent is less than one-half cent, or may be increased to the next higher cent if the fraction is one-half cent or more.

SEC. 4. *Application of section 20 of Ceiling Price Regulation 34.* No seller subject to this supplementary regulation may, after the effective date of this supplementary regulation, apply for an adjustment of any of his ceiling prices for power laundry services except diaper supply, linen supply and dry cleaning services under section 20 of Ceiling Price Regulation 34, as amended. All orders establishing ceiling prices for any power laundry subject to this supplementary regulation issued under either section 20 (a), 20 (b) or 20 (c) of Ceiling Price Regulation 34 are hereby revoked, upon the effective date of this regulation.

SEC. 5. *Definitions.* (a) "Power laundry" or "power laundries" as used in this regulation are laundries which in the laundry trade are customarily known and designated as such, and do not include hand laundries, launderettes or laundries using home-type laundry equipment to supply laundry services.

(b) "The Greater Cincinnati, Ohio, Trading Area", as used in this regulation is the area comprising Hamilton County in the State of Ohio and the Counties of Boone, Kenton and Campbell in the State of Kentucky.

Effective date. This Supplementary Regulation 21 to Ceiling Price Regulation 34 shall become effective July 19, 1952.

NOTE: The record-keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 14, 1952.

[F. R. Doc. 52-7852; Filed, July 14, 1952; 4:00 p. m.]

[General Ceiling Price Regulation, Supplementary Regulation 55, Revision 1]

GCPR, SR 55—SUSPENSION OF SAWMILL LOGS PRODUCED IN ALASKA

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Revision 1 to Supplementary Regulation 55 to the General Ceiling Price Regulation is hereby issued.

STATEMENT OF CONSIDERATIONS

This Revision 1 of Supplementary Regulation 55 extends indefinitely the exemption of sawmill logs established by Supplementary Regulation 55, as amended, to the General Ceiling Price Regulation. Supplementary Regulation 55, as amended, exempts from the provisions of the General Ceiling Price Regulation, until June 30, 1952, the sale and purchase in Alaska of sawmill logs produced and used in Alaska.

As the Office of Price Stabilization pointed out in the Statement of Considerations accompanying Amendments 1 and 2 to this supplementary regulation, the reversion of sawmill logs to the control of the General Ceiling Price Regulation would create a chaotic condition in the industry. New contracts have been entered into by the sawmills and loggers and are based upon prices in effect under this suspension and, therefore, somewhat above the General Ceiling Price Regulation level. The Office of Price Stabilization is not yet ready to take final action in this matter inasmuch as the prevailing practice of establishing prices by negotiation, as in the past, has served to keep the price level considerably below that prevailing in the Pacific northwest.

In the judgment of the Director of Price Stabilization, the action taken in this revision is generally fair and equitable and is necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended.

So far as practicable, the Director of Price Stabilization has given due consideration to the National defense efforts to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950, as amended.

In the formulation of this regulation, there has been consultation with industry representatives and consideration has been given to their recommendations.

REGULATORY PROVISIONS

Sec.
1. What this supplementary regulation does.
2. Suspension.
3. Geographic applicability.
4. Records.
5. Definitions.

AUTHORITY: Sections 1 to 5 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101-2110, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.

SECTION 1. *What this supplementary regulation does.* The purpose of this supplementary regulation is to suspend indefinitely from the provisions of the General Ceiling Price Regulation sales and purchases in Alaska of sawmill logs produced and used in Alaska.

SEC. 2. *Suspension.* The provisions of the General Ceiling Price Regulation shall not apply to sales and purchases of sawmill logs produced in Alaska: *Provided,* That such sawmill logs are delivered during the period in which this supplementary regulation is effective to a lumber mill situated in Alaska for manufacture into lumber.

SEC. 3. *Geographic applicability.* This supplementary regulation is applicable in Alaska.

SEC. 4. *Records.* Records of sales and purchases made pursuant to this supplementary regulation shall be maintained in the manner provided in section 16 of the General Ceiling Price Regulation.

SEC. 5. *Definitions.* When used in this supplementary regulation, the terms:

(a) "Sawmill log" means a tree of any species which has been severed from the stump in Alaska, trimmed of its branches, and cut into lengths suitable for manufacture into lumber.

(b) "Delivered" means receipt by the purchaser or by any carrier, including a carrier owned or controlled by the seller, for shipment to the purchaser.

Effective date. This Revision 1 of Supplementary Regulation 55 to the General Ceiling Price Regulation is effective as of July 1, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 14, 1952.

[F. R. Doc. 52-7851; Filed, July 14, 1952; 4:00 p. m.]

[Ceiling Price Regulation 94, Amdt. 4]

CPR 94—SALES OF USED PASSENGER AUTOMOBILES

ESTABLISHING CEILING PRICES IN TERRITORY OF ALASKA

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 4 to Ceiling Price Regulation 94 is hereby issued.

STATEMENT OF CONSIDERATIONS

This Amendment 4 to Ceiling Price Regulation 94 changes that regulation so that it also establishes ceiling prices for the sale of used passenger automobiles in the Territory of Alaska.

Sales of used automobiles in the Territory of Alaska have been covered by the General Ceiling Price Regulation which established ceiling prices based on the highest price charged during the base period December 19, 1950, to January 25, 1951, and Ceiling Price Regulation 9 for the sale of used automobiles purchased in the continental United States for resale in Alaska, which established ceiling prices based on the percentage markup used during the same base period. This period is not representative, as the used automobile business in Alaska is almost dormant during this period due to the severe cold weather which usually necessitates the storage of automobiles for protection. Used automobiles therefore, are not usually sold during this period and prices for the few sales that were made during the base period of the General Ceiling Price Regulation are not representative. In addition, a considerable number of used automobiles are sold by individual owners, who, of course, have no base period on which to base their ceiling prices.

This Amendment 4 to Ceiling Price Regulation 94 utilizes the ceiling prices established under Ceiling Price Regulation 94, as amended, for the sale of a used automobile in Region C of the continental United States and provides an allowance for transportation to Alaska which may be added to those ceiling prices in computing the ceiling price for the sale of a used automobile in Alaska.

The used automobile business in Alaska urgently needs the stabilization which would be brought about by the establishment of this method of fixing ceiling prices due to the lack of uniformity in the existing ceiling prices for used automobiles in Alaska. This amendment will establish a uniform graduated ceiling price pattern for Alaskan used automobile sellers.

In the formulation of this amendment there has been consultation with industry representatives, including trade association representatives, to the extent practicable, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

1. Section 1 is amended by changing paragraph (a) to read as follows:

(a) This regulation applies to you if you sell a used passenger automobile in the continental United States, the District of Columbia or the Territory of Alaska, whether as a retail dealer, wholesaler, or as an individual. The provisions of this regulation supersede, in their entirety, those provisions of the General Ceiling Price Regulation, Supplementary Regulation 5 to the General Ceiling Price Regulation and Ceiling Price Regulation 9 covering the sale of used passenger automobiles.

2. Section 2 is amended by changing paragraph (a) to read as follows:

(a) (1) Ceiling prices for the sale of used automobiles established by this regulation are set forth in Appendix A for the geographic regions of the continental United States specified. This appendix also specifies the amount that may be added to the price of the automobile for automatic transmissions or drives. Your ceiling price for any used automobile in the region in which you are selling the automobile is the price specified in Appendix A for that region for that make, model, line, or series and body style. It includes all standard equipment on the automobile, radio, heater, and other items of equipment except automatic transmissions or drives, or the air-conditioning unit specified in paragraph (f) of this section, when such equipment is installed on the automobile at the time the seller has received title to the automobile.

(2) The ceiling price for the sale of any used automobile in the Territory of Alaska is the price specified in Appendix A for Region C for that particular make, model, line, or series and body style, plus the appropriate allowance for transportation to Alaska listed in Appendix B.

3. Ceiling Price Regulation 94 is amended by inserting following Appendix A the following new Appendix B.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This Amendment 4 to Ceiling Price Regulation 94 is effective July 19, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 14, 1952.

APPENDIX B—ALLOWANCE FOR TRANSPORTATION TO ALASKA

If the current cost of shipping the automobile from Seattle, Wash., to the locality in Alaska where you are offering the vehicle for sale is between—	Your allowance for transportation to Alaska will be found in the table below. Select the appropriate figure considering the age of the vehicle									
	Age in model years of vehicle—									
	1	2	3	4	5	6	7	8	9	10 and over
$60 and $70	$50	$45	$40	$35	$30	$25	$20	$15	$10	$5
$70 and $80	60	54	48	42	36	30	24	18	12	6
$80 and $90	70	63	56	49	42	35	28	21	14	7
$90 and $100	80	72	64	56	48	40	32	24	16	8
$100 and $110	90	81	72	63	54	45	36	27	18	9
$110 and $120	100	90	80	70	60	50	40	30	20	10
$120 and $130	110	99	88	77	66	55	44	33	22	11
$130 and $140	120	108	96	84	72	60	48	36	24	12
$140 and $150	130	117	104	91	78	65	52	39	26	13
$150 and $160	140	126	112	98	84	70	56	42	28	14
$160 and $170	150	135	120	105	90	75	60	45	30	15
$170 and $180	160	144	128	112	96	80	64	48	32	16
$180 and $190	170	153	136	119	102	85	68	51	34	17
$190 and $200	180	162	144	126	108	90	72	54	36	18
$200 and $210	190	171	152	133	114	95	76	57	38	19
$210 and $220	200	180	160	140	120	100	80	60	40	20
$220 and $230	210	189	168	147	126	105	84	63	42	21
$230 and $240	220	198	176	154	132	110	88	66	44	22
$240 and $250	230	207	184	161	138	115	92	69	46	23
$250 and $260	240	216	192	168	144	120	96	72	48	24

$290 or over	280	252	224	196	168	140	112	84	56	28

NOTES

1. How to use Appendix B—This schedule is to be used in conjunction with Appendix A of this regulation to compute OPS ceiling prices of used passenger automobiles offered for sale in Alaska. The seller should locate the proper listed prices for the used passenger automobile in Appendix A, compute the current price by reducing that figure by 2 percent for each quarter which has elapsed since this regulation became effective, (beginning with Jan. 1, 1952) and adding the appropriate figure found in Appendix B to the resultant figure.
2. It will be necessary for each seller covered by this regulation, to ascertain freight charges by the most direct route from Seattle, Washington, to area of sale in the Territory of Alaska for each used passenger automobile being priced.
3. The allowance for transportation to Alaska is limited to the highest figure shown on this table. For used passenger automobiles the age of which is more than 10 years, the allowance specified in the column headed, 10 and over, should be used.
4. Example of computing age of used passenger automobiles: If you price a 1946 model during the calendar year 1952, the vehicle will be considered to be 6 years old for the entire 1952 calendar year. On January 1, 1953, the vehicle will be considered 7 years of age for the purpose of this regulation, and will be considered so for the entire calendar year 1953. This system of aging will continue as long as this regulation is in effect. A current year model used passenger automobile shall not be considered as being one year of age until the end of the current calendar year.

[F. R. Doc. 52-7850; Filed, July 14, 1952; 4:00 p. m.]

TITLE 41—PUBLIC CONTRACTS

Chapter II—Division of Public Contracts, Department of Labor

PART 201—GENERAL REGULATIONS

REGULAR DEALER IN PETROLEUM UNDER THE PUBLIC CONTRACTS ACT

Section 201.101 contains a definition of regular dealer in terms of one who "owns, operates, or maintains a store, warehouse or other establishment in which the materials, supplies, articles or equipment of the general character described by the specifications and required under the contract are bought, kept in stock, and sold to the public in the usual course of business." In addition to this general definition of regular dealer, a number of special types of regular dealers are also defined in this section.

Having found that the general method of operation of dealers in the petroleum distribution industry requires a special definition applicable to such dealers notice is hereby given that § 201.101 is amended by adding a new subparagraph designated § 201.101 (b) (7) to read as follows:

§ 201.101 *Manufacturer or regular dealer.* • • •

(b) • • •

(7) A regular dealer in petroleum may be a person who owns, operates, or maintains petroleum distribution equipment and a store, warehouse, or other place of business in which petroleum products of the general character described by the specifications and required under the contract are bought for the account of such person and sold to the public in the usual course of business, and whose principal business is such purchase and sale of such petroleum products.

This amendment to be effective upon publication in the FEDERAL REGISTER.

(Sec. 4, 49 Stat. 2038; 41 U. S. C. 38)

Signed at Washington, D. C., this 9th day of July 1952.

MAURICE J. TOBIN,
Secretary of Labor.

[F. R. Doc. 52-7675; Filed, July 14, 1952; 8:45 a. m.]

NOTICES

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[Order No. 2508, Amdt. 5]

BUREAU OF INDIAN AFFAIRS

DELEGATION OF AUTHORITY

1. In section 13 *Lands and minerals*, paragraph (h) is revised to read as follows:

(h) The approval and certification of applications for allotments on the public domain under authority of the act of February 8, 1887 (25 U. S. C. sec. 334), or the acts of February 28, 1891 and June 25, 1910 (25 U. S. C. sec. 336), and in the national forests pursuant to the act of June 25, 1910 (25 U. S. C. sec. 337).

2. The following is added to Section 13, *Lands and minerals:*

(u) The approval of assignments and the issuance of certificates of assignment to Minnesota Mdewakanton Sioux Indians of land acquired by the United States pursuant to the acts of March 2, 1889 (25 Stat. 992) and August 19, 1890 (26 Stat. 349).

(v) Soil and moisture conservation operations on Indian lands, pursuant to the President's Reorganization Plan No. IV, of 1940 (54 Stat. 1235), and the Soil Conservation Act of April 27, 1935 (16 U. S. C. sec. 590a), and subject to the coordination and general supervision of the Office of the Secretary.

3. Section 25 *Subdelegation* is amended to read as follows:

SEC. 25. *Redelegation.* The authority conferred upon the Commissioner in the preceding sections of this order may be redelegated by him to the Associate Commissioner, Assistant Commissioners, Executive Officer, Director, Division of Program, Chief Counsel, Associate Chief Counsel, Assistant Chief Counsel, Branch Chiefs, Area Directors, Superintendents or Officers in Charge of Agencies and Local Facilities, and such other officers of the Bureau of Indian Affairs as are designated by him. The Commissioner may also redelegate to such officials the authority conferred upon him by the general regulations appearing in Title 25, Code of Federal Regulations, insofar as such authority relates to action in individual cases. The Commissioner may authorize officials who may have a redelegation of authority under this section to redelegate such authority to employees of the Bureau designated by them. Appeal from an action taken by the Superintendent or other officer of an agency pursuant to a redelegation of authority under this section shall be taken to the Area Director and thence to the Commissioner. Appeal from an action taken by any other officer of the Bureau of Indian Affairs pursuant to a redelegation of authority under this section shall be taken to the Commissioner. Appeals from the Commissioner shall be taken to the Secretary of the Interior.

(5 U. S. C. 1946 ed., sec. 22; 25 U. S. C. 1946 ed., secs. 1a, 2, 2a; sec. 2, Reorg. Plan No. 3 of 1950, 15 F. R. 3174)

4. The following new section 27 *Withdrawal and restoration of authority*, is added:

SEC. 27. *Withdrawal and restoration of authority.* The Commissioner, or any Area Director with the approval of the Commissioner, may upon written notice to a Superintendent or other official withdraw from such official any authority directly delegated to him under the general regulations appearing in Title 25, Code of Federal Regulations, and thereafter the authority so withdrawn shall be exercised by the Area Director or such other official as may be designated in writing by or with the approval of the Commissioner. The authority so withdrawn from a Superintendent or other official may be restored by the Commissioner, or the Area Director with the approval of the Commissioner.

5. The following new section 28 *Action as duly authorized representative*, is added:

SEC. 28. *Action as duly authorized representative.* The Commissioner is authorized to take any action which under the general regulations appearing in Title 25, Code of Federal Regulations, may be taken by the Secretary of the Interior or his duly authorized representative, and which is not otherwise authorized by a delegation of authority to the Commissioner.

OSCAR L. CHAPMAN,
Secretary of the Interior.

JULY 9, 1952.

CIVIL AERONAUTICS BOARD

[Docket No. 2901 et al.]

NORTHWEST AIRLINES, INC., ET AL., PORTLAND-SEATTLE SERVICE CASE

NOTICE OF HEARING

Notice is hereby given pursuant to the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a), 401, and 1001 of the act, that a hearing in the above-entitled proceeding is assigned to be held on August 11, 1952, at 10:00 a. m., P. d. s. t., in Room 414, U. S. Courthouse, Seattle, Washington, before Examiner F. Merritt Ruhlen.

Without limiting the scope of the issues presented in this proceeding particular attention will be directed to the following matters:

1. Do the public convenience and necessity require the alteration, amendment or modification of the following certificates in the manner indicated:

(a) Northwest's certificate for Route No. 3 so as to authorize air transportation between the points, Seattle, Washington, and Portland, Oregon?

(b) United's certificate for Route No. 1 to include Spokane, Washington, as an intermediate point on segment 1 thereof between the intermediate point Pendleton, Oregon, and the intermediate point Boise, Idaho, so as to allow the provision of direct service (including nonstop service) between Spokane, on the one hand, and Seattle, Portland, Boise, and other points on segment 1 of Route No. 1, on the other hand, without the necessity of making the compulsory stop now required at Pendleton?

(c) Western's certificate for Route No. 63 so as to eliminate therefrom the restriction that flights between Portland and Seattle shall originate or terminate at Oakland or San Francisco, or a point south thereof?

2. If the public convenience and necessity require the alteration, amendment, or modification of Northwest's, United's, and Western's certificates of public convenience and necessity for Routes 3, 1, and 63, respectively, are these air carriers fit, willing, and able to perform the services contemplated in (a), (b), and (c) above?

3. In the event the public convenience and necessity require any or all of the proposed services, what terms and conditions should be imposed with respect to the conduct of such services?

For further details of the services proposed and the route modifications requested interested parties are referred to the prehearing conference report of the Examiner, the Board's orders, the applications and other pleadings which are on file with the Civil Aeronautics Board.

Notice is further given that any person other than parties on record desiring to be heard in this proceeding must file with the Civil Aeronautics Board on or before August 11, 1952, a statement setting forth the issues of fact or law he desires to controvert.

Dated at Washington, D. C., this 10th day of July 1952.

[SEAL] FRANCIS W. BROWN,
Chief Examiner.

[F. R. Doc. 52-7703; Filed, July 14, 1952; 8:45 a. m.]

[Docket No. SA-261]

ACCIDENT OCCURRING AT DALLAS, TEX.

NOTICE OF HEARING

In the matter of investigation of accident involving air collision between aircraft of United State Registry N-90650 and N-3858K at Dallas, Texas, June 28, 1952.

Notice is hereby given, pursuant to the Civil Aeronautics Act of 1938, as amended, particularly section 702 of said act, in the above-entitled proceeding that hearing is hereby assigned to be held on Tuesday, July 15, 1952, at 9:00 a. m. (local time) in the Auditorium, Mercantile Bank Building, 106 South Ervay Street, Dallas, Texas.

Dated at Washington, D. C., July 8, 1952.

[SEAL] EVERETT S. BOSWORTH,
Presiding Officer.

OFFICE OF DEFENSE MOBILIZATION

[CDHA 60]

FINDING AND DETERMINATION OF CRITICAL DEFENSE HOUSING AREAS UNDER DEFENSE HOUSING AND COMMUNITY FACILITIES AND SERVICES ACT OF 1951

JULY 14, 1952.

Upon a review of the construction of new defense plants and installations, and the reactivation or expansion of operations of existing defense plants and installations, and the in-migration of defense workers or military personnel to carry out activities at such plants or installations, and the availability of housing and community facilities and services for such defense workers and military personnel in each of the areas set forth below, I find that all of the conditions set forth in section 101 (b) of the Defense Housing and Community Facilities and Services Act of 1951 (Pub. Law 139, 82d Cong., 1st sess.) exist.

Accordingly, pursuant to section 101 of the Defense Housing and Community Facilities and Services Act of 1951 and by virtue of the authority vested in me by paragraph number 1 of Executive Order 10296 of October 2, 1951, I hereby determine that each of said areas is a critical defense housing area.

Corning-Painted Post, New York Area: (The area consists of the towns of Thurston, Campbell, Hornby, Rathbone, Addison, Erwin, Corning, Woodhull, Tuscarora, Lindley and Caton, the City of Corning and the Villages of Painted Post, Woodhull, Addison, Riverside and South Corning, all in Steuben County, New York.)

JOHN R. STEELMAN,
Acting Director of Defense Mobilization.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

SALES OF CERTAIN COMMODITIES AT FIXED PRICES

DOMESTIC AND EXPORT PRICE LISTS FOR JULY 1952

Pursuant to the Pricing Policy of Commodity Credit Corporation issued March 22, 1950 (15 F. R. 1583), and subject to the conditions stated therein, the following commodities are available for sale in the quantities and at the prices stated:

JULY 1952 DOMESTIC PRICE LIST

Commodity and approximate quantity available (subject to prior sale)	Domestic sales price
Nonfat dry milk solids, in carload lots only, 1951 production, 2,000,000 pounds; 1952 production, 10,000,000 pounds.	Spray process, U. S. Extra Grade, 1951 production, 17 cents per pound; 1952 production, 18 cents per pound. Prices apply "in store" at location of stock in any State ("in store" means at the processor's plant or in storage at warehouse, but with any prepaid storage and outhandling charges for the benefit of the buyer).
Cottonseed oil, bleachable prime summer yellow, 85,000,000 pounds.[1]	Market price or 17¾ cents per pound, whichever is higher, f. o. b. tank cars at points of storage locations.
Linseed oil, raw, 198,000,000 pounds	Market price on date of sale. (See note on Ceiling Price Certification at the end of this price list.)
Dry edible beans:	
Pinto, bagged, 640,000 per hundredweight.	On all beans, for areas other than those shown below, adjust prices upward or downward by an amount equal to the price support program differential between areas. Where no price support differential occurs, the price listed will apply. For other grades of all beans, adjust by market differentials. Prices listed below, on all beans, are at point of production. Amount of paid-in freight to be added, as applicable.
Great Northern, bagged, 745,000 per hundredweight.	No. 1 Grade, 1949[1] crop: $8.21 per 100 pounds, basis f. o. b. Denver rate area; $7.81 per 100 pounds, basis f. o. b. Idaho area.
Baby Lima, bagged, 460,000 per hundredweight.	No. 1 Grade 1948[1], 1949, 1950, and 1951 crops: $8.22 per 100 pounds, basis f. o. b. Twin Falls, Idaho, area; $8.59 per 100 pounds, basis f. o. b. Morrill, Nebr., area.
Cranberry beans, bagged, 13,000 per hundredweight.	No. 1 Grade 1949[1] crop: $7.39 per 100 pounds, basis f. o. b. California area.
Small Red, bagged, 18,000 per hundredweight.	No. 1 Grade 1949 crop: $9.66 per 100 pounds, basis f. o. b. Michigan area.
Small White, bagged, 100,000 per hundredweight.	No. 1 Grade 1951 crop: $9.12 per 100 pounds basis f. o. b. Portland, Oreg., area.
Pink, bagged, 171,000 per hundredweight.	No. 1 Grade 1951 crop: $8.96 per 100 pounds basis f. o. b. California area.
Tea, bagged, 1,000,000 per hundredweight.	No. 1 Grade 1951 crop: $9.06 per 100 pounds basis f. o. b. Portland, Oreg., and California areas.
Austrian winter pea seed, bagged, 2,163,000 per hundredweight.	No. 1 Grade 1950[1] and 1951 crop: $8.80 per 100 pounds f. o. b. Michigan area.
Austrian winter peas, bagged, not certified for purity or germination, 1,736,000 per hundredweight.[1]	$4 per 100 pounds, basis f. o. b. point of production, plus paid-in freight, as applicable.
Blue Lupine seed, bagged 1,142,000 per hundredweight.	In Portland, Oreg., and San Francisco areas only. The domestic market price for feed but not less than $3.50 per 100 pounds, f. o. b. point of storage, plus paid-in freight, as applicable. Purchaser must certify that commodity will be used for feed purposes only.
Common and Willamette vetch seed, bagged; 130,000 hundredweight.	$4 per 100 pounds, basis f. o. b. point of production, plus paid-in freight, as applicable.
Red Clover seed (uncertified), bagged, 58,000 hundredweight.	$7 per 100 pounds, basis f. o. b. point of production, plus paid-in freight, as applicable.
Red Clover seed (certified), bagged: Cumberland, 1,000 hundredweight; Kenland, 30 hundredweight; Midland, 1,530 hundredweight.	37.05 per 100 pounds, basis f. o. b. point of production, plus paid-in freight, as applicable.
Ladino Clover seed, bagged, certified, 40,000 hundredweight.	$42.30 per 100 pounds, basis f. o. b. point of production, plus paid-in freight, as applicable.
White Clover seed, bagged, 20 hundredweight.	$105.32 per 100 pounds basis f. o. b. point of production, plus paid-in freight, as applicable.
Hubam Sweet Clover seed, bagged, 50 hundredweight.	$32.80 per 100 pounds basis f. o. b. point of production, plus paid-in freight, as applicable; New Orleans PMA Commodity Office.
Crimson Clover seed, bagged, 200 hundredweight.	$10.80 per 100 pounds basis f. o. b. point of production, plus paid-in freight, as applicable.
Mixed Biennial Sweet Clover seed, bagged, 5,640 hundredweight.	$18 per 100 pounds basis f. o. b. point of production, plus paid-in freight, as applicable.
Alfalfa seed (certified), bagged, registered African, 6,702 pounds, certified Hairy Peruvian, 10,878 pounds.	$9.75 per 100 pounds basis f. o. b. point of production, plus paid-in freight, as applicable.
Smooth Bromegrass (Manchar certified), bagged, 110 hundredweight.	$23.40 per 100 pounds basis f. o. b. point of production, plus paid-in freight, as applicable.
Mountain Bromegrass (Bromar certified), bagged, 330 hundredweight.	$21.33 per 100 pounds basis f. o. b. point of production, plus paid-in freight, as applicable.
Sudan grass seed, bagged, 7 hundredweight.	Do.
Hairy Vetch seed, bagged, 70,000 hundredweight.	$3.93 per 100 pounds basis f. o. b. point of production, plus paid-in freight, as applicable: Chicago PMA Commodity Office.
Birdsfoot Trefoil seed, bagged, 140 hundredweight.	$15.75 per 100 pounds basis f. o. b. point of production, plus paid-in freight, as applicable.
Rough Pea seed, bagged, 8 hundredweight.	$79.05 per 100 pounds basis f. o. b. point of production, plus paid-in freight, as applicable.
Wheat, bulk, 25,000,000 bushels[1]	$7 per 100 pounds basis f. o. b. point of production, plus paid-in freight, as applicable: Portland, Oreg., PMA Commodity Office.
	Basis in store, the market price but in no event less than the applicable 1952 loan rate for the class, grade, quality and location, plus: (1) 18 cents per bushel if received by truck, or (2) 13 cents per bushel if received by rail or barge.
	Examples of minimum prices, per bushel: Kansas City, No. 1 HW, ex rail or barge, $2.02; Minneapolis, No. 1 HDNS, ex rail or barge, $2.05; Chicago, No. 1 RW, ex rail or barge, $2.06.
Oats, bulk, 4,700,000 bushels[1]	At points of production, basis in store, the market price but not less than the applicable 1952 county loan rate plus: (1) 8 cents per bushel if received by truck, or (2) 6 cents per bushel if received by rail or barge. At other points, the foregoing plus average paid-in freight.
	Examples of minimum prices, per bushel: Chicago, No. 3 or better, ex rail or barge, 97 cents; Minneapolis, No. 3 or better, ex rail or barge, 92 cents.
Barley, bulk, 8,000,000 bushel[1]	Basis in store, the market price but in no event less than the applicable 1952 loan rate for the class, grade, quality and location, plus: (1) 12 cents per bushel if received by truck or, (2) 8 cents per bushel if received by rail or barge.
	Examples of minimum prices per bushel: Minneapolis, No. 1 Barley, ex rail or barge, $1.50; San Francisco, No. 1 Western Barley, ex rail or barge, $1.54.
Grain Sorghums, bulk, 1,000,000 hundredweight.	Basis in store, the market price but in no event less than the applicable 1952 loan rate for the class, grade, quality and location, plus: (1) 20 cents per hundredweight if received by truck, or (2) 15 cents per hundredweight if received by rail or barge.
	Examples of minimum prices per hundredweight: Kansas City, No. 2 Grain Sorghums, ex rail or barge, $2.99, ex truck $3.01.

JULY 1952 DOMESTIC PRICE LIST—Continued

Commodity and approximate quantity available (subject to prior sale)	Domestic sales price
Corn, bulk, 50,000,000 bushels [1]	At points of production, basis in store, the market price but not less than the applicable 1951 county loan rate for No. 3 yellow plus: (1) 27 cents per bushel if received by truck, or (2) 24 cents per bushel if received by rail or barge. At other locations, the foregoing plus average paid-in freight. Examples of minimum prices per bushel: Chicago, No. 3 yellow, $1.99; St. Louis, No. 3 yellow, $2.01; Minneapolis, No. 3 yellow, $1.90; Omaha, No. 3 yellow, $1.92; Kansas City, No. 3 yellow, $1.97; for other classes, grades, and quality, market differentials will apply.
Rice, rough, bagged, 163,000 hundredweight.	Per 100 pounds—$0.40 plus 105 percent of 1951 support price for class, grade and yield plus-paid-in freight and for bags, if applicable.

[1] These same lots also are available at export sales prices announced today.

Ceiling price certification. Any purchaser from CCC of raw linseed oil, must be able and will be required to certify that the price paid to CCC does not exceed the highest ceiling price he could pay any of his usual suppliers for the commodity in the quantity and at the place and season that delivery is made.

JULY 1952 EXPORT PRICE LIST

Commodity and approximate quantity available (subject to prior sale)	Export price list
Cottonseed oil, bleachable prime summer yellow, 85,000,000 pounds.[1]	Market price f. o. b. tank cars at points of storage locations.
Dry edible beans	
Pea, bagged, 1950 crop, 11,000 hundredweight.[1 2]	No. 1 Grade delivered on track present location, on basis costs and freight paid to f. a. s. vessel at locations shown below. For export to Western Hemisphere countries—$6.50 per 100 pounds East Coast ports; for export to other than Western Hemisphere countries—$5.50 per 100 pounds, East Coast ports.
Great Northern, bagged, 1948 crop, 265,000 hundredweight.[1 2]	$6.60 per 100 pounds, U. S. Gulf ports (see note below).
Baby Lima, bagged, 1949 crop, 490,000 hundredweight. [1]	$4 per 100 pounds, San Francisco Bay area.
Pinto, bagged, 1949 crop, 640,000 hundredweight.[1 2]	$6.90 per 100 pounds Portland, Oreg., and Gulf ports; $7 per 100 pounds Mexico border points.
	NOTE: Available at PMA commodity offices at: (1) Portland, Oreg., for West Coast shipments and Mexico border points, Nogales and Points West; (2) Dallas, Tex. for Mexico border-Nogales to El Paso, inclusive; (3) Kansas City, Mo., for Texas-Mexico border points and Gulf ports.
	NOTE: "U. S. Gulf ports" means ports with freight rates not greater than to New Orleans. Any excess freight will be for account of the buyer.
	Discounts for grades on all beans: No. 2, 25 cents less than No. 1; No. 3, 50 cents less than No. 1; appropriate discounts will also be given for "off-color" beans.
	At CCC's option, 1949 crop beans may be furnished in place of 1948 beans in instances where stocks of 1948 beans o. the type and grade desired are exhausted.
Austrian winter peas, bagged, not certified for purity or germination 1,708,000 hundredweight.[1]	In Portland, Oreg., and San Francisco areas only, the domestic market price for feed but not less than $1.50 per 100 pounds, f. o. b. point of storage plus paid-in freight, as applicable.
Wheat, bulk, 25,000,000 bushels [1]	Market price on date of sale at point of delivery, provided delivery takes place within 15 days unless otherwise agreed upon.
Oats, bulk, 4,700,000 bushels [1]	Do.
Barley, bulk, 8,000,000 bushels [1]	Do.
Corn, bulk, 50,000,000 bushels [1]	Do.

[1] These same lots are available at domestic sales prices announced today.

[2] Ceiling Price Certification. Any purchaser from CCC of Pinto or Great Northern beans for export, or of Pea beans for export to Western Hemisphere countries, must be able and will be required to certify that the price paid to CCC does not exceed the highest ceiling price he could pay any of his usual suppliers for the commodity in the quantity and at the place and season that delivery is made.

Issued July 9, 1952.

[SEAL] HAROLD K. HILL,
Acting President,
Commodity Credit Corporation.

SECURITIES AND EXCHANGE COMMISSION

[File Nos. 7-1432, 7-1433, 7-1434]

BURLINGTON MILLS CORP. ET AL.

NOTICE OF APPLICATION FOR UNLISTED TRADING PRIVILEGES, AND OF OPPORTUNITY FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 8th day of July A. D. 1952.

In the matter of application by the Philadelphia-Baltimore Stock Exchange for unlisted trading privileges in Burlington Mills Corporation, Common Stock, $1 Par Value, 7-1432; Minnesota Mining & Mfg. Co., Common Stock, No Par Value, 7-1433; Northern States Power Company (Minn.), Common Stock, $5 Par Value, 7-1434.

The Philadelphia-Baltimore Stock Exchange, pursuant to section 12 (f) (2) of the Securities Exchange Act of 1934 and Rule X-12F-1 thereunder, has made application for unlisted trading privileges in the Common Stock, $1 Par Value, of Burlington Mills Corporation, listed and registered on the New York Stock Exchange; the Common Stock, No Par Value, of Minnesota Mining & Mfg. Co., listed and registered on the New York Stock Exchange; and the Common Stock, $5 Par Value, of Northern States Power Company (Minn.), listed and registered on the New York Stock Exchange. Rule X-12F-1 provides that the applicant shall furnish a copy of the application to the issuer and to every exchange on which the security is listed or already admitted to unlisted trading privileges. The application is available for public inspection at the Commission's principal office in Washington, D. C.

Notice is hereby given that, upon request of any interested person received prior to August 5, 1952, the Commission will set this matter down for hearing. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application, and other information contained in the official file of the Commission pertaining to this matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File Nos. 54-170, 54-172]

NIAGARA HUDSON POWER CORP.

INTERIM ORDER APPROVING PAYMENT OF A FEE

JULY 8, 1952.

The Commission having on August 25, 1949 issued its order approving plans filed pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("act") by Niagara Hudson Power Corporation ("Niagara Hudson"), a registered holding company, providing for the consolidation of Niagara Hudson's three major subsidiaries into a single new operating utility company, Niagara Mohawk Power Corporation ("Niagara Mohawk"), and for the dissolution of Niagara Hudson; and

Said order having reserved, among other things, jurisdiction over the reasonableness and appropriate allocation of all fees and expenses incurred and to be incurred by Niagara Hudson in connection with the plans and the transactions incident thereto; and Niagara Hudson having been dissolved pursuant to said plans and Niagara Mohawk having assumed the liabilities of Niagara Hudson; and

Applications for fees and expenses having been filed by various participants in the proceedings, hearings having been held and the Division of Public Utilities having filed its recommendation for findings and opinion to be issued by the Commission with respect to such fee applications; and

E. Ralph Sterling, financial adviser to the Committee for First Preferred Stockholders of Niagara Hudson, having amended his application for a fee for services rendered in the proceedings to reduce the requested amount from $12,500 to $10,000 in accordance with the recommendations of the Division of Public Utilities, and having requested that an order be entered directing the payment of such fee; and

All other fee applicants having objected to the recommendations of the Division of Public Utilities and having filed briefs in support thereof; and

The Commission having considered the record including a statement from Niagara Mohawk agreeing to pay this fee at this time, and finding that the services rendered by E. Ralph Sterling were necessary and of a benefit to the estate of Niagara Hudson and that the requested fee in the amount of $10,000 is not unreasonable:

It is ordered, That the payment by Niagara Mohawk of the fee of E. Ralph Sterling in the amount of $10,000 be, and hereby is, approved, and said company, be, and hereby is, authorized and directed to make payment of such amount to E. Ralph Sterling:

It is further ordered, That jurisdiction is reserved with respect to all other fees and expenses to be paid in connection with this proceeding.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File No. 70-2882]

PUBLIC SERVICE CO. OF NEW HAMPSHIRE

MEMORANDUM OPINION AND ORDER AUTHORIZING ISSUANCE AND SALE OF SHARES OF PREFERRED STOCK AND GRANTING EXEMPTION FROM RULE U-50

JULY 9, 1952.

On June 16, 1952, this Commission issued its order (Holding Company Act Release No. 11322) granting an application pursuant to section 6 (b) of the Public Utility Holding Company Act of 1935 ("act"), of Public Service Company of New Hampshire ("Public Service"), a public-utility subsidiary of New England Public Service Company, a registered holding company, for exemption from the provisions of sections 6 (a) and 7 of the act of the issuance and sale by Public Service at competitive bidding pursuant to Rule U-50 of 50,000 shares of its cumulative -- percent preferred stock, $100 par value. Our order contained the condition, among others, that the sale should not be consummated until the results of the competitive bidding had been made a matter of record herein and a further order issued in connection therewith.

Public Service has now filed an amendment to its application proposing the sale of such preferred stock privately through negotiated dealings and requesting that the Commission exempt such issuance and sale from the competitive bidding requirements of Rule U-50. The Commission by order dated July 3, 1953, directed that a hearing be held on the application as amended. Having considered the record, the Commission makes the following findings:

Pursuant to the authorization granted by our order of June 16, 1952, Public Service duly published invitations for the submission of sealed bids, to be opened on June 23, 1952, for the purchase of said 50,000 shares of preferred stock. Prior to that date, two underwriting syndicates, one headed by Kidder, Peabody & Co. and Blyth & Co., Inc. and the other by R. W. Pressprich & Co. and Spencer, Trask & Co., ("Pressprich Group"), qualified with the company in accordance with the invitations for bids. However, the only bid received was submitted by the syndicate headed by Kidder, Peabody & Co. and Blyth & Co., Inc. That bid specified a price to Public Service of $100.02 per share of its preferred stock and a dividend rate therefor of 5.60 percent, resulting in a cost of money of 5.599 percent. After opening the bid, Public Service rejected it, deeming it to be unsatisfactory.

On May 20, 1952, prior to the invitation for sealed bids for the purchase of Public Service's preferred stock, the New Hampshire Public Utilities Commission (State Commission) authorized Public Service in a pending rate proceeding, to submit for consideration and approval revised rate schedules designed to produce, on the basis of 1951 consumption, additional gross revenues of $1,344,750.[1] The State Commission order also provided for a temporary surcharge designed to permit recovery by the Company of $320,871 and certain other amounts to be approved by that Commission. On June 9, 1952 Public Service submitted revised rates to the State Commission and on the following day the Commission approved such rates to become effective as of June 9, 1952.

Counsel for the State of New Hampshire, for the Office of Price Stabilization and certain industrial customers filed motions for rehearing on June 6, 1952, which motions were denied by the State Commission on June 16, 1952, the day preceding the publication of invitations for bids for Public Service's preferred stock. On June 20, 1952, the State of New Hampshire, among others, filed an appeal to the Supreme Court of New Hampshire from the order of the State Commission and requested the Supreme Court to exercise its authority to suspend the rate order pending determination of the appeal.

After being informed of the rate litigation the Pressprich Group informed Public Service that it probably would not submit a bid.

Subsequent to its decision to reject the bid, Public Service requested authorization from this Commission to conduct negotiations for the sale of the stock, and the Commission informally authorized such negotiations, other than with Public Service's financial adviser, The First Boston Corporation.

The record shows that following our informal authorization, Public Service conducted conversations looking to a negotiated sale of its preferred stock with representatives of the two syndicates which had qualified with the company. Both groups indicated to Public Service their general price ideas as a basis for negotiations. The views expressed by the Pressprich Group were, in the management's opinion, more favorable to the company. Public Service so informed the Kidder-Blyth group and continued negotiations with the Pressprich Group. The agreement reached by Public Service with the latter group provides that the price to be paid to the company for preferred stock with a dividend rate of 5.40 percent will be $100.20 a share plus accrued dividends, resulting in a cost of money to the company of 5.3892 percent. The agreement also provides that the stock will be offered to the public at a price of $102.85 a share, resulting in an underwriting spread of $2.65 a share.

Orders have been issued by the New Hampshire Public Utilities Commission and the Vermont Public Service Commission authorizing the issuance and sale of the preferred stock in the manner and under the terms now proposed.

In view of the particular circumstances of this case, including pendency of rate litigation and the evidence adduced by Public Service to demonstrate that competitive conditions have been maintained, we are of the opinion that the requested exemption from the competitive bidding requirements of Rule U-50 should be granted.

In our order of June 16, 1952, we reserved jurisdiction over all legal fees and expenses of counsel for Public Service and the underwriters in connection with the sale of the preferred stock. The record now shows that the estimated legal fees and expenses to be incurred and paid by Public Service in this transaction aggregates $12,775, including a fee of $9,000 payable to Ropes, Gray, Best, Coolidge & Rugg, and $2,100 payable to Sulloway, Jones, Hollis, and Godfrey; and that a legal fee of $4,000 is to be paid by the purchasers of the preferred stock to their counsel, Choate, Hall & Stewart. These fees and expenses do not appear to be unreasonable.

On the basis of the record herein we conclude that the application, as amended, should be granted effective forthwith without the imposition of terms or conditions, other than those specified in Rule U-24:

Wherefore it is ordered, That the jurisdiction heretofore reserved with respect to fees and expenses be, and the same hereby is, released, and that, pursuant to the applicable provisions of the act, said application, as amended, including the request for exemption from the competitive bidding requirements of Rule U-50, be and it hereby is granted effective forthwith, subject to the terms and conditions contained in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

GEORGIA POWER CO.

SUPPLEMENTAL ORDER RELEASING JURISDICTION OVER RESULTS OF BIDDING IN SALE OF BONDS AND OVER FEES AND EXPENSES

JULY 9, 1952.

Georgia Power Company ("Georgia"), a public utility subsidiary of the Southern Company, a registered holding com-

[1] This figure includes, and in effect made permanent from the effective date of the new rates, a temporary rate increase of $703,736 which has been in effect since November 30, 1951.

pany, having filed an application, with amendments thereto, pursuant to section 6 (b) of the act, with respect to the issuance and sale by Georgia, pursuant to the competitive bidding requirements of Rule U-50, of $20,000,000 principal amount of First Mortgage Bonds __ Percent Series, due 1982; and

The Commission having, by order dated June 26, 1952, granted said application, as amended, except that the issuance and sale of the bonds were not to be consummated until the results of competitive bidding, pursuant to Rule U-50, were made a matter of record in this proceeding and a further order issued, for which purpose jurisdiction was reserved; and

Jurisdiction also having been reserved in said order of June 26, 1952, with respect to all fees and expenses incurred in connection with the proposed transactions; and

Georgia having filed a further amendment to the application in which it is stated that, in accordance with the permission granted by the said order of the Commission dated June 26, 1952, it offered such bonds for sale pursuant to the competitive bidding requirements of Rule U-50 and received the following bids:

Bidder	Annual interest rate (percent)	Price to company 1 (percent of principal)	Annual cost to company (percent)
The First Boston Corp...	3⅛	100.4199	3.3527
Union Securities Corp. and Equitable Securities Corp.	3⅛	100.19	3.3649
Halsey, Stuart & Co., Inc.	3⅛	100.067	3.3714
Harriman Ripley & Co., Inc.	3½	102.27	3.3790
Lehman Bros.	3½	101.9059	3.3982
Shields & Co. and Salomon Bros. & Hutzler	3½	101.88	3.3996
Kuhn, Loeb & Co., Blyth & Co., Inc., and Kidder, Peabody & Co.	3½	101.71	3.4085

1 Plus accrued interest from July 1, 1952, to the date of delivery of and payment for the bonds.

Said amendment having further stated that Georgia has accepted the bid of the First Boston Corporation for the purchase of the bonds, as set forth above, and that the bonds will be offered for sale to the public at a price of 101.039 percent of the principal amount thereof, plus accrued interest from July 1, 1952, resulting in an underwriter's spread of 0.6191 percent of the principal amount of the bonds, or an aggregate amount of $123,820; and

The record having been completed with respect to the fees and expenses incurred in connection with the proposed transactions, which are estimated as follows:

Federal original issue tax	$22,000.00
S. E. C. filing fee	2,060.00
Charges of trustee	12,000.00
Listing on New York Stock Exchange	2,400.00
Cost of temporary and definitive bonds	11,000.00
Printing	20,000.00
Recording supplemental indentures	4,000.00
Winthrop, Stimson, Putnam & Roberts, counsel:	
Fee	$10,000.00
Expenses	100.00
Arthur Andersen & Co., accountants:	
Fee	5,985.00
Expenses	75.00
Southern Services, Inc., mutual service company	6,000.00
Miscellaneous	3,000.00
	98,620.00

It appearing that the proposed fee and estimated expenses of Simpson Thacher & Bartlett, counsel for the purchaser of the bonds, which are to be paid by said purchaser, are $7,000.00 and $350.00 respectively; and

The Commission having examined the record in the light of said amendment, and observing no basis for imposing terms and conditions with respect to the price to be received by Georgia for the bonds, the interest rate, the underwriter's spread, or otherwise; and it appearing to the Commission that the above fees and expenses are not unreasonable provided they do not exceed the amounts estimated, and it appearing appropriate to the Commission that the jurisdiction heretofore reserved over the results of competitive bidding and over all fees and expenses, be released:

It is ordered, That the application, as further amended, be, and the same hereby is, granted forthwith, and that the jurisdiction heretofore reserved with respect to the results of competitive bidding, and over the fees and expenses incurred in connection with the proposed transactions, be and the same hereby is, released, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-2892]

OHIO POWER CO. AND AMERICAN GAS AND ELECTRIC CO.

ORDER CONCERNING ISSUANCE OF NOTES TO BANKS AND SALE OF COMMON STOCK BY SUBSIDIARY TO PARENT

JULY 8, 1952.

American Gas and Electric Company ("American Gas"), a registered holding company, and its electric utility subsidiary, the Ohio Power Company ("Ohio"), having filed a joint application-declaration, and an amendment thereto, pursuant to the Public Utility Holding Company Act of 1935, particularly sections 6, 7, and 10 thereof with respect to the following proposed transactions:

Ohio proposes to issue and sell, and American Gas proposes to purchase, 300,000 shares of Ohio's no par value common stock for a cash consideration of $14,500,000. The funds proposed to be used by American Gas for this purpose will be derived from the proceeds of its sale of common stock and debentures (File No. 70-2878).

Ohio has established a line of credit with six banking institutions pursuant to which Ohio proposes to borrow not to exceed $18,000,000 from time to time prior to March 31, 1953. Such borrowings will be evidenced by the issuance and sale of promissory notes by Ohio bearing interest from the date thereof at the then current prime credit rate and maturing 270 days after the date of such issuance.

Of the $18,000,000 proposed to be borrowed, Ohio had, as of March 31, 1952, borrowed $5,000,000 from such banks and had issued its notes in evidence thereof. It is further stated that additional borrowings of not to exceed $6,000,000 may be made prior to the effective date of the declaration. These borrowings are stated to be exempt from the provisions of section 6 (a) by reason of the provisions of section 6 (b).

The application-declaration states that at least five days prior to each borrowing or renewal made subsequent to the effective date of the joint application-declaration, an amendment will be filed setting forth the amount of said proposed borrowing and the annual rate of interest thereon. Ohio requests that such amendment or amendments become effective five days after the filing thereof provided no action is taken with respect thereto within such five-day period by the Commission.

The application-declaration further states that the notes may be repaid from time to time in whole or in part without premium.

Proceeds from the proposed sale of securities will be used by Ohio in connection with its construction program which, it is presently estimated, will require the expenditure of approximately $47,500,000 in 1952 and $51,000,000 in 1953.

Said application-declaration having been filed on June 12, 1952, an amendment thereto having been filed on June 27, 1952, notice of said filing having been given in the form and manner required by Rule U-23 promulgated pursuant to said act, the Commission not having received a request for hearing within the time specified in said notice, or otherwise, and the Commission not having ordered a hearing thereon; and

The Commission finding that the issuance and sale of securities by Ohio are for the purpose of financing the business of Ohio as a public utility company, that the issuance and sale of the common stock has been authorized by the Public Utilities Commission of Ohio, the State in which Ohio is organized and doing business, the Commission finding that the proposed transactions are in accordance with the applicable standards of the act, and that no adverse findings are necessary thereunder, and the Commission deeming it appropriate that the said application-declaration, as amended, should be granted and permitted to become effective without the imposition of terms or conditions:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of said act and subject to the terms and conditions

contained in Rule U-24 that said application-declaration, as amended, be, and the same hereby is, granted and permitted to become effective forthwith.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 52-7682; Filed, July 14, 1952; 8:46 a. m.]

[File No. 70-2893]

APPALACHIAN ELECTRIC POWER CO. AND AMERICAN GAS AND ELECTRIC CO.

ORDER CONCERNING ISSUANCE OF NOTES TO BANKS AND SALE OF COMMON STOCK BY SUBSIDIARY TO PARENT

JULY 8, 1952.

American Gas and Electric Company ("American Gas"), a registered holding company, and its electric utility subsidiary, Appalachian Electric Power Company ("Appalachian"), having filed a joint application-declaration, and an amendment thereto, pursuant to the Public Utility Holding Company Act of 1935, particularly sections 6, 7, and 10 thereof with respect to the following proposed transactions:

Appalachian proposes to issue and sell, and American Gas proposes to purchase, 300,000 shares of Appalachian's no par value common stock for a cash consideration of $9,000,000. The funds proposed to be used by American Gas for this purpose will be derived from the proceeds of its sale of common stock and debentures (File No. 70-2878).

Appalachian has established a line of credit with four banking institutions pursuant to which Appalachian proposes to borrow not to exceed $25,000,000 from time to time prior to May 31, 1953. Such borrowings will be evidenced by the issuance and sale of promissory notes by Appalachian bearing interest from the date thereof at the then current prime credit rate and maturing 270 days after the date of such issuance.

Of the $25,000,000 proposed to be borrowed, Appalachian had, as of May 31, 1952, borrowed $8,000,000 from such banks and had issued its notes in evidence thereof. It is further stated that additional borrowings of not to exceed $4,500,000 may be made prior to the effective date of the declaration. These borrowings are stated to be exempt from the provisions of section 6 (a) by reason of the provisions of section 6 (b).

The application-declaration states that at least five days prior to each borrowing or renewal made subsequent to the effective date of the joint application-declaration, an amendment will be filed setting forth the amount of said proposed borrowing and the annual rate of interest thereon. Appalachian requests that such amendment or amendments become effective five days after the filing thereof provided no action is taken with respect thereto within such five-day period by the Commission.

The application-declaration further states that the notes may be repaid from time to time in whole or in part without premium.

Proceeds from the proposed sale of securities will be used by Appalachian in connection with its construction program which, it is presently estimated, will require the expenditure of approximately $42,000,000 in 1952 and $37,000,000 in 1953.

Said application-declaration having been filed on June 13, 1952, an amendment thereto having been filed on June 27, 1952, notice of said filing having been given in the form and manner required by Rule U-23 promulgated pursuant to said act, the Commission not having received a request for hearing within the time specified in said notice, or otherwise, and the Commission not having ordered a hearing thereon; and

The Commission finding that the issuance and sale of securities by Appalachian are for the purpose of financing the business of that company as a public utility company, that the transactions have been approved by the State Corporation Commission of the State of Virginia, the State in which Appalachian is organized and one of the States in which it is doing business, that the transactions have not as yet been authorized by the Public Service Commission of West Virginia and the Tennessee Railroad and Public Utilities Commission, the State Commissions of the other States in which Appalachian does business; the Commission finding that the proposed transactions are in accordance with the applicable standards of the act and that no adverse findings are necessary thereunder; and the Commission deeming it appropriate that said application-declaration, as amended, be granted and permitted to become effective upon the granting of the requisite authorization by the appropriate State Commissions and notification of such authorizations to this Commission:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of said act, and subject to the terms and conditions contained in Rule U-24, that said application-declaration, as amended, be, and the same hereby is, granted and permitted to become effective upon notification to this Commission of appropriate authorizations by the Public Service Commission of West Virginia and the Tennessee Railroad and Public Utilities Commission.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 811-52]

SELECTED CUMULATIVE SHARES

NOTICE OF APPLICATION

JULY 8, 1952.

Notice is hereby given that Selected Cumulative Shares of Chicago has filed an application pursuant to section 8 (f) of the Investment Company Act of 1940 for an order of the Commission declaring that it has ceased to be an investment company within the meaning of the act.

Upon consideration of the application, it appears to the Commission that Selected Cumulative Shares was organized under and pursuant to a trust agreement, dated as of June 30, 1931, by and between Selected Shares Corporation, as depositor, the Central Republic Bank and Trust Company, as trustee, and the bearers from time to time of the certificates of Selected Cumulative Shares, under which City National Bank and Trust Company of Chicago thereafter became successor trustee; that Selected Cumulative Shares is registered under the Investment Company Act of 1940 as a unit investment trust and has not offered its shares to the public since July 1933.

It further appears that in accordance with the provisions of said trust agreement, Selected Cumulative Shares expired by its terms on July 1, 1951, and the trustee proceeded to sell the trust property and completed the liquidation of the assets within the time limitation; that shareholders were notified by the trustee of said termination and liquidation and were requested to present and surrender their certificates for their pro rata amount of the proceeds amounting to $15.500537 per share; that as of June 5, 1952, certificate holders of 12,550 shares out of the 13,610 outstanding shares have presented their certificates to the trustee for payment, and 1,060 shares remain outstanding representing less than 7 percent of the total outstanding at the date of termination; that the trustee will hold in trust the sum of $16,431.50 required for the payment of the remaining outstanding shares pending presentation and surrender of outstanding certificates.

For a more detailed statement of the matters of fact and law asserted, all interested persons are referred to said application which is on file in the offices of the Commission in Washington, D. C.

Notice is further given that an order granting the application may be issued by the Commission at any time on or after July 28, 1952, unless prior thereto a hearing upon the application is ordered by the Commission, as provided in Rule N-5 of the rules and regulations promulgated under the act. Any interested person may, not later than July 25, 1952, at 5:30 p. m., submit to the Commission in writing his views or any additional facts bearing upon this application or the desirability of a hearing thereon, or request the Commission in writing that a hearing be held thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., and should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reasons for such request, and the issues of fact or law raised by the application which he desires to controvert.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

Reference Room

ECONOMIC STABILIZATION AGENCY

Office of Price Stabilization

[Ceiling Price Regulation 7, Section 43, Special Order 756, Amdt. 1]

SUNBEAM CORP., ELECTRIC APPLIANCE DIVISION

CEILING PRICES AT RETAIL AND WHOLESALE

Statement of considerations. Special Order 756 under section 43, Ceiling Price Regulation 7, established retail and wholesale ceiling prices for toasters, mixers, waffle irons, coffee makers, egg cookers, irons, bottle warmers, hedge trimmers, sprinklers and animal clippers manufactured by Sunbeam Corporation, Electric Appliance Division and having the brand name "Sunbeam".

This amendment establishes new retail ceiling prices for certain of the applicant's branded articles. It appears that the ceiling prices requested are in line with those already granted and are no higher than the level of ceiling prices under Ceiling Price Regulation 7. The retail ceiling prices are established by incorporating into the special order the amended application dated March 4, 1952.

Amendatory provisions. Special Order 756 under Section 43 of Ceiling Price Regulation 7 is amended in the following respects:

1. In paragraph 1, after the words "in its application dated November 12, 1951," insert the words "as supplemented and amended by its application dated March 4, 1952".

2. Insert following paragraph 1 now appearing in the special order the following:

The prices listed in the manufacturer's supplemental application dated March 4, 1952 shall become effective on receipt of a copy of the notice for such articles, but in no event later than July 15, 1952.

Effective date. This amendment shall become effective July 2, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 2, 1952.

[F. R. Doc. 52-7445; Filed, July 2, 1952; 4:53 p. m.]

[CPR 7, Section 43; Revocation of Special Order 457, as amended]

CROWN FASTENERS CORP.

CEILING PRICES AT RETAIL

Statement of considerations. Special Order 457, as amended, issued under section 43 of Ceiling Price Regulation 7, establishes ceiling prices for sales at retail of slide fasteners manufactured by the Crown Fasteners Corporation, Warren, Rhode Island, having the brand name "Crown." Amendment 2 to Special Order 457 modified the marking and tagging requirements of section 43 to permit the Crown Fasteners Corporation to use until June 30, 1952, a label, tag or ticket stating the retail ceiling price of the "Crown" brand slide fastener without the additional statement required by section 43, "OPS—Sec. 43—CPR 7." This amendment provided, however, that on and after June 30, 1952, no retailer may offer or sell any "Crown" brand slide fastener at the ceiling price established by Special Order 457 unless it is marked or tagged as required by section 43 of CPR 7.

The Crown Fasteners Corporation has now informed the Director of Price Stabilization that it will not be practicable for it to change its labels, tags or tickets on and after June 30, 1952, or at any later date, so as to meet the requirements of section 43 of CPR 7. In view of these facts the Crown Fasteners Corporation requests that Special Order 457, as amended, be revoked. In the judgment of the Director such a revocation should be granted.

Revocation. 1. For the reasons set forth in the Statement of Considerations and pursuant to the request of the Crown Fasteners Corporation, Special Order 457, as amended, issued to Crown Fasteners Corporation under section 43 of Ceiling Price Regulation 7, effective August 17, 1951, establishing ceiling prices for sales at retail of slide fasteners having the brand name "Crown," is hereby revoked.

2. Within 30 days after the effective date of this order of revocation, the Crown Fasteners Corporation must send a copy of this order of revocation to all purchasers for resale to whom it has given notice of Special Order 457, as amended.

Effective date. This order shall become effective July 2, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 2, 1952.

[Delegation of Authority No. 61, Revision 1]

DIRECTORS OF THE REGIONAL OFFICES

DELEGATION OF AUTHORITY TO ACT UNDER CPR 134

By virtue of the authority vested in me as Director of Price Stabilization, pursuant to the Defense Production Act of 1950, as amended (64 Stat. 798, 803; 65 Stat. 131), Executive Order 10161 (15 F. R. 6105), and Economic Stabilization General Order No. 2, as amended (16 F. R. 738, 11626), this revised Delegation of Authority is hereby issued.

1. *Authority to act under CPR 134.* Authority is hereby delegated to the Directors of the Regional Offices, Office of Price Stabilization, to act under sections 4 (a) (6), 6 (c), 6 (d), 7, 9 (b) (3), 10, 14 (f), 16 (b), and 21 of CPR 134.

2. *Redelegation of authority.* The authority hereby delegated may be redelegated to the Directors of the District Offices of the Office of Price Stabilization.

This revised delegation of authority shall take effect on July 15, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

[Supplemental Vesting Order 18948]

JOEL B. WOLFE

In re: Trust under will of Joel B. Wolfe, deceased. File No. D-66-110; E. T. sec. 1893.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That Rudolf Udo Slattery, whose last address is Germany, on or since December 11, 1941, and prior to January 1, 1947, was a resident of Germany, and is and prior to January 1, 1947, was a national of a designated enemy country (Germany);

2. That all right, title, interest and claim of any kind or character whatsoever of the person named in subparagraph 1 hereof in and to the trust created under the will of Joel B. Wolfe, deceased, is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by the aforesaid national of a designated enemy country (Germany);

3. That such property is in the process of administration by the United States Trust Company of New York, as trustee, acting under the judicial supervision of the Surrogate's Court of New York County, New York;

and it is hereby determined:

4. That the national interest of the United States requires that the person named in subparagraph 1 hereof, be treated as a person who is and prior to January 1, 1947, was a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 10, 1952.

For the Attorney General.

[SEAL] PAUL V. MYRON,
Deputy Director,
Office of Alien Property.

FEDERAL REGISTER

VOLUME 17 NUMBER 138

Washington, Wednesday, July 16, 1952

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10373

AMENDING EXECUTIVE ORDER NO. 10161 WITH RESPECT TO REAL ESTATE CREDIT

By virtue of the authority vested in me by the Constitution and statutes, including the Defense Production Act of 1950, as amended, and as President of the United States, it is ordered that Executive Order No. 10161 of September 9, 1950, 15 F. R. 6105-6108, as amended, shall be, and it is hereby, further amended by adding the following at the end of Part V thereof:

"SEC. 503. (a) Except as otherwise provided in section 503 (b) of this Executive order, the functions conferred upon the President by section 607 of the Defense Production Act of 1950, as amended, are hereby delegated to the Board of Governors of the Federal Reserve System. The Board shall perform the functions delegated by this subsection subject to the concurrence of the Housing and Home Finance Administrator and upon the basis of estimates made pursuant to section 503 (b) of this Executive order.

"(b) The Secretary of Labor shall, pursuant to section 607 of the Defense Production Act of 1950, as amended, make estimates of the number of permanent, non-farm, family dwelling units the construction of which has been started during each calendar month, and, on the basis of such estimates, make estimates of the annual rate of construction starts during each such month, after making reasonable allowance for seasonal variations in the rate of construction. The Secretary shall transmit the said estimates to the Board of Governors of the Federal Reserve System.

"(c) The concurrence of the Housing and Home Finance Administrator specified in section 501 (b) of this Executive order shall not be necessary to the prescribing, changing, or suspending of the provisions of any regulation of the Board of Governors of the Federal Reserve System issued pursuant to section 501 hereof with respect to extensions of credit during any 'period of residential credit control relaxation' announced pursuant to the said section 607, and the requirements of section 502 (b) hereof shall not be applicable during any such period."

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended June 19, 1937.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

REVISED BOOKS

TITLE 32 of the Code of Federal Regulations

Title 32, containing the regulations of the Department of Defense and other related agencies, has been completely revised. Originally a single book, Title 32 is being reissued as two books as follows:

Parts 1–699 ($5.00)
Part 700 to end (to be announced)

These books contain the full text of regulations in effect on December 31, 1951

Order from
Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regulations, are hereby amended to read as follows:

§ 11.30 *Action by directors.* The board of directors of each association to be consolidated shall take appropriate action to authorize the execution of a consolidation agreement and articles of association for each association to be created as a result of the agreement. The board may designate one or more of its members to serve with representatives of each of the boards of the other associations involved as an organization committee for the formation of the new association or associations. Each board of directors, or the representatives of each association on the organization committee pursuant to authority by the association board of directors, shall execute on behalf of such associations the agreement of consolidation and articles of association on forms prescribed by the Commissioner and shall appoint not less than five or more than seven qualified persons to serve as directors for each association to be created as a result of the agreement, who will constitute the board of directors for the period intervening from the date of organization to the date fixed in the bylaws for the first annual meeting of stockholders or until their successors are elected and have qualified.

§ 11.31 *Action by members.* Meetings of association members shall be called in accordance with the provisions of the bylaws of the association. Notices of the meetings, containing a brief statement of the proposal shall be mailed to each stockholder of record. A favorable vote of a majority of the members present and voting at each separate meeting shall be necessary for the approval of the proposed consolidation, and such members shall adopt resolutions ratifying and approving the execution of the agreement of the consolidation and articles of association in the name of the association. The secretary-treasurer shall certify to the action taken at the meetings of members and his certificate shall set out the resolution adopted by the members ratifying the execution of the consolidation agreement.

§ 11.32 *Completing consolidation.* Upon completion of the association action, one set of organization papers for each association being organized, with the bank's recommendation, and a financial statement for each constituent association and each consolidated association being created as a result of the agreement, shall be submitted to the Commissioner for consideration. Upon approval by the Commissioner, notice of such approval and the effective date of the consolidation will be sent to the bank and each consolidated association, and a charter will be issued to the new association or associations which will be forwarded to the association or associations through the bank. Upon receipt of the approval notice, the bank should provide assistance in transferring all assets in accordance with the consolidation agreement, setting up the new books and establishing such other procedures as may be found necessary. The transfer of assets should be made the day following the effective date of the consolidation, if possible. The secretary-treasurer of each new association should take appropriate action to effect changes in stock issues, and should notify promptly each of the members that the consolidation has been approved. The charters of the constituent associations should be surrendered and sent to the Administration for cancelation. The Administration should be notified by the bank of the completion of the consolidation upon the issuance of new bank stock to the new association or associations in exchange for the stock held by the constituent associations.

§ 11.33 *Legal reserve requirement.* The legal reserve requirement for the new association or associations at the time of completion of the consolidation shall be the total of the unimpaired legal reserves of the constituent associations.

(Sec. 29, 39 Stat. 381; 12 U. S. C. 965)

PART 726—FIRE-CURED, DARK AIR-CURED, AND VIRGINIA SUN-CURED TOBACCO

MARKERING QUOTA REGULATIONS, 1953–54 MARKETING YEAR

Correction

In F. R. Doc. 52-7527, appearing at page 6184 of the issue for Thursday, July 10, 1952, the following changes should be made:

1. In the last sentence of § 726.420 (a), the phrase "for the farm so required" should read "for the farm so acquired".

2. In § 726.423 (b), the phrase 'have been met" should read "has been met".

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Regs., Serial No. SR-383]

PART 18—MAINTENANCE, REPAIR AND ALTERATION OF AIRFRAMES, POWER PLANTS, PROPELLERS, AND APPLIANCES

PART 24—MECHANIC AND REPAIRMAN CERTIFICATES

PART 52—REPAIR STATION CERTIFICATES

SPECIAL CIVIL AIR REGULATION; LIMITED MECHANIC CERTIFICATE WITH PROPELLER OR AIRCRAFT APPLIANCE RATING

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 10th day of July 1952.

Special Civil Air Regulation SR-365, which expires on July 31, 1952, was designed to provide for the certification of limited mechanics with propeller or aircraft appliance ratings as an interim measure until Parts 18, 24, and 52 of the Civil Air Regulations could be revised. Revisions of these parts were recently promulgated and became effective June 15, 1952. These revised parts, among other things, (1) allow a manufacturer to rebuild or alter products for which he holds a type or production certificate, or which are manufactured by him in accordance with appropriate specifications approved by the Administrator without holding a repair station certificate or employing certificated mechanics, (2) establish a new classification of airman known as a "repairman" who may be certificated to perform propeller and aircraft appliance work for an air carrier or certificated repair station, and (3) require the reinspection of all existing repair stations with provision for reissuance of the repair station certificate if compliance with present regulations is shown.

As a result of these revisions, there is now no need for such limited mechanic certificates with respect to manufacturers or certificated repair stations. However, since the reinspection of any particular repair station may not take place until June 15, 1953, and since, until reinspected, such repair station will continue to operate in accordance with Part 52 as it existed immediately prior to the recent revision, it is considered appropriate to extend to June 15, 1953, the authority granted by SR-365 insofar as it provides certification for limited mechanics employed by certificated repair stations. This will, in addition, lighten the administrative burden of issuing the new repairman certificates.

Since this amendment is minor in nature and imposes no additional burden on any person, notice and public procedure hereon are unnecessary, and the amended regulation may be made effective without prior notice.

In consideration of the foregoing the Civil Aeronautics Board makes and promulgates the following Special Civil Air Regulation effective immediately:

A mechanic certificate with a propeller or aircraft appliance rating, excepting a parachute rating, may be issued by the Administrator of Civil Aeronautics to an individual who is employed and designated by the holder of a repair station certificate with a propeller or aircraft appliance rating. The individual must be in direct charge of the inspection, overhaul, or repair of propellers or aircraft appliances, and his experience and employment record must indicate that he is competent to engage in such activity. The individual to whom a certificate is issued shall exercise the privileges of his certificate only with respect to work performed for such repair station and through the use of facilities provided by the repair station.

This regulation supersedes Special Civil Air Regulation SR-365, and shall terminate June 15, 1953, unless sooner superseded or rescinded.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 602, 607, 52 Stat. 1007, 1008, 1011; 49 U. S. C. 551, 552, 557)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

Chapter II—Civil Aeronautical Administration, Department of Commerce

[Amdt. 32]

PART 608—DANGER AREAS

ALTERATIONS

The danger area alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is not required. Part 608 is amended as follows:

1. In § 608.12, the Wilcox Dry Lake, Arizona, area, published on July 16, 1949 in 14 F. R. 4288, and amended on January 24, 1952 in 17 F. R. 715, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat. 32°14'00" N, long. 109°39'00" W; due S to lat. 32°07'00" N; W to lat. 32°07'30" N, long. 110°00'30" W; due N to lat. 32°14'00" N; due E to lat. 32°14'00" N, long. 109°39'00" W, point of beginning."

2. In § 608.14, a Camp San Luis Obispo, California (D-416), area is added to read:

Name and location (chart)	Description by geographical coordinates	Designated altitudes	Time of designation	Using agency
CAMP SAN LUIS OBISPO (D-416) (San Francisco Chart).	N. boundary: lat. 35°22'42" N; S. boundary: lat. 35°20'00" N; E. boundary: long. 120°41'00" W; W. boundary: long. 120°46'00" W.	Surface to 2,000 feet above terrain.	0500 to 2400 daily.	6th Army.

3. In § 608.14, a Knoxville, California (D-414), area is added to read:

Name and location (chart)	Description by geographical coordinates	Designated altitudes	Time of designation	Using agency
KNOXVILLE (D-414) (Sacramento Chart).	A circular area having a radius of 4 nautical miles centered at lat. 38°47'00" N, long. 122°23'09" W.	Surface to unlimited.	Continuous...	12th Naval District.

4. In § 608.18, the Tyndall Air Force Base, Panama City, Florida, Area I, published on May 26, 1950 in 15 F. R. 3212, amended on August 7, 1951 in 16 F. R. 7696, and on November 28, 1951 in 16 F. R. 11954, is further amended by changing the "Time of Designation" column to read: "Continuous, sunset to sunrise. Only Instrument Flight Rule conditions from sunrise to sunset."

5. In § 608.36, the Fallon, Nevada, area 2, Target No. 18 (D-268), published on May 20, 1952 in 17 F. R. 4558, is amended by changing the "Description by Geographical Coordinates" column to read: "2. Target No. 18 (D-268): A circular area having a radius of 5 miles centered at lat. 39°19'00" N, long. 118°53'30" W, excluding that portion lying north of a line connecting lat. 39°22'30" N, long. 118°50'00" W and lat. 39°23'00" N, long. 118°56'00" W." This area is amended also by changing the "Designated altitudes" column to read: "Surface to unlimited", and by changing the "Using agency" column to read: "Commander Naval Air Bases, 12th Naval District (Admin)".

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on July 15, 1952.

[SEAL] F. B. LEE, *Acting Administrator of Civil Aeronautics.*

TITLE 15—COMMERCE AND FOREIGN TRADE

Chapter III—Bureau of Foreign and Domestic Commerce, Department of Commerce

Subchapter C—Office of International Trade

[0th Gen. Rev. of Export Regs., Amdt. 2]

PART 384—GENERAL ORDERS

ORDERS MODIFYING VALIDITY OF CERTAIN EXPORT LICENSES

Section 384.8 *Orders modifying validity of certain export licenses* is amended by adding a new paragraph (d) to read as follows:

(d) *Steel products.* The validity period of all export licenses covering steel products identified on the Positive List by the Processing Codes "STEE" and "TNPL", having an expiration date on or after June 2, 1952, is hereby extended for the duration of the steel strike plus 90 days. This order applies to all such licenses whether or not the exporter's source of supply is involved in the work stoppage.

This action is not applicable to the use or extension of any rating or allotment authority granted under the Controlled Materials Plan or any other supply assistance program in connection with such licenses and exportations.

This order shall be effective as of July 10, 1952.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245, 3 CFR, 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59, 3 CFR, 1948 Supp.)

KARL L. ANDERSON, *Acting Director, Office of International Trade.*

TITLE 32—NATIONAL DEFENSE

Chapter XIV—The Renegotiation Board

Subchapter B—Renegotiation Board Regulations Under the 1951 Act

PART 1453—MANDATORY EXEMPTIONS FROM RENEGOTIATION

The Renegotiation Board hereby adopts the proposed amendment of § 1453.2 (d) which was published on April 5, 1952 (17 F. R. 3000 to 3001), with the following changes:

1. In subparagraph (3) (ii), the word "purchases" appearing in the third sentence is changed to read "purchase".

2. In subparagraph (7), the word "contents" appearing in the second sentence is changed to read "contract".

3. In subparagraph (7), delete the word "Since" in the next to the last sentence and insert the words "Assuming that".

4. Add a new subparagraph (8) to read as follows:

(8) *Procedure.* A contractor who claims that a portion of its profits attributable to the increment in value of excess inventory should be excluded from consideration in determining whether or not it has received excessive profits shall give notice to the Board of such claim at the time of or before such contractor completes the filing of the Standard Form of Contractor's Report (RB Form 1B). The Regional Board to which the contractor is assigned for renegotiation will request the contractor to substantiate its claim before conclusion of the renegotiation if it appears that, without regard to the provisions of this paragraph, excessive profits exist.

(Sec. 109, Pub. Law 9, 82d Cong.)

Dated: July 10, 1952.

JOHN H. JOSS, *Acting Chairman, The Renegotiation Board.*

[F. R. Doc. 52-7797; Filed, July 15, 1952; 8:50 a. m.]

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 7, Interpretation 1]

CPR 7—RETAIL CEILING PRICES FOR CERTAIN CONSUMER GOODS

INT. 1—COVERAGE OF AUCTIONEERS

An auctioneer who operates a used household furniture and furnishings, antiques and bric-a-brac store is subject to CPR 7 as to articles covered by that regulation if he holds title to the merchandise when he sells it, providing that he buys and sells it in substantially the same form and is not exempted under sections 2 and 3. If the auctioneer does not have title to the merchandise when he sells it, but merely acts as an agent for another, sales of articles covered by CPR 7 are governed by that regulation only if the owner is subject to it.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154).

HERBERT N. MALETZ, *Chief Counsel, Office of Price Stabilization.*

JULY 15, 1952.

[F. R. Doc. 52-7891; Filed, July 15, 1952; 4:00 p. m.]

[Ceiling Price Regulation 7, Interpretation 2]

CPR 7—RETAIL CEILING PRICES FOR CERTAIN CONSUMER GOODS

INT. 2—PRICING OF JOB LOT MERCHANDISE (SECTIONS 30 THROUGH 39)

A retailer who purchases quantity job lots for a lump sum determines his ceiling prices under CPR 7 by allocating the total cost of the purchase in any reasonable manner among the articles included in the job lot. A notation should be made on the invoice or other cost record indicating how the total cost of the job lot has been allocated. The job lot purchased merchandise may then be priced by applying the pricing rules in sections 30 through 39 of CPR 7.

If all of the retailer's merchandise in a category has been purchased in job lots, he may not use such purchases as the basis for establishing markups for that category on his pricing chart. He must determine the ceiling prices for such articles by applying either sections 36, 37 or 39 (e).

(Sec. 704, Stat. 816, as amended; 50 U. S. C. App. Sup. 2154).

HERBERT N. MALETZ, *Chief Counsel, Office of Price Stabilization.*

JULY 15, 1952.

[F. R. Doc. 52-7892; Filed, July 15, 1952; 4:00 p. m.]

[Ceiling Price Regulation 7, Interpretation 3]

CPR 7—RETAIL CEILING PRICES FOR CERTAIN CONSUMER GOODS

INT. 3—COMPANY SELLING THROUGH DOOR-TO-DOOR SALESMEN

A company sells a commodity through house-to-house "dealers" who pocket the deposits as commission, whereupon the company delivers the merchandise, collecting and retaining the balance. The questions are raised as to whether, on such sales to ultimate consumers, the company is subject to CPR 7, and, if so, how the offering price is computed.

If the article in question is covered by CPR 7, the company is subject to CPR 7, unless it meets the requirements for exemption contained in sections 2 or 3 of that regulation. The relationship between the company and its "dealers" would appear to be that of principal and agent; the so-called "dealer" does not buy the articles from the company and sell them, but rather it appears that the company itself sells the articles through salesmen.

The offering price for the article is the full price at which the article was sold by the salesmen on the list date, with no deduction allowed for the commission.

(Sec. 704, Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

HERBERT N. MALETZ, *Chief Counsel, Office of Price Stabilization.*

JULY 15, 1952.

[F. R. Doc. 52-7893; Filed, July 15, 1952; 4:00 p. m.]

[General Overriding Regulation 31]

GOR 31—AIR FREIGHT DURING STRIKE EMERGENCY ON SHIPMENTS TO HAWAII

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this General Overriding Regulation 31 is hereby issued.

STATEMENT OF CONSIDERATIONS

The continuation of the maritime strike on the west coast has caused a shortage of vaccines and serums for animals and fowls in the Territory of Hawaii. The Governor's Emergency Committee, established for the purpose of considering such problems, has recommended that these items be brought into the Territory by air freight and that the Office of Price Stabilization permit sellers of these items to add air freight dead to their present ceiling price. The Office of Price Stabilization has carefully considered this recommendation and has determined that it is appropriate to permit sellers of vaccines and serums for animals and fowls to add to their ceiling prices otherwise established, the increased costs of shipping these vaccines and serums by air freight as provided in this regulation.

This general overriding regulation has been so drafted that other critical items may be added to its coverage if the need should arise, but it should be noted that the Office of Price Stabilization will include additional commodities only in cases of critical necessity.

The Office of Price Stabilization contemplates that this regulation will be revoked as soon as the strike is settled as to all commodities not actually delivered or in transit at that time.

Because of the nature of this general overriding regulation, consultation with the industry affected, including trade representatives, has not been practicable.

REGULATORY PROVISIONS

Sec.
1. Freight increases.
2. Invoices.
3. Applicability of other regulations.

AUTHORITY: Sections 1 to 3 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup., 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101–2110, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR 1950 Supp.

SECTION 1. *Freight increases.* (a) If you sell any commodity listed in Appendix A to this General Overriding Regulation and if the commodity, at the time there is a binding agreement to buy and sell, is located in the Territory of Hawaii and if, because of the maritime strike on the west coast of the United States, you incurred air freight charges and charges for special packaging for air shipment of the commodity, you must determine your ceiling price for the commodity under the applicable ceiling price regulation as if transportation had been by normal means. You may then charge the buyer, in addition to such ceiling price, an amount not to exceed the difference between the cost of transportation by normal means and the air freight and special packaging charges actually incurred by you for the commodity, provided that such additional amount which you charge the buyer is shown on your invoice, for all sales except sales at retail, as the amount of air freight and special packaging charges passed on by you, as required by section 2.

(b) If you sell any commodity listed in Appendix A to this General Overriding Regulation and if the commodity, at the time there is a binding agreement to buy and sell, is located in the Territory of Hawaii and if, because of the maritime strike on the west coast of the United States, air freight and charges for special packaging are passed on to you by your supplier under this regulation, you must, in determining your ceiling price for the commodity under the applicable ceiling price regulation, exclude from your direct cost the amount listed on your supplier's invoice to you as the amount of air freight and special packaging charges passed on to you for the commodity. You may then charge the buyer, in addition to such ceiling price, an amount not to exceed the amount of air freight and special packaging charges passed on to you by your supplier as shown by your supplier's invoice for the commodity, provided that such additional amount which you charge the buyer is shown on your invoice, for all sales except sales at retail, as the amount of air freight and special packaging charges passed on by you, as required by section 2.

SEC. 2. *Invoices.* If you sell any commodities under this general overriding regulation, you must furnish each purchaser, except a retail purchaser, an invoice stating separately for each commodity the amount of the air freight and special packaging charges passed on by you under this general overriding regulation. This information may be included on the invoice you customarily furnished or which you are required to furnish under any other applicable OPS regulation.

SEC. 3. *Applicability of other regulations.* All of the provisions of all other applicable regulations except as modified by this general overriding regulation continue in full force and effect.

Effective date. This General Overriding Regulation 31 is effective July 15, 1952.

NOTE: The record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 15, 1952.

Chapter VI—National Production Authority, Department of Commerce

[CMP Regulation No. 1, Direction 12 as Amended July 15, 1952]

CMP REG. 1—BASIC RULES OF THE CONTROLLED MATERIALS PLAN

DIR. 12—RESTRICTIONS ON STEEL SHIPMENTS AND ACCEPTANCE OF DELIVERIES

This amended direction under CMP Regulation No. 1 is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this direction as amended, consultation with industry representatives has been rendered impracticable due to the need for immediate action and because the direction affects many different industries.

REGULATORY PROVISIONS

Sec.
1. What this direction does.
2. Prohibition on shipments and acceptance of deliveries.

AUTHORITY: Sections 1 and 2 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this direction does.* The purpose of this direction is to reduce disruption to the national defense program resulting from the work stoppage in the steel producing industry. This will be accomplished by prohibiting shipments and acceptance of deliveries of specified kinds of steel controlled materials for certain less essential uses.

SEC. 2. *Prohibition on shipments and acceptance of deliveries.* From the effective date of this amended direction until a date to be specified in a further amendment to or by revocation of this direction, no person shall accept delivery of steel controlled materials in the forms and shapes indicated in Schedule I of this direction from a steel distributor as defined in NPA Order M-6A, if such steel (a) was ordered pursuant to an authorized controlled material order bearing the program identification V followed by a digit, or (b) is to be used in the manufacture of products pursuant to authorized production schedules bearing the program identification V followed by a digit: *Provided, however,* That nothing in this section shall be construed to prohibit the shipment, acceptance of delivery, or use of such steel if ordered pursuant to an authorized controlled material order identified by the suffix program identification B–5. No person shall make shipment of such steel if he knows or has reason to believe that its acceptance will constitute a violation of the provisions of this section.

This direction, as amended, shall take effect July 15, 1952.

NATIONAL PRODUCTION AUTHORITY,
By JOHN B. OLVERSON,
Recording Secretary.

SCHEDULE I OF DIRECTION 12 TO CMP REGULATION NO. 1

FORMS AND SHAPES OF STEEL CONTROLLED MATERIALS

Carbon steel:
- Bar, hot-rolled (round, 1½ inches or larger).
- Bar, cold-finished (round, 1½ inches or larger).
- Electrical sheet and strip (high-grade [1]).
- Tin plate, hot-dipped.
- Tin plate, electrolytic.
- Structural shapes (wide-flanged sections [2]).
- Pressure tubing—seamless and welded.
- Mechanical tubing—seamless.

Alloy steel:
- Bar, hot-rolled (round, 1¼ inches or larger).
- Bar, cold-finished (round, 1¼ inches or larger).
- Pressure tubing—seamless and welded.
- Mechanical tubing—seamless.

Stainless steel (nickel-bearing): All forms and shapes.

[1] AISI—M17, M15, M14, and oriented.

[2] Wide flanged sections are steel beams or columns having parallel face flanges rolled on a universal structural mill or Grey mill, in sizes ranging in depth from 4 to 36 inches.

[F. R. Doc. 52-7894; Filed, July 15, 1952; 11:21 a. m.]

[NPA Order M-47B, Amdt. 1 of July 14, 1952]

M-47B—USE OF CONTROLLED MATERIALS IN CERTAIN CONSUMER DURABLE GOODS

REVISED SCHEDULE I

This amendment to NPA Order M-47B is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this amendment, consultation with industry representatives has been rendered impracticable due to the need for immediate action and because the order affects many different trades and industries.

NPA Order M-47B, as amended April 15, 1952, is hereby further amended by deleting Schedule I of the order and by substituting therefor a new Schedule I to read as follows:

SCHEDULE I OF ORDER M-47B

(Note: Listings are in accordance with the official CMP Class B Product List of February 1, 1952)

Product class code	
2342091	Corset and allied garment accessories.
2392	Housefurnishings, fabric (containing controlled materials).
23940	Canvas products.
24930	Frames for mirrors and pictures.
2511	Wood household furniture, except upholstered.
2512091	Dual-purpose sleeping equipment.
2512092	Wood household furniture, upholstered, n. e. c.
25130	Reed and rattan furniture (including bassinets).
2514	Metal household furniture.
2531092	Public building furniture, n. e. c.
25412	Cases, cabinets, counters, and other fixtures.
25620	Window shades and accessories.
2563	Venetian blind parts and accessories.
25910	Restaurant furniture.
2599092	Furniture and fixtures, n. e. c.
34211	Cutlery, scissors, shears, and trimmers.
34292	Furniture hardware.
3429391 3429392	Vacuum bottles and jugs, 1-quart and over.
3429691	Specialized hardware, fireplace equipment only.
3429699	Harness and saddlery hardware.
34396	Domestic cooking stoves, ranges, and cooking appliances, except electric.
34611	Vitreous-enameled cooking and kitchen utensils, except hospital utensils.
3463794	Ice cube trays and lunch boxes, metal; aluminum ice cube trays only.
3463795	Stamped or pressed metal end products, n. e. c.
34639	Stamped and spun cooking and kitchen utensils, except commercial cooking, kitchen, and hospital utensils, and commercial baking pans.
34712	Incandescent portable lamps.
3471591	Fluorescent portable lamps.
3489695	Wire products, n. e. c.
3499292	Fabricated metal products, n. e. c.
3499294	Bed rails, metal.
35227	Lawn mowers and lawn sweepers.
35811	Household mechanical washing machines.
3581291	Household ironers.
3581292	Household laundry equipment, n. e. c.
3583091	Sewing machines, household.
35841	Vacuum cleaners, household.
35851	Household mechanical refrigerators.
35852	Home and farm freezers.
3589292	Household machines, n. e. c.
36211	Electric fans, except industrial-type.
3621393	Electric razors and dry shavers.
3621394	Small household electric appliances, except fans.
36214	Household ranges, electric.
3699392	Electrical products, n. e. c., Christmas tree lighting outfits only.
37511	Motorcycles and parts, except repair parts.
=39120	Jewelers' findings and materials.
3914091	Flatware, commercial and domestic.
3914092	Silverware, hollow ware and plated ware.
39310	Pianos.
39320	Organs.
39410	Games and toys, except dolls and children's vehicles.
39420	Dolls and stuffed toy animals.
3943092	Children's vehicles and parts.
3949091	Sporting and athletic goods.
3949092	Commercial fishing equipment (except water craft).
39510	Pens, mechanical pencils, and pen points.
39520	Lead pencils.
39540	Artists' materials and equipment.
=39610	Costume jewelry and novelties, except precious metal.
39630	Metal buttons and parts, civilian-type.
3964093	Apparel fasteners.
3964094	Household needles, pins, similar notions, n. e. c., civilian-type.
=39860	Jewelry cases and instrument cases.
39950	Umbrellas, parasols, and canes.
39960	Tobacco pipes and cigarette holders.
39970	Soda fountain and beer-dispensing equipment.
3999494	Miscellaneous fabricated products, n. e. c.
5012	Specialty products, n. e. c.
8921	Religious goods, n. e. c.

(64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154)

This amendment shall take effect July 14, 1952.

NATIONAL PRODUCTION AUTHORITY,
By JOHN B. OLVERSON,
Recording Secretary.

= See section 5 (a) NPA Order M-47B.

Chapter XVI—Production and Marketing Administration, Department of Agriculture

[Defense Food Order 1, as Amended, Sub-Order 1]

DFO-1—CASTOR OIL

SO 1—AMENDMENT OF APPENDIX A

It is hereby found and determined that the provisions of this order are necessary and appropriate to promote the national defense; and it is, therefore, made effective pursuant to the authority vested in me by Defense Food Order 1, as amended (17 F. R. 401). In the formulation of this order there has been consultation with industry representatives, and consideration has been given to their recommendations. Consultation with representatives of trade associations in the formulation of this order has been rendered impracticable inasmuch as there is no trade association, as such, with respect to the castor oil industry and this order applies to numerous trades.

SUMMARY OF SUB-ORDER

Under Defense Food Order 1, as amended, the Director of the Fats and Oils Branch, Production and Marketing Administration, is authorized to amend Appendix A to Defense Food Order 1. This sub-order indicates the new maximum amount of castor oil that may be used in certain specified class uses by setting forth amended percentages for the respective class uses listed in Appendix A. The changes effected by this order are designed to give recognition to the improved castor oil supply situation by allowing users of castor oil to benefit from such situation and are in keeping with the Department's policy of easing controls whenever the supply and demand picture is such as to allow this action.

Definitions. Terms used in this sub-order shall have the same meaning as when used in Defense Food Order 1, as amended (17 F. R. 401).

Appendix A. Commencing with the calendar quarter beginning on July 1, 1952, Appendix A to Defense Food Order 1 is amended to read as follows:

APPENDIX A TO DEFENSE FOOD ORDER 1

Class use	*Percent*
Medicinal and pharmaceutical preparations	100
Protective linings for the inside of food containers	100
Demulsification of petroleum products	100
Synthetic, foam and natural rubber	100
Rubber factice	100
Hydraulic fluid	100
Lubricating grease	100
Electrical insulation	100
Leather	100
Sebacic acid	100
Textiles	80
Imitation leather and coated fabrics	80
Brake lining	80
Paint, varnish, lacquer, resins, and paint vehicles	80
Pigment and dye	80
Plastics	80
All other	50

Effective date. This sub-order shall become effective July 1, 1952.

With respect to violations, rights accrued, liabilities incurred, or appeals taken with respect to said Defense Food Order 1, as amended, prior to the effective time of the provisions hereof, all provisions of said Defense Food Order 1, as amended, shall be deemed to continue in full force and effect for the purpose of sustaining any proper suit, action, or other proceeding with respect to any such violation, right, liability, or appeal.

(Sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154.)

Done at Washington, D. C., this 10th day of July 1952.

[SEAL]

GEORGE L. PRICHARD,
Director, Fats and Oils Branch, Production and Marketing Administration.

[F. R. Doc. 52-7862; Filed, July 14, 1952; 12:31 p. m.]

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 4—DEPENDENTS AND BENEFICIARIES CLAIMS

CONTESTED CLAIMS; SCOPE OF TERM

In § 4.55, paragraph (a) is amended to read as follows:

§ 4.55 *Contested claims*—(a) *Scope of term.* The provisions of this section are applicable to claims filed by two or more persons for the same benefit where the allowance of one claim would necessitate disallowance of the other claim. This includes claims alleging legal widowhood, and claims of two or more persons alleging to have been the last in the same parental line to have stood in place of a parent to the veteran.

* * * * *

(Sec. 5, 43 Stat. 608, as amended, sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9; 38 U. S. C. 11a, 426, 707)

This regulation effective July 16, 1952.

[SEAL]

H. V. STIRLING,
Deputy Administrator.

[F. R. Doc. 52-7820; Filed, July 15, 1952; 8:54 a. m.]

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 114—TREATMENT OF MAILS: POSTAGE REFUNDS: INTERNATIONAL REPLY COUPONS: DISPOSITION OF FOREIGN DEAD MATTER

PART 127—INTERNATIONAL POSTAL SERVICE: POSTAGE RATES, SERVICE AVAILABLE, AND INSTRUCTIONS FOR MAILING

1. § 114.22 *Foreign matter* (17 F. R. 480) amend the first sentence of paragraph (a) *Delivery of*, to read as follows: "On receipt of foreign matter at the office of address it shall be delivered in the same manner as domestic mail matter, except as otherwise provided".

2. a. In § 127.271 *Guadeloupe.* (Including the Islands of Desirade, Les Saintes, Marie Galante, Petite Terre, St. Bartholomew (Barthelemy), and the French port of St. Martin) amend paragraph (b) (1) by adding subdivision (ii), to read as follows:

(ii) Air parcels.

Rates: $0.65 first 4 ounces; $0.20 each additional 4 ounces, or fraction.

Each air parcel must have affixed the blue Par Avion label (Form 2978). (See § 127.55(b)).

b. In § 127.301 *Martinique* amend paragraph (b) (1) by adding subdivision (ii), to read as follows:

(ii) Air parcels.

Rates: $0.65 first 4 ounces; $0.25 each additional 4 ounces, or fraction.

Each air parcel must have affixed the blue Par Avion label (Form 2978). (See § 127.55 (b).)

(R. S. 161, 396, 398; secs. 304, 309, 42 Stat. 24, 25, 48 Stat. 943; 5 U. S. C. 22, 369, 372)

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 854]

ALASKA

WITHDRAWING PUBLIC LANDS FOR USE OF DEPARTMENT OF THE AIR FORCE FOR MILITARY PURPOSES

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public lands in Alaska are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining and mineral-leasing laws, and reserved for the use of the Department of the Air Force for military purposes:

FAIRBANKS MERIDIAN

T. 1 S., R. 1 E.,
Sec. 3, NW¼ and NW¼SW¼;
Sec. 4, W½SE¼.

The areas described aggregate 280 acres.

It is intended that the lands described shall be returned to the administration of the Department of the Interior when they are no longer needed for the purpose for which they are reserved.

OSCAR L. CHAPMAN,
Secretary of the Interior.

JULY 10, 1952.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Bureau of Entomology and Plant Quarantine

[7 CFR Part 319]

PACKING MATERIALS; FLAG SMUT

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given under section 4 of the Administrative Procedure Act (5 U. S. C. 1003) that the Secretary of Agriculture, pursuant to sections 5 and 7 of the Plant Quarantine Act of 1912 (7 U. S. C. 159, 160), is considering amending 7 CFR Part 319 in the following respects:

1. Section 319.69 (a) would be amended by inserting a footnote referring to the restrictions on importations of wheat straw, hulls, and chaff contained in 7 CFR 319.59 et seq.;

2. Section 319.69 (b) would be amended to provide that wheat straw, hulls, and chaff, used as packing materials, shall not be permitted conditional entry into the United States when imported from Aden Protectorate, Afghanistan, Australia, Bulgaria, Caucasus (including Azerbaidzhan, South Russia, and Transcaucasia), Chile, China, Cyprus, Egypt, Germany, Greece, India, Iran, Iraq, Israel, Italy, Japan, Netherlands, Oman, Pakistan, Palestine, Portugal, Saudi Arabia, Sinai Peninsula, Spain, Syria, Trans-Jordan, Tunisia, Turkestan, Turkey, Union of South Africa, and Yemen; and

3. Section 319.59, the notice of quarantine relative to flag smut, would be revised and new regulations would be promulgated thereunder, as follows:

NOTICE OF QUARANTINE NO. 59, REVISED

§ 319.59 *Notice of quarantine.* The Secretary of Agriculture, having given the public hearing required by law, has determined that an injurious plant disease known as the flag smut disease of wheat, caused by the fungus Urocystis tritici Koernicke, not heretofore widely prevalent or distributed within or throughout the United States, is known or believed to exist in various foreign countries, listed below, and that the unrestricted importation from such foreign countries of the products listed below may result in the entry into the United States of the flag smut disease. Therefore, pursuant to sections 5 and 7 of the Plant Quarantine Act of 1912 (7 U. S. C. 159, 160), the Secretary of Agriculture, in order to prevent the introduction into the United States of the flag smut disease, forbids the importation into the United States from Aden Protectorate, Afghanistan, Australia, Bulgaria, Caucasus (including Azerbaidzhan, South Russia, and Transcaucasia), Chile, China, Cyprus, Egypt, Germany, Greece, India, Iran, Iraq, Israel, Italy, Japan, Netherlands, Oman, Pakistan, Palestine, Portugal, Saudi Arabia, Sinai Peninsula, Spain, Syria, Trans-Jordan, Tunisia, Turkestan, Turkey, Union of South Africa, and Yemen of (a) all species and varieties of wheat (Triticum, spp.), (b) wheat straw, hulls, and chaff, (c) wheat products of the milling process, such as bran, shorts, thistle sharps, and pollards, (d) seeds of Melilotus indica, and seeds of any field crop that have been separated from wheat during the process of screening, and (e) containers of the foregoing products not otherwise provided for in any other subpart,[1] except as provided in the regulations supplemental to this quarantine.

REGULATIONS

§ 319.59–1 *Definitions.* Words used in the singular form in the regulations in this subpart shall be deemed to impart the plural, and vice versa, as the case may demand. For the purposes of the regulations in this subpart the following words shall be construed, respectively, to mean:

(a) *Chief of Bureau.* The Chief of the Bureau of Entomology and Plant Quarantine, or any officer or employee of the Bureau to whom authority has heretofore been delegated or may hereafter be delegated to act in his stead.

(b) *Bureau.* The Bureau of Entomology and Plant Quarantine, United States Department of Agriculture.

(c) *Inspector.* Any person authorized by the Secretary of Agriculture of the United States to enforce the provisions of the Plant Quarantine Act.

(d) *Person.* Any individual, firm, corporation, company, society, association, or other organized group of any of the foregoing.

(e) *Importer.* The permittee, agent of the permittee, or other person bringing to the United States plant material which is subject to the quarantine and regulations in this subpart.

(f) *Flag smut.* The fungus disease known as the flag smut disease of wheat (Urocystis tritici Koern.), in any stage of development.

(g) *Wheat straw, hulls, or chaff.* Straw, hulls, or chaff of wheat, whether imported independently or in connection with or attached to any other importation.

(h) *Used bags.* Used bags of gunny or any other fabric, not otherwise provided for in any other subpart, that are being used as containers for enterable products.

(i) *Imported.* Brought to the United States from a country or locality designated in § 319.59, whether directly from such country or via another country.

(j) *Permit.* An authorization allowing the importation of enterable products in accordance with the regulations in this subpart.

§ 319.59–2 *Products prohibited entry.* Wheat, and wheat products, except such wheat products as have been so milled or so processed as to have destroyed all flag smut spores, are prohibited entry.

§ 319.59–3 *Enterable products and conditions for their entry.* (a) Wheat flour may be imported without complying with any of the requirements of this subpart.

(b) Upon compliance with the requirements for permit in § 319.59–5 and notice of arrival in § 319.59–6, the following products may be imported under the conditions stated:

(1) *Wheat products other than flour.* Wheat products, other than wheat flour, may be imported after it has been determined by an inspector that they have been so milled or so processed as to have destroyed all flag smut spores that may have been present.

(2) *Wheat straw, hulls, and chaff, field crop seeds, and containers thereof.* Wheat straw, hulls, and chaff, and seeds of Melilotus indica and seeds of any other crop that have been separated from wheat during the screening process, and containers thereof not otherwise restricted, may be imported subject to treatment upon arrival.

§ 319.59–4 *Treatment.* All products enterable under § 319.59–3 (b) (2) shall be treated upon arrival in the United States by the application of 5 percent ethyl mercury phosphate dust, or other chemical or method found by the Chief of the Bureau to be substantially as effective as 5 percent ethyl mercury phosphate dust in eliminating flag smut infection; or shall be processed or utilized as authorized by the inspector in a manner to destroy such infection. Any such processing or utilization of containers shall be in conformity with § 319.8–9 (e). The schedule of treatment or method of processing or utilization of enterable products shall be according to a method selected by the inspector in accordance with administratively authorized procedures known to be effective under the applicable conditions and with due recognition of any health hazards involved. Neither the Department of Agriculture nor the inspector shall be deemed responsible for any adverse effects of any such treatment. Treated seeds should be planted without delay in order to avoid reduced germination. All costs of such treatments, other than the services of an inspector during regularly assigned hours of duty and at the usual places of duty, shall be paid by the importer.

§ 319.59–5 *Applications for and issuance of permits.* Any person desiring to import enterable products, other than wheat flour, shall first submit to the Bureau an application stating the name and address of the importer, the approximate quantity and kinds of products it is desired to import, the country where grown (country of origin in the case of containers referred to in § 319.59), the port of entry into the United States, the name and address of the agent, if any, representing the importer, and the means of transportation to be employed. Such enterable material may be imported only after a permit has been issued.

§ 319.59–6 *Notice of arrival.* A notice shall be submitted by the importer, in duplicate, through the United States Collector of Customs, to the United States Department of Agriculture, immediately upon arrival at a port of entry of any shipment of products, other than wheat flour, enterable under this subpart. Such a notice is to be submitted on a form provided for that purpose by the Bureau (Form EQ–368) and shall contain the information called for by that form.

§ 319.59–7 *Shipments for experimental and scientific purposes.* Articles subject to the requirements of the regulations in this subpart may be imported by the United States Department of Agriculture for experimental or scientific purposes, on such conditions and under such safeguards as may be prescribed by the Chief of Bureau. The container of articles so moved shall bear, securely attached to the outside thereof, an identifying tag from the Bureau.

The proposed amendments would add a footnote to § 319.69 (a) of the regulations supplementary to the Packing Materials Quarantine referring to the restrictions on importations of wheat straw, hulls, and chaff contained in the Flag Smut Disease Quarantine and supplementary regulations and would amend § 319.69 (b) of the regulations supplementary to the Packing Materials Quarantine so as to provide that wheat straw, hulls and chaff, used as packing materials, shall not be permitted conditional entry into the United States when imported from certain designated countries. These wheat products might also introduce the flag smut disease.

The proposed amendments to § 319.59, the notice of quarantine relating to the flag smut disease, would extend the quarantine to include Afghanistan, Bulgaria, Caucasus (including Azerbaidzhan, South Russia, and Transcaucasia), Chile, Cyprus, Egypt, Germany, Greece, Iran, Israel, Netherlands, Pakistan, Palestine, Portugal, Tunisia, Turkestan, and Turkey, in which flag smut is known to occur, as well as Aden Protectorate, Iraq, Oman, Saudi Arabia, the Sinai Peninsula, Syria, Trans-Jordan, and Yemen. The latter eight countries are surrounded by countries where flag smut disease is known to occur. No reports are available concerning the existence of the disease in these eight countries. It is believed, however, that if adequate flag smut surveys were made there the disease would be found. It is therefore proposed that these countries also be included in the quarantine.

The proposed amendments to said Notice of Quarantine add to the quarantined products a number of by-products of the wheat screening and milling processes that might introduce the flag smut disease. Bags or other containers that might be contaminated with disease spores, and not already regulated in an-

[1] Section 319.8–9 restricts the importation from countries where the flag smut disease is known to occur of bags or parts of bags that have been used as containers of wheat or wheat products not so processed as to have destroyed all flag smut disease spores, or have been used as containers of field seeds separated from wheat during the process of screening.

other subpart, would similarly be added to the quarantined articles.

Provision would be made in the proposed supplementary regulations for the importation of certain by-products of the wheat screening and milling processes upon adequate treatment.

All of these proposals are in accordance with unopposed recommendations of the Department of Agriculture made at the March 30, 1951 public hearing on this subject.

All persons who desire to submit written data, views, or arguments in connection with these proposals should file the same with the Chief of the Bureau of Entomology and Plant Quarantine, Agricultural Research Administration, United States Department of Agriculture, Washington 25, D. C., within 30 days after the date of publication of this notice in the FEDERAL REGISTER.

(Secs. 5, 7, 37 Stat. 316, 317; 7 U. S. C. 159, 160)

Done at Washington, D. C., this 11th day of July 1952.

[SEAL] CHARLES F. BRANNAN, *Secretary of Agriculture.*

[F. R. Doc. 52-7794; Filed, July 15, 1952; 8:49 a. m.]

[7 CFR Parts 319, 321]

PINK BOLLWORM OF COTTON; FOREIGN COTTON LINT; COTTONSEED PRODUCTS FROM ALL FOREIGN COUNTRIES

NOTICE OF PROPOSED RULE MAKING

On February 8, 1951, there was published in the FEDERAL REGISTER (16 F. R. 1204) a notice concerning a public hearing to consider revising the various quarantines, orders, and regulations concerning the importation into the United States and the movement between the territories and possessions and the mainland of the United States of cotton, cotton products, and cotton wrappings. These matters were discussed at a public hearing in Washington, D. C., on March 28, 1951. Study of the testimony at the hearing and all other available information has resulted in a decision to propose that the existing order restricting the entry of cottonseed oil from Mexico be revoked and that such other quarantines, orders, and regulations affecting imports be revised and combined into one quarantine, with supplemental regulations.

Accordingly, notice is hereby given under section 4 of the Administrative Procedure Act (5 U. S. C. 1003) that the Secretary of Agriculture, pursuant to sections 5 and 7 of the Plant Quarantine Act (7 U. S. C. 159, 160), is considering revoking the order restricting the entry of cottonseed oil from Mexico into the United States (7 CFR 321.202); and further, is considering revising and combining into one quarantine, with supplementary regulations, under a new subpart heading "Foreign Cotton," the foreign pink boolworm of cotton quarantine and regulations (7 CFR 319.8, 319.8-1 et seq.), the order regulating the admission into the United States of foreign cotton lint (7 CFR 321.101), the regulations governing the importation of cotton and cotton wrappings into the United States (7 CFR 321.102 et seq.), the order restricting the admission into the United States of cottonseed cake, cottonseed meal, and all other cottonseed products except cottonseed oil (7 CFR 321.201), and the regulations governing the importation into the United States of cottonseed cake, cottonseed meal, and other cottonseed products (7 CFR 321.203 et seq.), said proposed revised and combined quarantine and regulations to read substantially as follows:

§ 319.8 *Notice of quarantine.* The Secretary of Agriculture having previously prohibited the importation for any purpose of cotton lint, baled, or unbaled; cotton and cotton wrappings; cottonseed and cottonseed hulls; and cottonseed cake, meal, and all other cottonseed products, except oil, from all foreign localities and countries, with certain exceptions as provided in the respective orders and notice of quarantine and regulations supplemental thereto, now determines that the finding in foreign countries of additional pests of cotton and pests associated with the movement of cotton and certain other commodities makes it necessary to amend and consolidate the said orders and notice of quarantine, and supplemental regulations.

Under authority conferred by section 5 of the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 159), and having given the public hearing required thereunder, the Secretary of Agriculture, in order to prevent the introduction into the United States of the pink bollworm of cotton (Pectinophora gossypiella (Saund.)), the golden nematode of potatoes (Heterodera rostochiensis Wr.), the flag smut disease (Urocystis tritici Koern.), and other injurious insect pests and plant diseases, hereby prohibits the importation into the United States, including the District of Columbia, Alaska, Hawaii, Puerto Rico, and the Virgin Islands of the United States, of (a) all parts and products of plants of the genus Gossypium, including seed cotton; cottonseed; cotton lint, linters, and other forms of cotton fiber; cottonseed hulls, cake, meal, and other cottonseed products, except oil; cotton waste; and all other unmanufactured parts of cotton plants; and (b) second-hand burlap and other fabric which have been used, or are of the kinds ordinarily used for wrapping or containing cotton, or for containing or transporting grains, field seeds, agricultural roots, rhizomes, tubers, or other underground crops; except as provided in the regulations supplemental to this quarantine: *Provided*, That, whenever the Chief of the Bureau of Entomology and Plant Quarantine shall find that existing conditions as to the pest risk involved in the importation of any of the above designated parts or products of cotton plants or second-hand burlap or other fabric to which the regulations supplemental hereto apply, make it safe to modify, by making less stringent, the restrictions contained in any such regulations, he shall set forth and publish such findings in administrative instructions, specifying the manner in which the regulations shall be made less stringent, whereupon such modification shall become effective.

REGULATIONS

§ 319.8-1 *Definitions.* For the purposes of the regulations in this subpart, the following words shall be construed, respectively, to mean:

(a) *Cotton.* Parts and products of plants of the genus *Gossypium*, including seed cotton; cottonseed; cotton lint, linters and other forms of unmanufactured cotton fiber; cottonseed hulls, cake, meal, and other cottonseed products, except oil; cotton waste; and all other unmanufactured parts of cotton plants.

(b) *Cottonseed.* Cottonseed from which the lint has been removed.

(c) *Seed cotton.* Cotton as it comes from the field.

(d) *Lint.* All forms of raw or unmanufactured ginned cotton, either baled or unbaled, except linters and waste.

(e) *Linters.* All forms of unmanufactured cotton fiber separated from cottonseed after the lint has been removed, excluding so-called "hull fiber" which shall be considered in the same category as waste.

(f) *Waste.* All forms of cotton waste derived from the manufacture of cotton lint, in any form or under any trade designation, including gin waste; and waste products derived from the milling of cottonseed.

(g) *Clean waste.* Waste that has been manufactured or processed in such a manner as to remove all uncrushed cottonseed or to have destroyed all insect life.

(h) *Bale covers.* Second-hand burlap and other fabric which have been used, or are of the kinds ordinarily used, for wrapping or containing cotton, or for containing or transporting grains, field seeds, agricultural roots, rhizomes, tubers, or other underground crops. Burlap and other fabric, when new or unused, are excluded from this definition.

(i) *Uncompressed cotton.* Cotton which has not been compressed, sometimes referred to as "gin" bales or "flat" bales.

(j) *Compressed cotton.* Cotton which has been compressed.

(k) *High density cotton.* Baled cotton compressed to a density of 28 or more pounds per cubic foot.

(l) *Contamination, contaminated.* Containing an admixture of whole cottonseed or seed cotton, or containing material which may carry golden nematode of potatoes or the flag smut disease.

(m) *Samples.* Samples of lint, linters, waste, cottonseed cake, and cottonseed meal, of the amount and character usually required for trade purposes.

(n) *North, northern.* When used to designate ports of arrival, the terms mean the port of Norfolk, Virginia, and all Atlantic Coast ports north thereof, ports along the Canadian border, and Pacific Coast ports in the States of Washington and Oregon. When used in a geographic sense to designate areas or locations, the terms mean the area comprised of States in which cotton is not grown commercially: *Provided*, That when cotton is grown commercially in certain portions of a State as in the case in Illinois, Kansas, and Missouri, the terms include only those portions of such State as may be administratively designated by the Chief of Bureau as remote from the main area of cotton production.

(o) *Contiguous areas of Mexico.* The cotton producing areas of Mexico contiguous to cotton-producing areas in that part of the United States designated as regulated area in Federal pink boolworm regulations (7 CFR Supp. 301.52-2).

(p) *West Coast of Mexico.* The State of Sinaloa and the State of Sonora, except that part of the Imperial Valley lying between San Luis Mesa and the Colorado River.

(q) *Imperial Valley, Mexico.* The Imperial Valley in the State of Baja California, including that portion of the Valley in the State of Sonora, Mexico, lying between San Luis Mesa and the Colorado River.

(r) *Treatment.* Procedures administratively approved by the Chief of Bureau for destroying infestations or infections of the insect pests or plant diseases referred to in § 319.8, such procedures to include fumigation, application of chemicals or dry or moist heat, and processing, utilization, or storage.

(s) *Permit.* A form of authorization to allow the importation of cotton in accordance with the regulations in this subpart.

(t) *Approved.* Approved by the Chief of Bureau.

(u) *Authorized.* Authorized by the Chief of Bureau.

(v) *Chief of Bureau.* The Chief of the Bureau of Entomology and Plant Quarantine, or any officer or employee of the Bureau to whom authority has heretofore been delegated or may hereafter be delegated to act in his stead.

(w) *Bureau.* The Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture.

(x) *Inspector.* Any person authorized by the Secretary of Agriculture to enforce the provisions of the Plant Quarantine Act.

(y) *Person.* Any individual, firm, corporation, company, society, association, or any organized group of any of the foregoing.

CONDITIONS OF ENTRY OF COTTON AND BALE COVERS

§ 319.8-2 *Application for and issuance of permits.* (a) Except as otherwise provided for in § 319.8-15, permits shall be obtained for importations of all cotton and bale covers. Persons desiring to import such material shall, in advance of departure of such material from a foreign port, submit to the Bureau an application[1] stating the name and address of the importer, the country from which such material is to be imported, and the kind of cotton or bale covers it is desired to import. In respect to cottonseed, the application shall also state the approximate quantity and the proposed United States port of entry. In respect to lint, linters, and waste, the application shall state whether such materials are compressed or uncompressed.

(b) When entry of lint, linters, or waste is requested at a port other than one in the North or on the Mexican Border, the application shall also specify whether the commodity is compressed to high density.

(c) Applications to import cotton or bale covers from contiguous areas of Mexico, the West Coast of Mexico, or the Imperial Valley of Mexico, shall state the place of origin.

(d) If through no fault of the importer a shipment of cotton or bale covers arrives at a United States port in advance of the issuance of a permit, it may be held, under suitable safeguards prescribed by the inspector at the port, in Customs custody at the risk of the importer, pending issuance of a permit, for a period not exceeding 20 days.

(e) Applications for permits may be made orally or on forms provided for the purpose by the Bureau, or may be made by a letter or telegram containing all the information required by this section.

(f) Upon receipt and approval of such application by the Bureau, a permit will be issued authorizing the importation and specifying the port of entry and the conditions of entry. A copy of the permit will be supplied to the importer.

(g) Upon receipt of an application to import unfumigated lint, linters, waste, or bale covers, for utilization or processing under agreement as defined in § 319.8-6 (a)-(2), an investigation will be made by an inspector to determine that the receiving mill is satisfactorily located geographically, is equipped with all necessary safeguards, and is apparently in a position to fulfill all precautionary conditions to which it may agree. Upon determination by the inspector that these qualifications are fulfilled, the mill may sign an agreement specifying that the required precautionary conditions will be maintained, whereupon a permit will be granted for the entry and utilization of such materials.

§ 319.8-3 *Refusal of permits.* (a) Permits for the importation of cotton and bale covers from contiguous areas of Mexico as authorized in § 319.8-10 may be refused and existing permits canceled (1) if, in the opinion of the Chief of Bureau, effective quarantine measures are not maintained by the duly authorized officials of Mexico to prohibit the movement into such contiguous areas of cotton and bale covers from parts of Mexico infested by the pink bollworm of cotton or from countries other than the United States, or (2) if the cotton and bale covers have not been produced and handled under conditions paralleling those required by § 301.52-1 et seq. of this chapter, for like products originating in parts of the United States designated as regulated areas in § 301.52-2 of this chapter or amendments thereof.

(b) Permits for the importation of lint or linters from the West Coast of Mexico as authorized in § 319.8-11 may be refused and existing permits canceled (1) if, in the opinion of the Chief of Bureau, effective quarantine measures are not maintained by the duly authorized officials of Mexico to prohibit the movement into the West Coast of Mexico of cotton and bale covers from other parts of Mexico infested by the pink bollworm of cotton or from countries other than the United States, or (2) if it has been determined by the Bureau that the pink bollworm of cotton exists in the area comprising the West Coast of Mexico.

(c) Permits for the importation of cotton and bale covers from the Imperial Valley of Mexico as authorized in § 319.8-12 may be refused and existing permits canceled (1) if, in the opinion of the Chief of Bureau, effective quarantine measures are not maintained by the duly authorized officials of Mexico to prohibit the movement into the State of Baja California of cotton and bale covers from other parts of Mexico or from countries other than the United States, (2) if it has been determined by the Bureau that the pink bollworm of cotton exists in the Imperial Valley of Mexico, or (3) if cottonseed is moved to the Territory of Baja California from areas of Mexico infested with the pink bollworm of cotton or from countries other than the United States, or other pest hazards are discovered or allowed to develop therein which in the opinion of the Chief of Bureau would increase the risk of pest introduction into the United States by the continued operation of § 319.8-12.

§ 319.8-4 *Notice of arrival.* Immediately upon arrival of any shipment of restricted cotton or bale covers at a port of entry the importer shall submit in duplicate, through the United States Collector of Customs and for the United States Department of Agriculture, a notice of such arrival, on a form provided for that purpose (Form EQ-368) and shall give such information as is called for by that form.

§ 319.8-5 *Marking of containers.* Every bale or other container of lint, linters, waste, or bale covers offered for entry shall be plainly marked with a bale number or other mark to distinguish it from other bales or containers.

ADDITIONAL CONDITIONS FOR ENTRY OF COTTON AND BALE COVERS FROM COUNTRIES OTHER THAN MEXICO

§ 319.8-6 *Lint, linters, and waste—(a) Compressed to high density.* (1) Entry of lint, linters, and waste from countries other than Mexico, compressed to high density, will be authorized, subject to vacuum fumigation, at any port where approved vacuum fumigation facilities are available or may hereafter be made available and where there are inspectors at the port to supervise such fumigation.

Such importations of lint, linters, and waste, other than clean waste, arriving at a northern port where there are no approved vacuum fumigation facilities may be entered for transportation to another northern port where such facilities are available, for fumigation.

Lint, linters, and waste other than clean waste, arriving at a port in the State of California, will be released at such port only after they have been given vacuum fumigation in an approved plant located thereat. If there are no approved vacuum fumigation facilities at

[1] Applications for permits should be made to Import and Permit Section, Bureau of Entomology and Plant Quarantine, 209 River Street, Hoboken, N. J.

the port of arrival, entry of such materials is authorized only for immediate transportation by all-water route to a port where approved vacuum fumigation facilities are available, there to receive the required fumigation before release.

(2) Entry of lint, linters, and waste from countries other than Mexico, when compressed to high density, will be authorized without vacuum fumigation at any northern port, subject to movement to an approved mill or plant the owner or operator of which has executed an agreement with the Bureau to the effect that, in consideration of the waiving of vacuum fumigation as a condition of entry and the substitution of approved utilization therefor:

(i) The lint, linters, and waste so entered will be consumed at the mill or plant in a manufacturing process and until so consumed will be retained at the mill or plant, unless written authority is granted by the Bureau to move the material to another mill or plant;

(ii) Sanitary measures satisfactory to the Bureau will be taken with respect to the collection and disposal of any waste, residues, and bale covers, including the collection and disposal of refuse from railroad cars, trucks, or other carriers used in transporting the material to the mill or plant;

(iii) Inspectors of the Bureau will have access to the mill or plant at any reasonable time to observe the methods of handling the material, the disposal of refuse, residues, waste, and bale covers, and otherwise to check compliance with the terms of the agreement;

(iv) Such reports of the receipt and utilization of the material, and disposal of waste therefrom as may be required by the inspector will be submitted to him promptly;

(v) Such other requirements as may be necessary in the opinion of the Chief of Bureau to assure retention of the material, including all wastes and residues, at the mill or plant and its utilization or disposal in a manner that will eliminate all pest risk, will be complied with.

(3) Failure to comply with any of the conditions of the agreement may be cause for immediate cancellation of the agreement by the inspector.

(4) Agreements may be executed with owners or operators of mills or plants located in States in which cotton is not grown commercially and at locations in such other States as may be administratively designated by the Chief of Bureau after due consideration of possible pest risk involved and the proximity of growing cotton.

(b) *Uncompressed or compressed below high density.* (1) Entry of lint, linters, and waste, uncompressed or compressed below high density, from countries other than Mexico, will be authorized, subject to vacuum fumigation, through any northern port, through any port in the State of California, and through any port on the Mexican Border, where approved vacuum fumigation facilities are available, or may hereafter be made available, and where there are inspectors at the port to supervise such fumigation.

Such importations arriving at a northern port where there are no approved vacuum fumigation facilities may be entered for immediate transportation in bond to a northern port where such facilities are available, for fumigation.

Such importations of lint, linters, and waste other than clean waste, arriving at a port in the State of California, are eligible for release at such port only after they have been given vacuum fumigation in an approved plant located thereat. If there are no approved vacuum fumigation facilities at the port of arrival, entry of such materials will be authorized only for immediate transportation by all-water route to any port in California or any northern port where approved vacuum facilities are available, there to receive the required vacuum fumigation before release.

(2) Entry without vacuum fumigation is authorized for compressed lint, linters, and waste from all countries other than Mexico, and for uncompressed waste derived from cotton milled in non-cotton-producing countries, arriving at a northern port, subject to movement to an approved mill or plant the owner or operator of which has executed an agreement with the Bureau as described in § 319.8–6 (a) (2).

(c) *Manufactured or processed.* Vacuum fumigation will not be required for lint, linters, clean waste, and other forms of cotton imported from countries other than Mexico when the inspector can determine that such lint, linters, waste, and other forms of cotton have been so manufactured, or so processed by bleaching, dyeing or other means, as to have removed all seed or to have destroyed all insect life.

Fumigation of hull fiber imported from countries other than Mexico will not be required when an inspector has determined that such hull fiber is free of cottonseed.

§ 319.8–7 *Cottonseed cake and cottonseed meal.* Entry of cottonseed cake and cottonseed meal from countries other than Mexico may be authorized through any port at which the services of an inspector are available, subject to examination by an inspector for freedom from contamination. If found to be free of such contamination, importations of such cottonseed cake and cottonseed meal may be released from further plant quarantine entry restrictions. If found to be contaminated such importations will be refused entry or subjected as a condition of entry and release to such safeguards as the inspector may prescribe, according to a method selected by him from administratively authorized procedures known to be effective under the conditions under which the safeguards are applied.

§ 319.8–8 *Cottonseed or seed cotton for experimental or scientific purposes.* Entry of small quantities of cottonseed or seed cotton for experimental or scientific purposes may be authorized through such ports as may be named in the permit, and shall be subject to such special conditions as shall be set forth in the permit to provide adequate safeguards against pest entry.

§ 319.8–9 *Bale covers.* (a) Except as otherwise noted in this section, entry may be authorized, subject to vacuum fumigation, through such northern ports, ports in the State of California, or Mexican Border ports as may be named in the permits, of bale covers which have been used with foreign cotton; or entry may be authorized without vacuum fumigation at such northern or California ports subject to movement of the bale covers to an approved mill or plant the owner or operator of which has executed an appropriate agreement with the Bureau similar to that described in § 319.8–6 (a) (2).

(b) Bale covers requiring vacuum fumigation as a condition of entry, which arrive at a port other than a northern port, at which port approved vacuum fumigation facilities are not available, may be entered only for immediate transportation by all-water route to a northern port, or to a California port where such facilities are available, for vacuum fumigation or forwarding to an approved mill for utilization, provided that such forwarding may not be made overland from a northern port to a California mill.

(c) Second-hand burlap or other fabric (under whatever trade name or trade designation) of the kinds ordinarily used for wrapping or containing cotton, grain, or root crops but which has not been so used, and American cotton bagging, commonly known as coarse gunny, which has been used to cover cotton grown in the United States only, may enter at any port under permit, without vacuum fumigation or other treatment.

(d) Bags or parts of bags that have been used for root crops, which arrive in the United States from a country where the golden nematode of potatoes is known to occur, and bags or parts of bags, regardless of their source, if found to be contaminated with such pest, may be entered subject to immediate treatment at the port of arrival in such manner and according to such method as the inspector may select from administratively authorized procedures known to be effective under the conditions under which the treatment is applied.

(e) Bags or parts of bags that have been used as containers of wheat or wheat products that have not been so processed as to have destroyed all flag smut disease spores, or have been used as containers of field seeds separated from wheat during the process of screening, arriving in the United States from a country where the flag smut disease[2] is known to occur, and intended for reuse here as grain containers, may be entered subject to immediate treatment at the port of arrival. Such bags and parts of bags imported for approved utilization may enter subject to paragraph (a) of this section.

(f) Bags or parts of bags that have been used for grains exported from the United States and returned thereto empty without use abroad, may be entered without restriction upon presentation to an inspector of satisfactory

[2] Regulations applicable to the entry of other products from countries infected with the flag smut disease are found in §§ 319.59, 319.59–1 et seq.

evidence of their origin and subsequent handling.

(g) The finding in a bale of fabric of a kind specified in this section will subject the entire bale to the requirements of this section applicable to the fabric found. The finding in a shipment of one bale that contains fabric of a kind specified in this section will subject all bales in the shipment to the requirements of this section applicable to the fabric found in the one bale. In the case of American cotton bagging or coarse gunny which has been used to cover cotton grown in the United States only, if there appear attached to such material patches of the finer burlaps or other fabrics which, in the opinion of the inspector, are strictly in the nature of patches and represent such an inconsiderable proportion as not to affect the character of the bale as a whole, treatment is not required. This provision does not apply, however, to bales of a mixed character which contain both American cotton bagging or coarse gunny which has been used to cover cotton grown in the United States only, and the finer fabrics, whether these latter have or have not been used as cotton wrappings.

ADDITIONAL CONDITIONS FOR ENTRY OF COTTON AND BALE COVERS FROM MEXICO

§ 319.8–10 *From contiguous areas of Mexico*—(a) *Lint, linters, and waste.* (1) Contingent upon the continued maintenance by the duly authorized Mexican officials of effective quarantine measures to prohibit the movement into contiguous areas of Mexico of cotton and bale covers from other parts of Mexico infested with the pink bollworm of cotton or from countries other than the United States, the entry of lint, linters, and waste that have been certified by an inspector as having been produced in the contiguous areas of Mexico and as having been handled under sanitary conditions paralleling those required by § 301.52–1 et seq. of this chapter, for like products originating in comparable parts of the United States designated as pink bollworm regulated areas in § 301.52–2 or amendments thereof, will be authorized through ports named in the permits for movement into such regulated areas of the United States. Upon arrival at such ports, the lint, linters, and waste will be released from further plant quarantine entry restrictions, and will immediately become subject to the requirements of § 301.52–1 et seq. of this chapter, applicable to like products produced in the area into which the importation is made.

(2) In the event that effective quarantines are not so maintained by Mexican officials, or should an inspector be unable to certify lint, linters, or waste as specified in subparagraph (1) of this paragraph, the entry of such lint, linters, and waste from contiguous areas of Mexico shall be subject to the requirements of this subpart applicable to the importation of such material from countries other than Mexico.

(b) *Cottonseed cake and meal.* Entry of cottonseed cake and cottonseed meal from contiguous areas of Mexico may be authorized through any port at which the services of an inspector are available, subject to examination by an inspector for freedom from contamination. If found to be free from such contamination, the importation will be released from further plant quarantine entry restrictions. Importations of such cottonseed cake or cottonseed meal, found to be contaminated, will be refused entry or subjected as a condition of entry and release to such safeguards as the inspector may prescribe, including treatment in accordance with a method selected by him from administratively authorized procedures known to be effective under the conditions under which the safeguards are applied.

(c) *Cottonseed and cottonseed hulls.* (1) Entry of cottonseed is authorized when certified by an inspector as having been produced in a contiguous area of Mexico, as having been treated by a method satisfactory to the Chief of Bureau, and as having been subsequently protected from contamination.

(2) Entry of cottonseed hulls is authorized when certified by an inspector as having been produced from seed that was treated in a contiguous area of Mexico by a method satisfactory to the Chief of Bureau, and as having been subsequently protected from contamination.

(3) Upon arrival in the United States such cottonseed or cottonseed hulls shall be released from further plant quarantine entry restrictions and shall immediately become subject to the requirements of § 301.52–1 et seq. of this chapter, applicable to cottonseed and cottonseed hulls produced in the area into which the importation is made.

(d) *Bale covers.* Entry of bale covers from contiguous areas of Mexico is authorized under the same conditions as those prescribed in § 319.8–9 for bale covers from countries other than Mexico.

§ 319.8–11 *From West Coast of Mexico*—(a) *Lint and linters.* Contingent upon the continued maintenance by the duly authorized Mexican officials of effective quarantine measures to prohibit the movement into the West Coast of Mexico of cotton and bale covers grown or handled in parts of Mexico infested with the pink bollworm of cotton or in countries other than the United States, and upon continued freedom of this area from infestation with the pink bollworm of cotton, compressed lint and linters originating in the West Coast of Mexico may be entered through such ports on the Mexican Border as are specified in the permits. In the event that either of these contingencies cannot be met, lint and linters originating in the area comprising the West Coast of Mexico shall be subject to the requirements of this subpart applicable to the importation of such material from countries other than Mexico. Vacuum fumigation at an approved plant may be substituted for compression.

(b) Uncompressed lint and linters from the West Coast of Mexico may be entered for immediate transportation to a port designated by the inspector and by a route selected by him from a list of administratively approved ports and routings available to him, for compression or vacuum fumigation or such material may be entered for movement in customs custody to an approved mill or plant the owner or operator of which has executed an agreement with the Bureau as described in § 319.8–6 (a) (2).

§ 319.8–12 *From Imperial Valley, Mexico.* Contingent upon the continued maintenance by the duly authorized Mexican officials of effective quarantine measures to prohibit the movement into the State of Baja California, Mexico of cotton and bale covers grown or handled in other parts of Mexico or in countries other than the United States, and upon continued freedom of that State from infestation with the pink bollworm of cotton, cotton and bale covers originating in the Imperial Valley of Mexico may be entered through such ports as are specified in the permits. In the event that either of these contingencies cannot be met, or if conditions are found to exist in the Territory of Baja California which in the opinion of the Chief of Bureau would increase the risk of pest introduction into the United States by a continued operation of this section, cotton and bale covers originating in the Imperial Valley of Mexico shall be subject to the requirements of this subpart applicable to the importation of cotton and bale covers from countries other than Mexico.

§ 319.8–13 *From other parts of Mexico.* Entry of Mexican cotton and bale covers not otherwise specifically provided for in §§ 319.8–10 to 319.8–12, inclusive, shall be subject to the requirements of this subpart applicable to the importation of cotton and bale covers from countries other than Mexico.

MISCELLANEOUS PROVISIONS

§ 319.8–14 *Reentry into United States of cotton exported therefrom.* (a) Cotton and bale covers grown, produced, or handled in the United States, and in the original bales or other containers in which such material was exported therefrom, may reenter the United States at any port under permit, without vacuum fumigation or restriction as to utilization, upon compliance with §§ 319.8–2, 319.8–4, and 319.8–5, and upon the submission of evidence satisfactory to the inspector that such material was grown, produced, or handled in the United States and does not constitute a risk of introducing the pink bollworm of cotton.

(b) Cotton and bale covers of foreign origin imported into the United States in accordance with this subpart and exported therefrom, when in the original bales or other original containers, may reenter the United States under the conditions outlined in paragraph (a) of this section.

§ 319.8–15 *Samples.* (a) Samples of lint, linters, waste, cottonseed cake, and cottonseed meal may be entered without further permit other than the authorization contained in this section, but subject to inspection and such treatment as the inspector may adjudge necessary.

(b) Samples of cottonseed or seed cotton may be entered subject to the conditions and requirements outlined in §§ 319.8–2, 319.8–4, and 319.8–8.

(c) Bales or other containers of cotton shall not be broken or opened for sampling, nor shall samples be withdrawn until the inspector has so authorized and has prescribed the conditions and safeguards under which such samples shall be obtained.

§ 319.8–16 *Treatment.* (a) Vacuum fumigation as specified in this subpart shall consist of fumigation in a vacuum fumigation plant approved by the Chief of Bureau, under the supervision of an inspector and to his satisfaction. Continued approval of the plant will be contingent upon the granting by the operator thereof, to the inspector, of access to all parts of the plant at all reasonable hours for the purpose of supervising sanitary and other operating conditions, checking the efficacy of the apparatus and chemical operations, and determining that wastage has been cleaned up and disposed of in a manner satisfactory to the inspector; and upon the maintenance at the plant of conditions satisfactory to the inspector.

After cotton and bale covers have been vacuum fumigated they shall be so marked under the supervision of an inspector. Such material may thereafter be distributed, forwarded, or shipped without further plant quarantine entry restriction.

Cotton and bale covers held by an importer for vacuum fumigation must be stored under conditions satisfactory to the inspector.

(b) An inspector may authorize the substitution of processing, utilization, or other form of treatment for vacuum fumigation when in his opinion such other treatment, selected by him from administratively authorized procedures, will be effective in eliminating infestation of the pink bollworm of cotton.

§ 319.8–17 *Release of cotton and bale covers after 18 months' storage.* Cotton and bale covers, the entry of which has been authorized subject to vacuum fumigation or other treatment because of the pink bollworm only, and which have not yet received such treatment but have been stored for a period of 18 months or more in a port in the north or in a location within a pink bollworm regulated area designated in § 301.52–2 of this chapter, will be released from further plant quarantine entry restrictions.

§ 319.8–18 *Collection and disposal of waste.* (a) Importers shall handle imported, unfumigated cotton and bale covers in a manner to avoid waste. If waste does occur, the importer or his agent shall collect and dispose of such waste in a manner satisfactory to the inspector.

(b) If, in the judgment of an inspector, it is necessary as a safeguard against risk of pest dispersal to clean railway cars, lighters, trucks, and other vehicles used for transporting such cotton or bale covers, or to clean piers, warehouses, fumigation plants, mills, or other premises, the importer or his agent shall perform such cleaning, in a manner satisfactory to the inspector.

(c) All costs incident to such collection, disposal, and cleaning other than the services of the inspector during his regular tour of duty, shall be borne by the importer or his agent.

§ 319.8–19 *Importation for exportation, and importation for transportation and exportation.* (a) Importation of cotton and bale covers for exportation, or for transportation and exportation in accordance with the quarantine and regulations of this subpart shall also be subject to §§ 352.1 to 352.8, inclusive, of this chapter, and amendments thereof.

(b) Importation of unfumigated lint, linters, waste, cottonseed cake, cottonseed meal, and bale covers for cotton only at northern ports, for exportation or for transportation and exportation through another northern port, may be authorized by the inspector if, in his judgment, such procedures can be authorized without risk of introducing the pink bollworm of cotton.

(c) Importation of lint, linters, and waste from Mexico for transportation and exportation may be authorized under permit if such material is compressed before, or immediately upon entry into the United States, or is compressed while enroute to the port of export at a compress specifically authorized in the permit. The ports of export which may be named in the permit shall be limited to those that have been administratively approved for such exportation.

(d) Importation of uncompressed lint, linters, and waste from Mexico may be authorized under permit at Brownsville, Texas for exportation. Importation of such material may also be authorized at such other ports and under such conditions as may be designated in the permits for transportation to and exportation from the designated ports.

§ 319.8–20 *Ports of entry or export.* When ports of entry or export are not specifically designated in the regulations in this subpart but are left to the judgment of the inspector, the inspector shall designate only such ports as have been administratively approved for such entry or export.

§ 319.8–21 *Costs and charges.* The services of the inspector during regularly assigned hours of duty and at the usual places of duty shall be furnished without cost to the importer. The Bureau will not assume responsibility for any costs or charges, other than those indicated in this section, in connection with the entry, inspection, treatment, conditioning, storage, forwarding, or any other operation of any character incidental to the physical entry of an importation of a restricted material.

§ 319.8–22 *Material refused entry.* Any material refused entry for noncompliance with the requirements and conditions of this subpart shall be promptly removed from the United States or abandoned by the importer for destruction, and pending such action shall be subject to the immediate application of such safeguards against escape of plant pests as the inspector may prescribe. If such material is not promptly safeguarded by the importer, removed from the United States, or abandoned for destruction to the satisfaction of the inspector it may be seized, destroyed, or otherwise disposed of in accordance with section 10 of the Plant Quarantine Act (7 U. S. C. 164a). Neither the Department of Agriculture nor the inspector will be responsible for any costs accruing for demurrage, shipping charges, cartage, labor, chemicals, or other expenses incidental to the safeguarding or disposal of material refused entry by the inspector, nor will the Department of Agriculture or the inspector assume responsibility for the value of material destroyed.

§ 319.8–23 *Importations by the Department of Agriculture.* Cotton and bale covers may be imported by the Department of Agriculture for experimental or scientific purposes under such conditions as may be prescribed by the Chief of Bureau, which conditions may include clearance through the Division of Plant Exploration and Introduction of the Bureau of Plant Industry, Soils, and Agricultural Engineering.

§ 319.8–24 *Applicability of Mexican Border Regulations.* The quarantine and regulations in this subpart in no way affect the applicability of Part 320 of this chapter, the Mexican Border Regulations, to the entry from Mexico of railway cars or other vehicles that may contain cotton or bale covers or be contaminated therefrom.

The purposes of the proposed action are to rescind the present restrictions on the importation of cottonseed oil from Mexico; to include as a basis for quarantine action the hazards of introducing the golden nematode of potatoes and the flag smut disease in used bagging; and to consolidate, revise, and systematize the quarantine and the several orders and regulations relating to the importation of cotton lint, (baled or unbaled), cotton and cotton wrappings, and cottonseed cake, meal, and all other cottonseed products, except oil. Conditional importation under safeguards of unfumigated cotton and cotton products would be allowed when such products are destined to an approved mill operating under an agreement to utilize or process the products in a manner to eliminate all possibility of pest introduction. Unfumigated cotton that has been stored in certain geographical areas in the United States for a period of 18 months would be released without further treatment. The proposed regulations would also revise certain established procedures to conform to current experiences and to knowledge acquired as to hazards of pest introduction involved.

The proposed revision would supersede 7 CFR 319.8, 319.8–1 et seq., effective November 11, 1944, as amended effective February 6, 1948; 7 CFR 321.101, effective July 1, 1915; 7 CFR 321.102 to 321.114, inclusive, effective August 1, 1917, as revised effective December 11, 1937, July 1, 1938, and February 2, 1945; 7 CFR 321.201, effective July 16, 1917; and 7 CFR 321.203 to 321.208, inclusive, effective July 16, 1917, as amended effective August 7, 1925; as well as all administrative instructions supplementary thereto.

All persons who desire to submit written data, views, or arguments in connection with this matter should file the same with the Chief of the Bureau of Entomology and Plant Quarantine, Agricultural Research Administration, United States Department of Agriculture, Washington 25, D. C., within 30 days after the date of the publication of this notice in the FEDERAL REGISTER.

(Secs. 5, 7, 37 Stat. 316, 317; 7 U. S. C. 159, 160)

Done at Washington, D. C., this 11th day of July 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

NOTICE OF FILING OF PLAT OF SURVEY

JULY 7, 1952.

Notice is given that the plat of original survey of the following described lands, accepted March 12, 1952, will be officially filed in the Land Office, Anchorage, Alaska, effective at 10:00 a. m. on the 35th day after the date of this notice:

U. S. SURVEY No. 3099 ALASKA

Spruce Cape Small Tract Group, embracing lots 1 to 30, inclusive; located in latitude 57°48'07" North, longitude 152°22'15" West.

The area described contains 39.04 acres.

The lands are included in the withdrawal made by Executive Order No. 8344 of February 10, 1940, from settlement, location, sale or entry for classification and in aid of legislation.

Anyone having a settlement or other right to any of these lands initiated prior to the date of the withdrawal of the lands should assert the same within three months from the date on which the plat is officially filed by filing application under the appropriate public land laws, setting forth all facts relative thereto.

CHESTER W. MCNALLY,
Acting Manager.

[F. R. Doc. 52–7767; Filed, July 15, 1952; 8:46 a. m.]

ALASKA

SMALL TRACT CLASSIFICATION ORDER NO. 60

JULY 9, 1952.

Pursuant to the authority delegated to me under section 2.21 of Order No. 1, Bureau of Land Management, Region VII, approved by the Acting Secretary of the Interior August 20, 1951 (16 F. R. 8625), I hereby classify as hereinafter indicated under the Small Tract Act of June 1, 1938 (52 Stat. 609, 43 U. S. C. Sec. 682a), as amended, the following described public lands in the Anchorage, Alaska, Land District:

KENAI AREA

SEWARD MERIDIAN

For lease and sale—for home sites.

T. 6 N., R. 12 W.,
Unit No. 3A, sec. 14: E½.
Unit No. 3B, sec. 23: NE¼.
T. 6 N., R. 11 W.,
Unit No. 4A, sec. 33: S½SW¼NE¼; N½SE¼ except N½NW¼NE¼SE¼ and NW¼NE¼NE¼SE¼.
Unit No. 4B, sec. 34: S½NE¼NE¼NE¼; SE¼NW¼NE¼NE¼; NE¼SW¼NE¼NE¼; S½S½N½NE¼ except SW¼SW¼NW¼NE¼; W½SE¼NW¼; E½SW¼NW¼ except NW¼NE¼SW¼NW¼; SW¼SW¼NW¼ except NW¼SW¼SW¼NW¼; SW¼ except N½NE¼NE¼SW¼; W½SE¼ except NW¼NW¼NW¼SE¼; W½NE¼SE¼ except SE¼SW¼NE¼SE¼; N½NE¼NE¼SE¼; NW¼NW¼SE¼SE¼.

The above described lands comprise 391 tracts aggregating approximately 977.5 acres.

2. The lands are located near the village of Kenai, Alaska, on the west side of the Kenai Peninsula. Units No. 3A and 3B lie from 3½ to 5 miles north and west of the village of Kenai and are accessible by the North Kenai Farm Road which traverses the west edge of the units. Units No. 4A and 4B lie from 1½ to 3 miles east of Kenai and are accessible by the Kenai Junction to Kenai Road which traverses the units in an east-west direction. Situated for the most part on well-drained minor uplands, the lands support a vegetative cover of mixed stands of spruce, birch, and aspen. Adequate water for domestic purposes may be obtained from wells and sewage disposal may be made by the use of cesspools or septic tanks. No public utilities are available in the unit at the present time; however, such services as religious, educational, commercial, and transportation are obtainable in Kenai. The climate is a favorable combination of the temperate coastal climate of south central Alaska and the extreme continental climate of interior Alaska.

3. This classification order shall not become effective to change the status of the land or to permit the leasing thereof under the Small Tract Act of June 1, 1938, cited above, until 10:00 a. m. on July 29, 1952. At that time the land shall, subject to valid existing rights, become subject to application as follows:

(a) *Ninety-one day period for preference right filings.* For a period of 91 days from 10:00 a. m. on July 29, 1952, to close of business October 27, 1952, inclusive, to (1) application under the Small Tract Act of June 1, 1938, by qualified veterans of World War II, for whose service recognition is granted by the Act of September 27, 1944, (58 Stat. 747, 43 U. S. C. Secs. 279, 282) as amended, and by other qualified persons entitled to credit for service under the said act, subject to the requirements of applicable law, and (2) applications under any applicable public land laws, based on prior existing valid settlement and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Application by such veterans and by other persons entitled to credit for service shall be subject to claims of the classes described in subdivision (2).

(b) *Advance period for simultaneous preference right filings.* All applications by such veterans and persons claiming preference rights superior to those of such veteran filed on July 9, 1952, or thereafter, up to and including 10:00 a. m. on July 29, 1952, shall be treated as simultaneously filed.

(c) *Date for non-preference right filings authorized by the public land laws.* Commencing at 10:00 a. m. on October 28, 1952, any of the land remaining unappropriated shall become subject to application under the Small Tract Act by the public generally.

(d) *Advance period for simultaneous non-preference right filings.* Applications under the Small Tract Act by the general public filed on October 8, 1952, or thereafter, up to and including 10:00 a. m. on October 28, 1952, shall be treated as simultaneously filed.

4. A veteran shall accompany his application with a complete photostatic, or other copy (both sides) of his certificate of honorable discharge, or of an official document of his branch of service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claim. Persons asserting preference rights, through settlement or otherwise, and those having equitable claim, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

5. All applications referred to in paragraphs 3 and 4, which shall be filed in the Land Office at Anchorage, Alaska, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations to the extent that such regulations are applicable. Applications under the Small Tract Act of June 1, 1938, shall

be governed by the regulations contained in Part 257 of Title 43 of the Code of Federal Regulations.

6. Lessees under the Small Tract Act of June 1, 1938, will be required, within a reasonable time after execution of the lease, to construct upon the leased land, to the satisfaction of the appropriate officer of the Bureau of Land Management authorized to sign the lease, improvements which, in the circumstances, are presentable, substantial, and appropriate for the use for which the lease is issued. Leases will be for a period of not more than three years, at an annual rental of $5, payable in advance for the entire lease period. Every lease will contain an option to purchase clause and every lessee may file an application to purchase at the sale price as provided in the lease.

7. All of the land will be leased in tracts of 2.5 acres each, in accordance with the classification map on file in the Land Office, Anchorage, Alaska. The tracts, where possible, are made to conform in description with the rectangular system of survey, in compact units.

8. Lessees must locate any well or sewage disposal facility according to the regulations and laws of the Territory of Alaska.

9. The leases will be made subject to rights-of-way for road purposes and public utilities, of 50 feet in width, along section and/or quarter section lines and 33 feet in width along other tract boundaries, as shown on the classification maps on file in the Land Office, Anchorage, Alaska. Such rights-of-way may be utilized by the Federal Government, State, Territory, county, or municipality, or any agency thereof. The rights-of-way may, in the discretion of the authorized officer of the Bureau of Land Management, be definitely located prior to the issuance of the patent. If not so located, they may be subject to location after patent is issued.

10. All inquiries relating to these lands shall be addressed to the Manager, Land Office, Anchorage, Alaska.

FRED J. WEILER,
Chief, Division of Land Planning.

Bureau of Reclamation

[No. 9]

TUCUMCARI IRRIGATION PROJECT, NEW MEXICO

ANNOUNCEMENT OF ANNUAL WATER RENTAL CHARGES

JUNE 20, 1952.

1. *Water rental.* Pursuant to Article 10 of the contract of December 27, 1938, irrigation water will be furnished, when available, upon a rental basis during the irrigation season of 1953, where the progress of construction will permit, to the irrigable lands in the Arch Hurley Conservancy District described below:

Entire project irrigable area embracing all units from 1 through 7—water to be furnished beginning about April 1, 1953.

Irrigable lands shall be as designated by the Secretary under date of October 5, 1951, and described in detail in the "Tabulation of Irrigable Areas" dated January 2, 1951. Any qualified water user wishing to ascertain the irrigability of any tract of land may do so by examining copies of this designation in the office of the Arch Hurley Conservancy District.

2. *Charges and terms of payment.* (a) The minimum water rental charge for irrigable land within the boundaries of the Arch Hurley Conservancy District, as above described, shall be $3.75 per irrigable acre, payment of which will entitle the water user to one acre-foot of water per irrigable acre, or so much thereof as may be available in the event of pro-ration. Additional water will be furnished during the irrigation season, if available, at the rate of $2.00 per acre-foot. In the event applications received are for an amount of water in excess of the available supply all deliveries will be subject to pro-ration to the extent deemed necessary.

(b) All charges shall be payable by the District to the United States in advance of the delivery of water, minimum water rental charges payable for irrigable lands which do not apply for water shall be due on or before June 1, 1953.

3. Water will be delivered and measured by Government Forces at the nearest measuring device to the individual farm.

4. The District will request water delivery for, and certify to the United States as entitled to receive water, only such lands as are owned or are held under contract of purchase by persons duly qualified to receive water under the terms of the Reclamation Act of June 17, 1902 (32 Stat. 388), and acts of Congress supplementary thereto or amendatory thereof, and who have duly complied with the requirements of the contract of December 27, 1938, between the United States and the District, including:

(a) The execution and delivery of the recordable contract as provided for in Article 30 (b) of said contract;

(b) The execution and delivery of the valid recordable contract, in case of ownership of excess land, as provided for in Articles 30 (a) and 32 of said contracts.

5. Individual applications for water on forms approved by the United States and the payments required by this announcement will be received at the office of the Secretary of the Arch Hurley Conservancy District, Tucumcari, New Mexico. Requests by the District for water for such lands as are entitled to receive water and payments by the District to the United States will be received at the office of the Bureau of Reclamation, Tucumcari, New Mexico.

6. The above water rental procedure will be followed since it has been determined that it is factually impossible, in view of the provision for construction of distribution works by the United States under the contract with the Arch Hurley Conservancy District dated December 27, 1938, to make water available for irrigation use during the season 1953 as contemplated in Article 8 of the contract.

H. E. ROBBINS,
Regional Director.

Office of the Secretary

ALASKA

NOTICE FOR FILING OBJECTIONS TO ORDER WITHDRAWING PUBLIC LANDS FOR USE OF DEPARTMENT OF THE AIR FORCE FOR MILITARY PURPOSES [1]

For a period of 60 days from the date of publication of the above entitled order, persons having cause to object to the terms thereof may present their objections to the Secretary of the Interior. Such objections should be in writing, should be addressed to the Secretary of the Interior, and should be filed in duplicate in the Department of the Interior, Washington 25, D. C. In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where the proponents of the order can explain its purpose, intent, and extent. Should any objection be filed, whether or not a hearing is held, notice of the determination by the Secretary as to whether the order should be rescinded, modified or let stand will be given to all interested parties of record and the general public.

OSCAR L. CHAPMAN,
Secretary of the Interior.

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214), and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners, and learning period for certificates issued under the general learner regulations (§§ 522.1 to 522.14) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Single Pants, Shirts and Allied Garments, Women's Apparel, Sportswear and Other Odd Outerwear, Rainwear, Robes and Leather and Sheep-Lined Garments Divisions of the Apparel Industry Learner Regulations (29 CFR 522.160 to 522.166, as amended December 31, 1951; 16 F. R. 12043, and June 2, 1952; 17 F. R. 3818).

Anvil Brand, Inc., 318 Willowbrook Street, High Point, N. C., effective 7-7-52 to 1-6-53; 25 learners for expansion purposes (cotton work shirts and pants).

Barson and Bishop, Franklin Street, Weissport, Pa., and Annex-Railroad Street, Lehighton, Pa., effective 7-3-52 to 7-2-53; 10 percent of the productive factory force (ladies' blouses).

Carbondale Products Co., Inc., 21-23 Dundaff Street, Carbondale, Pa., effective 7-3-52 to 7-2-53; five learners (ladies' undergarments).

Carter Dress Co., 40 West Main Street, Plymouth, Pa., effective 7-7-52 to 7-6-53; 10 learners (dresses).

The Essex Manufacturing Co., 620-6 Franklyn Avenue, Essex, Baltimore 21, Md., effective 7-3-52 to 7-2-53; 10 percent of the productive factory force (cotton work pants).

Eugenia Sportswear, 801 James Street, Hazleton, Pa., effective 7-3-52 to 7-2-53; two learners (children's jackets).

Flushing Shirt Manufacturing Co., Hardwick and Front Streets, Belvidere, N. J., effective 6-30-52 to 6-29-53; 10 learners (men's shirts).

Joseph's Manufacturing Co., 1807 Main Street, Springfield, Mass., effective 6-30-52 to 6-29-53; five learners (cotton frocks and aprons).

Industrial Garment Manufacturing Co., 201 East Oak Street, Palestine, Texas, effective 7-2-52 to 7-1-53; 10 percent of the productive factory force (work pants).

Par-Mat Undergarment Co., Inc., 122 East High Street, Manheim, Pa., effective 7-3-52 to 7-2-53; five learners; learners to be engaged at subminimum wage rates in the manufacture of women's underwear and sleeping wear made from woven materials only (ladies' slips and nightgowns).

Pelion Manufacturing Co., Pelion, S. C., effective 6-30-52 to 6-29-53; five learners (sports shirts).

Pioneer Manufacturing Co., Inc., 83 Waller Street, Wilkes-Barre, Pa., effective 7-3-52 to 1-2-53; 25 learners for expansion purposes (infants' and children's dresses and playtops).

Rita's Fashions, Lincoln Street, Moscow, Pa., effective 7-4-52 to 7-3-53; five learners (ladies' blouses and children's dresses).

Susquehanna Manufacturing Co., 456 Main Street, Edwardsville, Pa., effective 7-5-52 to 7-4-53; six learners (dresses and blouses).

Hosiery Industry Learner Regulations (29 CFR 522.40 to 522.51, as revised November 19, 1951; 16 F. R. 10733).

Texas Knitting Mills, Inc., Mineral Wells, Texas, effective 7-9-52 to 7-8-53; five learners.

Knitted Wear Industry Learner Regulations (29 CFR 522.68 to 522.79, as amended January 21, 1952; 16 F. R. 12866).

Par-Mat Undergarment Co., Inc., 122 East High Street, Manheim, Pa., effective 7-3-52 to 7-2-53; five learners; learners to be engaged at subminimum wage rates in the manufacture of women's underwear and sleeping wear made from knitted materials only (knitted underwear).

Stratford Knitting Mills, Inc., Linfield, Pa., effective 7-18-52 to 7-17-53; five learners (knitted undergarments).

Shoe Industry Learner Regulations (29 CFR 522.250 to 522.260, as amended March 17, 1952; 17 F. R. 1500).

St. Clair Shoe Manufacturing Corp., St. Clair, Mo., effective 7-15-52 to 1-14-53; 50 learners for expansion purposes.

Texas Boot Manufacturing Co., Inc., Forest Avenue, Lebanon, Tenn., effective 7-1-52 to 12-31-52; 50 learners for expansion purposes.

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.14).

Frederick Tailoring Co., Inc., Pasteur and Queen Streets, New Bern, N. C., effective 7-8-52 to 7-7-53; 7 percent of the productive factory force; machine operators (except cutting), pressers, handsewers; each 480 hours; 60 cents per hour for the first 240 hours and 65 cents per hour for the remaining 240 hours (men's slacks and suit trousers).

Harvard Clothes, Inc., Twelfth Avenue South, Wisconsin Rapids, Wis., effective 7-7-52 to 7-6-53; 7 percent of the productive factory force; sewing machine operators, handsewers, pressers; each 480 hours; 60 cents per hour for the first 240 hours and 65 cents per hour for the remaining 240 hours (suits, topcoats, overcoats).

Soboroff Sons Co., 1500 North Ogden Avenue, Chicago 10, Ill., effective 7-8-52 to 7-7-53; 10 percent of the productive factory force; machine operator (except cutting), pressers, handsewers; each 240 hours at 65 cents per hour (men's and boys' cloth hats and caps).

Sparta Pipes, Inc., Sparata, N. C., effective 7-18-52 to 1-17-53; 10 percent of the productive factory force; pipe makers; 240 hours at 65 cents per hour (smoking pipes).

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be cancelled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 8th day of July 1952.

MILTON BROOKE, *Authorized Representative of the Administrator.*

CIVIL AERONAUTICS BOARD

[Docket No. 5513]

SCHEDULED AIR SERVICE TO MONTE VISTA, COLO.

NOTICE OF HEARING

Notice is hereby given pursuant to the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a), 401, 404, 1001, and 1002 thereof that a hearing in the above-entitled proceeding is assigned to be held on August 6, 1952, at 10:00 a. m. (Rocky Mountain standard time) in the City Hall, Monte Vista, Colorado, before Examiner F. Merritt Ruhlen.

Without limiting the scope of the issues presented in this proceeding particular attention will be directed to the question whether scheduled air service to the City of Monte Vista, Colorado, should be provided through the Monte Vista Airport.

For more detailed information with respect to the issues involved herein attention is directed to the pleadings on file with the Civil Aeronautics Board.

Notice is further given that any person other than parties of record desiring to be heard in this proceeding must file with the Civil Aeronautics Board on or before August 6, 1952, a statement setting forth the issues of fact or law he desires to controvert.

Dated at Washington, D. C., this 10th day of July 1952.

[SEAL] FRANCIS W. BROWN, *Chief Examiner.*

[Ceiling Price Regulation 83, Section 2, Special Order 11, Amdt. 9]

GENERAL MOTORS CORPORATION

BASIC PRICES AND CHARGES FOR NEW PASSENGER AUTOMOBILES

Statement of considerations. Special Order 11 established a schedule of prices and charges pursuant to section 2 of Ceiling Price Regulation 83 for sellers of new passenger automobiles and factory installed extra equipment manufactured by the General Motors Corporation. Subsequent to the issuance of Special Order 11 the General Motors Corporation has introduced a new item of factory installed extra, special or optional equipment on its Buick new passenger automobiles and a wholesale ceiling price has been approved on series 70 Buick passenger automobiles. The General Motors Corporation now desires to add this same item on series 50 Buick passenger automobiles. Accordingly, the same wholesale ceiling price has been established for this item. Special Order 11 is, therefore, amended to include a charge for the new item of factory installed extra, special or optional equipment.

Special provisions. For the reasons set forth in the statement of considerations and pursuant to section 2 of Ceiling Price Regulation 83, this amendment to Special Order 11 is hereby issued.

1. The following charge for factory installed extra, special or optional equipment is added to the list of extra, special or optional equipment contained in paragraph 2 of Special Order 11:

BUICK PASSENGER AUTOMOBILES	
Power Drive (Series 50)	$185.00

Effective date. This Amendment 9 to Special Order 11 shall become effective July 15, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

FEDERAL POWER COMMISSION

[Docket No. E-6414]

NEBRASKA MID-STATE RECLAMATION DISTRICT

NOTICE OF DECLARATION OF INTENTION

JULY 9, 1952.

Public notice is hereby given that the Nebraska Mid-State Reclamation District of Grand Island, Nebraska, has filed a declaration of intention pursuant to section 23 (b) of the Federal Power Act (16 U. S. C. 817) to construct a hydroelectric development and irrigation project (Docket No. E-6414) on the Platte River and certain of its tributaries in Dawson, Gosper, Buffalo, Hall and Merrick Counties, Nebraska. The proposed project will consist of: A diversion dam across the Platte River about 6 miles west of Overton, Nebraska, with a supply canal about 15.5 miles long extending Northeasterly therefrom to control works on the westerly end of the Elm Creek Reservoir System to be formed by a series of dams and dikes across ravines and draws and interconnected by short canals. Water from Elm Creek Reservoir System will be diverted through the proposed Odessa Power Plant located about 1½ miles North of the town of Odessa to the Kearney Canal. Additional water will be diverted from the Elm Creek Reservoir System through the proposed Wood River Plant No. 1 into the proposed Riverdale Reservoir to be located to the east in the Wood River Watershed. Water from the Riverdale Reservoir will be diverted through the proposed Wood River Power Plant No. 2 to be located about 6½ miles North of the town of Odessa to the proposed Wood River Reservoir, forming a part of the proposed Staghorn Reservoir System. Water from the proposed Wood River Reservoir will then be diverted through the Wood River Plant No. 3 into Wood River. Wood River Reservoir will be connected to four other reservoirs of the Staghorn System to be formed by a series of dams and dikes across ravines and draws. The total power installation of the Elm Creek Reservoir and Staghorn Reservoir System will be approximately 30,700 kilowatts, which energy will be connected with the Nebraska Public Power System for distribution by it.

The Commission will investigate the proposed project and determine whether a license under the Federal Power Act is required or whether the project may be constructed upon compliance within the State Laws only. Any objection or comments concerning this matter should be communicated or submitted within 30 days from the date of publication of this notice to the Federal Power Commission, Washington 25, D. C.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 52-7817; Filed, July 15, 1952; 8:53 a. m.]

[Docket Nos. G-1678, G-1996]

MICHIGAN-WISCONSIN PIPE LINE CO.

ORDER SUSPENDING PROPOSED RATE SCHEDULE, POSTPONING HEARING, CONSOLIDATING PROCEEDINGS FOR HEARING, AND SPECIFYING DATE OF HEARING AND PROCEDURE FOR CONSOLIDATED PROCEEDINGS

JULY 10, 1952.

On June 11, 1952, Michigan-Wisconsin Pipe Line Company (Michigan-Wisconsin) filed its Second Revised Sheet No. 5 to its FPC Gas Tariff, comprising its Rate Schedule G-1, providing for an increase in the rate of 31½ cents per Mcf of natural gas presently in effect under bond to 35 cents per Mcf, effective July 12, 1952. The proposed additional increase would result in increased payments by Michigan-Wisconsin's resale customers amounting to approximately $3,871,000 annually, or 11.1 percent based on estimated sales for the twelve-month period ending July 31, 1953.

The present rate of 31½ cents per Mcf, contained in Michigan-Wisconsin's First Revised Sheet No. 5, which the filing of June 11, 1952, would supersede, was suspended by order issued April 25, 1951, in Docket No. G-1678, but became effective under bond on October 1, 1951, when the proceedings in that docket were not completed at the end of the maximum suspension period of five months. The rate of 31½ cents per Mcf superseded a rate of 28 cents per Mcf and represented an increase of approximately $3,771,775, annually, or 12½ percent.

From the cost data submitted by Michigan-Wisconsin in purported justification of the further increase of the rate from 31½ cents per Mcf to 35 cents per Mcf it appears that the proposed increase is based upon a working capital allowance which, among other things, ignores the availability of tax accruals for working capital purposes; upon a 6½ percent rate of return for which no support or explanation has been submitted although the rates presently in effect under bond are based, in part, on a 6 percent rate of return; upon anticipated increased purchase gas costs reflecting the proposed increased rate; and upon contemplated wage increases which have not been granted.

In view of the foregoing, and because of other items of a questionable nature appearing in the data submitted by Michigan-Wisconsin, it does not appear that the proposed increase in rates has been supported as required by section 4 (e) of the Natural Gas Act, and such increase may be unjust, unreasonable, unduly discriminatory or preferential or otherwise unlawful, and may place an undue burden upon ultimate consumers of natural gas.

As required by § 154.16 of the Commission's regulations Under the Natural Gas Act, a copy of said Second Revised Sheet No. 5 to Michigan-Wisconsin's EPC Gas Tariff was sent to each customer which would be affected thereby, and also to various State, county, and municipal authorities.

The Public Service Commissions of Michigan and Wisconsin, and the Cities of Milwaukee, Wisconsin, and Detroit, Michigan, filed objections to the proposed second increased rate, and have requested that such Second Revised Sheet No. 5 be suspended and a hearing held with respect to the reasonableness of the increased rate therein proposed.

Comments were also received from the Wisconsin Power and Light Company, Wisconsin Michigan Power Company, Wisconsin Natural Gas Company, Wisconsin Public Service Corporation, Keokuk Gas Service Company, Wisconsin Fuel and Light Company, Madison Gas and Electric Company, Michigan Gas Utilities Company, Milwaukee Gas Light Company, Fort Madison Gas Company, Michigan Gas & Electric Company, Iowa Southern Utilities Company, and Iowa Electric Company, each of which is a customer of Michigan-Wisconsin. Most of these customer companies oppose the proposed increased rate and request suspension of said Second Revised Sheet No. 5.

Hearings have been held, but have not been completed, in Docket No. G-1678 respecting the 31½ cents per Mcf rate which is presently in effect under bond. At such hearings, after Michigan-Wisconsin presented its justification, the hearings were recessed subject to further order of the Commission. By order issued June 11, 1952, the hearings are to resume on July 21, 1952. It appears that the proposed increase filed June 11, 1952 and the rate which is the subject of the hearings in Docket No. G-1678 should be consolidated for hearing and the hearings in Docket No. G-1678 postponed to a date when the consolidated proceedings may go forward.

The Commission finds:

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing, pursuant to the authority contained in § 4 (e) of such Act, concerning the lawfulness of Michigan-Wisconsin's FPC Gas Tariff, Second Revised Sheet No. 5, and that said Second Revised Sheet No. 5 and the rate schedule therein contained be suspended as hereinafter provided and the use thereof be deferred pending hearing and decision thereon.

(2) Good cause exists for consolidating the proceedings in Docket Nos. G-1678 and G-1996 for the purpose of hearing, and for postponement of the hearings in Docket No. G-1678 as hereinafter ordered.

(3) It is necessary and appropriate to carry out the provisions of the Natural Gas Act, and it is in the public interest, that the procedure hereinafter prescribed shall be followed at the consolidated proceedings.

The Commission orders:

(A) The proceedings in Docket Nos. G-1678 and G-1996 be and the same are hereby consolidated for the purpose of hearing.

(B) The hearings in Docket No. G-1678 be and the same are hereby postponed to September 16, 1952, on which date a public hearing be held at 10:00 a. m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., in the consolidated proceedings concerning the lawfulness of the rates, charges, and classifications contained in the First and Second Revised Sheets No. 5 to Michigan-Wisconsin Pipe Line Company's FPC Gas Tariff.

(C) Pending such hearing and decision on Second Revised Sheet No. 5 to Michigan-Wisconsin Pipe Line Company's FPC Gas Tariff, said Second Revised Sheet No. 5 be and the same is hereby suspended and the use thereof deferred until December 12, 1952, and until such further time as said Second Revised Sheet No. 5 may be made effective in the manner prescribed by the Natural Gas Act.

(D) At the hearings on September 16, 1952, Michigan-Wisconsin shall present its justification, in accordance with the provisions of section 4 (e) in support of the rate hereby suspended in Docket No. G-1996. After Michigan-Wisconsin has completed this presentation, other parties, including Commission Staff Counsel shall proceed with and conclude their cross-examination in Docket Nos. G-1678 and G-1996: *Provided, however,* That in the event that a request is made for a recess to permit preparation for cross-examination in the latter docket, the hearing shall be recessed by the Presiding Examiner for no more than two weeks for that purpose.

(E) Interested State Commissions may participate in Docket No. G-1996, as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f) of the Commission's rules of practice and procedure.

Date of issuance: July 10, 1952.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 52-7798; Filed, July 15, 1952; 8:50 a. m.]

[Docket No. G-1881]

NORTHERN NATURAL GAS CO.

ORDER FIXING DATE FOR ORAL ARGUMENT

JULY 10, 1952.

On July 2, 1952, the City of St. Paul, Minnesota, an intervenor in the above-entitled proceeding, and on July 9, 1952, the City of Waseca, Minnesota, and the Western States Utilities Company, intervenors herein, filed motions paralleling the motion to dismiss filed by Commission staff counsel in these proceedings on June 26, 1952, which motion, by Commission order issued July 3, 1952, was set for oral argument and the time fixed for the filing of memoranda of law or briefs.

The Commission finds: It is appropriate to carry out the provisions of the Natural Gas Act that the motions of the Cities of St. Paul and Waseca, Minnesota, and The Western States Utilities Company, be set for oral argument and that said motions be argued together with the motion of Commission staff counsel.

The Commission orders: The motions of the Cities of St. Paul and Waseca, Minnesota, and The Western States Utilities Company be set for argument before the Commission and orally argued together with the motion of Commission staff counsel, on July 17, 1952, at 10 a. m., e. d. s. t., in the Hearing Room, Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., and that Commission staff counsel, and each party to the proceeding may file a memorandum of law or brief with respect to the motions on or before July 14, 1952.

Date of issuance: July 10, 1952.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

[Project No. 1144]

ELIZABETH H. GRAFF ET AL.

NOTICE OF APPLICATION FOR SURRENDER OF LICENSE

JULY 9, 1952.

In the matter of Elizabeth H. Graff, John H. Graff and Elizabeth Graff Knight.

Public notice is hereby given that John H. Graff and Elizabeth Graff Knight, of Seattle, Washington, for herself and as executrix of the will of Elizabeth H. Graff (deceased) have filed application under the Federal Power Act (16 U. S. C. 791a–825r) for surrender of the license for water-power Project No. 1144, located on Lowell Creek in the vicinity of Seward in the Third Judicial Division, Alaska.

Any protest against the approval of this application or request for hearing thereon, with the reasons for such protest or request and the name and address of the party or parties so protesting or requesting, should be submitted before August 18, 1952, to the Federal Power Commission, Washington 25, D. C.

[SEAL] LEON M. FUQUAY,
Secretary.

[Project No. 2104]

PACIFIC GAS AND ELECTRIC CO.

NOTICE OF APPLICATION FOR LICENSE

JULY 8, 1952.

Public notice is hereby given that Pacific Gas and Electric Company, of San Francisco, California, has made application for license pursuant to the provisions of the Federal Power Act (16 U. S. C. 791–825r) for a proposed hydroelectric project, to be known as Pit No. 6 Project, and designated as Project No. 2104, on the Pit River near Redding in Shasta County, California, and affecting lands of the United States within Shasta National Forest. The proposed project would consist of: (a) a concrete gravity dam across Pit River, about 230 feet in height above the streambed, with top of crest at Elevation 1391 and normal operating surface at Elevation 1430, equipped with two 60 x 40-foot and one 22½ x 15-foot radial gates, and one 15-foot diameter gate-controlled sluice pipe; (b) a reservoir extending upstream to Pit No. 5 plant, with an effective capacity of approximately 4,500 acre-feet between normal operating water surface (Elevation 1430) and minimum normal operating water level (Elevation 1422) and a total storage of about 36,200 acre-feet at normal water surface (Elevation 1430); (c) water conduits to consist of two penstocks each 180 inches in diameter and about 160 feet long, to extend through the dam from a roller-gate controlled intake structure to the powerhouse; (d) a powerhouse immediately downstream from the dam, to house two vertical turbine-generator units of 36,000-kva., each (total 72,000 kva., 0.9 power factor, initial and ultimate capacity); (e) a substation and switchyard adjacent to the powerhouse to contain necessary switching and transforming equipment; (f) two 220,000-volt transmission lines about 3 miles long each, extending from the switchyard at Pit No. 6 plant to the junction with the applicant's interconnected primary transmission system; and miscellaneous hydraulic and electric appurtenances.

Any protest against the approval of this application or request for any action thereon, with the reason for such protest or request, and the name and address of the party or parties so protesting or requesting, should be submitted on or before August 25, 1952, to the Federal Power Commission at Washington 25, D. C.

OFFICE OF DEFENSE MOBILIZATION

[CDHA 61]

FINDING AND DETERMINATION OF CRITICAL DEFENSE HOUSING AREAS UNDER THE DEFENSE HOUSING AND COMMUNITY FACILITIES AND SERVICES ACT OF 1951 (PUB. LAW 139, 82D CONG.)

JULY 15, 1952.

Upon a review of the construction of new defense plants and installations, and the reactivation or expansion of operations of existing defense plants and installations, and the in-migration of defense workers or military personnel to carry out activities at such plants or installations, and the availability of housing and community facilities and services for such defense workers and military personnel in each of the areas set forth below, I find that all of the conditions set forth in section 101 (b) of the Defense Housing and Community Facilities and Services Act of 1951 (Pub. Law 139, 82d Cong., 1st Sess.) exist.

Accordingly, pursuant to section 101 of the Defense Housing and Community Facilities and Services Act of 1951 and by virtue of the authority vested in me by paragraph number 1 of Executive Order 10296 of October 2, 1951, I hereby determine that each of said areas is a critical defense housing area.

Savannah River, Georgia-South Carolina, Area. (The area consists of Aiken, Allendale, Barnwell and Bamberg Counties, and Orangeburg County, except the Townships of Elloree, Eutaw, Holly Hill, Providence and Vance, all in South Carolina; and Richmond, Columbia, and McDuffie Counties, and District 81-Wrens (Including Wrens Town) in Jefferson County, all in Georgia.)

This supersedes certification under Docket No. 1 dated March 21, 1952.

JOHN R. STEELMAN,
Acting Director of Defense Mobilization.

[F. R. Doc. 52-7898; Filed, July 15, 1952; 12:05 p. m.]

[RC 52; No. 362]

SAVANNAH RIVER, GEORGIA-SOUTH CAROLINA, AREA

DETERMINATION AND CERTIFICATION OF A CRITICAL DEFENSE HOUSING AREA

JULY 15, 1952.

Upon specific data which has been prescribed by and presented to the Secretary of Defense and the Director of Defense Mobilization and on the basis of other information available in the discharge of their official duties, the undersigned find that the conditions required by section 204 (1) of the Housing and Rent Act of 1947, as amended, exist in the area designated as

Savannah River, Georgia-South Carolina, Area. (The area consists of Aiken, Allendale, Barnwell, and Bamberg Counties, and Orangeburg County, except the Townships of Elloree, Eutaw, Holly Hill, Providence and Vance, all in South Carolina; and Richmond, Columbia, McDuffie Counties, and District 81-Wrens (Including Wrens Town), in Jefferson County, all in Georgia.)

This supersedes certification under Docket No. 1 dated March 21, 1952.

Therefore, pursuant to section 204 (1) of the Housing and Rent Act of 1947, as amended, and Executive Order 10276 of July 31, 1951, the undersigned jointly determine and certify that the aforementioned area is a critical defense housing area.

WILLIAM C. FOSTER,
Acting Secretary of Defense.
JOHN R. STEELMAN,
Acting Director of Defense Mobilization.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-2885]

UNITED CORP.

SUPPLEMENTAL ORDER CONCERNING SALE OF COMMON STOCK OF SUBSIDIARY COMPANY

JULY 9, 1952.

The United Corporation ("United"), a registered holding company, having filed a declaration pursuant to section 12 of the Public Utility Holding Company Act of 1935 ("act") and Rule U-44 promulgated thereunder with respect to the sale by it, pursuant to the competitive bidding requirements of Rule U-50, of 154,230 shares of common stock of South Jersey Gas Company, representing approximately 28.25 per cent of the voting securities of that company; and

The Commission having, by order dated June 24, 1952, permitted said declaration to become effective, subject to the condition, among others, that the proposed sale of common stock shall not be consummated until the results of competitive bidding shall have been made a matter of record in this proceeding, and a further order shall have been entered in the light of the record so completed; and

United having on July 9, 1952, filed a further amendment to said declaration in which it is stated that it has offered the common stock for sale pursuant to the competitive bidding requirements of Rule U-50 and has received the following bids:

Bidding group headed by—	*Price per share to United*
The First Boston Corp.	$15.379
Lehman Bros., Bear Stearns & Co., and A. C. Allyn & Co., Inc.	14.805
Kidder, Peabody & Co. and Allen & Co.	13.35

The amendment further stating that United has accepted the bid of the group headed by the First Boston Corporation for the common stock as set forth above and that the purchasers intend to offer 92,230 of the shares to be purchased to a limited number of persons at a price of $15,629 per share, resulting in an underwriters' spread of $.25 per share; the record indicating that of the remaining 62,000 shares, the First Boston Corporation and Wertheim & Co. will each retain 25,000 shares for temporary investment only, and 12,000 shares will be retained by Gas Industries Fund, Inc.; and

The First Boston Corporation and Wertheim & Co., having filed a statement agreeing that so long as they retain any of the said shares, they will not (a) participate as underwriter in financing by South Jersey Gas Company on a negotiated basis or (b) attempt to place a representative or nominee on the Board of Directors of South Jersey Gas Company; and

The Commission having examined said amendment and having considered the record herein and finding no basis for imposing terms and conditions with respect to the price to be received for the common stock, and the underwriters' spread with respect thereto:

It is hereby ordered, That jurisdiction heretofore reserved in connection with the sale of said common stock be, and the same hereby is, released, and that the said declaration, as further amended, be, and the same hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24 of the general rules and regulations under the act.

By the Commission.

[File No. 70-2896]

ATTLEBORO STEAM AND ELECTRIC CO. ET AL.

NOTICE OF FILING REGARDING ISSUANCE BY SUBSIDIARIES TO PARENT COMPANY OF PROMISSORY NOTES

JULY 10, 1952.

In the matter of Attleboro Steam and Electric Company, Beverly Gas and Electric Company, Gloucester Electric Company, Northern Berkshire Gas Company, Norwood Gas Company, Quincy Electric Light and Power Company, Southern Berkshire Power & Electric Company, Weymouth Light and Power Company, Worcester County Electric Company, New England Electric System, File No. 70-2896.

Notice is hereby given that New England Electric System ("NEES"), a registered holding company, and its above named public-utility subsidiary companies, hereinafter individually referred to as "Attleboro", "Beverly", "Gloucester", "Northern Berkshire", "Norwood", "Quincy", "Southern Berkshire", "Weymouth" and "Worcester County" and collectively referred to as "the borrowing companies", have filed applications-declarations, pursuant to the Public Utility Holding Company Act of 1935, and have designated sections 6 (a), 7, 9 (a), 10 and 12 (f) of the act and Rules U-23, U-43 (a), and U-45 (a) thereunder as applicable to the proposed transactions, which are summarized as follows:

The borrowing companies propose to issue to NEES, from time to time but not later than September 30, 1952, additional unsecured promissory notes in an aggregate amount up to but not exceeding $1,540,000. Said notes will mature December 1, 1952, and will bear interest at the prime interest rate charged by banks on similar notes at the time said notes are issued to NEES. It is stated in the applications-declarations that at the present time the prime interest rate paid by banks on notes similar to those proposed to be issued is 3 percent per annum. It is further stated that if said prime interest rate is in excess of 3¼ percent at the time of the proposed notes are to be issued, NEES and the borrowing company will file an amendment to this filing at least five days prior to the proposed issue date of such note. Such amendment will set forth the amount of the note proposed to be issued and the proposed rate of interest thereof. NEES and the borrowing companies request that unless the Commission notifies it and the applicable borrowing company or companies to the contrary within said five day period, the amendment shall become effective at the end of such period. The applications-declarations further state that the proposed notes may be prepaid, in whole or in part, without premium.

The following table shows for each of the borrowing companies the notes payable to NEES at June 30, 1952, and the aggregate maximum amount of such notes proposed to be issued during the period from July 1, 1952, to September 30, 1952.

Company	Notes payable to NEES at June 30, 1952	Aggregate maximum borrowings during period July 1, 1952, to Sept. 30, 1952
Attleboro	$325,000	$100,000
Beverly	2,125,000	150,000
Gloucester	555,000	100,000
Northern Berkshire	1,150,000	150,000
Norwood	280,000	90,000
Quincy	680,000	100,000
Southern Berkshire	805,000	50,000
Weymouth	650,000	100,000
Worcester	2,600,000	700,000
	6,960,000	1,540,000

The applications-declarations further state that the proceeds of the notes proposed to be issued are to be used by the borrowing companies for construction costs, cost of conversion to natural gas and to reimburse their treasuries for prior construction expenditures. The applications-declarations further state that incidental services in connection with the proposed note issues will be performed, at cost, by New England Power Service Company, an affiliated service company, such cost being estimated not to exceed $200 for NEES and each of the borrowing companies, or an aggregate of $2,000. The applications-declarations further state that no State commission or Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

NEES and the borrowing companies request that the Commission's order herein become effective forthwith upon issuance.

Notice is further given that any interested person may, not later than July 23, 1952, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reason or reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the applications-declarations, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File No. 70-2897]

NEW ENGLAND POWER CO.

NOTICE OF FILING REGARDING PROPOSED NOTE ISSUES

JULY 10, 1952.

Notice is hereby given that a declaration has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935, by New England Power Company ("NEPCO"), a public-utility subsidiary company of New England Electric System, a registered holding company. NEPCO has designated sections 6 (a) and 7 of the act and Rule U-23 thereunder as applicable to the proposed transactions, which are summarized as follows:

The declaration indicates that NEPCO presently has outstanding $5,400,000 principal amount of promissory notes, due April 1, 1953, issued pursuant to a bank loan agreement with five banks, namely, the First National Bank of Boston ($2,970,000), the Chase National Bank of the City of New York ($702,000), the Hanover Bank ($702,000), Irving Trust Company ($702,000) and the New York Trust Company ($324,000). Under its bank loan agreement, NEPCO proposes to issue to the above mentioned banks, from time to time, but not later than December 31, 1952, $6,000,000 of additional unsecured promissory notes all of which will mature April 1, 1953. The proceeds of the new notes will be used for construction expenditures during the period from July 1, 1952 to December 1, 1952, and to reimburse NEPCO's treasury for prior construction expenditures.

The declaration states that each new note issued prior to October 1, 1952 will bear interest to that date at the six month prime commercial rate generally being charged by banks in Boston on the fifth business day prior to the issuance thereof, but in no event less than 3 percent per annum nor more than 3¼ percent per annum and will bear interest from October 1, 1952 to April 1, 1953, at said rate on October 1, 1952, but in no event less than 3 percent nor more than 3½ percent per annum. The declaration further states that each new note issued after October 1, 1952, will bear interest to April 1, 1953, at said rate on the fifth business day prior to the issuance thereof, but in no event less than 3 percent per annum nor more than 3½ percent per annum. The bank loan agreement under which the proposed notes will be issued provides for the payment of a commitment fee of ¼ percent per annum from the effective date of the agreement to December 31, 1952, on the average daily difference between $7,000,000, the amount of the banks' unborrowed commitment, and the additional amount borrowed under the agreement. Subject to certain restrictions, the proposed notes may be prepaid, in whole or in part, without premium.

According to the declaration, NEPCO expects that its note indebtedness will be financed through the issuance of capital stock and first mortgage bonds in approximately equal amounts late in 1952 or early in 1953 and, in this connection, NEPCO proposes that the proceeds of any permanent financing, except financing (including the assumption of indebtedness of Connecticut River Power Company) for the acquisition of properties of Connecticut River Power Company, done before the maturity of the notes proposed to be issued, will be applied in reduction of, or in total payment of notes then outstanding, and the amount of authorized but unissued notes, if any, will be reduced by the amount, if any, by which such permanent financing exceeds the notes at the time outstanding.

The declaration states that incidental services in connection with the proposed note issues, will be performed, at cost, by New England Power Service Company, an affiliated service company, such cost being estimated not to exceed $1,000. The bank loan agreement provides that NEPCO will reimburse the First National Bank of Boston, as Agent for the five lending banks, for out-of-pocket expenses and NEPCO expects such expenses to be nominal.

The declaration indicates that the New Hampshire Public Utilities Commission has approved the proposed issuance and sale of the additional notes and that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

NEPCO requests that the Commission's order herein become effective forthwith upon issuance.

Notice is further given that any interested person may, not later than July 23, 1952, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the

nature of his interest, the reason or reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the declaration, as filed or as amended, may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 and U-100 thereof.

By the Commission.

[F. R. Doc. 52-7773; Filed, July 15, 1952; 8:48 a. m.]

E. L. BREWSTER ET AL.

MEMORANDUM OPINION AND ORDER REVOKING BROKER-DEALER REGISTRATIONS

JULY 9, 1952.

In the matter of Edward Leroy Brewster, d/b/a E. L. Brewster, 127 Colony Street, Meriden, Connecticut; The Three Brooks, Inc., North Street, Greenwich, Connecticut; Wilmer R. Chance, d/b/a W. R. Chance & Co., 141 Milk Street, Boston 9, Massachusetts; Clyde F. Frost, d/b/a Clyde F. Frost Co., 24 Federal Street, Boston 10, Massachusetts; Ross & Company, Inc., 507 Service Building, Rutland, Vermont.

These are proceedings pursuant to section 15 (b) of the Securities Exchange Act of 1934 ("the act") to determine whether the registrants named above, who are registered as broker and dealer, willfully violated section 17 (a) of the act and Rule X-17A-5 thereunder and, if so, whether it is in the public interest to revoke their registrations.[1]

The proceedings were instituted by the issuance of separate notices and orders for hearing, copies of which were sent by registered mail to the addresses last furnished us by the registrants in their registration applications or amendments thereto. These registered notices were returned to us by the Post Office Department with notations indicating that the registrants could not be found at the addresses given.[2] None of the registrants appeared in person or was represented by counsel on the date set for hearing.

On November 28, 1942, we promulgated Rule X-17A-5 under section 17 (a) of the act, which provides, among other things, that every registered broker or dealer must file with this Commission a report of financial condition during each calendar year commencing with the year 1943. Promulgation of the rule was announced by publication in the FEDERAL REGISTER, by release to the press, and by distribution to persons on our mailing list.

The registrations of the registrants have not been withdrawn, cancelled, revoked or suspended, and as of the institution of the proceedings were in full force and effect. Our records show that the registrants failed to file the required reports for 1951 and a number of years preceding.

Upon review of the records in these proceedings, we have concluded that each of the registrants violated section 17 (a) of the act and Rule X-17A-5 thereunder as a result of failure to file such reports. We conclude also that such violations were willful within the meaning of section 15 (b).[3]

On the basis of the foregoing, we are of the opinion that it is necessary in the public interest to revoke the registration of each of the registrants.

Accordingly, it is ordered, That the registrations of Edward Leroy Brewster, doing business as E. L. Brewster; The Three Brooks, Inc.; Wilmer R. Chance, doing business as W. R. Chance & Co.; Clyde F. Frost, doing business as Clyde F. Frost Co.; Ross & Company, Inc., be, and they hereby are, revoked.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

DEPARTMENT OF JUSTICE

Office of Alien Property

[Vesting Order 18951]

OTTO STAGE

In re: Claim owned by Otto Stage also known as Otto Stege. F-28-31905.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR, 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That Otto Stage, also known as Otto Stege, whose last known address is 65 Benzerstrasse, Walsrode, Hannover, Germany, on or since December 11, 1941, and prior to January 1, 1947, was a resident of Germany and is, and prior to January 1, 1947, was, a national of a designated enemy country (Germany);

2. That the property described as follows: The claim against the Treasurer of Lucas County, State of Ohio, the County Commissioner of Lucas County and or the State Superintendent of Banks, Columbus, Ohio, arising out of the collection and receipt by the Treasurer of the County of Lucas, State of Ohio, of the following: Those certain dividends payable to Otto Stage representing the sixth, seventh, eighth, ninth and final dividends in an aggregate amount of $297.44 arising out of a bank account numbered 2164, maintained with the Commerce Guardian Trust and Savings Bank, Toledo, Ohio, in the name of Otto Stage and identified by claim numbered S 4001, said sum presently on deposit with the Treasurer of Lucas County, Ohio, and any and all rights to file, demand, enforce and collect the same,

is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, Otto Stage, also known as Otto Stege, the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That the national interest of the United States requires that the person identified in subparagraph 1 hereof, be treated as a person who is and prior to January 1, 1947, was a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 10, 1952.

For the Attorney General.

[Vesting Order 18947]

JOSEF MUELLER ET AL.

In re: Debts owing to Josef Mueller and others.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That the persons whose names and addresses are listed as owners on Exhibit A attached hereto and by reference made a part hereof, on or since December 11, 1941, and prior to January 1, 1947 were residents of Germany and are, and prior to January 1, 1947 were, nationals of a designated enemy country (Germany);

2. That enterprises whose names are listed on the aforesaid Exhibit A are corporations, partnerships, associations, or other business organizations which on or since December 11, 1941, and prior to January 1, 1947, were organized under the laws of and had their principal places of business in Germany and are and prior to January 1, 1947, were, nationals of a designated enemy country (Germany);

3. That the personal representatives, heirs, next of kin, legatees and distributees of Helene Weintraud, deceased, of Maria Suhr, deceased, also known as Maria Bausch Suhr, and of Adolf Convert, deceased, who there is reasonable cause to believe on or since December 11, 1941, and prior to January 1, 1947 were, residents of Germany are, and prior to January 1, 1947 were, nationals of a designated enemy country (Germany);

4. That Kern & Birner, Buchdruckerei & Verlagsanstalt, the last known address of which is Frankfurt/M Holbeinstr. 42, Germany, that VDO Tachometer A. G., the last known address of which is Frankfurt/Main, Graefstr. 103, Germany, and that Emil Pinkau & Co., the last known address of which is Leipzig, Germany, are corporations, partnerships, associations, or other business organizations which on or since December 11, 1941, and prior to January 1, 1947, were organized under the laws of and had their principal places of business in Germany and are, and prior to January 1, 1947 were, nationals of a designated enemy country (Germany);

5. That the persons whose names and last known addresses are listed below:

Ernst Toennies, Frankfurt Main, Germany.

Walter Werz, Wiesbaden, Dambachtal 20, Germany.

Berthold H. Gottschalk, c/o Allgemeine Finanzierungs, G. m. b. H., Ruesselsheim Main, Germany.

Gebr. Klingspor, Offenbach Main, Germany.

on or since December 11, 1941, and prior to January 1, 1947 were residents of Germany and are, and prior to January 1, 1947 were, nationals of a designated enemy country (Germany);

6. That the persons who own the property described in subparagraph 7 (f) and (g) hereof who, if individuals, there is reasonable cause to believe on or since December 11, 1941 and prior to January 1, 1947 were residents of Germany, and which, if corporations, partnerships, associations or other business organizations, there is reasonable cause to believe on or since December 11, 1941 and prior to January 1, 1947 were organized under the laws of and had their principal places of business in Germany, are, or prior to January 1, 1947 were, nationals of a designated enemy country (Germany).

7. That the property described as follows:

a. Those certain debts or other obligations evidenced by the checks and drafts described in Exhibits A and B, attached hereto and by reference made a part hereof, said checks and drafts owned by the persons listed therein as owners and presently in the custody of the Attorney General of the United States, together with any and all rights to demand, enforce and collect the aforesaid debts or other obligations and any and all rights in, to and under said checks and drafts,

b. That certain debt or other obligation evidenced by an American Express Company money order numbered AJ 9700061 in the amount of $5.00, dated November 10, 1939 payable to and owned by Kern & Birner, Buchdruckered & Verlagsanstalt and presently in the custody of the Attorney General of the United States, together with any and all rights to demand, enforce and collect the aforesaid debt or other obligation and any and all rights in, to and under said money order,

c. That certain debt or other obligation evidenced by an American Express Company money order numbered AK 3215598 in the amount of $10.60 dated November 20, 1939, payable to and owned by VDO Tachometer A. G., and presently in the custody of the Attorney General of the United States, together with any and all rights to demand, enforce and collect the aforesaid debt or other obligation and any and all rights in, to and under said money order,

d. Any and all rights and interests in, to and under a receipt issued by W. J. Conroy for the Chamberlin of the City of New York, said receipt numbered 16555 in the amount of $2,639.81, dated March 7, 1940 and owned by Ernst Toennies and presently in the custody of the Attorney General of the United States,

e. Those certain debts or other obligations evidenced by six (6) bills of exchange, payable at the Amalgamated Bank of New York, dated, in the amounts and payable to the persons listed below:

Amount	Dated	Payee
$102.80	May 25, 1939	Emil Pinkau
$102.80	July 27, 1939	Emil Pinkau G. m. b. H.
$100.00	Sept. 2, 1939	Do.
$104.00	do	Do.
$110.70	Oct. 24, 1939	Do.
$104.00	do	Do.

said bills of exchange owned by Emil Pinkau & Co. and presently in the custody of the Attorney General of the United States, together with any and all accruals to the aforesaid debts or other obligations and any and all rights to demand, enforce and collect the same, and any and all rights in, to and under said bills of exchange.

f. That certain debt or debt or other obligation evidenced by a check drawn on The Hackley Union National Bank, Muskegon, Michigan, said check numbered 34, in the amount of $50.00, dated April 25, 1945, payable to Frau Clara Hager, owned by the persons referred to in subparagraph 6 hereof, and presently in the custody of the Attorney General of the United States, together with any and all rights to demand, enforce and collect the aforesaid debt or other obligation, and any and all rights in, to and under said check,

g. That certain debt or other obligation evidenced by a check, numbered D 39312, in the amount of $10.00, dated May 20, 1940, drawn on the Manufacturers Trust Company, payable to Freida Vainer, said check owned by the persons referred to in subparagraph 6 hereof and

presently in the custody of the Attorney General of the United States together with any and all rights to demand, enforce and collect the aforesaid debt or other obligation, and any and all rights in, to and under said check,

h. Any and all rights and interests in, to and under a Foreign Money Order Receipt, Numbered 5848947 in the amount of $86.25, dated October 19, 1940, payable to Gustel Werz and owned by Walter Werz, and presently in the custody of the Attorney General of the United States,

i. Two (2) shares of $10 par value common stock of General Motors Corporation, a corporation organized under the laws of the State of Delaware, evidenced by certificates numbered WC 131–680 and WC 176–565 for one share each, registered in the name of and owned by Berthold H. Göttschalk, and presently in the custody of the Attorney General of the United States, together with all declared and unpaid dividends thereon, and

j. That certain debt or other obligation evidenced by an American Express Company money order numbered AL 1878273 in the amount of $20.00 dated November 8, 1939 payable to and owned by Gebr. Klingspor, and presently in the custody of the Attorney General of the United States together with any and all rights to demand, enforce and collect the same, and any and all rights in, to and under said money order,

is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, the aforesaid nationals of a designated enemy country (Germany);

and it is hereby determined:

8. That the national interest of the United States requires that the persons referred to in subparagraphs 1, 2, 3 and 6 and named in subparagraphs 4 and 5 hereof, be treated as persons who are and prior to January 1, 1947, were nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 8, 1952.

For the Attorney General.

BETTY ECKERT

In re: Bank account owned by Betty Eckert. F-28-23634-E-1.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That Betty Eckert, whose last known address is Rheinstrasse, Baden Baden, Germany, on or since December 11, 1941, and prior to January 1, 1947, was a resident of Germany and is, and prior to January 1, 1947, was, a national of a designated enemy country (Germany);

2. That the property described as follows: That certain debt or other obligation owing to Betty Eckert, by Central Savings Bank, 2100 Broadway, New York 23, New York, arising out of a savings account, account number 64,161, entitled Betty Eckert, maintained at the aforesaid bank, and any and all rights to demand, enforce and collect the same,

is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or which is evidence of ownership or control by, Betty Eckert, the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That the national interest of the United States requires that the person named in subparagraph 1 hereof be treated as a person who is and prior to January 1, 1947, was a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 10, 1952.

For the Attorney General.

TIENE AND WILLIAM AHRENS

In re: Interest in real property and property insurance policies owned by the

Reference Room

personal representatives, heirs, next of kin, legatees and distributees of Tiene Ahrens, deceased, and William Ahrens, deceased, also known as Wilhelm Ahrens, deceased, also known as Wilhelm Ahrens F–28–31917.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1–40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That the personal representatives, heirs, next of kin, legatees and distributees of Tiene Ahrens, deceased, and of William Ahrens, deceased, also known as Wilhelm Ahrens, who there is reasonable cause to believe on or since December 11, 1941, and prior to January 1, 1947, were residents of Germany, are, and prior to January 1, 1947, were, nationals of a designated enemy country (Germany);

2. That the property described as follows:

a. An undivided one-sixth (1/6th) interest in real property situated in the Borough and County of Middlesex, State of New Jersey, particularly described in Exhibit A, attached hereto and by reference made a part hereof, together with all hereditaments, fixtures, improvements and appurtenances thereto, and any and all claims for rents, refunds, benefits or other payments arising from the ownership of such property, and

b. All right, title and interest of the persons referred to in subparagraph 1 hereof, in and to all insurance policies covering the premises described in the aforesaid Exhibit A, and any and all extensions or renewals thereof,

is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, the persons referred to in subparagraph 1 hereof, the aforesaid nationals of a designated enemy country (Germany);

and it is hereby determined:

3. That the national interest of the United States requires that the persons referred to in subparagraph 1 hereof, be treated as persons who are and prior to January 1, 1947, were nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described in subparagraph 2–a hereof, subject to recorded liens, encumbrances and other rights of record held by or for persons who are not nationals of designated enemy countries, and

There is hereby vested in the Attorney General of the United States the property described in subparagraph 2–b hereof.

All such property so vested to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 10, 1952.

For the Attorney General.

FEDERAL REGISTER

VOLUME 17 NUMBER 139

Washington, Thursday, July 17, 1952

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10374

ENLARGING THE NICOLET AND CHEQUAMEGON NATIONAL FORESTS, WISCONSIN

WHEREAS the United States has acquired through exchange under the authority of Title III of the Bankhead-Jones Farm Tenant Act (50 Stat. 525), as amended (7 U. S. C. 1010–1013), certain lands lying within the present boundaries of the Nicolet National Forest and the Chequamegon National Forest, in Wisconsin; and it is contemplated that the United States will from time to time hereafter acquire through exchange under the said authority additional lands lying within the present boundaries of the said forests; and

WHEREAS the United States has also acquired through exchange under the authority of the said Title III, as amended, or the act of March 1, 1911, 36 Stat. 963, as amended, certain lands adjacent to or in an area adjacent to the said forests; and it is contemplated that the United States will from time to time hereafter acquire through exchange under the said authority additional lands lying within the said area; and

WHEREAS certain of the public lands which were reserved for lighthouse purposes by Executive order of July 21, 1871, and which have been declared surplus to the needs of the Lighthouse Service and transferred to the Department of Agriculture for the use of the Forest Service, are adjacent to the Chequamegon National Forest; and

WHEREAS it appears that the above-described lands are suitable for national-forest purposes and that it would be in the public interest to reserve such lands as parts of the Nicolet National Forest or the Chequamegon National Forest, as hereinafter indicated:

NOW, THEREFORE, by virtue of the authority vested in me by section 24 of the act of March 3, 1891, 26 Stat. 1103 (16 U. S. C. 471), section 1 of the act of June 4, 1897, 30 Stat. 34, 36 (16 U. S. C. 473), and section 11 of the act of March 1, 1911, 36 Stat. 963 (16 U. S. C. 521), and as President of the United States, and upon the recommendation of the Secretary of Agriculture, it is ordered as follows:

SECTION 1. All lands within the present boundaries of the Nicolet and Chequamegon National Forests which have been acquired by the United States through exchange under the authority of Title III of the Bankhead-Jones Farm Tenant Act, as amended, are hereby added to and reserved as parts of the respective national forests within which they are situated; and all such lands hereafter acquired by the United States in the manner and under the authority stated shall likewise be added to and reserved as parts of the said forests immediately upon acquisition of title thereto by the United States.

SEC. 2. The following-described land, which has been acquired by the United States under the authority of the said act of March 1, 1911, as amended, and which is adjacent to the Nicolet National Forest, is hereby added to and reserved as a part of the said forest:

FOURTH PRINCIPAL MERIDIAN

Beginning at the northwest corner of sec. 3, T. 38 N., R. 11 E., thence by metes and bounds:

East, 160 feet, approximately, to the shore line of Laurel Lake.

Southwesterly, along shore line of Laurel Lake to intersection of the west boundary line of sec. 3.

North, along west boundary line of sec. 3, to point of beginning.

The tract described contains approximately 0.75 acre.

SEC. 3. The exterior boundaries of the Chequamegon National Forest are hereby extended to include the following-described area, and all lands within such area which have been acquired by the United States under the authority of Title III of the Bankhead-Jones Farm Tenant Act, as amended, or the said act of March 1, 1911, as amended, are hereby added to and reserved as parts of the Chequamegon National Forest; and all such lands hereafter acquired by the United States under such authority shall likewise be added to and reserved as parts of the said forest immediately upon acquisition of title thereto by the United States:

FOURTH PRINCIPAL MERIDIAN

T. 47 N., R. 6 W.,
Sec. 2, S½;
Sec. 3, S½;
Sec. 4, S½;
Secs. 8 and 17.

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended June 19, 1937.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

REVISED BOOKS

TITLE 32 of the Code of Federal Regulations

Title 32, containing the regulations of the Department of Defense and other related agencies, has been completely revised. Originally a single book, Title 32 is being reissued as two books as follows:

Parts 1–699 ($5.00)
Part 700 to end (to be announced)

These books contain the full text of regulations in effect on December 31, 1951

Order from Superintendent of Documents, Government Printing Office, Washington 25, D. C.

T 48 N., R. 6 W.,
Secs. 12, 13, and 24.

The tract described contains approximately 4.160 acres.

SEC. 4. Except as to the following-described lands and right-of-way, all public lands in fractional section 7, T. 52 N., R. 4 W., and fractional section 12, T. 52 N., R. 5 W., Fourth Principal Meridian, Wisconsin, aggregating approximately 109 acres, which were reserved for lighthouse purposes by Executive order of July 21, 1871, are hereby added to and reserved as parts of the Chequamegon National Forest; and the said Executive order of July 21, 1871, is hereby revoked so far as it affects such lands:

TRACT NO. 1

Beginning at a point on the west shore of Sand Island in lot 1, sec. 12, T. 52 N., R. 5 W., from which a point on the shore line intersected by a line extended due west from the center of old light tower which is attached to a dwelling, bears south 15 feet; thence due east, approximately 530 feet to the east shore line of lot 1; thence northwesterly, westerly and southwesterly along the shore line of lot 1 to point of beginning. This tract contains approximately 1.03 acres.

TRACT NO. 2

Beginning at a point on the west shore of lot 2, sec. 12, T. 52 N., R. 5 W., from which a point on the south boundary of lot 1, sec. 12 is due north approximately 530 feet, and from which the present boathouse bears north 100 feet, thence by metes and bounds:
East 200 feet
North 200 feet
West 340 feet, approximately, to shore line,
Southerly along shore line to point of beginning.
This tract contains approximately 0.902 acre.

RIGHT-OF-WAY

A right-of-way 25 feet in width, connecting Tracts Nos. 1 and 2, described above, the center line of which is described as follows:

Beginning at a point on the north boundary of Tract No. 2, from which the northeast corner of said tract bears east approximately 160 feet; thence on an approximate bearing and distance of N. 1° 30" E., 1320 feet to the south boundary of Tract No. 1.

SEC. 5. All lands to which this order is applicable which have been or may hereafter be acquired under authority of the said Title III of the Bankhead-Jones Farm Tenant Act, as amended, shall be administered under the laws, rules, and regulations applicable to national-forest lands acquired under the said act of March 1, 1911, as amended.

HARRY S. TRUMAN

THE WHITE HOUSE,

EXECUTIVE ORDER 10375

RESTORING LANDS COMPRISING THE ROUND TOP MILITARY RESERVATION AND RIGHTS-OF-WAY THERETO TO THE JURISDICTION OF THE TERRITORY OF HAWAII

WHEREAS certain lands known as Round Top Military Reservation and rights-of-way thereto, located at Honolulu, Island of Oahu, Territory of Hawaii, which form a part of the public lands ceded and transferred to the United States by the Republic of Hawaii under the joint resolution of annexation of July 7, 1898, 30 Stat. 750, were reserved for military purposes of the United States by Executive Order No. 978 of November 24, 1908, as modified by Executive Orders No. 4667 of June 13, 1927, No. 5931 of October 8, 1932, and No. 6948 of January 17, 1935; and

WHEREAS such lands are no longer needed for military purposes, and it is deemed advisable and in the public interest that they be restored to the use of the Territory of Hawaii:

NOW, THEREFORE, by virtue of the authority vested in me by section 91 of the act of April 30, 1900, 31 Stat. 159, as amended by section 7 of the act of May 27, 1910, 36 Stat. 447, it is ordered as follows:

The following-described tract of land comprising the Round Top Military Reservation and the rights-of-way thereto, located on the Island of Oahu, Territory of Hawaii, are hereby restored to the jurisdiction of the Territory of Hawaii:

1. Beginning at a monument No. 1 which is a concrete post with a brass plate set in top from which the azimuth (measured clockwise from true south) and distance to Ualakaa Triangulation Station is 41° 33' 30" 99.90 feet thence running by true azimuths and distances as follows:
323° 58' 20" 179.80 feet to a concrete monument No. 8;
44° 32' 00" 294.94 feet to a concrete monument No. 7;
53° 32' 00" 157.63 feet to a concrete monument No. 6;
74° 10' 00" 87.26 feet to a concrete monument No. 5;
149° 51' 00" 225.12 feet to a concrete monument No. 4;
194° 36' 30" 148.92 feet to a concrete monument No. 3;
211° 00' 30" 133.30 feet to a concrete monument No. 2;
266° 23' 30" 319.38 feet to the point of beginning, containing an area of 3.68 acres, more or less.

2. *Right of Way to Tantalus Road:* Beginning at a concrete monument No. 5 of the Round Top Military Reservation boundary from which the azimuth and distance to U. S. C. & G. Triangulation Station Punchbowl is 89° 35' 48.3" 2662.12 feet thence running by true azimuths and distances as follows:
17° 07' 20" 453.23 feet to a concrete monument No. 3;
17° 07' 20" 288.00 feet to a concrete monument No. 2c;
57° 11' 20" 7.32 feet to a concrete monument No. 2b;
60° 11' 00" 22.39 feet to a concrete monument No. 2a;
197° 07' 20" 301.20 feet to a concrete monument No. 2;
197° 07' 20" 480.49 feet to a concrete monument No. 1;
339° 51' 00" 27.21 feet to the point of beginning, containing an area of 0.355 acre, more or less.

3. *Right of Way to Sugar Loaf Military Reservation:* This right of way is a strip of land 10 feet wide extending from Round Top Military Reservation to Sugar Loaf Military Reservation, extending 5 feet on each side of the center line which is described as follows:

Beginning at monument No. 1 of Round Top Military Reservation, which is a concrete post with a brass plate set in top, from which the true azimuth (measured clockwise from true south) and distance to U. S. Coast and Geodetic Survey triangulation station "Ualakaa" is 41° 33' 30", 99.90 feet, as shown on Government Survey Registered Map 2338; thence from said initial point by true azimuths and distances as follows:
236° 11' 846.1 feet to a pipe on top of Round Top Ridge;
198° 19' 30" 1,152.5 feet to a pipe marking the end of course No. 1 of the Round Top Forest Reserve near turn in Tantalus Heights Road;
211° 50' 1,016.7 feet to monument No. 7, marking the end of course No. 5 of the Sugar Loaf Military Reservation, from which the true azimuth and distance to Territorial

Survey triangulation station "Kakea" is 208° 10' 261.9 feet, containing an area of 0.69 acre, more or less.

4. *Right of Way to Awapuhi Street:* This right of way is 10 feet wide extending from Round Top Military Reservation to Awapuhi Street, Manoa. The center line of this right of way is described as follows:

Beginning at a point (not marked) on the boundary of Round Top Military Reservation between the monuments Nos. 7 and 8, from which the azimuth and distance to a concrete monument No. 8 of Round Top Military Reservation is 224° 32' 00" 5.29 feet, thence running by true azimuth and distance 295° 11' 30" 1429.80 feet, to a point (not marked) located in the center of north terminus of Awapuhi Street, containing an area of 0.328 acre, more or less.

HARRY S. TRUMAN

THE WHITE HOUSE,
July 15, 1952.

[F. R. Doc. 52-7924; Filed, July 15, 1952; 4:28 p. m.]

RULES AND REGULATIONS

TITLE 6—AGRICULTURAL CREDIT

Chapter I—Farm Credit Administration, Department of Agriculture

Subchapter C—Regulations Issued by the Federal Land Banks

PART 23—FEDERAL LAND BANK OF COLUMBIA

FEES

1. Section 23.2 of Title 6, Code of Federal Regulations, is revoked.

2. Section 23.5 of Title 6, Code of Federal Regulations, is amended to read as follows:

§ 23.5 *Release of personal liability fees.* The following fees shall be charged in connection with applications for release of personal liability if an appraisal is made in connection therewith:

Federal Land Bank Loan	$10.00
Land Bank Commissioner Loan	10.00
Joint Federal Land Bank and Land Bank Commissioner Loan	10.00

3. Section 23.7 of Title 6, Code of Federal Regulations, is revoked.

(Sec. 13 "Ninth," 39 Stat. 372, sec. 26, 48 Stat. 44, sec. 32, 49 Stat. 48, as amended; 12 U. S. C. and Supp. 781 "Ninth," 723, 1016) [6 CFR 19.322 and 19.326, Res. Bd. Dir. June 19, 1952]

THE FEDERAL LAND BANK OF COLUMBIA,
[SEAL] JULIAN H. SCARBOROUGH,
President.

[F. R. Doc. 52-7855; Filed, July 16, 1952; 8:53 a. m.]

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supp. 15]

PART 60—AIR TRAFFIC RULES

CERTIFICATES OF WAIVER ISSUED FOR AIR SHOWS

1. Section 60.1-1 (b) provides that "no certificate of waiver will be issued for any 'air race', 'air meet', or similar aeronautical demonstration which includes • • • acrobatics not under direct radio control provided by the holder of the certificate of waiver." This supplement modifies the foregoing policy by permitting the use of means other than radio in the control of acrobatics. The Administrator intends to provide positive control of acrobatics and yet not limit the control to radio methods and thereby exclude ground signals and other methods.

2. Section 60.1-1 (b), published on September 27, 1951, in 16 F. R. 9802, is hereby amended by deleting the word "radio".

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective August 15, 1952.

[SEAL] F. B. LEE,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52-7825; Filed, July 16, 1952; 8:45 a. m.]

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53044]

PART 2—MEASUREMENT OF VESSELS

LIBERIAN ADMEASUREMENT RULES

The Government of the Republic of Liberia has advised the Government of the United States that the admeasurement rules set forth in part 2, Customs Regulations of 1943 (19 CFR Part 2), have been adopted as the standard for the measurement of vessels under the Liberian flag. Accordingly, the first sentence of § 2.63, Customs Regulations of 1943 (19 CFR 2.63), is amended by the insertion of "Liberia" immediately after "Latvia" and preceding "the Netherlands."

(R. S. 161, 4154, as amended, sec. 3, 23 Stat. 119; 5 U. S. C. 22, 46 U. S. C. 3, 81. Sec. 102, Reorg. Plan No. 3 of 1946; 3 CFR 1946 Supp., ch. IV; Reorg. Plan No. 26 of 1950; 3 CFR 1950 Supp., ch. III)

[SEAL] D. B. STRUBINGER,
Acting Commissioner of Customs.

Approved: July 11, 1952.

E. H. FOLEY,
Acting Secretary of the Treasury.

[F. R. Doc. 52-7867; Filed, July 16, 1952; 8:56 a. m.]

TITLE 46—SHIPPING

Chapter I—Coast Guard, Department of the Treasury

Subchapter N—Explosives or Other Dangerous Articles or Substances and Combustible Liquids on Board Vessels

[CGFR 52-8]

PART 146—TRANSPORTATION OR STORAGE OF EXPLOSIVES OR OTHER DANGEROUS ARTICLES OR SUBSTANCES, AND COMBUSTIBLE LIQUIDS ON BOARD VESSELS

PART 147—REGULATIONS GOVERNING USE OF DANGEROUS ARTICLES AS SHIPS' STORES AND SUPPLIES ON BOARD VESSELS

MISCELLANEOUS AMENDMENTS

A notice regarding proposed changes in the regulations governing the transportation of explosives, compressed gases, and poisonous articles was published in the FEDERAL REGISTER, dated August 16, 1951, 16 F. R. 8136-8139, as Items X, XI, and XII, on the agenda to be considered by the Merchant Marine Council and a public hearing was held by the Merchant Marine Council on September 18, 1951, in Washington, D. C. All the comments submitted were considered and where practicable were incorporated into the regulations.

The purpose of the amendments to 46 CFR 146.01-4, 146.02-8, 146.02-13 to 146.02-16, inclusive, 146.05-15, 146.05-17, 146.20-1 to 146.20-300, inclusive, 146.24-1 to 146.24-100, inclusive, 146.25-1 to 146.25-400, inclusive, 146.28-1, 146.28-2, 146.28-22, 146.29-1, 146.29-3, 146.29-6, 146.29-23, and 146.29-100, is to revise and bring up to date the requirements governing the transportation of explosives, compressed gases, and poisonous articles. This revision permits a number of new explosives, new hazardous articles in the form of compressed gases, and new poisonous articles, all of which have become commercially important, to be shipped by water in increasing quantities. The new requirements also allow the use of a number of new containers when transporting certain commodities by water. All the changes in requirements are in agreement with the Interstate Commerce Commission's regulations insofar as it is practicable for water transportation. Because they have served their purpose, 46 CFR 146.28-3, 146.28-5, 146.28-9 to 146.28-12, inclusive, 146.28-16, 146.28-18, and 146.28-19 are canceled.

The purpose of the amendment to 46 CFR 147.05-100, regarding *Table S—Classification: Ships' stores and supplies of a dangerous nature*, is editorial in nature and revises the requirements governing transportation of ships' signal and emergency equipment to agree with changes made in lifesaving appliances now required on board merchant vessels, which were considered at previous public hearings held by the Merchant Marine Council. The descriptive terminology has been changed to agree with terms now used in other regulations in 46 CFR Parts 33, 59, 60, 76, 94, and 113, as well as by industry.

It is hereby found necessary in the interests of National Defense to continue in effect certain temporary

amendments to regulations in 46 CFR 146.28-1, 146.28-2, 146.28-6, to 146.28-8, inclusive, 146.28-13 to 146.28-15, inclusive, 146.28-17, and 146.28-20 to 146.28-22, inclusive, for the duration of the National Emergency proclaimed by the President on December 16, 1950 (Proc. 2914, 3 CFR 1950 Supp.). These regulations are supplementary and amendatory to the regulations in 46 CFR Part 146.

The requirements in 46 CFR 146.20-1 to 146.20-300, inclusive, regarding transportation of explosives, have been completely revised and brought up to date by this document and follow the requirements of the Interstate Commerce Commission insofar as it is practicable for water transportation. Many of these requirements do not provide the safety necessary for the bulk transportation of military explosives and, therefore, the special requirements in 46 CFR 146.29-1 to 146.29-100, inclusive, as amended, are hereby found necessary in the interests of National Defense to be continued in effect. These regulations will apply to the transportation of military explosives during the National Emergency proclaimed by the President on December 16, 1950 (Proc. 2914, 3 CFR 1950 Supp.), or during a war in which the United States may be engaged, or during any other National Emergency proclaimed by the President.

The detailed regulations governing the transportation of explosives, compressed gases, and poisonous articles have been completely revised and the sections renumbered to allow for future expansion, if necessary. For convenience a table showing the old section number and the new section number assigned is printed below and the asterisk before a section number indicates that section has been revised or added:

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), to promulgate regulations in accordance with the statutes cited with the regulations below, the following amendments to the regulations are prescribed which shall become effective 90 days after date of publication of this document in the FEDERAL REGISTER:

SUBPART—PREFACE

1. Section 146.01-4 is amended to read as follows:

§ 146.01-4 *Classifications.* Explosives or other dangerous articles or substances, and combustible liquids are classified in the regulations in this part according to their principal characteristics and properties as follows:

Explosives:
- Class A—Dangerous explosives.
- Class B—Less dangerous explosives.
- Class C—Relatively safe explosives.

Inflammable liquids.
Inflammable solids and oxidizing materials.
Corrosive liquids.
Compressed gases.
Poisons:
- Extremely dangerous poison, Class A.
- Less dangerous poison, Class B.
- Tear gases or irritating substances, Class C.

Radioactive materials, Class D.
Combustible liquids.
Hazardous articles.

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C. App. 1275)

SUBPART—GENERAL REGULATIONS

2. Section 146.02-8 is amended to read as follows:

§ 146.02-8 *U. S. Government shipments.* (a) Shipments of explosives or other dangerous articles or substances offered by or consigned to the Departments of the Army, Navy, or Air Force of the United States Government shall be packed, including limitations of weight, in accordance with the Interstate Commerce Commission regulations for the transportation of explosives or other dangerous articles in effect at the time of shipment, or in containers of equal or greater strength and efficiency as required by the regulations of these Departments.

(b) Shipments of radioactive materials, made by the Atomic Energy Commission, or under its direction or supervision, which are escorted by personnel specially designated by the Atomic Energy Commission, are exempt from the regulations in this part.

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C. App. 1275)

3. Section 146.02-13 is amended to read as follows:

§ 146.02-13 *Report fires.* (a) The master of any ocean-going vessel having on board explosives or other dangerous articles or substances as cargo and about to enter a port of the United States shall make or cause to be made an inspection immediately prior to entering such port. If the inspection discloses the presence of fire or any other hazardous condition, such condition shall immediately be reported to the District Commander of the United States Coast Guard or his authorized representative having supervision over the port or place to which the vessel is bound and the master or person in charge of such vessel shall comply with the instructions given by the District Commander or his authorized representative as to the procedure to be followed in entering the port or place.

(b) In the event of wreck, fire, or other disaster involving radioactive materials, other than low activity ores, or that part of a vessel where radioactive material, other than low activity ores, is stowed, safety precautions shall be observed in accordance with §§ 146.25-1 to 146.25-400, inclusive, pertaining to the care following leakage or sifting of radioactive materials.

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C. App. 1275)

4. Section 146.02-14 is amended to read as follows:

§ 146.02-14 *Damaged containers.* (a) Any outside container that is suffi-

ciently damaged as to permit the escape of the contents therein, or shows marks of having leaked, or the securing means give evidence of failure to properly contain the package, shall not be accepted on board any vessel for transportation or stowage, nor shall such damaged containers be on board any vessel entering the navigable waters of the United States except in accordance with the provisions of § 146.02–15.

(b) Any damaged outside containers, as described in paragraph (a) of this section, except those containing radioactive materials, other than low activity ores, when restored or repaired to the satisfaction of the owner or master of the vessel may be accepted. Special attention shall be given to containers of substances that are required by the regulations to be shipped "wet" to be certain that any escaped liquid is replaced before the restored container is accepted.

(c) Damaged, leaking or insecure outside containers in which radioactive materials, other than low activity ores, are packed shall be handled in accordance with the safety precautions set forth in §§ 146.25–1 to 146.25–400, inclusive, pertaining to the care following leakage or sifting of radioactive materials. This provision shall be complied with by all vessels to which the regulations in this part apply when upon the navigable waters of the United States.

(d) Damaged, leaking or insecure outside containers which it is not feasible to restore shall be refused and promptly reported by the owner or master of the vessel to the nearest District Commander of the United States Coast Guard or his authorized representative. This provision shall be complied with by all vessels to which the regulations in this part apply when upon the navigable waters of the United States.

(e) Containers of a particular type that frequently show damage, leakage or other failure shall also be reported to the District Commander of the United States Coast Guard or his authorized representative for the district in which the cargo was laden. Such information as will assist in correcting faults of such containers should be included in this report.

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C. App. 1275)

5. Sections 146.02–15 and 146.02–16 are amended to read as follows:

§ 146.02–15 *Emergency shipments.* (a) In event of a casualty occurring to or on board a vessel involving explosives or other dangerous articles or substances on board the vessel as cargo, the master or person in charge of the vessel is authorized to adopt such procedure as will, in his judgment, provide a maximum safety to the vessel, its passengers and crew. When such a casualty results in damaged containers or the emergency use of unauthorized containers, such containers upon arrival at a port shall not be offered to any forwarding carrier for transportation. The vessel, owner, agent, charterer, master or other person in charge of the vessel shall report immediately to the nearest District Commander of the United States Coast Guard or his authorized representative and request instructions as to disposition of the damaged or unauthorized containers.

(b) Explosives or other dangerous articles or substances found on board a vessel in an unsafe condition may be disposed of by jettisoning or otherwise destroyed or rendered innocuous or may be continued in transportation to the nearest port whichever course may, in the judgment of the master or person in charge, provide maximum safety to the vessel, its passengers and crew. If such substance is brought into port, delivery shall not be made to the consignee or any forwarding carrier and a report shall immediately be made to the nearest District Commander of the United States Coast Guard or his authorized representative with a request for instructions as to disposition of the substance. A report shall likewise be made covering the disposition by jettisoning or otherwise of dangerous substances.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, when radioactive materials, other than low activity ores, are involved, the safety precautions set forth in §§ 146.25–1 to 146.25–400, inclusive, pertaining to the care following leakage or sifting of radioactive materials shall be followed whenever practicable.

§ 146.02–16 *Shipments in violation.* (a) Shipments of explosives or other dangerous articles or substances found by a vessel's owner, agent, charterer, master, or person in charge to have been tendered or delivered for transportation on board a vessel under a false or deceptive descriptive name, marking, invoice, shipping paper or other declaration, or without the shipper furnishing information in writing of the true character thereof at or before the time of delivery, shall be refused transportation and the District Commander of the United States Coast Guard or his authorized representative, for the district in which such cargo was offered shall promptly be notified, in writing, of all the facts in connection with such violation.

(b) When any such shipments are found in transit the master of the vessel is authorized to adopt such procedure as will in his judgment provide maximum safety to the vessel, its passengers and crew. If brought into port, delivery shall not be made to the consignee or any forwarding carrier and a report shall immediately be made to the nearest District Commander of the United States Coast Guard or his authorized representative, with a request for instructions as to disposition of the shipment.

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C. App. 1275)

SUBPART—SHIPPER'S REQUIREMENTS RE: PACKING, MARKING, LABELING AND SHIPPING PAPERS

6. Section 146.05–15 is amended by changing paragraph (d) (5) and paragraph (g) to read as follows:

§ 146.05–15 *Marking and labeling applying to domestic shipments only.*

* * *

(d) * * *

(5) Each outside container of samples of explosives when offered for transportation on board vessels shall bear the "red label for samples of explosives" and each outside container of special fireworks in addition to the markings prescribed shall bear the "red label for special fireworks", as described and illustrated in § 146.05–17 (t) and (s).

* * * * *

(g) Each package containing "Any Other Dangerous Article" as defined by the regulations in this part shall be conspicuously labeled by the shipper as follows except as otherwise provided:

(1) "Red label" as described and illustrated in § 146.05–17 (f) on containers of inflammable liquids, except when exempted by the regulations in this part.

(2) "Yellow label" as described and illustrated in § 146.05–17 (g) on containers of inflammable solids and oxidizing materials, except when exempted by the regulations in this part.

(3) "White label" as described and illustrated in § 146.05–17 (h) on containers of acids, except when exempted by the regulations in this part.

(4) "White label" as described and illustrated in § 146.05–17 (j) on containers of corrosive liquids, except when exempted by the regulations in this part.

(5) "White label" as described and illustrated in § 146.05–17 (k) on containers of alkaline caustic liquids, except when exempted by the regulations in this part.

(6) "Red label" as described and illustrated in § 146.05–17 (l) on containers of inflammable compressed gases, except when exempted by the regulations in this part.

(7) "Green label" as described and illustrated in § 146.05–17 (m) on containers of nonflammable compressed gases, except when exempted by the regulations in this part.

(8) "Poison gas label" as described and illustrated in § 146.05–17 (n) on containers of class A poisons.

(9) "Poison label" as described and illustrated in § 146.05–17 (o) on containers of class B poison liquids, or solids, except when exempted by the regulations in this part.

(10) "Tear gas label" as described and illustrated in § 146.05–17 (p) on containers of class C poisons.

(11) "Radioactive materials label" as described and illustrated in § 146.05–17 (q) on containers of group I and group II radioactive materials.

(12) "Radioactive materials label" as described and illustrated in § 146.05–17 (r) on containers of group III radioactive materials.

(13) "Empty label" as described and illustrated in § 146.05–17 (u) shall be applied to empty containers when such application is required by the regulations in this part.

(14) "Bung label" as described and illustrated in § 146.05–17 (v) on metal barrels or drums containing inflammable liquids with vapor pressure exceeding 16 pounds per square inch, absolute.

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C. App. 1275)

7. Section 146.05–17 is amended to read as follows:

§ 146.05–17 *Labels.* (a) Shippers shall furnish and attach the labels prescribed for their packages.

(b) Labels shall not be applied to packages containing articles which are not subject to the regulations in this part.

(c) Shippers shall not apply labels which by their size, shape and color, may readily be confused with standard caution labels prescribed in this part.

(d) Labels shall conform to standard as required by the Interstate Commerce Commission regulations.

(e) A combination diamond-shaped label-tag of proper size and color, bearing on one side the shipping information and on the reverse side the wording prescribed in this section will be permitted.

(f) Red label for inflammable liquids.

(Reduced size)

(Black printing on red)

(g) Yellow label for inflammable solids and oxidizing materials.

(Reduced size)

(Black printing on yellow)

(h) White label for acids.

(Reduced size)

(Black printing on white)

(j) White label for corrosive liquids.

(Reduced size)

(Black printing on white)

(k) White label for alkaline caustic liquids.

(Reduced size)

(Black printing on white)

(l) Red label for inflammable gases.

(Reduced size)

(Black printing on red)

(m) Green label for nonflammable gases.

(Reduced size)

(Black printing on green)

(n) Poison gas label.

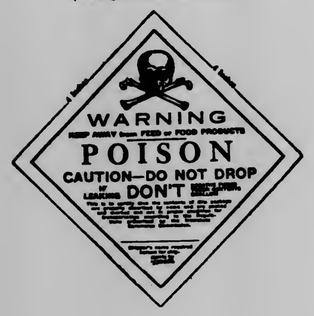
(Reduced size)

(Red printing on white)

(o) Poison label.

(Reduced size)

(Red printing on white)



(p) Tear gas label.

(Reduced size)

(Red printing on white)

(q) Radioactive materials, Group I or II.

(Reduced size)

(Red printing on white)

(r) Radioactive materials, Group III.

(Reduced size)

(Blue printing on white)

(s) Red label for special fireworks.

(Reduced size)

(Black printing on red)

(t) Red label for samples of explosives.

(Reduced size)

(Black printing on red)

(u) Empty label (white) for empty containers.

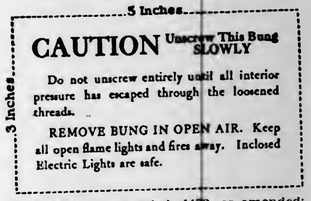
(Reduced size)

(Black printing on white)

(v) Bung label.

(Reduced size)

(Black printing on white)



(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C. App. 1275)

8. Sections 146.20–1 to 146.20–300, inclusive, are amended to read as follows:

SUBPART—DETAILED REGULATIONS GOVERNING EXPLOSIVES

Sec.
146.20–1 An explosive.
146.20–3 Prohibited or not permitted explosives.
146.20–5 Acceptable explosives.
146.20–7 Class A explosives.
146.20–9 Class B explosives.
146.20–11 Class C explosives.
146.20–13 Samples of explosives and explosive articles for laboratory and examination purposes.
146.20–15 Stowage of explosives.
146.20–17 Stowage of explosives in holds containing coal.
146.20–19 On deck stowage of explosives.
146.20–21 Stowage of fireworks.
146.20–23 Stowage of explosives in magazines adjacent to other dangerous articles.
146.20–25 Stowage of explosives and non-dangerous cargo.
146.20–27 Stowage and dunnaging of containers of explosives.
146.20–29 Preparation of magazines, decks, hatches and holds before handling explosives.
146.20–31 Loading and unloading explosives.
146.20–33 Constructing of magazines.
146.20–35 Handling explosives.
146.20–37 Cargo working equipment.

Sec.
146.20–39 Installation of loading chute.
146.20–41 Lights, tools and equipment.
146.20–43 Fires.
146.20–45 Smoking.
146.20–47 Liquor or drugs.
146.20–49 Damaged or leaking containers of explosives.
146.20–51 Containers found damaged or leaking on board vessels.
146.20–53 Magazine vessels storing explosives.
146.20–55 Lighting in stowage compartments.
146.20–57 Handling explosives; magazine vessels.
146.20–59 Living quarters on magazine vessels.
146.20–61 Lamp box on magazine vessels.
146.20–63 Storage of other dangerous articles.
146.20–65 Magazine vessels' stores.
146.20–67 Matches.
146.20–69 Firearms.
146.20–71 Fire extinguishing equipment.
146.20–73 Supervision of magazine vessels.
146.20–75 Unauthorized persons on magazine vessels.
146.20–77 Repacking of explosives on board magazine vessels.
146.20–79 Work boat.
146.20–81 Life preservers.
146.20–83 Fenders.
146.20–85 Authorization to load or discharge explosives.
146.20–87 Permits for Class A explosives.
146.20–90 Stowage and storage chart of explosives and other dangerous articles.
146.20–100 Table A—Classification: Class A; dangerous explosives.
146.20–200 Table B—Classification: Class B; less dangerous explosives.
146.20–300 Table C—Classification: Class C; relatively safe explosives.

AUTHORITY: §§ 146.20–1 to 146.20–300 issued under R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C. 1275.

SUBPART—DETAILED REGULATIONS GOVERNING EXPLOSIVES

§ 146.20–1 *An explosive.* For the purpose of the regulations in this subchapter an explosive is defined as any chemical compound, mixture, or device, the primary or common purpose of which is to function by explosion, i. e., with substantially instantaneous release of gas and heat, unless such compound, mixture, or device is otherwise specifically classified in the regulations in this part.

§ 146.20–3 *Prohibited or not permitted explosives.* The offering of the following explosives for transportation, carriage, conveyance, storage, stowage, or use on board vessels is forbidden:

(a) Fulminates or other detonating compounds in bulk in dry condition.

(b) Explosive compositions that ignite spontaneously or undergo marked decomposition when subjected for 48 consecutive hours to a temperature of 75° C. (167° F.).

(c) Explosives containing an ammonium salt and a chlorate.

(d) Liquid nitroglycerin, diethylene glycol dinitrate, or other liquid explosives not authorized by the Commandant of the Coast Guard.

(e) Explosives condemned by the Bureau of Explosives (except properly packed samples for laboratory examinations). Appeal may be made to the Interstate Commerce Commission from such condemnations.

(f) Leaking or damaged packages of explosives.

(g) Condemned or leaking dynamite shall not be repacked and offered for shipment unless the repacking is done by a competent person in the presence of, or with the written consent of, an inspector, or with the written authority of the chief inspector of the Bureau of Explosives.

(h) Firecrackers, flash crackers or salutes, the explosive contents of which exceed 12 grains each in weight.

(i) Fireworks that combine an explosive and a detonator or blasting cap.

(j) Fireworks containing an ammonium salt and a chlorate.

(k) Fireworks containing yellow or white phosphorus.

(l) Fireworks or fireworks compositions that ignite spontaneously or undergo marked decomposition when subjected for 48 consecutive hours to a temperature of 75° C. (167° F.).

(m) Fireworks, properly condemned by the Bureau of Explosives, except properly repacked samples for laboratory examinations.

(n) Toy torpedoes, the maximum outside dimension of which exceeds ⅞ inch, or toy torpedoes containing a mixture of potassium chlorate, black antimony and sulfur with an average weight of explosive composition in each torpedo exceeding 4 grains.

(o) Toy torpedoes containing a cap composed of a mixture of red phosphorus and potassium chlorate exceeding an average of one-half (0.5) grain per cap.

(p) Fireworks containing copper sulfate and a chlorate.

§ 146.20–5 *Acceptable explosives.* (a) Acceptable explosives are divided by the Interstate Commerce Commission regulations into three classes according to degree of hazard in transportation, as follows:

Class A explosives, detonating or otherwise of maximum hazard.
Class B explosives, inflammable hazard.
Class C explosives, minimum hazard.

(b) Acceptable explosives are defined by the Interstate Commerce Commission regulations as set forth in this subpart, and such definitions are binding upon all shippers making shipments of any explosives by common carrier vessels engaged in interstate or foreign commerce by water. Such definitions are accepted and adopted and form part of the regulations in this subchapter applying to all shippers making shipments of explosives by any vessel and shall apply to the owners, charterers, agents, masters or persons in charge of vessels and to other persons transporting, carrying, conveying, storing, stowing or using explosives on board any vessel.

§ 146.20–7 *Class A explosives.* Class A explosives are defined as:

(a) *Type 1.* Solid explosives which can be caused to deflagrate by contact with sparks or flame such as produced by safety fuse or an electric squib, but cannot be detonated[1] by means of a No. 8 test blasting cap.[2] Examples: Black powder, low explosives, and certain types of propellant explosives.

(b) *Type 2.* Solid explosives which contain a liquid explosive ingredient, and which, when unconfined,[3] can be detonated by means of a No. 8 test blasting cap;[2] or which can be exploded in at least 50 percent of the trials in the Bureau of Explosives' Impact Apparatus[4] under a drop of 4 inches or more, but cannot be exploded in more than 50 percent of the trials under a drop of less than 4 inches. Examples: Commercial dynamite containing a liquid explosive ingredient and certain types of propellant explosives.

(c) *Type 3.* Solid explosives which contain no liquid explosive ingredient and which can be detonated, when unconfined,[3] by means of a No. 8 test blasting cap;[2] or which can be exploded in at least 50 percent of the trials in the Bureau of Explosives' Impact Apparatus[4] under a drop of 4 inches or more, but cannot be exploded in more than 50 percent of the trials under a drop of less than 4 inches. Examples: Commercial dynamite containing no liquid explosive ingredient, trinitrotoluene, amatol, tetryl, picric acid, urea nitrate, pentolite and commercial boosters.

(d) *Type 4.* Solid explosives which can be caused to detonate, when unconfined,[3] by contact with sparks or flame such as produced by safety fuse or an electric squib; or which can be exploded in the Bureau of Explosives' Impact Apparatus[4] in more than 50 percent of the trials under a drop of less than 4 inches. Examples: Initiating and priming explosives, lead azide, fulminate of mercury, etc.

(e) *Type 5.* Desensitized liquid explosives are explosives which may be detonated separately, or when absorbed in sterile absorbent cotton, by a No. 8 test blasing cap;[2] but which cannot be exploded in the Bureau of Explosives' Impact Apparatus[4] by a drop of less than 10 inches. The desensitizer must not be significantly more volatile than nitroglycerin and the desensitized explosive must not freeze at temperatures above minus 10° F. Example: Desensitized nitroglycerin.

(f) *Type 6.* Liquid explosives that can be exploded in the Bureau of Explosives' Impact Apparatus[4] under a drop of less

[1] The detonation test is performed by placing the sample in an open-end fiber tube which is set on the end of a lead block approximately 1½ inches in diameter and 4 inches high which, in turn, is placed on a solid base. A steel plate may be placed between the fiber tube and the lead block.

[2] A No. 8 test blasting cap is one containing 2 grams of a mixture of 80 percent mercury fulminate and 20 percent potassium chlorate, or a cap of equivalent strength.

[3] "Unconfined" as used in this section does not exclude the use of a paper or soft fiber tube wrapping to facilitate tests.

[4] The Bureau of Explosives impact apparatus is a testing device designed so that a guided 8-pound weight may be dropped from predetermined heights so as to impact specific quantities of liquid or solid materials under fixed conditions. Detailed prints may be obtained from the Bureau of Explosives, 30 Vesey Street, New York 7, N. Y.

UNIVERSITY OF MICHIGAN LIBRARIES

than 10 inches. Example: Nitroglycerin. See "Prohibited or not permitted explosives" in § 146.20–3.

(g) *Type 7.* (1) Blasting caps[5] are small tubes, usually made of an alloy of either copper or aluminum, closed at one end and loaded with a charge of initiating or priming explosives, class A—Type 4, either with or without other suitable explosives. The total weight of explosives per unit shall not exceed 150 grains. Blasting caps[5] which have been provided with a means for firing by an electric current, and sealed, are known as electric blasting caps.

(2) Detonating primers are devices for commercial use which contain a detonator and an additional charge of explosive, all assembled in a suitable envelope. The total weight of explosives is more than 150 grains per unit.

(3) Detonating fuzes are used in the military service to detonate the high explosive bursting charges of projectiles, mines, bombs, torpedoes, and grenades. In addition to a powerful detonator, they may contain several ounces of a high explosive, such as tetryl or dry nitrocellulose, all assembled in a heavy steel envelope.

(h) *Type 8.* (1) Any solid or liquid compound, mixture or device which is not specifically included in any of the above types, and which under special conditions may be so designated and approved by the Bureau of Explosives. Example: Shaped charge, commercial.

(2) A shaped charge, commercial, consists of a plastic, paper, or other suitable container comprising a charge of not to exceed 8 ounces of a high explosive containing no liquid explosive ingredient and with a hollowed out portion (cavity) lined with a rigid material. This device shall not contain a detonator.

(i) *Ammunition for cannon.* Ammunition for cannon is fixed, semifixed, or separate loading ammunition which is fired from a cannon, mortar, gun, howitzer or recoilless rifle.

(j) *Ammunition for cannon with projectiles.* Ammunition for cannon with explosive projectiles, gas projectiles, smoke projectiles, incendiary projectiles, illuminating projectiles, or shell, is fixed ammunition assembled in a unit consisting of the cartridge case containing the propelling charge and primer, and the projectiles, or shell, fuzed or unfuzed. Detonating fuzes, tracer fuzes, explosive or ignition devices, or fuze parts with explosives contained therein must not be assembled in ammunition or included in the same outside package unless shipped by, for, or to the Departments of the Army, Navy, or Air Force of the United States Government or unless of a type approved by the Bureau of Explosives.

(k) *Explosive projectiles.* Explosive projectiles are shells or projectiles loaded with explosives or bursting charges, with or without other materials, for use in cannon, guns, or mortars.

(l) *Grenades.* Grenades, hand or rifle, are small metal or other containers designed to be thrown by hand or projected from a rifle. They are filled with an explosive or a liquid, gas or solid material such as a toxic or tear gas or an incendiary or smoke producing material and a bursting charge. When shipped without explosives or bursting charges, see "Chemical ammunition, class A or B poisons," as set forth in §§ 146.25–100 and 146.25–200. For tear gas grenades see § 146.25–300.

(m) *Explosive bombs.* Explosive bombs are metal or other containers filled with explosives. They are used in warfare and include aeroplane bombs and depth bombs.

(n) *Explosive mines.* Explosive mines are metal containers filled with a high explosive.

(o) *Explosive torpedoes.* Explosive torpedoes, such as are used in warfare, are metal devices containing a means of propulsion and a quantity of high explosives.

(p) *Rocket ammunition.* Rocket ammunition is fixed ammunition which is fired from a tube, launcher, rails, trough, or other device as distinguished from cannon ammunition which is fired from a cannon, gun, or mortar. It consists of an igniter and propelling charge, commonly described as a motor, and explosive projectile, gas projectile, smoke projectile, incendiary projectile, or illuminating projectile, fuzed or unfuzed.

(q) *Ammunition for small arms with explosive bullets or explosive projectiles.* Ammunition for small arms with explosive bullets or ammunition for small arms with explosive projectiles is fixed ammunition to be used in machine guns or similar fire arms and consists of a metallic cartridge case, the primer and the propelling charge, with explosive bullet or explosive projectile with or without detonating fuze, the component parts necessary for one firing being all in one assembly. Detonating fuzes, tracer fuzes, explosive or ignition devices or fuze parts with explosives contained therein must not be assembled in ammunition or included in the same outside package unless shipped by, for, or to the Departments of the Army, Navy, or Air Force of the United States Government or unless of a type approved by the Bureau of Explosives.

(r) *Chemical ammunition.* Chemical ammunition used in warfare is all kind of explosive chemical projectiles, shells, bombs, grenades, etc., loaded with toxic, tear, or other gas, smoke or incendiary agent; also such miscellaneous apparatus as cloud-gas cylinders, smoke generators, etc., that may be utilized to project chemicals.

(s) *Boosters.* Boosters consist of a casing containing a high explosive and are used to increase the intensity of explosion of the detonator of a detonating fuze.

(t) *Jet thrust units (jato), Class A.* Jet thrust units (jato), Class A, are metal cylinders containing a mixture of chemicals capable of burning rapidly and producing considerable pressure. Under certain conditions the chemical fuel with which the unit is loaded may explode. Jet thrust units are designed to be ignited by an electric igniter. They are used to assist aeroplanes to take off.

§ 146.20–9 *Class B explosives.* Class B explosives are defined as those explosives which in general function by rapid combustion rather than detonation and include some explosive devices such as special fireworks, flash powders, some pyrotechnic signal devices and solid propellant explosives which include some smokeless powders. These explosives are further specifically described as:

(a) Ammunition for cannon with empty projectiles, inert-loaded projectiles, solid projectiles or without projectiles, or shell, is fixed ammunition assembled in a unit consisting of a cartridge case containing the propelling charge and primer with empty, inert-loaded, or solid projectiles, or without projectiles, which is fired from a cannon, mortar, gun, howitzer or recoilless rifle.

(b) Rocket ammunition is fixed ammunition which is fired from a tube, launcher, rails, trough, or other device as distinguished from cannon ammunition which is fired from a cannon, gun, or mortar. It consists of an igniter and propelling charge, commonly described as a motor, and empty projectile, inert-loaded projectile or solid projectile, or without projectiles.

(c) Special fireworks are manufactured articles designed primarily for the purpose of producing visible or audible pyrotechnic effects by combustion or explosion. (See Class C explosives for "fireworks, common.") Examples of special fireworks are: toy torpedoes, railway torpedoes, some firecrackers and salutes, exhibition display pieces, aeroplane flares, illuminating projectiles not fused and without expelling charges, flash powders in inner units not exceeding 2 ounces each, flash sheets in interior packages, flash powder or spreader cartridges containing not over 72 grains of flash powder each (see "Black powder and low explosives" for shipments made as low explosives), and flash cartridges consisting of a paper cartridge shell, small-arms primer, and flash composition not exceeding 180 grains all assembled in one piece. Fireworks must be in a finished state, exclusive of mere ornamentation, as supplied to the retail trade and must be so constructed and packed that loose pyrotechnic composition will not be present in packages in transportation.

(d) Jet thrust units (jato), Class B, are metal cylinders containing a mixture of chemicals capable of burning rapidly and producing considerable pressure. Jet thrust units are designed to be ignited by an electric igniter. They are used to assist aeroplanes to take off.

(e) Propellant explosives are solid chemicals or solid chemical mixtures which function by rapid combustion of successive layers, generally with little or no smoke, and some may also be sensitive to detonation. The rate of combustion is controlled by composition, size and form of grain. Propellant explosives include smokeless powder for small arms, smokeless powder for cannon, smokeless powder or solid propellant explosives for rockets, jet thrust units, or other devices. Black powder, and propellant explosives as prepared for shipment that are also sensitive to detonation, are Class A explosives as defined in § 146.20–7. Fire extinguisher charges containing not to exceed 50 grains of propellant explosives per unit are exempt from the regulations in this part.

[5] Blasting caps, blasting caps with safety fuse, or electric blasting caps in quantities of 1,000 or less are classified as Class C explosives.

§ 146.20–11 *Class C explosives.* Class C explosives are defined as certain types of manufactured articles which contain Class A, or Class B explosives, or both, as components but in restricted quantities, and certain types of fireworks. These explosives are further specifically described as:

(a) Small-arms ammunition designed to be fired from a pistol, revolver, rifle, or shotgun held by the hand or by the hand and shoulder, or machine guns of caliber less than 0.75, or blank remover cartridges fired from catapults and canopies, is fixed ammunition consisting of a metallic or paper cartridge case, a primer and a propelling charge, with or without bullet, shot, tear gas material, tracer components, or incendiary compositions or mixtures, but not including bullets loaded with high explosives.

(b) Explosive cable cutters are used for cutting cables, etc. They consist of a metal device containing a knife-edged component which is propelled by a small charge of an explosive compound.

(c) Cordeau detonant fuse is a fuse containing a core of pentaerythrite tetranitrate or cyclotrimethylene trinitramine not exceeding 110 grains per linear foot, overspun with yarns, tapes and waterproofing compounds. Wire countering is permissible.

(d) Percussion fuzes, combination fuzes, and time fuzes are devices used to ignite the powder charges of ammunition or the black powder bursting charges of projectiles.

(e) Tracer fuzes and tracers are devices which are attached to projectiles and contain a slow-burning composition to show the flight of projectiles at night.

(f) Cartridge bags, empty, with black powder igniters consist of empty bags having attached thereto an igniter composed of black powder.

(g) Igniters consist of fiberboard, paper or metal tubes containing a small quantity of igniting compound which is ignited by the action of a primer, pull wire or scratch composition.

(h) Delay electric igniters consist of small metal tubes containing a wire bridge in contact with a small quantity of ignition compound. The ignition compound is in contact with or in close proximity to a short piece of safety fuse.

(i) Electric squibs consist of small tubes or blocks containing a small quantity of ignition compound in contact with a wire bridge.

(j) Fuse lighters and fuse igniters are small cylindrical hollow pasteboard or metal tubes containing an igniting composition in one end, the other end being open to permit it to be placed on safety fuse.

(k) Safety squibs are small paper tubes containing a small quantity of black powder. One end of each tube is usually twisted and tipped with sulfur.

(l) Instantaneous fuse is cotton yarn impregnated with meal powder. Each outside container shall be plainly marked "Instantaneous Fuse".

(m) Primers are devices used to ignite the powder charges of ammunition or the black powder bursting charges of projectiles. For small-arms ammunition, the primers are "small-arms primers" or "percussion caps".

(n) Safety fuse consists of a core of black powder overspun with yarns, tapes, and/or waterproofing compounds. Each outside container shall be plainly marked "Safety Fuse".

(o) Toy paper caps, consisting of paper cap ammunition for toy pistols, in sheets, strips, rolls, or individual caps, must not contain more than an average of twenty-five hundredths of a grain of explosive composition per cap and must be packed in inside packages constructed of cardboard not less than 0.013 inch in thickness, metal not less than 0.008 inch in thickness, or noncombustible plastic not less than 0.15 inch in thickness, which shall provide a complete enclosure and the minimum dimensions of each side or end of such package shall be not less than ⅛ inch in height. Unless greater weight of composition is approved by the Bureau of Explosives, the number of caps in these inside packages shall be limited so that not more than 10 grains of explosive composition shall be packed into 1 cubic inch of space and not exceeding 17.5 grains of the explosive composition of toy caps shall be packed in any inside container. These inner containers must be packed in outside containers as specified in § 146.20–300.

(p) Explosive rivets, each containing not more than 75 milligrams of explosive composition, are exempt from specification packaging and labeling requirements when packed in pasteboard or other inside boxes in securely closed strong wooden boxes, fiberboard boxes or metal containers. Each outside container must be marked "Explosive Rivets".

(q) Common fireworks are manufactured articles designed primarily for the purpose of producing visible or audible pyrotechnic effects by combustion or explosion. Common fireworks must be in the finished state exclusive of mere ornamentation, as supplied to the retail trade and must be so constructed and packed that loose pyrotechnic composition will not be present in packages in transportation. No component part of any article listed in this paragraph which is designed to produce an audible effect (other than propelling or expelling charges) shall contain pyrotechnic composition in excess of 2 grains in weight. Fireworks other than those specifically enumerated below are classed as special fireworks (see Class B explosives):

(1) Roman candles not exceeding 10 balls spaced uniformly in the tube, total pyrotechnic composition in each candle not to exceed 20 grams in weight.

(2) Sky rockets with sticks, total pyrotechnic composition not to exceed 20 grams each in weight. The rocket sticks must be securely fastened to the casing.

(3) Helicopter type rockets, total pyrotechnic composition not to exceed 20 grams each in weight.

(4) Cylindrical fountains, total pyrotechnic composition not to exceed 75 grams each in weight. The inside tube diameter shall not exceed ¾ inch.

(5) Cone fountains, total pyrotechnic composition not to exceed 50 grams each in weight.

(6) Wheels, total pyrotechnic composition not to exceed 60 grams in weight, for each driver unit, but there may be any number of drivers on any one wheel. The inside bore of driver tubes shall not be over ½ inch.

(7) Railway fusees, truck flares, hand ship distress signals, smoke pots, smoke candles, smoke signals, and illuminating torches. Total pyrotechnic composition of illuminating torches not to exceed 100 grams each in weight.

(8) Sparklers and dipped sticks, total pyrotechnic composition not to exceed 100 grams each in weight. Pyrotechnic composition containing any chlorate or perchlorate shall not exceed 5 grams.

(9) Colored box and cone fire, total pyrotechnic composition not to exceed 100 grams each in weight.

(10) Mines and shells of which the mortar is an integral part, total pyrotechnic composition not to exceed 40 grams each in weight.

(11) Firecrackers and salutes with casings, the external dimensions of which do not exceed 1½ inches in length or ¼ inch in diameter, total pyrotechnic composition not to exceed 2 grains each in weight.

(r) Igniter cord consists of a wire uniformly covered with a combustible chemical mixture, countered with strands of wire and overspun with textile thread which, when ignited, burns at various rates according to design. Each outside container shall be plainly marked "Igniter Cord".

§ 146.20–13 *Samples of explosives and explosive articles for laboratory and examination purposes.* (a) New explosives, including fireworks and explosive devices, must be examined and approved by the Bureau of Explosives as safe for transportation before being offered for shipment, except that a sample of such explosives, fireworks and explosive devices, not to exceed 5 pounds net weight, may be offered for transportation on board cargo vessels subject to the regulations in this subchapter for the purpose of this examination. Samples of explosives, except liquid nitroglycerin, other than new explosives not exceeding 5 pounds net weight may for purposes of laboratory examination be offered for transportation by cargo vessels subject to the regulations of this subchapter. For the purposes of the regulations in this part a new explosive, including fireworks and explosive devices, is the product of a new factory or an explosive or explosive device of an essentially new composition or character made by any factory.

(b) Before being offered for shipment, explosive articles in the experimental state must be made safe by removal of ignition elements or otherwise.

(c) Shipments of samples of explosives, fireworks and explosive devices must be packed, marked and described as required by the Interstate Commerce Commission regulations in effect at the time of shipment for the explosive contained therein.

(d) *Label.* Each outside package containing samples of explosives for laboratory examination will have securely and conspicuously attached to it a square red label as shown under subpart pertaining to shipper's requirements.

§ 146.20-15 *Stowage of explosives.* (a) All articles of cargo classified as explosives by the regulations in this part shall be stowed on board a vessel in conformity with the conditions specified for the individual articles as set forth in the table shown in this section. Mixed stowage of explosives with other explosives or other dangerous articles or substances or combustible liquids shall be in conformity with the loading and stowage chart, § 146.20-90. Specifications governing the construction and location of magazines and lockers used in stowage of explosives are detailed in §§ 146.09-1 to 146.09-6.

(b) Vessels engaged in transfer of explosives between receiving points and delivery points within the harbors, bays, sounds, lakes and rivers including the explosive anchorages on the navigable waters may, when transporting explosives, stow such cargo "On deck in open", "On deck under cover," or "Under deck." Explosives stowed "On deck in open" shall after loading and during transportation be covered by tarpaulins securely lashed in place.

NOTE: §§ 146.20-15 to 146.20-51, 146.20-85, 146.20-90, 146.20-100, 146.20-200, 146.20-300 are inapplicable to the transportation of military explosives. See § 146.29-1.

§ 146.20-17 *Stowage of explosives in holds containing coal.* Unless especially authorized by the U. S. Coast Guard, explosives shall not be stowed in a hold containing coal, nor shall explosives be stored in a hold above or adjacent to a hold containing coal.

(See note to § 146.20-15.)

§ 146.20-19 *On deck stowage of explosives.* (a) Articles classified as explosives, the stowage of which is permitted "On deck" by the regulations in this part, shall be properly secured. Such security may be obtained by using existing vessel's structures such as bulwarks, hatch coamings, shelter deck and poop bulkheads as part boundaries and effectively closing in the cargo by fitting angle bar closing means secured by bolting to clips or other parts of the ship's structure. Lashing of deck stowage permitted, provided eye pads are fitted to carry such lashings. Guard rails shall not be used to secure such lashings.

(b) Bulky articles may be secured by lashing with individual wire rope lashings.

(c) Shoring of such bulky articles of cargo shall be in addition to the foregoing means of securing.

(d) Explosives stowed "On deck" shall be so stowed as to provide safe access to the crew's quarters and to all parts of the deck required to be used in the navigation and necessary working of the vessel.

(e) Airing spaces for the crew shall be maintained free and clear of the stowed cargo.

(f) When runways for use of crew are built over stowed cargo, they shall be so constructed and fitted with rails and lifelines as to afford complete protection to the crew when in use.

(g) Explosives permitted by the regulations in this part to be stowed "On deck" shall not be stowed on or under a bridge deck or within a distance, in a horizontal plane, of 25 feet of an operating or embarkation point of any lifeboat.

(h) "On deck" cargoes of explosives shall not be stowed nearer than 25 feet in a horizontal plane to the access means provided for crew quarters.

(j) Fire plugs, sounding pipes, and access to same shall be maintained free and clear of explosive cargo stowed on deck.

(k) Of the open deck space available after allowing for above restrictions for the stowage of explosives "On deck", not more than 50 percent of such available deck space shall be occupied by the stowage of these articles or explosives.

(See note to § 146.20-15.)

§ 146.20-21 *Stowage of fireworks.* (a) Fireworks that can be "exploded en masse" shall not be offered or accepted for transportation except as high explosives and shall be stowed in magazines. Magazines may be of a portable type as detailed in § 146.09-6.

(b) Fireworks (other than the type that can be "exploded en masse") shall, when permitted to be transported on passenger vessels, be stowed in metal lockers, such metal lockers to be located either "On deck under cover" or "Tween decks readily accessible".

(See § 146.09-5 for specifications of locker.)

(c) Fireworks shall not be stowed in the same hold in which magazines containing explosives are located.

(d) All containers packed with permissible special fireworks acceptable for transportation on board vessels in accordance with these regulations shall have attached the (red) special fireworks label as shown in § 146.05-17 (s).

(See note to § 146.20-15.)

§ 146.20-23 *Stowage of explosives in magazines adjacent to other dangerous articles.* (a) Magazines containing explosives that are required to be stowed in such magazines by the tables contained in §§ 146.20-100 to 146.20-300, inclusive, shall not be located in the same holds or holds adjacent to those in which inflammable liquids, inflammable solids or oxidizing materials are stowed, nor shall such magazines be located in holds below such substances stowed "On deck."

(b) On vessels transporting explosives and inflammable compressed gases, the requirements as to separation of these two substances shall be as set forth in §§ 146.24-1 to 146.24-100, inclusive.

(c) Magazines containing explosives shall not be located in the same hold or a hold below one in which corrosive liquids are stowed.

(d) Magazines containing explosives shall not be located in the same hold with poisonous articles, combustible liquids, or hazardous articles.

(See note to § 146.20-15.)

§ 146.20-25 *Stowage of explosives and nondangerous cargo.* Magazines in which explosives are stowed shall be protected from damage by heavy nondangerous cargo stowed in the same hold. Shafting, steel bar, steel shapes, pipe, heavy machinery and similar types of cargo shall, if stowed within the same hold, be so isolated or dunnaged or secured as to prevent damage to magazine under any conditions likely to be encountered during the voyage.

(See note to § 146.20-15.)

§ 146.20-27 *Stowage and dunnaging of containers of explosives.* (a) Containers of explosives shall be so stowed and dunnaged as to prevent movement in any direction.

(b) Boxes of explosives marked "This Side Up" shall be so stowed.

(c) Kegs of black powder shall be stowed in an upright position, the bungs up, and each tier shall be completely dunnaged.

(d) The top tier of boxes and kegs shall be so braced and blocked that no displacement of any package can occur, either upwardly or laterally.

(e) Containers of explosives shall be so braced that they shall not be liable to be pierced by the dunnaging or crushed by superimposed weight.

(See note to § 146.20-15.)

§ 146.20-29 *Preparation of magazines, decks, hatches and holds before handling explosives.* (a) The floors of all magazines and holds shall be cleared of all rubbish and discarded dunnage, and be swept broom clean before commencing to load any explosive items of cargo. Bilges shall be examined and any residue of previous cargo removed therefrom.

(b) All decks, gangways and hatches over or through which explosives must be passed or handled in loading or unloading, shall be freed of all loose material and shall be swept broom clean both before and after loading or unloading.

(c) The hatches and cargo ports opening into a compartment in which explosives are stowed shall be kept closed at all times, except during loading or unloading of the compartment. When closed the hatches shall be covered with tarpaulins securely battened.

(See note to § 146.20-15.)

§ 146.20-31 *Loading and unloading explosives.* No Class A dangerous explosives or Class B less dangerous explosives except special fireworks shall be loaded on board any vessel until all other cargo has been placed on board the vessel. This applies to vessels moving from ports where cargo of explosives originate. At intermediate ports or at port of destination explosives shall not be loaded or unloaded at the same time that other cargo is being loaded or unloaded.

(See note to § 146.20-15.)

§ 146.20-33 *Constructing of magazines.* All work in connection with the constructing of a magazine, or other conditioning of holds, decks, or hatches, shall be completed before the actual loading of explosives is undertaken.

(See note to § 146.20-15.)

§ 146.20-35 *Handling explosives.* (a) All explosives must be handled carefully. Packages of explosives must not be thrown, dropped, rolled, dragged or slid over each other or over the decks.

(b) In transferring explosives from a pier or another vessel the packages must be handled by hand or by using a regulation chute and mattress. If the difference in elevation between the vessels or a vessel and the loading dock, or conditions of weather render it difficult to safely load or unload by hand or chute, mechanical hoists, crates, rope net slings or basket may be used. The maximum load handled in crates, rope net slings or baskets per draft shall not exceed 2,400 pounds. No containers of explosives shall be loaded above the side of any crate or basket nor shall rope net slings be so loaded as to prevent the sling from encompassing the entire load on its top side. Explosives shall not be handled roughly. They must be hoisted and lowered carefully and only deposited or lowered onto a mattress.

(c) Blasting caps, detonating fuzes, fulminate of mercury and other initiating or priming explosives as defined in these regulations shall be considered as constituting a distinct class of dangerous explosives and because of the hazard involved they shall be handled with extreme care.

(d) "Can" hooks shall not be used for raising or lowering a barrel, drum, or other container of explosives. Metal bale hooks shall not be used in handling packages of explosives.

(e) Transfer trucks equipped with "electric motor" means of propulsion shall not be used in handling any high explosive, low explosive, black powder or propellant explosives on board vessels.

(See note to § 146.20-15.)

§ 146.20-37 *Cargo working equipment.* (a) Before explosives are loaded or unloaded on or from a vessel the master or other person in charge of the vessel shall be required to ascertain by examination the condition and working order of all slings, crates, baskets, boxes, chutes, mattresses, tackle and other equipment to be used in the transfer operation.

(b) Any and all equipment which in the judgment of the master or other person in charge of the vessel is not in safe working condition shall be rejected and he shall prohibit its use and take such precautions as he may deem necessary to be certain such rejected equipment is not used for the purpose of loading or unloading explosives. The master or other person in charge of the vessel shall keep watch of all equipment used during the transfer of explosives and if any part of the equipment shows any defect or is damaged in use, work shall be stopped and the damaged or defective equipment repaired or replaced before permitting the loading or unloading to continue.

(c) This inspection of cargo working equipment shall apply to the vessel's equipment and to stevedores or other contractor's equipment.

(See note to § 146.20-15.)

§ 146.20-39 *Installation of loading chute.* The incline of the chute to be used in loading explosives shall be such that the velocity of the packages sliding will not be great enough to cause violent shock when coming in contact with other packages on the chute, or when reaching the bottom of the chute. If otherwise, men shall be stationed alongside the chute to retard and control the velocity of the packages. Chutes shall be carefully wiped down with waste moistened with machine oil before packages of explosives are transferred.

(See note to § 146.20-15.)

§ 146.20-41 *Lights, tools and equipment.* (a) No artificial light except electric lights or electric lamps or floodlights shall be used while loading or unloading explosives.

(b) Flashlights of a non-spark type shall be provided by the vessel owner or operator for persons required to enter holds in which explosives are stowed.

(c) Members of the crew of the vessel and other persons permitted on board the vessel to aid and assist in loading or unloading explosives, shall not be permitted to have or carry on their persons, firearms, matches, bale hooks or metallic tools.

(d) No person engaged in loading Class A dangerous explosives or Class B less dangerous explosives shall wear boots or shoes shod or strengthened with iron nails or other metal, unless such boots or shoes are covered with rubber, leather, felt or some such non-sparking material.

(See note to § 146.20-15.)

§ 146.20-43 *Fires.* (a) No unnecessary fire shall be permitted on docks, lighters or vessels, while loading or unloading explosives.

(b) Fires deemed necessary must be properly safeguarded and left in constant charge of some competent person assigned for that purpose by the master for the entire period of cargo transfer.

(c) A line of fire hose of sufficient length to cover the area of loading operations and connected with an adequate water supply shall be laid ready for use.

(See note to § 146.20-15.)

§ 146.20-45 *Smoking.* Smoking is prohibited on or near any vessel loading or unloading explosives. "NO SMOKING" warning signs shall be posted during operations of loading and unloading such cargo. One such "NO SMOKING" sign shall be located on the pier at a safe distance from the vessel when such loading or unloading is taking place at a pier.

(See note to § 146.20-15.)

§ 146.20-47 *Liquor or drugs.* No person who, in the judgment of the master or other person in charge of the vessel, may be considered as being under the influence of liquor or of drugs, shall be permitted on board a vessel while loading, unloading or transporting explosives.

(See note to § 146.20-15.)

§ 146.20-49 *Damaged or leaking containers of explosives.* (a) Any container of explosives showing evidence of damage or leakage of a liquid ingredient shall not be accepted for transportation or storage on board any vessel.

(b) Any container of an explosive when offered for transportation, or storage, showing excessive dampness or which is moldy or shows outward signs of any oil stain or other indications that absorption of the liquid part of the explosive is not perfect, or that the amount of the liquid part of the explosive is greater than the absorbent can carry, shall not be accepted for transportation. The shipper must substantiate any claim that a stain is due to accidental contact with grease, oil, or similar substance. In case of doubt the container shall be refused.

(See note to § 146.20-15.)

§ 146.20-51 *Containers found damaged or leaking on board vessels.* (a) Any container of explosives found damaged or leaking while on board a vessel shall either be repacked or removed from the vessel, whichever course appears advisable within the judgment of the master. If the master elects to jettison the container such jettisoning shall not be accomplished within any area adjacent to the coast line nor in shallow water.

(b) If upon arrival at a foreign port it is found that a container has been damaged or is leaking, the master should consult the local port authorities and request instructions as to disposition of the insecure package.

(c) The owner, charterer, agent, master, or person in charge of a vessel shall report in writing the occurrence of damaged or leaking containers of explosives to the District Commander of the United States Coast Guard or his authorized representative for the district in which the substance was taken on board the vessel setting forth a description of the container; the damage sustained; when possible, a reason for the damage; the name and address of the consignor and consignee (or shipping mark); and a statement of the disposition of the container.

(d) When the failure of a container of explosives results in a casualty involving loss of life, personal injury or damage to the vessel, no report other than those required by the provisions of §§ 136.05-1 to 136.05-10, inclusive, of this chapter, shall be made.

(See note to § 146.20-15.)

§ 146.20-53 *Magazine vessels storing explosives.* (a) For the purposes of the regulations in this part, a magazine vessel storing explosives is defined as follows: A magazine vessel is any type of water-borne craft used for the receiving, storing or dispensing of explosives, but not transporting same.

(b) Permitted type of magazine vessels: Single deck vessels with or without house on deck shall be the only acceptable type for use in the storage of explosives.

(c) Stowage on board magazine vessels: Class A dangerous explosives and Class B less dangerous explosives in excess of 5,000 pounds stored in any magazine vessel shall be stowed below deck. No amounts of such explosives shall be stowed above deck unless the vessel is fitted with a deck house the stowage area of which conforms with the requirements of the regulations in this part for the stowage of explosives. Blasting caps and electric blasting caps in excess of 1,000 shall not be stored on the same magazine vessel with Class A dangerous explosives or Class B less dangerous explosives.

(d) The compartment on board a magazine vessel used for stowage of explosives shall be ceiled with wood throughout in such manner as will provide a smooth interior surface. Any metal stanchions within such compartment shall be boxed in the same manner as the compartment is ceiled. Overhead ceiling need not be fitted when the over deck is weather tight. All nail and bolt heads shall be countersunk and all exposed metal shall be covered with wood.

(e) Initiating and priming explosives of the Class A dangerous explosives group when stowed on board magazine vessels at the same time as high explosives are being stowed shall be stowed in a compartment separate from other explosives. Blasting caps and electric blasting caps shall be stowed in a location on board the magazine vessel that shall be separated from the other explosives on board the vessel by a horizontal distance of at least 25 feet from any bulkhead or partition forming a boundary of a compartment in which other explosives are stowed.

(f) Magazine storage vessels having a dry storage space capable of being used for any purpose whatsoever shall have a cofferdam of the minimum width of 24 inches fitted between such dry storage space and the adjacent explosive stowage compartment. This cofferdam may be of wood or steel and be formed by two tight thwartship bulkheads extending from the skin of the vessel to the overdeck. A watertight hatch shall be fitted in the weather deck if such compartment extends thereto for access to such cofferdam.

§ 146.20–55 *Lighting in stowage compartments.* No artificial means of lighting shall be fitted within a compartment used for the storage of explosives. The use of oil or chemical burning lamps or lanterns is prohibited on board a magazine vessel except for required navigation, anchorage, warning lights and living quarters. Battery supplied, self-contained unit electric lanterns or hand flashlights are the only means of artificial light permitted in such storage compartments.

§ 146.20–57 *Handling explosives; magazine vessels.* In receiving and dispensing explosives on or from magazine vessels such explosives shall be handled is accordance with the regulations as set forth in §§ 146.20–1 to 146.20–300.

§ 146.20–59 *Living quarters on magazine vessels.* Living quarters of magazine vessels shall be fitted on the inside with asbestos board or other fire resistant material. Only bracketed ship's lamps shall be allowed in the living quarters. Stoves for heating or cooking shall be mounted not closer than 6 inches to the deck or sides of the house and shall be well and securely fastened. Smoke pipe for such stoves where passed through top of the house shall be kept clear from any woodwork a distance of not less than 3 inches all around and protected by a layer of asbestos, an air space of at least 1 inch, and a metal collar constructed of not less than No. 16 gauge sheet metal and so formed as to be secured only on the weather side at the top of house. No openings shall be permitted from any living quarters into the stowage compartments of the magazine vessel.

§ 146.20–61 *Lamp box on magazine vessels.* A metal lamp box constructed of sheet metal of not less than No. 16 U. S. standard gauge shall be provided and secured in place in an isolated location on the deck. All permitted portable oil lights and the oil supply for same shall, when not in use, be stowed therein.

§ 146.20–63 *Storage of other dangerous articles.* Magazine vessels having explosives stowed therein shall not be used for the stowage of other dangerous articles of cargo.

§ 146.20–65 *Magazine vessels' stores.* Articles for use as stores on board magazine vessels shall conform to the conditions as set forth in Part 147 of this subchapter.

§ 146.20–67 *Matches.* Safety matches requiring a prepared surface for ignition shall be the only type of matches permitted on board a magazine vessel. They shall be kept in a metal box or can with a metal cover and stowed in the custodian's living quarters.

§ 146.20–69 *Firearms.* No fire arms or ammunition for same (except as cargo) shall be permitted on board magazine vessels.

§ 146.20–71 *Fire extinguishing equipment.* No explosive shall be received or stored on or dispensed from any magazine vessel, unless four (4) 2½-gallon extinguishers of the soda-acid type and four (4) 2-gallon pails filled with dry sand shall be distributed in strategic location about the vessel. In locations where extinguishers are continuously exposed to a temperature lower than 40° F. such extinguishers shall be of the anti-freeze type.

§ 146.20–73 *Supervision of magazine vessels.* Magazine vessels in which explosives are stored shall at all times be in charge of a custodian employed for that purpose by the owner or owners of the magazine vessel.

§ 146.20–75 *Unauthorized persons on magazine vessels.* Custodian of a magazine vessel shall not permit unauthorized persons to come on board a magazine vessel except in an emergency tending to preservation of life.

§ 146.20–77 *Repacking of explosives on board magazine vessels.* No explosives shall be repacked on board a magazine vessel. Broken or damaged packages shall be placed in an open box and conveyed to a safe location for repacking or other disposition.

§ 146.20–79 *Work boat.* For purposes of safety, a work boat shall be part of the equipment of each magazine vessel.

§ 146.20–81 *Life preservers.* One approved type life preserver shall be provided for each person employed upon a magazine vessel.

§ 146.20–83 *Fenders.* Magazine vessels shall be fitted with fenders in such number and size as will prevent any vessel tying up alongside from actually coming in contact hull to hull.

§ 146.20–85 *Authorization to load or discharge explosives.* Shipments of Class A explosives in amounts exceeding 500 pounds net weight, or over 250,000 "Blasting Caps" or "Electric Blasting Caps" shall not be laden on or discharged from any vessel at any point or place in the United States, its territories or possessions (not including the Panama Canal Zone) until authorization for such loading or discharging has been obtained by the owner, agent, charterer, master, or person in charge of the vessel from the District Commander of the United States Coast Guard, or his authorized representative.

(See note to § 146.20–15.)

§ 146.20–87 *Permits for class A explosives.* (a) Before permits to load or discharge class A explosives in amounts exceeding 500 pounds net weight, or over 250,000 "Blasting Caps" or "Electric Blasting Caps" are granted in accordance with § 146.20–85, the requirements of this section shall be met.

(b) Where loading or discharge operations take place in designated explosive anchorages, the following requirements shall be determined:

(1) The requested amount of explosives to be loaded or discharged shall not exceed limits set by the applicable anchorage regulation of the Secretary of the Army in regard to the quantity of class A explosives which a vessel may have on board.

(2) The vessel shall comply in all respects with the regulations in this subchapter.

(3) Conditions within the anchorage shall offer no more than normal acceptable hazards to the vessel or its cargo.

(4) If there are Department of Defense installations, such as a Navy or Army Depot, navy yard, naval anchorage, etc., in the vicinity of an explosive anchorage, the Commanding Officer of the installation should be apprised of the proposed movement of explosives and if opposition is raised the permit shall be withheld.

(c) Where loading or discharge operations take place in civilian establishments outside designated explosive anchorages, the following requirements shall be determined:

(1) The District Commander of the United States Coast Guard, together with the cognizant Captain of the Port, shall be furnished a written permit or document having comparable legal effect from the municipal, state, or port authority authorizing the vessel to use a designated waterfront facility for explosives loading or discharge.

(2) The vessel shall comply in all respects with the regulations in this subchapter.

(3) The facility shall offer no more than normal acceptable hazards to the vessel or its cargo.

(4) The proposed loading or discharge facility shall offer isolation and remoteness from populous areas which compare favorably with the distance required by the American Table of Distances for inhabited buildings, unbarricaded, even though permission has been obtained for its use from local authorities.

NOTE: Under the exemption contained in § 146.10–4 railroad carfloats transporting railroad vehicles to vessel's side for the purpose of transferring their cargo to the vessel will not be required to obtain a permit as required by § 146.20–85. However, the Captain of the Port has the authority under 33 U. S. C. 471 to require a permit for such carfloats to enter an explosives anchorage. A permit is also required under § 146.20–85 for the transfer of explosives from the carfloats to the vessel.

(d) Where loading or discharge operations take place in the establishments under direct control of the Department of Defense, the following requirements shall be determined:

(1) The vessel shall comply in all respects with the regulations in this subchapter.

(2) Commercial vessels loading or discharging military explosives shipped by or consigned to the Department of Defense of the United States Government at facilities under its direct control such as a Navy or Army depot, arsenal, navy yard, port of embarkation, etc., where transfer of the explosives is supervised by Army, Navy or Air Force personnel, shall comply with the United States Coast Guard regulations pertaining to the safe handling, transportation, conveyance, stowage, or use of explosives or other dangerous articles or substances on board vessels.

§ 146.20–90 *Stowage and storage chart of explosives and other dangerous articles.* The table entitled "Stowage and storage chart of explosives and other dangerous articles" shows the explosives and other dangerous articles which must not be loaded or stowed together. Cyanides or cyanide mixtures must not be stowed or stored with acids or corrosive liquids. Consult detailed regulations of other dangerous articles for provisions regarding "on deck stowage" of such articles on board vessels transporting explosives. The letter X at an intersection of horizontal and vertical columns shows that these articles must not be loaded or stowed together, for example: Detonating fuzes, boosters (explosive), horizontal column (7), must not be loaded or stowed with high explosives, vertical column (2). The provisions of this table are not applicable to barges. Stowage on board barges shall be in accordance with the provisions of §§ 146.10–1 to 146.10–50, inclusive.

(See note to § 146.20–15.)

STOWAGE AND STORAGE CHART OF EXPLOSIVES AND OTHER DANGEROUS ARTICLES

The letter X at an intersection of horizontal and vertical columns shows that these articles must not be loaded or stowed together.

Class A Explosives		1 Low explosives or black powder	2 High explosives	3 Initiating or priming explosives, wet: diazodinitrophenol, nitrophenol, fulminate of mercury, guanyl nitrosamino guanylidene hydrazine, lead azide, lead styphnate, nitro mannite, nitrosomannitan, pentaerythrite tetranitrate, tetrazene.	4 Blasting caps, with or without safety fuze (including electric blasting caps), detonating primers	5 Ammunition for cannon with explosive projectiles, gas projectiles, smoke projectiles, incendiary projectiles or illuminating projectiles	6 Explosive rivets, small explosive bolts, torpedoes, or mines, rifle or hand grenades (explosive), jet thrust units (jato) Class A	7 Detonating fuses, boosters (explosive)	See footnotes at end of table.

[1] Blasting caps or electric blasting caps in quantities not exceeding 1000 caps may also be stowed or stored with articles named in columns (16), (20), (23), and (24).

[2] Explosives, class A, and explosives, class B, must not be loaded or stowed with chemical ammunition containing incendiary charges either with or without bursting charges. Chemical ammunition of the same classification containing incendiary charges may be loaded and stowed together.

§ 146.20–100 *Table A—Classification: Class A; dangerous explosives*

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Ammunition for cannon with explosive projectiles. Ammunition for cannon with gas projectiles. Ammunition for cannon with smoke projectiles. Ammunition for cannon with incendiary projectiles. Ammunition for cannon with illuminating projectiles.	Ammunition for cannon is all fixed, semi-fixed, or separate-loading ammunition fired from a cannon, mortar, gun, howitzer, or recoilless rifle as distinguished from ammunition fired from a device such as a pistol, revolver, rifle, shotgun or similar firearm. Fixed ammunition assembled in a unit consisting of the cartridge case containing the propelling charge and primer, and the projectile, or shell, fuzed or unfuzed. ICC packing regulations require that detonating fuzes, tracer fuzes, explosive or ignition devices, or fuze parts with explosives contained therein must not be assembled in ammunition or included in the same outside package unless shipped by, for, or to the Departments of the Army, Navy, or Air Force of the U. S. Government or unless of a type approved by the Bureau of Explosives. Each outside package must be plainly marked with the appropriate descriptive name of the contents as: "Ammunition for cannon with explosive projectiles," "Ammunition for cannon with gas projectiles," "Ammunition for cannon with smoke projectiles," "Ammunition for cannon with incendiary projectiles" or "Ammunition for cannon with illuminating projectiles."	No label required except "Ammunition for cannon with gas projectiles" loaded with a poisonous gas or liquid, Class A, and an explosive charge must bear the white "Poison gas" label.	Stowage: magazine. Outside containers: Strong wooden or metal containers.	Not permitted.	Not permitted.	Not permitted.
Ammunition for cannon, nonexplosive.	Material relating to ammunition for cannon, but containing no explosive, or other dangerous article, such as cartridge cases, "dummy" or "drill" cartridges, etc., sand-loaded projectiles, sand-loaded bombs, empty projectiles, empty mines, empty bombs, solid projectiles, or empty torpedoes.	----------	Not subject to regulations in this subpart.	Not subject to regulations in this subpart.	Not subject to regulations in this subpart.	Not subject to regulations in this subpart.

UNIVERSITY OF MICHIGAN LIBRARIES

Table A—Classification: Class A; dangerous explosives—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Ammunition—Projectiles, grenades, bombs, mines and torpedoes:						
Explosive projectiles	Shells or projectiles loaded with explosives or bursting charges for use in cannon, guns, or mortars.	No label required except bombs, grenades, projectiles, or other containers loaded with a poisonous gas or liquid, Class A, and an explosive charge, either boxed or unboxed, must bear the white "Poison gas" label.	Stowage: Magazine or in a compartment entirely allotted for stowage of these articles, which compartment may be located: "On deck under cover," "Tween decks," or "Under deck."	Not permitted	Not permitted	Not permitted
Explosive hand grenades.	Small metal or other containers designed to be thrown by hand or projected from a rifle.		Outside containers: Strong wooden or metal boxes. Gross weight of a box containing more than 1 projectile, grenade, bomb or mine must not exceed 250 lb.			
Explosive rifle grenades.	They are filled with an explosive or a liquid gas or solid material, such as a toxic or tear gas or an incendiary or smoke producing material and a bursting charge.		Explosive projectiles, explosive torpedoes, explosive mines, or explosive bombs, exceeding 90 lb. in weight may be accepted without being boxed only when shipped by, for or to the Departments of the Army, Navy, or Air Force of the U. S. Government.			
Explosive bombs	Metal or other containers filled with explosives.					
Explosive mines	Metal containers filled with a high explosive.					
Explosive torpedoes	Metal devices containing a means of propulsion and a quantity of high explosives.					
	ICC packing regulations require that detonating fuzes, tracer fuzes, explosive or ignition devices, bouchons, or fuze parts with explosives contained therein must not be assembled in explosive projectiles, explosive grenades, explosive bombs, explosive mines, explosive torpedoes, or included in the same outside package with these articles unless shipped by, for or to the Departments of the Army, Navy, or Air Force of the U. S. Government or unless of a type approved by the Bureau of Explosives.					
	Each outside package or each projectile, bomb, mine or torpedo that is shipped unbored must be plainly marked with the appropriate descriptive name of the contents as: "Explosive projectile," "Explosive torpedo," "Explosive mine," "Explosive bomb," "Hand grenades," or "Rifle grenades."					

Table A—Classification: Class A: dangerous explosives—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Ammunition, chemical, explosive:	Chemical ammunition used in warfare is all kind of explosive chemical projectiles, shells, bombs, grenades, etc., loaded with toxic, tear, or other gas, smoke or incendiary agent; also such miscellaneous apparatus as cloud-gas cylinders, smoke generators, etc., that may be utilized to project chemicals.		When these articles are shipped assembled with their ignition elements, bursting charges, detonating fuzes, or explosive components, they must be shipped in conformity with the regulations prescribed for "Explosive projectiles", "Explosive hand grenades," "Explosive rifle grenades," "Explosive bombs," "Explosive mines," or "Explosive torpedoes."			
Includes such explosive ammunition as: gas projectiles, smoke projectiles, incendiary projectiles, illuminating projectiles, gas bombs, smoke bombs, incendiary bombs, gas grenades, smoke grenades, and incendiary grenades.	These articles must be shipped in accordance with the requirements for "*Ammunition—Projectiles, grenades, bombs, mines and torpedoes.*"		For shipment of these articles not containing ignition elements, bursting charges, detonating fuzes, or other explosive components, see "*Chemical ammunition (containing Class A poisons, liquids, or gases.)*" "*Chemical ammunition (containing class B poisons, liquids, or gases.)*" or "*Chemical ammunition (containing class C poisons, liquids, gases, or solids).*"			
Also miscellaneous apparatus, such as: cloud-gas cylinders, smoke generators, etc., used to project chemicals.						
Ammunition for small arms with explosive bullets.	Fixed ammunition to be used in machine guns or similar firearms and consists of a metallic cartridge case, the primer and the propelling charge, with explosive bullet or explosive projectile, with or without detonating fuze, the component parts necessary for one firing being all in one assembly.		Stowage: Magazine	Not permitted	Not permitted	Not permitted.
Ammunition for small arms with explosive projectiles.	ICC packing regulations require that detonating fuzes, tracer fuzes, explosive or ignition devices or fuze parts with explosives contained therein must not be assembled in ammunition or included in the same outside package unless shipped by, for or to the Departments of the Army, Navy, or Air Force of the U. S. Government or unless of a type approved by the Bureau of Explosives.		Outside containers: Strong wooden or metal containers. The gross weight of the outside package must not exceed 150 lb.			
	Each outside package must be plainly marked: "Ammunition for small arms with explosive bullets," or "Ammunition for small arms with explosive projectiles."					

UNIVERSITY OF MICHIGAN LIBRARIES

Table A—Classification: Class A; dangerous explosives—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Black powder Low explosives. May include: Black blasting powder. Black pellet powder. Black rifle powder. *Blasting powder.* *Flash powder cartridges exceeding 72 grains each.* *Flash powder in inner units exceeding 2 ounces each.* *Flash powder sheets in bulk.* Low blasting explosives. *Rifle powder.* *Spreader cartridges exceeding 72 grains each.* *Sporting powder.*	Black powder and low explosives are solid explosives which can be caused to deflagrate by contact with sparks or flame such as produced by a safety fuse or an electric squib, but cannot be detonated by means of a No. 8 test blasting cap Flash powder sheets in bulk, flash powders packed in inner units exceeding 2 ounces each, and flash powder or spreader cartridges exceeding 72 grains each are classed as low explosives Observe "This Side Up" stowage of boxes bearing such legend. Each outside package must be plainly marked with the appropriate descriptive name of the contents as "Black powder" or "Low explosives," and may also show "Blasting," "Rifle" etc. as "Black blasting powder," "Black rifle powder," "Low blasting explosive," or "black pellet powder." Boxes with inside containers packed filling holes up must be marked "This Side Up."	No label required	Stowage: Magazine Outside containers: Wooden barrels or kegs (ICC-10 B) not over 200 lb. gr. wt. Metal kegs (ICC-13) not less than 7 inches long and not less than 0.34 lb net wt. nor over 150 lb. net wt. Bundles of metal kegs (ICC-13) firmly tied together with rope and strong burlap, canvas or similar material, securely sewed and roped, not over 100 lb. net wt. Wooden boxes: (ICC-14) WIC, not over 140 lb. gr. wt. (ICC-15A, 16A) WIC, not over 200 lb. gr. wt. Fiberboard boxes (ICC-23F, 23H) WIC, not over 65 lb. gr. wt.	Not permitted	Not permitted	Not permitted.
High explosives	See various types of high explosives as described in this section.		Not permitted	Not permitted	Not permitted	Not permitted.
High explosives (*when containing more than 75% liquid explosive ingredient*, except blasting gelatin and gelatin dynamite). High explosives (*when containing not more than 75% liquid explosive ingredient*) Also: (*Blasting gelatin*). (*Gelatin dynamite*).	Each outside box must be plainly marked on top and on one side or end: "High explosives—Dangerous." The top of boxes must be marked "This Side Up." Observe "This Side Up" stowage.	No label required	Stowage: Magazine Outside containers: Wooden boxes (ICC-14, 15A, 16A) not exceeding 75 lb. gr. wt. Fiberboard boxes (ICC-23F, 23H) WIC, not exceeding 65 lb. gr. wt. Authorized only for "High explosives (*when containing not more than 75% liquid explosive ingredient*)": Fiberboard boxes (ICC-23G) not exceeding 65 lb. gr. wt.	Not permitted	Not permitted	Not permitted.
High explosives (*when containing 10% or less of a liquid explosive ingredient*).	Each outside box must be plainly marked on top and on one side or end: "High explosives—Dangerous." The tops of boxes must be marked "This Side Up." Observe "This Side Up" stowage.	No label required	Stowage: Magazine Outside containers: Wooden boxes (ICC-14, 15A, 16A) not exceeding 140 lb. gr. wt. Fiberboard boxes (ICC-23F, 23G, 23H) not exceeding 65 lb. gr. wt.	Not permitted	Not permitted	Not permitted.
High explosives (*containing no liquid explosive ingredient*).	Each outside box must be plainly marked on top and on one side or end: "High explosives—Dangerous." Each keg, drum, or barrel must be marked on both ends: "High explosives—Dangerous."	No label required	Stowage: Magazine Outside containers: Wooden barrels or kegs (ICC-10 B) not over 200 lb. gr. wt. Wooden boxes, (ICC-14, 15A, 16A) WIC, not over 140 lb. gr. wt. Fiberboard boxes (ICC-23F, 23G, 23H) not over 65 lb gr wt.	Not permitted	Not permitted	Not permitted.

Table A—Classification: Class A: dangerous explosives—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
High explosives (*containing no liquid explosive ingredient not any chlorate*) *Amatol.* *Shaped charges, commercial.*	Each outside box must be plainly marked on top and and on one side or end "High explosives—Dangerous." Each keg, drum, or barrel must be marked on both ends: "High explosives—Dangerous."	No label required	Stowage: Magazine Outside containers: Wooden barrels or kegs (ICC-10 B) not over 200 lb. gr. wt. (not permitted for "Shaped charges commercial"). Wooden boxes (ICC-14, 15A, 16A) WIC, not over 140 lb. gr. wt. Fiberboard boxes: (ICC-23F, 23H) not over 65 lb. gr. wt. (ICC-23G) not over 65 lb. gr. wt. (Not permitted for "Shaped charges, commercial.") Amatol when cast in a solid block or column may also be shipped in steel barrels or drums (ICC-14A) not over 50 lb. gr. wt.	Not permitted	Not permitted	Not permitted.
High explosives (*in dry condition*) Including: *Ammonium picrate.* *Nitroguanidine.* *Nitrourea.* *Picrolite.* *Picric acid.* *Tetryl.* *Trinitroresorcinol.* *Trinitrotoluene* *Urea nitrate.* NOTE.—Some of the above substances may be shipped as "Drugs, chemicals, medicines or cosmetics" in securely closed glass bottles of quantity not exceeding 4 oz. in one outside package.	Each outside box must be plainly marked on top and on one side or end "High explosives—Dangerous." Each keg, drum, or barrel must be marked on both ends: "High explosives—Dangerous."	No label required	Stowage: Magazine Outside containers: Wooden barrels or kegs (ICC-10 B) not over 200 lb. gr. wt. Wooden boxes (ICC-14, 15A, 16A) not over 50 lb. net wt. For trinitrotoluene and pentolite only, the gr. wt must not exceed 140 lb. Fiberboard boxes (ICC-23F) not over 65 lb. gr. wt. Fiber drums (ICC-21A, 21B) not over 200 lb net wt.	Not permitted	Not permitted	Not permitted.
High explosives (*wet with not less than 10 pound of water to each 90 pounds of dry material*). Including: *Ammonium picrate.* *Picric acid.* *Trinitrobenzene.* *Trinitroresorcinol.* *Trinitrotoluene.* *Urea nitrate.* NOTE.—For shipments of some of the above materials in small quantities in a wet condition see §146.22-100.	Each keg or barrel must be marked on both ends: "High explosives—Dangerous."	No label required	Stowage: Magazine Outside containers: Wooden barrels or kegs (ICC-10B) not over 50 gal. cap.	Not permitted	Not permitted	Not permitted.
High explosives (*nitrocellulose—guncotton and negative cotton—when shipped in dry condition*).	Each outside box must be plainly marked on top and on one side or end—"High explosives—Dangerous."	No label required	Stowage: Magazine Outside containers: Wooden boxes (ICC-14, 15A, 16A) not over 75 lb. gr. wt.	Not permitted	Not permitted	Not permitted.
High explosives (*nitrostarch when shipped in dry condition*)	Each outside box must be plainly marked on top and on one side or end "High explosives—Dangerous."	No label required	Stowage: Magazine Outside containers. Wooden boxes (ICC-14, 15A, 16A) not over 75 lb. gr. wt.	Not permitted	Not permitted	Not permitted.
High explosives (*fireworks that can be exploded en masse*).	Fireworks that can be exploded en masse by dropping the completed shipping package from a height of 6 feet or by the impact of a rifle bullet, if found safe for transportation.	No label required	Stowage: Magazine Outside containers. Wooden boxes (ICC-14, 15A, 16A) not over 140 lb. gr. wt.	Not permitted	Not permitted	Not permitted.

UNIVERSITY OF MICHIGAN LIBRARIES

Table A—Classification: Class A; dangerous explosives—Continued

Descriptive name of article	Characteristic properties cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
High explosives (propellant explosives, Class A).	Propellant explosives, Class A, are those propellant explosives which can be caused to deflagrate by contact with sparks or flame such as produced by safety fuse or an electric squib; or which contain a liquid explosive ingredient and which, when unconfined, can be detonated by means of a No. 8 test blasting cap, or which can be exploded, in at least 50% of the trials in the Bureau of Explosives' impact apparatus under a drop of 4 inches or more but cannot be exploded in more than 50% of the trials under a drop of less than 4 inches. Each keg or barrel must be marked on both ends: "High explosives—Dangerous." Each outside box must be plainly marked on top and on one side or end: "High explosives—Dangerous."	No label required.	Stowage: Magazine. Outside containers: Wooden barrels or kegs (ICC-10B) not over 200 lb. gr. wt. Metal kegs (ICC-13) at least 8 inches long, not over 150 lb. gr. wt. Bundles of metal kegs (ICC-13) roped, wrapped in burlap, canvas or similar materials, securely sewed or roped, not over 100 lb. net wt. Tight metal containers not over 200 lb. gr. wt. Tight wooden boxes with tight inside metal cases not over 200 lb. gr. wt. Wooden boxes (ICC-14, 15A, 15B, 15C) with ICC approved inside containers, not over 200 lb. gr. wt. Fiberboard boxes (ICC-23F, 23H) with ICC approved inside containers, not over 65 lb. gr. wt.	Not permitted.	Not permitted.	Not permitted.
Initiating or priming explosives.	Solid explosives which can be caused to detonate, when unconfined, by contact with sparks or flame such as produced by safety fuse or an electric squib; or which can be exploded in the Bureau of Explosives' impact apparatus in more than 50% of the trials under a drop of less than 4 inches.					
Blasting caps—more than 1,000. Blasting caps with safety fuse—more than 1,000. Electric blasting caps—more than 1,000.	Blasting caps are small tubes, usually made of an alloy of either copper or aluminum, closed at one end and loaded with a charge of initiating or priming explosives. Class A—Type 4, either with or without other suitable explosives. The total weight of explosives per unit shall not exceed 150 grains. Blasting caps which have been provided with a means of firing by an electric current, and sealed, are known as electric blasting caps. Do not stow blasting caps with any high explosive. Do not handle blasting caps at the same time as high explosives are being loaded. Each outside box must be plainly marked with the appropriate descriptive name of the contents as: "(number) Blasting caps—Handle carefully," "(number) Electric blasting caps—Handle carefully," "(number) Blasting caps with safety fuse—Handle carefully." In addition each box must bear the marking "Do not stow or load with any high explosive."	No label required.	Stowage: Magazine. Outside containers: Wooden boxes, (ICC-14, 15A, 16A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-23F, 23H) WIC, not over 75 lb. gr. wt.	Not permitted.	Not permitted.	Not permitted.

			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Boosters (explosive). Detonating fuses.	Boosters consist of a casing containing a high explosive and are used to increase the intensity of explosion of the detonator of a detonating fuze. Detonating fuzes are used in the military service to detonate the high explosive bursting charges of projectiles, mines, bombs, torpedoes and grenades. In addition to a powerful detonator, they may contain several ounces of a high explosive such as tetryl or dry nitrocellulose, all assembled in a heavy steel envelope. Do not stow boosters or detonating fuzes with any high explosive. Do not load at the same time as high explosives are being loaded. Each outside container must be plainly marked "Detonating fuzes—Handle carefully" or "Boosters (Explosive)—Handle carefully—Do not store or load with any high explosive."	No label required.	Stowage: Magazine. Outside containers: Strong tight wooden boxes, not over 100 lb. gr. wt. for detonating fuzes. Not over 300 lb. gr. wt. for boosters.	Not permitted.	Not permitted.	Not permitted.
Detonating primers.	Detonating primers are devices for commercial use which contain a detonator and an additional charge of explosives, all assembled in a suitable envelope. The total weight of explosives is more than 150 grains per unit. Do not stow detonating primers with any high explosive. Do not load at the same time as high explosives are being loaded. Each outside container must be plainly marked "Detonating primers—Handle carefully."	No label required.	Stowage: Magazine. Outside containers: Wooden boxes (ICC-14, 15A, 16A), not over 150 lb. gr. wt. Fiberboard boxes (ICC-23F, 23H) WIC, not over 75 lb. gr. wt.	Not permitted.	Not permitted.	Not permitted.
Initiating explosives *(in bulk in dry condition).*	----------	----------	Transportation prohibited.	Transportation prohibited.	Transportation prohibited.	Transportation prohibited.
Initiating explosives *(dinitrodiazodinitrophenol wet with not less than 40% by weight of water).*	For safety in transportation these substances are packed wet with water. Therefore, observe outside containers for signs of leakage. Reject leaking containers or ones showing signs of having leaked. Do not handle these substances at the same time as high explosives are being loaded. In handling and in stowage, avoid exposure to shock, friction, heat, and open flame. Sufficient outage in outside containers must be allowed to prevent rupture of container in freezing weather, or a mixture of denatured ethyl alcohol and water may be used to prevent freezing in transit. Each outside barrel, drum, or keg must be plainly marked "Initiating Explosives—Dangerous. Do not store or load with any high explosive."	No label required.	Stowage: Magazine. Outside containers: Steel barrels or drums (ICC-5, 5D), WIC, not over 220 lb. net dry wt. Wooden barrels or kegs (ICC-10B), WIC not over 220 lb. net dry wt.	Not permitted.	Not permitted.	Not permitted.

Rocket ammunition with explosive projectiles. Rocket ammunition with gas projectiles. Rocket ammunition with smoke projectiles. Rocket ammunition with incendiary projectiles. Rocket ammunition with illuminating projectiles.	Rocket ammunition is fixed ammunition which is fired from a tube, launcher, rails, trough, or other device, consisting of an igniter and propelling charge commonly described as a motor, and explosive projectile, gas projectile, smoke projectile, incendiary projectile, or illuminating projectile, fuzed or unfuzed. **IOO packing regulations require that detonating fuzes, tracer fuzes, explosive or ignition devices, bouchons or fuze parts with explosives contained therein, must not be assembled in ammunition or included in the same outside package unless shipped by, for or to the Departments of the Army, Navy, or Air Force of the U. S. Government, or unless of a type approved by the Bureau of Explosives.** Each outside package must be plainly marked with the appropriate descriptive name of the contents as: "Rocket ammunition with explosive projectiles," "Rocket ammunition with gas projectiles," "Rocket ammunition with smoke projectiles," "Rocket ammunition with incendiary projectiles," or "Rocket ammunition with illuminating projectiles."	No label required except "Rocket ammunition with gas projectiles loaded with a poisonous gas or liquid, Class A, and an explosive charge must bear the white "Poison gas" label.	Stowage: Magazine. Outside containers: Strong wooden or metal containers.	Not permitted.	Not permitted.	Not permitted.
Unstable explosives: Explosive compositions that ignite spontaneously. *Explosive compositions that undergo marked decomposition when subjected for 48 consecutive hours to a temperature of 167° F.* *Explosive compositions containing an ammonium salt and a chlorate.*			Transportation prohibited.	Transportation prohibited.	Transportation prohibited.	Transportation prohibited.

(See note to § 146.20-15.)

§ 146.20-200 *Table B—Classification: Class B; less dangerous explosives*

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Ammunition for cannon with nonexplosive projectile. Ammunition for cannon with empty projectile. Ammunition for cannon with inert-loaded projectile. Ammunition for cannon with solid projectile. Ammunition for cannon without projectile.	Ammunition for cannon with empty projectile, inert-loaded projectile, solid projectile, or without projectile, or shell, is fixed ammunition assembled in a unit consisting of the cartridge case containing the propelling charge and primer with empty, inert-loaded, or solid projectile, or without projectile or shell, which is fired from a cannon, mortar gun or howitzer. Each outside package must be plainly marked with the appropriate descriptive name of the contents as "Ammunition for cannon with empty projectile," "Ammunition for cannon with inert-loaded projectile," "Ammunition for cannon with solid projectile," "Ammunition for cannon without projectile."	No label required.	Stowage: "On deck under cover" "Tween decks." "Under deck." Outside containers: Strong wooden or metal containers.	Not permitted.	Not permitted.	Not permitted.
Fireworks, forbidden. The following fireworks or fireworks compositions shall not be offered for transportation: Firecrackers, flash crackers or salutes, exceeding 12 grains of explosive content. Fireworks combining an explosive with a detonator or blasting cap. Fireworks containing an ammonium salt and a chlorate. Fireworks containing yellow or white phosphorous. Fireworks or fireworks compositions that ignite spontaneously or undergo marked decomposition when subjected for 48 consecutive hours to a temperature of 75° C., (167° F.). Fireworks properly condemned by the Bureau of Explosives, except properly repacked samples for laboratory examinations. Toy torpedoes exceeding ⅝ in. diameter or containing a mixture of potassium chlorate, black antimony and sulfur exceeding 4 grains average weight of such explosive composition. Toy torpedoes containing a cap composed of red phosphorous and potassium chlorate exceeding ½ gram per cap.	Fireworks or fireworks compositions described here are, for the purposes of safety in transportation, forbidden to be offered or transported because of instability or risk of premature ignition or detonation.		Not permitted.	Not permitted.	Not permitted.	Not permitted.

			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Fireworks, special (*photographic flash powder*).	Special fireworks are manufactured articles designed primarily for the purpose of producing visible or audible pyrotechnic effects by combustion or explosion. (See "Fireworks common" under Class C explosives.) Examples are toy torpedoes, railway torpedoes, some firecrackers and salutes, exhibition display pieces, aeroplane flares, illuminating projectiles not fuzed and without expelling charges, flash powders in inner units not exceeding 2 ounces each, flash sheets in interior packages, flash powder or spreader cartridges containing not over 72 grains of flash powder each, and flash cartridges, consisting of a paper cartridge shell, small-arms primer, and flash composition, not exceeding 180 grains all assembled in 1 piece. Fireworks must be in a finished state, exclusive of mere ornamentation, as supplied to the retail trade and must be so constructed and packed that loose pyrotechnic composition will not be present in packages in transportation. Each outside container will be plainly marked: "Special fireworks—Handle carefully—Keep fire away." Do not stow in same compartment with any inflammable liquid or solid, inflammable compressed gas or combustible organic material.	Special fireworks.	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Wooden barrels or kegs (ICC-11B) not over 500 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 16A, 19A) not over 500 lb. gr. wt. Fiberboard boxes (ICC-12B) not over 65 lb. gr. wt. (not permitted for illuminating projectiles, toy torpedoes, aeroplane flares, and fireworks shells or fireworks bombs of which the mortar or firing device is not an integral part.)	Stowage in metal lockers located: "On deck under cover." "Tween decks readily accessible." NOTE: Stow in an accessible location where shipment may be readily observed and with fire extinguishing equipment easily available. Outside containers: Wooden barrels or kegs (ICC-11B) not over 500 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 16A, 19A) not over 500 lb. gr. wt. Fiberboard boxes (ICC-12B) not over 65 lb. gr. wt. (not permitted for illuminating projectiles, toy torpedoes, aeroplane flares, and fireworks shells or fireworks bombs of which the mortar or firing device is not an integral part.)	Ferry stowage (AA). Outside containers: Wooden barrels or kegs (ICC-11B) not over 500 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 16A, 19A) not over 500 lb. gr. wt. Fiberboard boxes (ICC-12B) not over 65 lb. gr. wt. (not permitted for illuminating projectiles, toy torpedoes, aeroplane flares, and fireworks shells or fireworks bombs of which the mortar or firing device is not an integral part.)	Ferry stowage (BB). Outside containers: Wooden barrels or kegs (ICC-11B) not over 500 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 16A, 19A) not over 500 lb. gr. wt. Fiberboard boxes (ICC-12B) not over 65 lb. gr. wt. (not permitted for illuminating projectiles, toy torpedoes, aeroplane flares, and fireworks shells or fireworks bombs of which the mortar or firing device is not an integral part.)
Fireworks, special (*flash or spreader cartridges not exceeding 72 grains of flash powder each*).	----do----------	Special fireworks.	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Wooden boxes (ICC-15A, 15B, 16A, 19A) WIC, not over 500 cartridges to an outside box. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt.	Stowage in metal lockers located: "On deck under cover." "Tween decks readily accessible." Outside containers: Wooden boxes (ICC-15A, 15B, 16A, 19A) WIC, not over 500 cartridges to an outside box. Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Propellant explosives	Propellant explosives are solid chemicals or solid chemical mixtures which function by rapid combustion of successive layers, generally with little or no smoke. Propellant explosives include smokeless powder for cannon, smokeless powder or solid propellant for rockets, jet thrust units or other devices. Propellant explosives as prepared for shipment that are also sensitive to detonation are class A explosives and are covered under "High explosives," § 146.20-100. Black powder is not classified as a propellant explosive (see Black powder—Low explosives, § 146.20-100). Each outside package must be plainly marked "Propellant explosives."	No label required.	Stowage—magazine or: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Wooden barrels or kegs (ICC-10B) not over 200 lb. gr. wt. Metal kegs (ICC-13) not over 150 lb. gr. wt. Bundles of metal kegs (ICC-13) roped, wrapped in burlap, canvas or similar materials, securely sewed and roped, not over 100 lb. net wt. Tight metal containers, not over 200 lb. gr. wt. Tight wooden boxes with tight inside metal cases, not over 200 lb. gr. wt. Wooden boxes (ICC-14A, 15A, 15B, 15C) with ICC approved inside containers, not over 200 lb. gr. wt. Fiberboard boxes (ICC 23F, 23H) with ICC approved inside containers, not over 65 lb. gr. wt.	Not permitted.	Not permitted.	Not permitted.
Propellant explosives in water (*smokeless powder for cannon or small arms*).	For propellant explosives shipped wet with water observe containers carefully for signs of leakage. Reject containers which are leaking or which show signs of having leaked. Each outside package must be plainly marked "Propellant explosives in water."	No label required.	Stowage—magazine or: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Steel barrels or drums (ICC-5, 5A, 5B, 6A, 6B, 6C) not over 55 gal. capacity. Wooden barrels or kegs (ICC-10A, 10B) not over 50 gal. capacity. Wooden boxes (ICC-15A) WIML ICC 2F, not over 200 lb. gr. wt.	Not permitted.	Not permitted.	Not permitted.
Propellant explosives in water, unstable, condemned, or deteriorated (*smokeless powder for cannon or small arms*).	For propellant explosives shipped wet with water observe containers carefully for signs of leakage. Reject containers which are leaking or which show signs of having leaked. Each outside package must be plainly marked "Propellant explosives in water."	No label required.	Stowage—magazine or: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Steel barrels or drums (ICC 5, 5A, 5B, 6A, 6B, 6C) not over 55 gal. capacity. Wooden barrels or kegs (ICC-10A, 10B) not over 50 gal. capacity. Wooden boxes (ICC 15A) WIMC ICC 2F, not over 200 lb. gr. wt. Tank cars (ICC-103, 103W).	Not permitted.	Not permitted.	Not permitted.

Blasting caps—1,000 or less. Blasting caps with safety fuse—1,000 or less caps. Electric blasting caps—1,000 or less.	Blasting caps are small tubes, usually made of an alloy of either copper or aluminum, closed at one end and loaded with a charge of initiating or priming explosives, Class A—Type 4, either with or without other suitable explosives. The total weight of explosives shall not exceed 150 grains. Blasting caps which have been provided with a means for firing by an electric current, and sealed, are known as electric blasting caps. Do not stow blasting caps with any high explosive. Do not handle blasting caps at the same time high explosives are being loaded. Each outside box must be plainly marked with the appropriate descriptive name of the contents as "(number) Blasting caps—Handle carefully." "(number) Electric blasting caps—Handle carefully." "(number) Blasting caps with safety fuse—Handle carefully." In addition each box must bear the marking "Do not stow or load with any high explosive."	No label required.	Stowage—portable magazines or metal lockers. Outside containers: Wooden boxes (ICC-14, 15A, 15A) not over 150 lb. gr. wt. Fiberboard boxes (ICC-23F, 23H) WIC, not over 75 lb. gr. wt. NOTE: Blasting caps in any quantity shall not be stowed in the same magazine with any other explosive or in any locker in which fireworks are stowed. They may be stowed in portable magazines or metal lockers provided such are located in cargo carrying compartments away from all sources of heat and in which no inflammable liquids, inflammable solids or oxidizing materials, corrosive liquids or inflammable compressed gases are stowed.	Not permitted.	Not permitted.	Not permitted.

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Cordeau detonant fuse	Cordeau detonant fuse is a fuse containing a core of pentaerythrite tetranitrate or cyclotrimethylene trinitramine not exceeding 110 grains per linear foot, overspun with yarns, tapes, and waterproofing compounds. Do not stow in the same compartment with inflammable liquids, inflammable solids and oxidizing materials, corrosive liquids or inflammable compressed gases. Each outside container must be plainly marked: "Cordeau detonant fuse—Handle carefully."	No label required.	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Strong wooden boxes not over 150 lb. gr. wt. Strong fiberboard boxes not over 65 lb. gr. wt.	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Strong wooden boxes not over 150 lb. gr. wt. Strong fiberboard boxes not over 65 lb. gr. wt.	Ferry stowage (AA) Outside containers: Strong wooden boxes not over 150 lb. gr. wt. Strong fiberboard boxes not over 65 lb. gr. wt.	Ferry stowage (BB). Outside containers: Strong wooden boxes not over 150 lb. gr. wt. Strong fiberboard boxes not over 65 lb. gr. wt.
Explosive cable cutters	Explosive cable cutters consist of a metal device containing a knife-edged component which is propelled by a small charge of an explosive compound. Do not stow in the same compartment with inflammable liquids, inflammable solids and oxidizing materials, corrosive liquids or inflammable compressed gases. Each outside container will be plainly marked: "Explosive cable cutters—Handle carefully."	No label required.	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Strong wooden boxes, not over 150 lb. gr. wt.	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Strong wooden boxes, not over 150 lb. gr. wt.	Ferry stowage (AA) Outside containers: Strong wooden boxes, not over 150 lb. gr. wt.	Ferry stowage (BB). Outside containers: Strong wooden boxes, not over 150 lb. gr. wt.
Explosive rivets	Metal rivets each containing not more than 75 milligrams of explosive composition placed in one end. Do not stow in same compartment with inflammable liquids, inflammable solids and oxidizing materials, corrosive liquids or inflammable compressed gases. Each outside container will be plainly marked: "Explosive rivets."	No label required.	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Strong metal or wooden boxes, not over 150 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Strong metal or wooden boxes, not over 150 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.	Ferry stowage (AA) Outside containers: Strong metal or wooden boxes, not over 150 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.	Ferry stowage (BB). Outside containers: Strong metal or wooden boxes, not over 150 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.
Fireworks, common: Fireworks other than those specifically enumerated here are classed as special fireworks (see Class B explosives).	Common fireworks are manufactured articles designed primarily for the purpose of producing visible or audible pyrotechnic effects by combustion or explosion. Common fireworks must be in the finished state, exclusive of mere ornamentation, as supplied to the retail trade and must be so constructed and packed that loose pyrotechnic composition will not be present in packages in transportation. No component part of any article listed here which is designed to produce an audible effect (other than propelling or expelling charges) shall contain pyrotechnical composition in excess of 2 grains in weight.

Fuzes. Percussion fuzes. Combination fuzes. Time fuzes. Tracer fuzes. Tracers.	Percussion fuzes, combination fuzes, and time fuzes are devices used to ignite the powder charges of ammunition or the black powder bursting charges of projectiles. Tracer fuzes and tracers are devices which are attached to projectiles and contain a slow-burning composition to show the flight of the projectiles at night. Do not stow in the same compartment with any inflammable liquids, inflammable solids and oxidizing materials, corrosive liquids, or inflammable compressed gases. Each outside box will be plainly marked with the appropriate descriptive name of the contents as: "Percussion fuzes—Handle carefully." "Combination fuzes—Handle carefully." "Time fuzes—Handle carefully." "Tracer fuzes—Handle carefully." "Tracers—Handle carefully."	No label required	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Strong wooden boxes not over 150 lb. gr. wt.	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Strong wooden boxes not over 150 lb. gr. wt.	Ferry stowage (AA). Outside containers: Strong wooden boxes not over 150 lb. gr. wt.	Ferry stowage (BB). Outside containers: Strong wooden boxes not over 150 lb. gr. wt.

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Igniter cord	Igniter cord consists of a wire uniformly covered with a combustible chemical mixture, countered with strands of wire and overspun with textile thread which, when ignited, burns at various rates according to design. Do not stow in the same compartment with inflammable liquids, inflammable solids and oxidizing materials, corrosive liquids or inflammable compressed gases. Each outside package must be plainly marked "Igniter cord."	No label required	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Strong wooden barrels, strong metal containers, strong wooden boxes, not over 200 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Strong wooden barrels, strong metal containers, strong wooden boxes, not over 200 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.	Ferry stowage (AA). Outside containers: Strong wooden barrels, strong metal containers, strong wooden boxes, not over 200 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.	Ferry stowage (BB). Outside containers: Strong wooden barrels, strong metal containers, strong wooden boxes, not over 200 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.
Igniters. Cartridge bags, empty, with black powder igniters. Delay electric igniters. Electric squibs. Fuse lighters or fuse igniters. Igniters. Safety squibs.	Cartridge bags, empty, with black powder igniters consist of empty bags having attached thereto an igniter composed of black powder. Delay electric igniters consist of small metal tubes containing a wire bridge in contact with a small quantity of ignition compound. Electric squibs consist of small tubes or blocks containing a small quantity of ignition compound in contact with a wire bridge. Fuse lighters or fuse igniters are small, cylindrical pasteboard or metal tubes containing an igniting composition in one end, the other end being open to permit insertion of safety fuse. Igniters consist of fiberboard, paper, or metal tubes containing a small quantity of igniting compound which is ignited by the action of a primer, pull wire or scratch composition. Safety squibs are small paper tubes containing a small quantity of black powder. One end of each tube is usually twisted and tipped with sulfur. Each outside box must be plainly marked with the appropriate descriptive name of the contents as: "Cartridge bags, empty, with black powder igniters," "Delay electric igniters," "Electric squibs," "Fuse lighters and fuse igniters," "Igniters," or "Safety squibs."	No label required	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Metal barrels or drums. Strong wooden barrels or strong wooden boxes, not over 150 lbs. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt. Note: Shall not be stowed in the same compartment with inflammable liquids, inflammable solids and oxidizing materials, corrosive liquids or inflammable compressed gases.	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Metal barrels or drums. Strong wooden barrels or strong wooden boxes, not over 150 lbs. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt. Note: Shall not be stowed in the same compartment with inflammable liquids, inflammable solids and oxidizing materials, corrosive liquids or inflammable compressed gases.	Ferry stowage (AA). Outside containers: Metal barrels or drums. Strong wooden barrels or strong wooden boxes, not over 150 lbs. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.	Ferry stowage (BB). Outside containers: Metal barrels or drums. Strong wooden barrels or strong wooden boxes, not over 150 lbs. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.
Instantaneous fuse	Instantaneous fuse is cotton impregnated with meal powder. Do not stow in the same compartment with inflammable liquids, inflammable solids and oxidizing materials, corrosive liquids, or inflammable compressed gases. Each outside box will be marked: "Instantaneous fuse."	No label required	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Strong wooden barrels or strong wooden boxes not over 150 lb. gr. wt.	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Strong wooden barrels or strong wooden boxes not over 150 lb. gr. wt.	Ferry stowage (AA). Outside containers: Strong wooden barrels or strong wooden boxes not over 150 lb. gr. wt.	Ferry stowage (BB). Outside containers: Strong wooden barrels or strong wooden boxes not over 150 lb. gr. wt.

			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Primers Cannon primers. Combination primers. Empty cartridge cases, primed. Grenades, empty, primed. Percussion caps. Small-arms primers.	Primers are devices used to ignite the powder charges of ammunition or the black powder bursting charge of projectiles. For small-arms ammunitions the primers are "small arms primers" or "percussion caps." Do not stow in the same compartment with inflammable liquids, inflammable solids and oxidizing materials, corrosive liquids or inflammable compressed gases. Each outside box must be plainly marked with the appropriate descriptive name of the contents as: "Cannon primers—Handle carefully," "Combination primers—Handle carefully," "Empty cartridge cases, primed—Handle carefully," "Grenades, empty, primed—Handle carefully," "Percussion caps Handle carefully," "Small-arms primers—Handle carefully."	No label required.	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Strong tight wooden boxes WIC, not over 150 lb. gr. wt. Empty cartridge cases, primed, may also be shipped in strong, tight, outside fiberboard boxes. Small-arms primers may also be shipped in (ICC-12B) fiberboard boxes, with inside containers, not over 5,000 primers shall be packed in each outside package.	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Strong tight wooden boxes WIC, not over 150 lb. gr. wt. Empty cartridge cases, primed, may also be shipped in strong, tight, outside fiberboard boxes. Small-arms primers may also be shipped in (ICC-12B) fiberboard boxes, with inside containers, not over 5,000 primers shall be packed in each outside package.	Ferry stowage (AA) Outside containers: Strong tight wooden boxes WIC, not over 150 lb. gr. wt. Empty cartridge cases, primed, may also be shipped in strong, tight, outside fiberboard boxes. Small-arms primers may also be shipped in (ICC-12B) fiberboard boxes, with inside containers, not over 5,000 primers shall be packed in each outside package.	Ferry stowage (BB). Outside containers: Strong tight wooden boxes WIC, not over 150 lb. gr. wt. Empty cartridge cases, primed, may also be shipped in strong, tight, outside fiberboard boxes. Small-arms primers may also be shipped in (ICC-12B) fiberboard boxes, with inside containers, not over 5,000 primers shall be packed in each outside package.
Safety fuse	Safety fuse consists of a core of black powder overspun with yarns, tapes, and or waterproofing compounds. Do not stow in the same compartment with inflammable liquids, inflammable solids and oxidizing materials, corrosive liquids or inflammable compressed gases. Each outside package must be plainly marked "Safety fuse."	No label required.	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Strong wooden barrels, strong metal containers, strong wooden boxes, not over 200 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Strong wooden barrels, strong metal containers, strong wooden boxes, not over 200 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.	Ferry stowage (AA) Outside containers: Strong wooden barrels, strong metal containers, strong wooden boxes, not over 200 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.	Ferry stowage (BB). Outside containers: Strong wooden barrels, strong metal containers, strong wooden boxes, not over 200 lb. gr. wt. Strong fiberboard boxes, not over 65 lb. gr. wt.
Small-arms ammunition Small-arms ammunition, tear gas cartridges.	Small-arms ammunition designed to be fired from a pistol, revolver, rifle, or shotgun held by the hand or by the hand and shoulder, or machine guns of caliber less than .75, or blank remover cartridges fired from catapults and canopies, is fixed ammunition consisting of a metallic or paper cartridge case, a primer and a propelling charge, with or without bullet or shot, tear gas material, tracer components, or incendiary compositions or mixtures, but not including bullets loaded with high explosives. Do not stow small-arms ammunition in any compartment in which are stowed inflammable liquids, inflammable solids or oxidizing materials or inflammable compressed gases. Each outside package will be plainly marked: "Small-arms ammunition." In addition to the above, packages containing cartridges with tear gas material will be marked "Tear gas cartridges" and will be labeled with "Tear Gas" label.	No label required.	Stowage: "On deck in open." "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Outside containers: Wooden boxes WIC. Fiberboard boxes WIC. Metal containers. When packed with nonexplosive or noninflammable articles, or with small arms primers or percussion caps in quantity not to exceed 5 pounds, the following weight limitations apply: Wooden boxes, not over 75 lb. net wt. Fiberboard boxes, not over 65 lb. gr. wt.	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Wooden boxes WIC. Fiberboard boxes WIC. Metal containers. When packed with nonexplosive or nonflammable articles, or with small arms primers or percussion caps in quantity not to exceed 5 pounds, the following weight limitations apply: Wooden boxes, not over 75 lb. net wt. Fiberboard boxes, not over 65 lb. gr. wt.	Ferry stowage (AA) Outside containers: Wooden boxes WIC. Fiberboard boxes WIC. Metal containers. When packed with nonexplosive or nonflammable articles, or with small arms primers or percussion caps in quantity not to exceed 5 pounds, the following weight limitations apply: Wooden boxes, not over 75 lb. net wt. Fiberboard boxes, not over 65 lb. gr. wt.	Ferry stowage (BB). Outside containers: Wooden boxes WIC. Fiberboard boxes WIC. Metal containers. When packed with nonexplosive or nonflammable articles, or with small arms primers or percussion caps in quantity not to exceed 5 pounds, the following weight limitations apply: Wooden boxes, not over 75 lb. net wt. Fiberboard boxes, not over 65 lb. gr. wt.

SUBPART—DETAILED REGULATIONS GOVERNING POISONOUS ARTICLES

146.25-1 Definition of poisonous articles.
146.25-5 Extremely dangerous poisons, Class A, poison gas label.
146.25-10 Less dangerous poisons, Class B, liquids and solids, poison label.
146.25-15 Tear gas or irritating substances, Class C, tear gas label.
146.25-20 Radioactive materials, Class D, radioactive materials label.
146.25-25 Exemptions for radioactive materials.
146.25-30 Packing and shielding of radioactive materials.
146.25-35 Stowage and handling on board vessels.
146.25-40 Limitation of "On deck" stowage.
146.25-45 Limitation on all stowage.
146.25-50 Care following leakage or sifting of poisonous articles.
146.25-55 Exemptions for poisons, Class B.
146.25-60 Cylinder valve protection.
146.25-100 Table H—Classification: Class A; extremely dangerous poisons.
146.25-200 Table H—Classification: Class B; less dangerous poisons.
146.25-300 Table H—Classification: Class C; tear gas or irritating substances.
146.25-400 Table H—Classification: Class D; radioactive materials.

AUTHORITY: §§ 146.24-1 to 146.25-400, inclusive, issued under R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C. 1976.

SUBPART—DETAILED REGULATIONS GOVERNING COMPRESSED GASES

§ 146.24-1 *Definition of compressed gases.* A compressed gas is defined by the Interstate Commerce Commission regulations as set forth in § 146.24-5, and such definition is binding upon all shippers making shipments of compressed gases by common carrier vessels engaged in interstate or foreign commerce by water. This definition is accepted and adopted and forms part of the regulations in this subchapter applying to all shippers making shipments of compressed gases by any vessel, and shall apply to the owners, charterers, agents, master, or other person in charge of a vessel and to other persons, transporting, carrying, conveying, storing, stowing or using compressed gases on board any vessel subject to R. S. 4472, as amended (46 U. S. C. 170), and the regulations in this subchapter.

§ 146.24-5 *Compressed gas defined.* (a) A compressed gas for the purposes of the regulations in this part is defined as any material or mixture having in the container either an absolute pressure exceeding 40 pounds per square inch at 70° F., or an absolute pressure exceeding 104 pounds per square inch at 130° F., or both; or any liquid inflammable material having a Reid [1] vapor pressure exceeding 40 pounds per square inch absolute at 100° F. (See §§ 146.25-1 to 146.25-400, inclusive, for gases defined and classified as poisonous.)

(b) Any compressed gas, as defined in paragraph (a) of this section, shall be classified as an inflammable compressed gas if either:

(1) A mixture of 13 percent or less (by volume) with air forms an inflammable mixture; [2] or,

(2) The inflammability range [2] with air is greater than 12 percent regardless of the lower limit.

§ 146.24-10 *Mixtures of compressed gas and poisonous materials.* Any compressed gas mixtures containing poisonous articles Class A, Class B, or Class C in such proportion that the mixture would be classed as a poisonous article under §§ 146.25-1 to 146.25-15, inclusive, must be shipped in cylinders and in accordance with the regulations prescribed for such poisonous mixtures.

§ 146.24-15 *Containers.* (a) Compressed gases shall not be offered or ac-

[1] American Society for Testing Materials Method of Test for Vapor Pressure of Petroleum Products (D-323). Copies of this specification are available for reading purposes at U. S. Coast Guard Headquarters, Washington 25, D. C. This specification may be purchased from the American Society for Testing Materials, 1916 Race Street, Philadelphia 3, Pa.

[2] These limits shall be determined at atmospheric temperature and pressure. The method of sampling and the test procedure shall be acceptable to the Interstate Commerce Commission (Bureau of Explosives). The inflammability range is defined as the difference between the minimum and maximum percentage by volume of the material in mixture with air that forms an inflammable mixture.

UNIVERSITY OF MICHIGAN LIBRARY

cepted for transportation except when contained in metal cylinders unless otherwise specifically permitted in drums, tanks, motor vehicles, tank cars, or other containers as shown in the table for compressed gases, in § 146.24–100.

(b) Only containers that comply with Interstate Commerce Commission specifications and are charged in accordance with Interstate Commerce Commission regulations shall be accepted, except that foreign cylinders, which are permitted under conditions shown in paragraph (c) of this section, may be accepted on board vessels for export shipment.

(c) Cylinders of foreign manufacture received from foreign countries for charging with compressed gas may be accepted for transportation as indicated in the table for the particular character vessels involved provided such cylinders are retested and recharged in accordance with the Interstate Commerce Commission regulations applying to such cylinders and the compressed gas involved. The bill of lading or other shipping paper shall, when possible, identify the cylinder and shall carry the following certification:

These cylinders have been retested and refilled in accordance with the Interstate Commerce Commission requirements for export.

(d) The regulations in this part require that cylinders offered for transportation on board vessels shall have their valves protected by one of the following methods:

(1) By metal caps securely attached to the cylinders and of sufficient strength to protect the valve from injury during transit.

(2) By having the valves recessed into the cylinders or otherwise protected so that they will not be subject to a blow if the cylinder is dropped on a flat surface.

(3) By enclosing the cylinder in a box or crate of substantial construction so as to give proper protection to the valves. These outside containers shall be marked "Inside Packages Comply With Prescribed Specifications", and the appropriate label shall be affixed thereto.

(e) All containers partially or completely filled with a compressed gas shall have the proper label attached except as the regulations in this part may specifically exempt such labeling requirements.

§ 146.24–20 *Exemptions for compressed gases.* Compressed gases, except poisonous gases as defined by the regulations in this part, are exempt from specification packaging, marking other than name of contents, and labeling requirements as follows:

(a) In cylinders or tubes not exceeding 2-inch outside diameter, and of not more than 4-fluid-ounce capacity.

(b) Metal containers not over 1 quart capacity charged to not over 170 pounds per square inch at 70° F., or containers not over 30 gallons capacity charged to not over 75 pounds per square inch at 70° F., filled with nondangerous material to not over 90 percent capacity at 70° F., and then charged with nonflammable, nonliquefied gas. Each container must be tested before shipment to 3 times the gas pressure at 70° F., and, when refilled and reshipped, must be retested at this pressure before each shipment.

(c) Inside nonrefillable metal containers charged with a solution of materials and compressed gas or gases, which is nonpoisonous and nonflammable and of capacity not to exceed 30 cubic inches (16.6 fluid ounces). Pressure in the container not to exceed 55 pounds per square inch absolute at 70° F., and the liquid content of the material and gas must not completely fill the container at 130° F. Each completed container filled for shipment must have been heated until content reached a minimum temperature of 130° F., without evidence of leakage, distortion or other defect.

(d) Carbonated beverages.

(e) Foodstuffs, soaps, or cosmetics, in metal cans with soluble or emulsified compressed gas, provided the pressure in the container does not exceed 105 pounds per square inch absolute at 70° F., or 140 pounds per square inch absolute at 130° F. The metal container must be capable of withstanding without bursting a pressure of 2 times the pressure of the contents at 70° F., or 1½ times the pressure of the contents at 130° F., whichever is greater.

(f) Refrigerant gases, except poisonous and inflammable gases as defined by the regulations in this subchapter, may be shipped in ICC–2P inside metal containers equipped with safety devices of a type approved by the Bureau of Explosives and packed in strong wooden or fiber boxes of such design as to protect valves from injury or accidental functioning under conditions incident to transportation. Pressure in the container shall not exceed 85 pounds per square inch, absolute, at 70° F. Each completed metal container filled for shipment shall be heated until content reaches a minimum temperature of 130° F. without evidence of leakage, distortion, or other defect. Each outside shipping container shall be plainly marked "Inside containers comply with prescribed ICC specifications."

§ 146.24–25 *Stowage on board vessels.* All compressed gases permitted for transportation on board vessels shall, when taken on board a vessel, be stowed in accordance with the provisions applying to the particular character of vessel as shown in the table forming § 146.24–100, and the detailed requirements for stowage shown therein.

§ 146.24–30 *"On deck" stowage.* Compressed gases which are permitted any type of "On deck" stowage by the provisions of the table forming § 146.24–100, shall be properly secured, when so stowed, in a manner satisfactory to the master or other person in charge of the vessel consistent with the following conditions:

(a) That the vessel has open spaces on deck suitable for such purposes of stowage.

(b) That the vessel has sufficient freeboard to afford structural protection from seas or adequate protection and security by bulwarks.

(c) Cylinders shall be stowed on their sides unless racks are provided for vertical stowage.

(d) Cylinders shall not be carried "On deck" over holds containing coal.

(e) When stowed "On deck protected" the cylinders shall be protected from the direct rays of the sun by means of structural erections or awnings. Tarpaulins covering cylinders and in contact therewith are not considered adequate protection. Protection by use of wood dunnage is permitted.

§ 146.24–35 *"Under deck" stowage.* (a) Cylinders stowed "Under deck" shall be stowed in cool compartments or holds either capable of being ventilated or constructed gas tight, protected from open flame and any source of artificial heat, clear of living spaces, either crew or passenger, and readily accessible from hatches or cargo holds.

§ 146.24–40 *Stowage clearance, ocean going vessels.* Containers of inflammable compressed gas stowed either "On deck" or "Under deck" on board vessels on ocean voyages shall be stowed at least 8 feet clear of the ship's side; containers of non-inflammable compressed gas shall be stowed at least 3 feet clear of the ship's side.

§ 146.24–45 *Stowage clearance, vessels on inland waters.* Containers of inflammable compressed gas stowed either "On deck" or "Under deck" on board vessels on inland water voyages, including lakes, bays, sounds, rivers, and the Great Lakes, shall be stowed at least 3 feet clear of the vessel's side.

§ 146.24–50 *Stowage securing means.* In the stowage of all cylinders of compressed gases, securing means shall be such as to prevent any movement. Wooden or metal cradles or racks securely stopped, coir rope matting, rope grommets or squared metal shoes fitted at each end of each cylinder are types of acceptable means for stowage. Cylinders packed in squared wooden boxes need not be stowed in cradles or racks. When cylinder stowages are not provided with locking means, shoring or lashing with wire cable shall be provided to prevent movement. Dunnage shall be provided under the first tier of all cylinders so they shall not rest directly on a steel or iron deck. Lashings shall be secured to pad eyes or other permanent structural parts of the vessel. Pipe rails shall not be used to secure lashings.

§ 146.24–55 *Stowage of compressed gas and explosives.* (a) Cylinders containing an inflammable compressed gas shall not be transported or stored on any vessel carrying explosives unless:

(1) When carried "on deck" on vessels having machinery spaces amidship, the engine and boiler room spaces intervene between the holds which contain the explosive and the spaces over which the cylinders are stowed.

(2) When carried "on deck" on vessels having machinery spaces aft, the bridge structural erections shall intervene between the holds which contain the explosives and the spaces over which the cylinders are stowed. This stowage shall not be allowed unless it provides a distance between the stowages of at least one complete hold space.

(3) When carried "Under deck", the engine and boiler room spaces, or one complete hold free of any explosives or inflammable liquid shall intervene between the stowage of the explosives and the cylinders containing the gases.

(b) Inflammable compressed gases shall not be stowed in the same compartment in which inflammable liquids are stowed, nor shall they be stowed above, below, or adjacent to a compartment in which inflammable liquids in excess of 1 ton are stowed, except that small vessels, having only 2 holds adjacent to each other, may stow inflammable liquids and inflammable compressed gases in adjacent holds, provided such are separated from each other by the maximum horizontal distance available.

(c) Cylinders shall not be overstowed with other dangerous articles of cargo.

§ 146.24–60 *Stowage of cylinders containing chlorine.* Cylinders or other containers of chlorine shall not be stowed in the same compartment with sodium metallic, potassium metallic, phosphorus, copper or brass leaf or sheets, powdered antimony, turpentine, ammonia, finely divided organic material, nor with the following compressed gases: coal gas, hydrogen, or acetylene.

§ 146.24–65 *Instructions regarding lights and smoking.* Instructions shall be given by the master or other person in charge of the vessel to all members of the crew regarding the hazards of inflammable gases. The use of open flame lights and smoking is prohibited in the vicinity of deck cargoes of inflammable compressed gases. The master or other person in charge of this vessel shall cause "NO SMOKING" warning signs to be posted in this vicinity of such deck cargoes.

§ 146.24–70 *Leaking cylinders not accepted.* A leaking cylinder or other container of compressed gas shall not be accepted for transportation.

§ 146.24–75 *Report of leaking or damaged cylinders.* (a) The owner, charterer, agent, master or person in charge of a vessel shall report in writing each occurrence of leaking or damaged cylinders of compressed gas to the District Commander of the United States Coast Guard or his authorized representative, for the district in which the substance was taken on board the vessel, setting forth a description of the container, and specification markings appearing thereon, the damage sustained, when possible a reason for the damage, the name and address of the consignor and consignee (or shipping mark) and a statement relative to the disposition of the container.

(b) When the failure of a cylinder of compressed gas results in a casualty involving loss of life, personal injury or damage to the vessel no report other than those required by the provisions of §§ 136.05–1 to 136.05–20, inclusive, of this chapter, shall be made.

§ 146.24–80 *Liquid chlorine in bulk.* (a) Liquid chlorine may be transported in bulk on board Class "AA", "BB", or "BC" cargo barges when loaded in Class I arc-welded steel tanks (pressure vessel type), which are independent of the structure of the vessel.

(b) (1) New or existing barges proposed to be used for the transportation of chlorine in bulk shall be approved. Detail plans showing the design and construction of the barges shall be submitted for such approval. An approved barge shall be maintained in accordance with the provisions of the initial approval, normal wear and wastage excepted. Failure to maintain such physical condition may result in the withdrawal of said approval.

(2) Tanks shall be fabricated, constructed and tested in accordance with the applicable provisions of the regulations in Subchapter F (Marine Engineering) of this chapter, which are also published in a pamphlet entitled "Marine Engineering Regulations and Material Specifications" by the U. S. Coast Guard. In addition to other markings required to be shown upon the tank, the water capacity of the tank in pounds shall also be stamped and stenciled thereon. Plans shall be submitted when requesting approval.

(c) Tanks shall be designed for an allowable working pressure of not less than 300 pounds per square inch and the safety valves shall be set at the maximum allowable working pressure of the tank. Each tank shall be provided with a manhole nozzle and cover on top of the tank of sufficient diameter to permit access to the interior of the tank and to provide for the proper mounting of venting, loading, unloading and safety valves. Other openings in the tank are prohibited.

(d) A protective housing of approved design shall be provided over the manhole cover and the valves and other openings in said cover, and so constructed as to provide that any leakage of the lading occurring around the cover, valves, gaskets, safety devices, etc., can readily be discharged into the water alongside the barge.

(e) Independent tanks shall be so fitted on board the barge as to provide sufficient space for visual inspection around the tanks and any adjacent fixed structural part of the barge, or in lieu thereof the installation shall be such as to make it practicable to move said tanks for the inspection of the structure of the barge and the tanks.

(f) The design indicative of the manner in which the tanks are to be installed, supported, and secured on board the barge shall be approved prior to installation. Tanks shall be supported in steel cradles and secured in place by means of base anchorages or steel bands. No appendages shall be welded to a tank after said tank has been stress relieved.

(g) The maximum weight of chlorine loaded into a tank shall not exceed 1.25 times the fresh water capacity of the tank. When more than one tank is installed in a barge, said tanks shall not be interconnected, either directly or by a manifold. When a tank is being filled or discharged no other of the barge's cargo tanks shall be connected to said filling or discharge line. Filling and discharge pipe connections shall be kept disconnected at the cargo tank, except when actually loading or unloading the lading of the cargo tank and the outlet valves on the tank shall, when the filling or discharge line is disconnected, be completely plugged or blanked off.

(h) Because of the importance of the requirement that tanks shall not be loaded with chlorine in excess of 1.25 times the water capacity (weight basis) the following procedure is required to be followed:

(1) The cargo tank to be filled shall be inspected to insure that it is empty and free from foreign matter. After being again made tight the tank shall be evacuated to at least 20 inches of mercury and then loaded with chlorine through a direct pipe line from a shore tank that is mounted on scales so that a predetermined weighted amount of chlorine is loaded into a cargo tank on board the barge. Any vapor vented during the loading operation shall be ignored in calculating the safe carrying capacity of the cargo tank.

(2) After the loading operation is completed the vapor above the liquid chlorine shall be analyzed and if it should contain less than 80 percent chlorine, vapors shall be withdrawn through the vent line until the vapor content in the cargo tank shows at least 80 percent chlorine. The arsenious oxide or the potassium iodide methods of analysis shall be used in determining the percentage of chlorine in the vapor.

(3) Upon completion of the loading of a cargo tank and after filling connections are removed, the cover plate gasket and fittings attached to the cover plate shall be tested for leakage of chlorine. This shall be done by using the aqua ammonia method.

(4) The chlorine shall be unloaded by taking advantage of its vapor pressure to force the liquid out of the tank. If desired, compressed air may be used, provided it has been dried by passing it over activated aluminum oxide, silica gel, or other approved drying agent. The compressed air system shall contain a safety valve arranged and set so that the air pressure in the cargo tank cannot exceed 150 pounds per square inch gauge.

(5) A flexible metal connection, of a design to be approved, shall be fitted in each filling discharge, and return pipe line to compensate for movement of the barge during the operation of filling or discharge.

(6) A diagrammatic sketch of filling and discharge systems shall be submitted when requesting approval. Complete information shall be indicated by legends shown on the sketch.

(7) Alternate methods of filling or discharging the lading may be submitted for approval for use.

(i) [Reserved]

(j) Cargo tanks shall be examined and retested every 2 years in the presence of an inspector of the Coast Guard. The examination shall consist of a thorough internal and external inspection. The hydrostatic test shall be at a pressure of 450 pounds per square inch. The relief valve or valves shall be dismantled, overhauled, and reset at the time of this biennial inspection. Said valve or valves may be dismantled, overhauled, and reset at such other times as is the desire of the carrier; provided such dismantling, overhauling, and resetting are made with the cognizance of and under such conditions as are agreed upon with the Officer in Charge, Marine Inspection. Upon

satisfactory conclusion of test at the time of the biennial inspection, the inspector shall stamp upon the tank the date and other identification necessary to indicate authority for continued use of the cargo tanks and relief valves. When a carrier finds it necessary to replace a relief valve, he shall report the change in writing to the Officer in Charge, Marine Inspection, in the district where the change took place or at the first port of call. The replacement shall be the same size, capacity, and material as the replaced valve and shall be set to relieve at the safe working pressure of the tank.

(k) [Reserved.]

(l) (1) No other kind of cargo except liquid caustic soda shall be on board any barge at the same time that chlorine in either liquid or vapor form is present in a cargo tank

(2) Chlorine tanks shall not be installed within liquid caustic soda tanks.

(3) Barges used for the transportation of chlorine and liquid caustic soda shall be of steel construction.

(m) The following substances shall not be used as stores on board barges transporting chlorine in bulk: Hydrogen, methane, liquefied petroleum gases, acetylene, ammonia, methyl ether, ethyl phosphine, turpentine, compounds containing such substances, metallic powders, finely divided metals or finely divided organic material.

(n) Repairs involving the use of welding or burning equipment shall not be undertaken on the barge while chlorine in either liquid or vapor form is present in the tanks, except in an emergency involving the safety of the barge.

(o) During the time chlorine cargo is laden in the tanks the barge shall be under constant surveillance. A towing vessel engaged in transporting such barges shall not leave the barge unattended except when the barge is moored at a pier, wharf, dock or other terminal and then only if such facility is provided with watchman or guard service. When the barge is at the consignor's or consignee's terminal, watchman or guard service shall be provided by said consignor or consignee.

(p) The Interstate Commerce Commission's standard "Dangerous" placard shall be displayed in four locations on the barge when chlorine is laden in the tanks. A placard shall be posted approximately midship on each side and facing outboard. A placard shall be posted at each end of the barge at about the ends of the tanks facing outboard. Racks for mounting such placards will be so arranged as to provide clear visibility and be protected from becoming readily damaged or obscured. After unloading and before a tank or tanks are gas-freed, the placard shall be reversed to show the "Dangerous-Empty" legend.

(q) The word "approved" when used in this section shall mean approved by the Commandant, U. S. Coast Guard.

§ 146.24-85 *Anhydrous ammonia in bulk.* (a) Anhydrous ammonia may be transported in bulk on board Class "AA", "BB", or "BC" cargo barges and cargo vessels when loaded in unfired pressure vessel type tanks independent of the structure of the vessel.

(b) New or existing barges and cargo vessels proposed to be used for the transportation of anhydrous ammonia in bulk shall be constructed or altered in accordance with the applicable regulations in this chapter.

(c) The cargo tanks shall meet the requirements for Class II arc-welded unfired pressure vessels and shall be fabricated, inspected, and tested in accordance with the applicable requirements of Subchapter F (Marine Engineering) of this chapter.

(d) (1) Unlagged cargo tanks subject to atmospheric temperatures shall be designed for a pressure of not less than 250 pounds per square inch gauge.

(2) Where cargo tanks are lagged as required by paragraph (1) (1) of this section, the tanks shall be designed for a pressure of not less than 225 pounds per square inch gauge.

(3) Refrigerated cargo tanks, in which the temperature of the liquid ammonia is maintained below the normal atmospheric temperatures, shall be designed for a pressure of not less than the vapor pressure corresponding to the temperature of the liquid at which the system is to be maintained, but in no case shall the design pressure be less than 90 pounds per square inch gauge.

(e) Each tank shall be provided with not less than a 12" x 16" or a 15" diameter manhole fitted with a cover located above the maximum liquid level and as close to the top of the tank as possible.

(f) (1) Independent tanks shall be arranged in the barge or vessel so as to provide a minimum clearance of not less than 24 inches from the vessel's side and not less than 15 inches from the vessel's bottom. Where more than one tank is installed in a vessel, the distance between such tanks shall be not less than 15 inches. Alternate provisions may be made for moving such tanks to provide adequate inspection and maintenance of the vessel's structure and the tanks.

(2) The design shall show the manner in which the tanks are to be installed, supported, and secured in the barge or vessel and shall be approved prior to installation. Tanks shall be supported in steel saddles and securely anchored in place. If the tanks are required to be stress-relieved no appendages shall be welded to the tanks after they have been stress-relieved.

(3) Tanks may be located in dry cargo holds or in liquid cargo tanks and may be installed "on deck" or "under deck" with the tank protruding above deck. On installation where a portion of the tank extends above the weather deck, provision shall be made to maintain the weather tightness of the deck except that vessels operating on protected inland waters may have tanks located in the holds of hopper type barges without the watertightness of the deck being maintained. All tanks shall be installed with the manhole opening located above the weather deck.

(4) Sides of cargo barges shall be provided with suitable guards as an added protection against the cargo tanks becoming damaged as a result of collision.

(5) The anhydrous ammonia tanks may be installed in the bulk liquid cargo tanks provided the liquid surrounding the anhydrous ammonia tanks complies with the following chemical and physical properties:

(i) Boiling point above 125° F. at atmospheric pressure.

(ii) Inert to ammonia at 100° F. at atmospheric pressure.

(iii) Noncorrosive in the liquid and vapor phase to the ammonia tanks and piping.

(g) (1) Upon satisfactory completion of tests and inspection, the following marking, at least ⅜ inch high, shall be stamped into the metal of the tank or stamped into a noncorrodible name plate permanently attached to the tank by means of welding.

Name and address of fabricator

---

p. s. i. Design pressure | p. s. i. Shop test pressure

Inspector's number, initials, and CG symbol

Manufacturer's serial number

Date of manufacture | U. S. gallons Water capacity

(2) In addition to the markings required to be stamped on the tank, the legend, "Anhydrous Ammonia Only", shall be stenciled or painted in black letters approximately 4 inches high upon the dome or upper portion of the tank.

(3) All tank inlet and outlet connections, except safety relief valves, liquid level gauging devices, and pressure gauges shall be labeled to designate whether they communicate with the vapor or liquid space. Labels of noncorrosive material may be attached to valves.

(4) All tank markings shall be permanently and legibly stamped in a readily visible position. If the tanks are lagged, the markings attached to the tank proper shall be duplicated on the outside jacket of the lagging.

(h) (1) All valves, flanges, fittings, and accessory equipment shall be of a type suitable for use with anhydrous ammonia, and shall be made of forged steel, in accordance with the requirements in Part 51 of this chapter (Subchapter F—Marine Engineering). Valves shall be fitted with noncorrosive material suitable for ammonia service. Valves, flanges, and pipe fittings shall be of the square or round ammonia tongue and groove type or raised-face American Standard Association 300-pound standard, fitted with suitable soft gasket material. Welded fittings shall be used wherever possible, and the number of pipe joints shall be held to a minimum. Nonferrous materials, such as copper, copper alloys, and aluminum alloys, and ferrous materials, such as cast iron and Grade B cupola malleable iron shall not be used in the construction of valves, fittings, or accessory equipment.

(2) Piping shall be of seamless drawn steel designed for the maximum pressure to which the system may be subjected but in no case shall pipe of thickness less than American Standards Association Schedule 40 be employed. In case of piping on the discharge side of the liquid pumps or vapor compressors, the design shall be for a pressure of not less than the pump or compressor relief valve setting, or provided the piping is not fitted with relief valves, the design pressure shall not be less than the total discharge head of the pump or compressor.

(3) Each tank shall be provided with the necessary fill and discharge liquid and vapor shut-off valves, safety valves, liquid level gauging devices, thermometer well, and pressure gauges which shall be grouped in the smallest practicable space and shall be suitably protected against mechanical damage. Other openings in tanks, except as specifically permitted in the regulations in this section are prohibited.

(4) All liquid and vapor connections to tanks, except safety relief valves and liquid level gauging devices and pressure gauges described in subparagraphs (7) and (8) of this paragraph, shall be equipped with automatic excess flow valves, or in lieu thereof, may be fitted with quick closing internal stop valves. The control mechanism for such valves shall be provided with a secondary control which will cause the internal stop valves to close automatically in case the liquid or vapor line is broken. The excess flow or internal stop valve shall be located on the inside of the tank or outside where the piping enters the tank; in the latter case, installation shall be made in such a manner that any undue strain will not cause breakage between the tank and the excess flow or internal stop valve.

(5) Liquid level gauging devices shall be of the following types: magnetic, rotary tube, slip tube, fixed tube, automatic float, or such other suitable type as may be approved by the Commandant.

(6) All liquid level gauging devices shall be designed to indicate the maximum level to which the tank may be filled with liquid at temperatures between 20° F. and 130° F.

(7) Gauging devices that require bleeding of the product to the atmosphere, such as rotary tube, fixed tube, and slip tube, shall be so designed that the bleed valve maximum opening is not larger than a No. 54 drill size, unless provided with an excess flow valve.

(8) Pressure gauge connections need not be equipped with excess flow valves if the openings are not larger than a No. 54 drill size.

(9) Where possible, provision shall be made for expansion and contraction of piping by means of seamless steel pipe expansion bends. Special consideration will be given for packless type expansion joints. Slip type expansion joints are prohibited.

(10) Piping shall be provided with adequate support to take the weight of the piping off the valves and fittings.

(i) (1) Each tank shall be fitted with two or more approved safety relief valves of either the internal or external spring-loaded type suitable for ammonia service.

(2) Each safety relief valve shall be set to discharge at a pressure not in excess of the design pressure of the tank. The combined relieving capacities of the safety relief valves shall be such as to prevent a rise of pressure in the tank of more than 10 percent above the maximum allowable pressure.

(3) The minimum required rates of discharge of the safety relief valves for each tank expressed in terms of cubic feet per minute of free anhydrous ammonia at 60° F. and atmospheric pressure shall be determined by converting the actual free discharge area for anhydrous ammonia, as calculated by Fetterly's formula [1] to discharge capacities using the orifice flow formula [2] and employing the physical properties of the gas (molecular weight, ratio of specific heats and absolute temperature) at a maximum relieving pressure of 5 percent in excess of the set pressure of the safety relief valve.

(4) Prior to the approval of safety relief valves by the Commandant, manufacturers shall have tests conducted or submit satisfactory evidence that such tests have been conducted and approved by the Underwriters Laboratories, Inc., or by a properly supervised and inspected testing laboratory acceptable to the Commandant relative to determining the actual relieving capacity at various pressures of three representative samples for each size of each design or type of safety relief valve submitted for approval. The actual relieving capacity shall be determined by flow tests at a rated pressure of 5 percent in excess of the set pressure of the valve. A table of relieving capacities for each size of valve for which approval is requested shall be submitted, indicating actual capacities in cubic feet per minute of anhydrous ammonia gas and equivalent rates of discharge for free air corrected to 60° F. and atmospheric pressure.

(5) Safety relief valves shall be attached to the tank near the highest point of the vapor space. Shut-off valves shall not be installed between the tanks and the safety relief valves, except manifolds for mounting multiple safety relief valves may be fitted with acceptable interlocking 3-way valves so arranged at all times as to permit at any position of the 3-way valve an unrestricted flow of vapors through at least one port. When two safety relief valves are mounted in parallel on both the upper outlets of the 3-way valve, the arrangement shall be such as to permit at least one safety relief valve to be operative at all times.

(6) (i) Each safety relief valve installed on a cargo tank shall be connected to a branch vent of a venting system which shall be constructed so that the discharge of gas will be directed vertically upward to a point at least 10 feet above the weather deck or above the top of any tank or house located above the weather deck. The capacity of branch vents or vent headers shall depend upon the number of cargo tanks connected to such branch or header and upon their total safety relief valve orifice discharge areas as provided for in the following table:

Number of cargo tanks:	Percent of total discharge area
1 or 2	100
3	90
4	80
5	70
6 or more	60

(ii) In addition to the requirement specified in subdivision (i) of this subparagraph, the size of the branch vents or vent holders shall be such that the back pressure in the relief valve discharge lines, shall not be more than 10 percent of the safety relief valve setting.

(iii) Return bends and restrictive pipe fittings are not permitted. Vents and headers shall be so installed as to prevent stresses on safety relief valve mountings.

(iv) The vent discharge riser shall be so located as to provide protection against mechanical injury and such discharge pipes shall be fitted with loose raincaps.

(v) No valve of any type shall be fitted in the vent pipe between the safety relief valve and the vent outlets. Suitable provision shall be made for draining the discharge pipe.

(7) Each safety relief valve shall be marked with data as follows:

(i) Name of manufacturer.

(ii) Size of valve.

(iii) Pressure rating of valve and set pressure.

(iv) Actual rate of discharge in cubic feet per minute of the gas at 60° F. and atmospheric pressure.

(8) Each safety relief valve shall be tested in the presence of an inspector before being placed in service. The tests shall satisfactorily indicate that the safety relief valve will start to discharge at a pressure not in excess of the design pressure of the tank.

(j) The filling density, or the percent ratio of the liquefied gas that may be loaded in the tank to the weight of the water the tank will hold at 60° F., shall

---

[1] Fetterly's formula:

$$A=\frac{[(DU\times 3.1416)-2E]\times C\times t_2-t_1}{L\times P\times 50}\sqrt{\frac{W_2}{W_1}}$$

Where:

A = free discharge area of the safety relief valve, in square inches.
D = outside diameter of tank, in feet.
U = overall length of tank, in feet.
E = area of end of tank, in square feet.
$C=\frac{t_1-t_2}{62.5+20t}$, B. t. u. transmitted to contents of the tank per square foot of tank surface per hour per degree Fahrenheit temperature difference between 1,200° F. and the temperature of the contents.
t_1 = flame temperature at outside of the tank, in degrees Fahrenheit (1,200° F.-1,000° F.).
t_2 = temperature of the liquid contents in the tank corresponding to pressure P, in degrees Fahrenheit.
t = thickness of tank, in inches.
P = relieving pressure of the safety relief valve, 105 percent of the set pressure of the safety relief valve plus 14.7, in pounds per square inch absolute.
L = latent heat of vaporization of the liquid portion of the gas at pressure P, in B. t. u. per pound.
W_2 = density of steam at pressure P, in pounds per cubic foot.
W_1 = density of the gas at pressure P, in pounds per cubic foot.

Fetterly's formula may be modified for tank sizes above a DU value of 160 by proportionately reducing the flame temperature t_1, from 1,200° F. to 1,000° F. until a DU value of 500 is reached, above which the flame temperature shall remain constant at 1,000° F.

[2] The expression for orifice flow corresponds to the maximum adiabatic flow of an ideal gas through a frictionless orifice (coefficient of discharge of unity) when the back-pressure on the discharge side is less than the critical pressure. Allowance should be made for deviations from the ideal gas laws at the relieving pressure P.

not exceed 50 percent for unlagged tanks and 57 percent for lagged or refrigerated tanks.

(k) (1) The cargo tanks shall be loaded or unloaded by the pressure differential method. Alternate methods of filling or discharging the lading may be submitted for approval.

(2) Where cargo barges or vessels are provided with compressors for maintaining the pressure differential between the shore storage tanks and cargo tanks, the following procedure for unloading and loading the tanks shall be followed:

(i) In loading cargo tanks, the compressor shall be connected to the vapor suction line on the cargo tank and discharge to the vapor line on the shore storage tank. The connection between the liquid line on the shore storage tank and the unloading line on the barge may be made by wire braided armored rubber hose or other type of suitable hose. The hose shall be designed for a bursting pressure of five times the safety relief valve setting and be hydrostatically tested to twice the setting of the safety relief valve.

(ii) During loading operations, the pressure differential between the high and low side of the compressor shall be not more than 50 p. s. i. gauge.

(iii) When the pressure differential has dropped to between 5 and 10 p. s. i. indicating that all of the liquid has been removed from the shore tanks, the compressor suction and discharge shall be reversed in order to remove the remaining gas from the shore tanks.

(iv) An oil separator, relief valve, and pressure gauge shall be installed on each side of the compressor.

(v) For unloading the cargo tanks, the connections shall be reversed and the compressor shall take suction on the shore tanks and discharge through the vapor lines to the cargo tanks.

(3) A diagrammatic sketch of filling and discharge systems shall be submitted for approval.

(l) (1) Lagged tanks shall be covered with a nonflammable insulation material of a thickness to provide a thermal conductance of not more than 0.075 B. t. u. per square foot per degree Fahrenheit differential in temperature per hour. The entire insulation shall be covered with a sheet metal jacket of not less than 0.083" thickness and efficiently flashed around all openings so as to be weathertight.

(2) Where unlagged tanks are installed in insulated holds or 'tween-deck spaces such tanks shall be considered lagged provided the thermal conductance of the insulation is not less than that required by subparagraph (1) of this paragraph.

(m) (1) Where refrigerated systems are installed to maintain the temperature of the liquid below atmospheric, at least two complete refrigeration plants automatically started and stopped by pressure variations within the tanks shall be provided, each to be complete with the necessary auxiliaries for proper operation. The capacity of each refrigeration compressor shall be sufficient to maintain the vapor pressure in the tanks during peak atmospheric temperature conditions below the pressure for which the tanks are designed.

(2) An alternate arrangement may consist of three compressors, any two of which shall be capable of maintaining the vapor pressure in the tanks during peak atmospheric temperature conditions below the pressure for which the tanks are designed, the third compressor acting as a stand-by unit.

(3) Refrigerated tanks shall be covered with a suitable insulant to prevent sweating of the tank surfaces.

(n) (1) Cargo tanks shall be examined and retested at least every 4 years in the presence of an inspector. The examination shall consist of a thorough internal and external examination, except as noted in subparagraph (4) of this paragraph. The hydrostatic test shall be equal to twice the design pressure of the tank.

(2) The safety relief valves shall be dismantled, overhauled, and reset at the time of the 4-year inspection. Said valves may be dismantled, overhauled, and reset at such other times as is the desire of the carrier; provided such work is done with the cognizance of and under such conditions as are agreed upon with the Officer in Charge, Marine Inspection.

(3) Upon satisfactory completion of the test at the time of the 4-year inspection, the inspector shall stamp upon the tank the date and other identification necessary to indicate authority for continued use of the cargo tanks and safety relief valves. When a carrier finds it necessary to replace a safety relief valve, he shall report the change in writing to the Officer in Charge, Marine Inspection, in the district where the change took place or at the first port of call. The replacement shall be the same size, capacity, and material as the replaced valve and shall be set to relieve at no more than the design pressure of the tank.

(4) In addition to the test prescribed in subparagraph (1) of this paragraph, each lagged tank shall be subject to an external inspection at least once every 8 years by having the jacket and lagging removed. If the jacket, and lagging are not removed during the 4-year test, the tank shall hold the prescribed hydrostatic pressure for at least 20 minutes without any pressure drop.

(o) Each cargo tank shall be electrically grounded to the hull. The cargo barge or vessel shall be electrically connected to the shore piping prior to connecting the cargo hose.

(p) Repairs involving the use of welding or burning equipment shall not be undertaken on the anhydrous ammonia tanks or liquid or vapor piping while the lading in either liquid or vapor form is present in the tanks.

(q) During the time anhydrous ammonia is laden in the tanks the barge or vessel shall be under constant surveillance. A towing vessel engaged in transporting such barges shall not leave the barge unattended except when the barge is moored at a pier, wharf, dock, or other terminal and then only if such facility is provided with watchman or guard service. When the barge is at the consignor's or consignee's terminal, watchman or guard service shall be provided by said consignor or consignee.

(r) The Interstate Commerce Commission's standard "Dangerous" placard shall be displayed in four locations on the barge when anhydrous ammonia is laden in the tanks. A placard shall be posted approximately amidships on each side and facing outboard. A placard shall be posted at each end of the barge at about the ends of the tanks facing outboard. Racks for mounting such placards shall be so arranged as to provide clear visibility and be protected from becoming readily damaged or obscured. After unloading and before a tank or tanks are gas-freed, the placard shall be reversed to show the "Dangerous-Empty" legend.

§ 146.24-100 *Table G—Classification: Compressed gases.*

Descriptive name of article	Characteristic properties, caution marks, markings required	Label required	Cargo vessel	Required conditions for transportation: Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Acetylene	*Inflammable gas. Violently explosive when in the range of mixture with air (3 to 72% for pure acetylene.) Slightly lighter than air. Pressure usually less than 400 lb. per square inch at 130° F.*	Red gas.	Stowage: "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "'Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (A-A). Ferry stowage (A-A).	Ferry stowage (BB). Ferry stowage (BB).
Air, compressed	*Non-inflammable gas. Pressure usually about 2,250 lb. per square inch at 130° F.*	Green gas.	Stowage: "On deck protected." "On deck under cover." "'Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "'Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (A-A).	Ferry stowage (BB).
Anhydrous ammonia. Ammonia, anhydrous.	*Noninflammable gas. Toxic; irritating fumes in air. Odor noticeable at less than 1%. Pungent odor gives warning of dangerous quantities in air. Liquid is corrosive. Weakly inflammable and explosive with about 16 to 27% in air, when ignited in a fire at a temperature about 1,100° F. Lighter than air. Pressure about 515 lb. per square inch at 130° F.*	Green gas.	Stowage: "On deck protected." "On deck under cover." "'Tween decks readily accessible." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "'Tween decks readily accessible." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-105A500, 105A300, 105A300W). Tanks (ICC-105A500, 106A500X). Tank motor vehicle complying with ICC motor carrier regulations.	Ferry stowage (A-A).	Not permitted.
Argon	*Noninflammable gas. Noncombustible, but excessive quantities in confined space may cause suffocation. Odorless. Heavier than air. Pressure usually about 2,250 lb. per square inch at 130° F.*	Green gas.	Stowage: "On deck protected." "On deck under cover." "'Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-107A).	Stowage: "On deck protected." "On deck under cover." "'Tween decks readily accessible." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (A-A).	Not permitted.
Boron trifluoride	*Noninflammable gas. Suffocating. Strongly irritating to lungs. Possess easily detectable odor. Heavier than air. Boiling point at 149° F. Pressure usually about 2,250 lb. per square inch at 130° F.*	Green gas.	Stowage: "On deck protected." "On deck under cover." "'Tween decks readily accessible." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "'Tween decks readily accessible." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Not permitted.	Not permitted.
Butadiene, inhibited	*Inflammable gas. A hydrocarbon liquid or compressed gas with distinct odor. Forms explosive or inflammable mixtures in air. Inhibited liquid is stable for 24 hours. Pressure usually about 25 lb. per square inch at 130° F. Heavier than air.*	Red gas.	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-104A, 104A-W).	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Not permitted.	Not permitted.

			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Carbon dioxide Liquefied carbon dioxide.	*Noninflammable gas* *Will cause suffocation if breathed in excessive quantities.* *Odorless.* *Heavier than air.* *Pressure usually about 2,280 lb. per square inch at 130° F.* Do not stow with cyanides.	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC–105A500, 105A500W, 105A600, 105A600W.) Tank motor vehicles complying with ICC motor carrier regulations. Authorized only for stowage: "On deck protected" or "On deck under cover." Portable tanks (ICC–51) not over 8,000 lb. gr. wt. (Fixed length dip tube gauging devices are not acceptable).	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible" Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA) Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank motor vehicles complying with ICC motor carrier regulations.	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC–105A500, 105A500W, 105A600, 105A600W). Tank motor vehicles complying with ICC motor carrier regulations. Authorized only for stowage: "On deck protected" or "On deck under cover." Portable tanks (ICC–51) not over 8,000 lb. gr. wt. (fixed length dip tube gauging devices are not acceptable).
Carbon dioxide-nitrous oxide mixture.	*Noninflammable gas* *A mixture of carbon dioxide and nitrous oxide.* *Heavier than air.* *See individual gases for hazards.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA) Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders
Carbon dioxide—oxygen mixture.	*Noninflammable gas* *Colorless, odorless gas.* *Main hazard is that of oxygen present. Hazard decreases with increase of carbon dioxide.* *Heavier than air.* *See individual gases for hazards.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders. (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders. (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA) Containers: Cylinders. (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders.
Carbon monoxide	*Inflammable gas* *Poisonous, even in small quantities (much less than 1%).* *Inflammable and explosive with about 12 to 74% in air.* *Odorless.* *About as heavy as air.* *Pressure usually about 2,200 lb. per sq. in. at 130° F.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Not permitted	Not permitted	Not permitted.
Chlorine	*Noninflammable gas* *Poisonous; pungent odor; gives warning of dangerous quantities in air.* *Even in small quantities has a choking, smothering effect and is very injurious to membranes and tissues.* *Much heavier than air.* *May cause combustion of acetylene, turpentine, and finely divided organic material.* *Pressure about 210 lb. per sq. in. at 130° F.*	Green gas	Stowage: "On deck in open." "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC–105A300, 105A300W, 106A500, 106A500X). Tanks (ICC–106A500, 106A500X).	Not permitted except in an emergency involving life or health, and upon application made to the Commandant of the Coast Guard, limited shipments of chlorine may be made under such conditions as the said Commandant in his judgment may authorize.	Not permitted except in an emergency involving life or health, and upon application made to the Commandant of the Coast Guard, limited shipments of chlorine may be made under such conditions as the said Commandant in his judgment may authorize.	Not permitted except in an emergency involving life or health, and upon application made to the Commandant of the Coast Guard, limited shipments of chlorine may be made under such conditions as the said Commandant in his judgment may authorize.
Compressed gases, N. O. S.	*Inflammable gas or noninflammable gas.*	Red gas or green gas (appropriate one).	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Not permitted	Not permitted	Not permitted.

			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Dimethyl ether	*Inflammable gas* *Inflammable and explosive with about 3 to 30% in air.* *Anesthetic.* *Heavier than air.* *Pressure about 170 lb. per sq. inch at 130° F.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-105A300, 105A300W, 106A500, 106A500X).	Not permitted	Not permitted	Not permitted.
Dispersant gas, N. O. S.	*Noninflammable gas* *A noninflammable gas or mixture of gases such as the freons which are used as propellants, etc.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-106A500, 106A500X).	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA) Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC-106A500, 106A500X).
Ethane	*Inflammable gas* *Inflammable and explosive with about 3 to 12% in air.* *Odorless and about as heavy as air.* *Pressure usually about 2,500 lb. per sq. in. at 130° F.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Not permitted	Not permitted	Not permitted.
Ethylene	*Inflammable gas* *Inflammable and explosive with about 2 to 28% in air.* *Anesthetic.* *About as heavy as air.* *Pressure usually about 2,500 lb. per sq. inch at 130° F.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Not permitted	Not permitted	Not permitted.
Fertilizer, ammoniating solution, *containing free ammonia.*	*Noninflammable gas*	Green gas	Stowage: "On deck." "Under deck away from heat." Containers: Tank cars (ICC-105A300, 105A300W, 106A500, 106A500X).	(Shipped only in tank cars)	(Shipped only in tank cars)	Ferry stowage (BB). Containers: Tank cars (ICC-105A-300, 105A300W, 106A500, 106A-500X).
Fire extinguishers	*Fire extinguishers containing non-liquefied gas for the purpose of expelling fire extinguishing contents.* *This applies only to fire extinguishers the gas content of which possesses a gauge pressure exceeding 25 lb. per sq. in. at 70° F.*	No label required.	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Stout wooden boxes. Fiberboard boxes.	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Stout wooden boxes. Fiberboard boxes.	Ferry stowage (AA) Containers: Stout wooden boxes. Fiberboard boxes.	Ferry stowage (BB). Containers: Stout wooden boxes. Fiberboard boxes.
Fluorine	*Inflammable gas* *Colorless, odorless gas.* *Extremely reactive chemically.* *Combines with moist air to form a dangerous, corrosive and irritating vapor.* *Will start fires if a jet of fluorine impinges on combustible material.* *Poisonous.* *Heavier than air.* *Shipped as a low pressure gas.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Not permitted	Not permitted	Not permitted.

Table G—Classification: Compressed gases—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Helium	*Noninflammable gas* *Nonpoisonous, but in excessive quantities in an enclosed space may cause suffocation.* *Very much lighter than air.* *Pressure usually about 2,200 lb. per sq. inch at 130° F.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-107A****). Tanks (ICC-107A****).	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." "Cargo hatch trunkway." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC-107A****) Tanks (ICC-107A****).
Helium-oxygen mixture	*Noninflammable gas* *Colorless odorless gas having some oxidizing properties depending upon proportion of oxygen in mixture.* *Lighter than air in most proportions.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA) Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders.
Hydrocarbon gas, liquefied. Liquefied hydrocarbon gas.	*Inflammable gas* *May be a definite gas or mixtures of any of the liquefiable gases.* *Vapors heavier than air.* *Mixtures of vapor with air in certain proportions will be inflammable and explosive.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars.	Not permitted	Not permitted	Not permitted.
Hydrocarbon gas, non-liquefied. Non-liquefied hydrocarbon gas.	*Inflammable gas* *May be a definite gas or mixtures of nonliquefiable hydrocarbon gases.* *Mixtures of vapor with air in certain proportions will be inflammable and explosive. Vapors heavier than air.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Not permitted	Not permitted	Not permitted.
Hydrogen	*Inflammable gas* *Inflammable and violently explosive with about 4 to 75% in air.* *Nonpoisonous, but excessive quantities in an enclosed space may cause suffocation.* *Very much lighter than air.* *Pressure usually about 2,200 lb. per sq. in. at 130° F.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-107A****) Tanks (ICC-107A****)	Not permitted	Not permitted	Not permitted.
Hydrogen bromide Hydrobromic acid, anhydrous.	*Noninflammable gas* *Colorless gas with strong penetrating odor.* *Very corrosive if moisture is present.* *Fumes strongly when exposed to moist air.* *Irritating to mucous membrane.* *Soluble in water.* *Heavier than air.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA) Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders.
Hydrogen chloride	*Noninflammable gas* *Incipient oil leakage fumes which are irritating in contact with mucous membrane will be formed. With moisture present it is likely the fumes will show in the form of a vapor cloud. A weak muriatic acid solution which will attack iron and steel with evolution of hydrogen gas may be formed.* *Miscible with water.* *Heavier than air.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." "Cargo hatch trunkway." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA) Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders.

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Hydrogen sulfide	*Inflammable gas.* *Inflammable and explosive with about 4 to 5% in air.* *Foul odor gives warning of dangerous quantities in air.* *Poisonous even in small quantities (much less than 1%).* *Slightly heavier than air.* *Pressure about 550 lb. per sq. in. at 130° F.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC–106A800, 106A800X).	Not permitted	Not permitted	Not permitted.
Insecticide, liquefied gas	*Nonin flammable gas.* *Mixtures of insecticides such as D, D, T., Pyrethrum, etc., in liquefied propellant gases.* *These mixtures are usually noninflammable.* *May be toxic on continued or prolonged exposure to fumes.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders.
Liquefied nonin flammable gas charged with nitrogen, carbon dioxide, or air. Liquefied nonflammable gases charged with nitrogen, carbon dioxide or air.	*Nonin flammable gas* *Nonin flammable gases such as freons, etc., which are pressured with nitrogen, carbon dioxide or air.* *Principal hazard is pressure.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders.
Liquefied petroleum gas (pressure not exceeding 75 lb. per sq. in. at 105° F.).	*Inflammable gas* *Predominant components are generally propane, propylene, butanes (normal butane or isobutane), butylenes and butadiene.* *Heavier than air.* *Mixtures with air in certain proportions will be inflammable and explosive.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC–106A500, 106A500X). Tanks (ICC–106A500, 106A500X). Special tank containers (approval required). Tank motor vehicle (complying with ICC motor carrier regulations).	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC–106A500, 106A500X). Tanks (ICC–106A500, 106A500X).
Liquefied petroleum gas (pressure not exceeding 450 lb. per sq. in. at 105° F.).	*Inflammable gas* *Predominant components are generally propane, propylene, butanes (normal butane or isobutane), butylenes and butadiene.* *Heavier than air.* *Mixtures with air in certain proportions will be inflammable and explosive.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC–105A600, 105A–600W). Special tank containers (approval required). Tank motor vehicle (complying with ICC motor carrier regulations).	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers. Cylinders. Tank cars (ICC–105A600, 105A–600W).
Liquefied petroleum gas (pressure not exceeding 375 lb. per sq. in. at 105° F.).	*Inflammable gas* *Predominant components are generally propane, propylene, butanes (normal butane or isobutane), butylenes and butadiene.* *Heavier than air.* *Mixtures with air in certain proportions will be inflammable and explosive.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC–105A500, 105A–500W). Special tank containers (approval required). (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC–105A500, 105A–500W).

Table G—Classification: Compressed gases—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Liquefied petroleum gas (pressure not exceeding 300 lb. per sq. in. at 105° F.).	*Inflammable gas* *Predominant components are generally propane, propylene, butanes (normal butane or isobutane), butylenes and butadiene.* *Heavier than air.* *Mixtures with air in certain proportions will be inflammable and explosive.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC–105A400, 105A400W). Special tank containers (Approval required.) Tank motor vehicle (complying with ICC motor carrier regulations).	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC–105A400, 105A400–W).
Liquefied petroleum gas (pressure not exceeding 225 lb. per sq. in. at 105° F.)	*Inflammable gas* *Predominant components are generally propane, propylene, butanes (normal butane or isobutane) butylenes and butadiene.* *Heavier than air.* *Mixtures with air in certain proportions will be inflammable and explosive.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) *Tank cars (ICC–105A300, 105A–300W). Special tank containers (approval required). Tank motor vehicle (complying with ICC motor carrier regulations).	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC–105A300, 105A300–W).
Liquefied petroleum gas (pressure not exceeding 75 lb. per sq. in. at 105° F.).	*Inflammable gas* *Predominant components are generally propane, propylene, butanes (normal butane or isobutane), butylenes and butadiene.* *Heavier than air.* *Mixtures with air in certain proportions will be inflammable and explosive.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Steel drums (ICC–5, 5F) not over 11 gal. cap. when authorized by ICC regulations. Tank cars (ICC–104A, 104A–W). Special tank containers (approval required). Tank motor vehicle (complying with ICC motor carrier regulations).	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With washed heads.) (Boxed.) Steel drums (ICC–5, 5F) not over 11 gal. cap. when authorized by ICC regulations.	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Steel drums (ICC–5, 5F) not over 11 gal. cap. when authorized by ICC regulations.	Ferry stowage (BB). Containers: Cylinders. Steel drums (ICC–5, 5F) not over 11 gal. cap. when authorized by ICC regulations. Tank cars (ICC–104A, 104A–W).
Liquefied petroleum gas (pressure not exceeding 250 lb. per sq. in. at 115° F.).	*Inflammable gas* *Predominant components are generally propane, propylene, butanes (normal butane or isobutane), butylenes and butadiene.* *Heavier than air.* *Mixtures with air in certain proportions will be inflammable and explosive.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Portable tanks (ICC–51) not over 8,000 lb. gr. wt. (fixed length dip tube gauging devices are not acceptable).	Not permitted	Not permitted	Ferry stowage (BB). Containers: Portable tanks (ICC–51) not over 8,000 lb. gr. wt. (fixed length dip tube gauging devices are not acceptable).
Liquefied petroleum gas (pressure exceeding 250 lb. per sq. in. at 115° F.). NOTE: Gases with vapor pressure exceeding 250 lb. per sq. in. at 115° F. shall be placed in tanks with design working pressure increased above 250 lb. per sq. in. by increments of 62.5 lb. per sq. in.	*Inflammable gas* *Predominant components are generally propane, propylene, butanes (normal butane or isobutane), butylenes and butadiene.* *Heavier than air.* *Mixtures with air in certain proportions will be inflammable and explosive.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Portable tanks (ICC–51), not over 8,000 lb. gr. wt. (fixed length dip tube gauging devices are not acceptable).	Not permitted	Not permitted	Ferry stowage (BB). Containers: Portable tanks (ICC–51) not over 8,000 lb. gr. wt. (fixed length dip tube gauging devices are not acceptable).
Machine or apparatus assembled for shipment containing not over 15 lb. weight of gas or liquid for their operation).		No label required	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Wooden boxes or crates (nonspecification).	Stowage: "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Wooden boxes or crates (nonspecification).	Ferry stowage (AA). Containers: Wooden boxes or crates (nonspecification).	Ferry stowage (BB). Containers: Wooden boxes or crates (nonspecification).

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Methane	*Inflammable gas.* *Nonpoisonous, but in excessive quantities in a closed space will cause suffocation.* *Forms an explosive mixture with about 5 to 14% in air.* *Nonliquefied hydrocarbon gas.* *Lighter than air.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinder: (With valve protection cap.) (With dished heads.) (Boxed.)	Not permitted	Not permitted	Not permitted.
Methyl chloride	*Inflammable gas.* *Inflammable and explosive with about 8 to 20% in air.* *Evolves hydrochloric acid fumes when burned.* *Faintly sweet odor, like ether.* *Pressure about 105 lb. per sq. in. at 130° F.* *Heavier than air.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-106A500, 106A500X, 105A300, 105A300W). Tanks (ICC-106A500, 106A500X).	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC-106A500, 106A500X, 105A300, 105A300W). Tanks (ICC-106A500, 106A500X).
Methyl mercaptan	*Inflammable liquid or gas with a strong offensive odor.* *Boiling point 45.7° F.* *Vapor pressure 24.5 lb. per sq. in. at 68° F.* *Heavier than air.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-106A500, 106A500X).	Not permitted	Not permitted	Not permitted.
Monochlorodifluoromethane	*Noninflammable gas.* *Nonpoisonous, but excessive quantities in an enclosed space may cause suffocation.* *Odorless and colorless.* *Much heavier than air.* *Decomposes when passed through flames, evolving hydrochloric and hydrofluoric acid fumes.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-105A300, 105A-300W, 106A500, 106A500X, 110A-500W. Tanks (ICC-106A500, 106A-500X).	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." Containers: Cylinders: (With valve protection cap. (With dished heads.) (Boxed.) Tanks (ICC-106A500, 106A500X).	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tanks (ICC-106A500, 106A500X).	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC-105A300, 105A-300W, 106A500, 106A500X, 110A-500W). Tanks (ICC-106A500, 106A500X).
Monochlorotetrafluoroethane	*Noninflammable gas.* *Nonpoisonous, but excessive quantities in an enclosed space may cause suffocation.* *Odorless and colorless.* *Very much heavier than air.* *Decomposes when passed through flames, evolving hydrochloric and hydrofluoric acid fumes.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-106A500, 106A-500X). Tanks (ICC-106A500, 106A-500X).	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tanks (ICC-106A500, 106A500X).	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tanks (ICC-106A500, 106A500X).	Ferry stowage (BB). Containers: Cylinders: (With valve protection cap.) Tank cars (ICC-106A500, 106A-500X). Tanks (ICC-106A500, 106A500X).
Monochlorotrifluoromethane	*Noninflammable gas.* *Colorless and practically odorless.* *Nonpoisonous, but excessive quantities in an enclosed space may cause suffocation.* *Very much heavier than air.* *Decomposes when passed through flames, evolving hydrochloric and hydrofluoric acid fumes.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders.

Table G—Classification: Compressed gases—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Monomethylamine, anhydrous	*Inflammable gas.* *Pungent, suffocating gas, like ammonia.* *Slightly heavier than air.* *Pressure about 110 lb. per sq. in. at 130° F.*	Red gas	Stowage: "On deck protected." "On deck under cover." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-106A500, 106A500X, 105A300, 105A300W).	Stowage: "On deck protected." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC-106A500, 106A-500X, 105A300, 105A300W).
Neon gas	*Noninflammable gas.* *Nonpoisonous, but excessive quantities in an enclosed space may cause suffocation.* *Odorless.* *Lighter than air.* *Pressure usually about 2,200 lb. per sq. inch at 70° F.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders.
Nitrogen	*Noninflammable gas.* *Nonpoisonous, but excessive quantities in an enclosed space may cause suffocation.* *About as heavy as air.* *Pressure usually about 2,200 lb. per sq. in. at 70° F.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween deck readily accessible." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-107A ****). Tanks (ICC-107A ****).	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC-107A ****). Tanks (ICC-107A ****).
Nitrosyl chloride	*Noninflammable gas.* *Corrosive to iron. If shipped in nickel cylinder only.* *This gas involved in a fire (at high temperatures) will form chlorine and one of the oxides of nitrogen as products of decomposition.* *Pressure usually about 130 lb. per sq. in. at 130° F.* *Much heavier than air.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck away from heat." Containers: Cylinders: Tank cars ((ICC-105A300W).	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Cargo hatch trunkway." Containers: Cylinders.	Ferry stowage (AA). Containers: Cylinders.	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC-105A300W).
Nitrous oxide	*Noninflammable gas.* *Will support combustion.* *Anesthetic.* *Odorless and sweet tasting.* *Heavier than air.* *Pressure usually about 850 lb. per sq. in. at 130° F.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank motor vehicles complying with ICC motor carrier regulations. Authorized only for stowage: "On deck protected." "On deck under cover." Portable tanks (ICC-51) not over 8,000 lb. gr. wt. (fixed length dip tube gauging devices are not acceptable).	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank motor vehicles complying with ICC motor carrier regulations.	Ferry stowage (BB). Containers: Cylinders. Tank motor vehicles complying with ICC motor carrier regulations. Authorized only for stowage: "On deck protected." "On deck under cover." Portable tanks (ICC-51) not over 8,000 lb. gr. wt. (fixed length dip tube gauging devices are not acceptable).
Oxygen	*Noninflammable gas.* *Strong supporter of combustion. Accelerates fires.* *May cause self-ignition of easily oxidized and other hydrocarbon material when oxygen is released in gaseous form.* *Colorless, odorless and tasteless.* *Slightly heavier than air.* *Pressure usually about 2,200 lb. per sq. in. at 130° F.*	Green gas	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.) Tank cars (ICC-107A****).	Stowage: "On deck protected." "On deck under cover." "Tween decks." "Cargo hatch trunkway." "Under deck away from heat." Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (AA). Containers: Cylinders: (With valve protection cap.) (With dished heads.) (Boxed.)	Ferry stowage (BB). Containers: Cylinders. Tank cars (ICC-107A****).

SUBPART—DETAILED REGULATIONS GOVERNING POISONOUS ARTICLES

§ 146.25-1 *Definition of poisonous articles.* (a) Poisonous articles are divided by the Interstate Commerce Commission regulations into four classes according to degree of hazard in transportation. These are:

Extremely dangerous poisons—Class A.
Less dangerous poisons—Class B.
Tear gases or irritating substances—Class C.
Radioactive materials—Class D.

(b) These poisonous articles are defined by the Interstate Commerce Commission regulations as set forth in §§ 146.25-5, 146.25-10, 146.25-15, and 146.25-20, and such definitions are binding upon all shippers making shipments of poisonous articles by common carrier vessels engaged in interstate or foreign commerce by water. These definitions are accepted and adopted and form part of the regulations in this subchapter and apply to all shippers making shipments of poisonous articles by any vessel and shall apply to owners, charterers, agents, master or other person in charge of a vessel and to other persons, transporting, carrying, conveying, storing, stowing, or using poisonous articles on board vessels subject to R. S. 4472, as amended (46 U. S. C. 170), and the regulations in this subchapter.

§ 146.25-5 *Extremely dangerous poisons, Class A, poison gas label.* Poisonous gases or liquids of such nature that a very small amount of the gas, or vapor of the liquid, mixed with air is dangerous to life. This class includes the following:

Bromacetone.
Cyanogen.
Cyanogen chloride containing less than 0.9 percent water.
Diphosgene.
Ethyldichlorarsine.
Hydrocyanic acid.[1]
Lewisite.
Methyldichlorarsine.
Mustard gas.
Nitrogen peroxide (tetroxide).
Phenylcarbylamine chloride.
Phosgene (diphosgene).

§ 146.25-10 *Less dangerous poisons, Class B, liquids and solids, poison label.* (a) Poisonous liquids or solids (including pastes and semi-solids), other than Class A, C, or D poisons, which are known to be so toxic to man as to afford a hazard to health during transportation, or which, in the absence of adequate data on human toxicity, are presumed to be toxic to man because they fall within any one of the following categories when tested on laboratory animals:

(1) *Oral toxicity.* Those which produce death within 48 hours in half or more than half of a group of 10 or more white laboratory rats weighing 200 to 300 grams at a single dose of 50 milligrams or less per kilogram of body weight, when administered orally.

(2) *Toxicity on inhalation.* Those which produce death within 48 hours in half or more than half a group of 10 or more white laboratory rats weighing 200 to 300 grams, when inhaled continuously for a period of 1 hour of less at a concentration of 2 milligrams or less per liter of vapor, mist, or dust, provided such concentration is likely to be encountered by man when the chemical product is used in any reasonable foreseeable manner.

(3) *Toxicity by skin absorption.* Those which produce death within 48 hours in half or more than half of a group of 10 or more rabbits tested at a dosage of 200 milligrams or less per kilogram body weight, when administered by continuous contact with the bare skin for 24 hours or less.

(b) The foregoing categories shall not apply if the physical characteristics or the probable hazards to humans as shown by experience indicate that the substances will not cause serious sickness or death. Neither the display of danger or warning labels pertaining to use nor the toxicity tests set forth above shall prejudice or prohibit the exemption of any substances from the provisions of the regulations in this part.

§ 146.25-15 *Tear gas or irritating substances, Class C, tear gas label.* Tear gases are liquid or solid substances which upon contact with fire or when exposed to air give off dangerous or intensely irritating fumes, such as brombenzylcyanide, chloracetophenone, diphenylamine-chlorarsine, and diphenylchlorarsine, but not including any poisonous article, Class A.

§ 146.25-20 *Radioactive materials, Class D, radioactive materials label.* (a) Radioactive material is any material or combination of materials that spontaneously emits ionizing radiation. For the purpose of the regulations in this part radioactive materials are divided into 3 groups according to the type of rays emitted at any time during transportation, as follows:

[1] Dilute solutions of hydrocyanic acid of not exceeding 5 percent strength are classed as poisonous articles, Class B.

UNIVERSITY OF MICHIGAN LIBRARY

(1) *Group I.* Radioactive materials that emit gamma rays only or both gamma and electrically charged corpuscular rays.

(2) *Group II.* Radioactive materials that emit neutrons and either or both types of radiation characteristic of Group I materials.

(3) *Group III.* Radioactive materials that emit electrically charged corpuscular rays only, i. e., alpha or beta, etc., or any other radioactive material that is so shielded that the gamma radiation at the surface of the package does not exceed 10 milliroentgens[1] per 24 hours at any time during transportation.

§ 146.25-25 *Exemptions for radioactive materials.* (a) Radioactive materials are exempt from prescribed packaging, marking other than the name of the contents, and labeling requirements, provided they fulfill all of the following conditions:

(1) The package must be such that there can be no leakage of radioactive materials under conditions normally incident to transportation.

(2) The package must contain not more than 0.1 millicuries[2] of radium, or polonium, or that amount of strontium 89, strontium 90, or barium 140 which disintegrates at a rate of more than 5 million atoms per second; or that amount of any other radioactive substance which disintegrates at a rate of more than 50 million atoms per second.

(3) The package must be such that no significant alpha, beta, or neutron radiation is emitted from the exterior of the package, and the gamma radiation at any surface of the package must be less than 10 milliroentgens per 24 hours.

(b) Manufactured articles other than liquids, such as instrument or clock dials of which radioactive materials are a component part, and luminous compounds, when securely packed in strong outside containers are exempt from specification packaging, marking other than name of contents, and labeling requirements provided the gamma radiation at any surface of the package is less than 10 milliroentgens per 24 hours.

(c) Radioactive materials, such as ores, residues, etc., of low activity, packed in strong tight containers, are exempt from specification packaging, marking other than name of contents, and labeling requirements for transportation on board vessels only if the gamma radiation or equivalent at any point in any space or area continuously occupied by passengers, crew, or shipments of animals, will not exceed 40 milliroentgens per 24 hours at any time during transportation.

§ 146.25-30 *Packing and shielding of radioactive materials.* (a) Not more than 2,000 millicuries of radium, polonium, or other members of the radium family of elements, and not more than that amount of any other radioactive substance which disintegrates at a rate of 100,000 million (10^{11}) atoms per second may be packed in one outside container for transportation on board vessels, except by special arrangements and under conditions approved by the Commandant of the Coast Guard.

(b) Radioactive materials that present special hazards due to their tendency to remain fixed in the human body for long periods of time (i. e., radium, plutonium, and radioactive strontium, etc.) must, in addition to the packing prescribed in this subpart, be packed in inside metal containers (ICC specification 2R) or other containers approved by the Bureau of Explosives, and authorized by the Commandant of the Coast Guard.

(c) All radioactive materials must be so packed and shielded that the degree of fogging of undeveloped film under conditions normally incident to transportation (24 hours at 15 feet from the package) will not exceed that produced by 11.5 milliroentgens of penetrating gamma rays of radium filtered through ½ inch of lead.

(d) The design and preparation of the package must be such that there will be no significant radioactive surface contamination of any part of the container.

(e) The smallest dimension of any outside shipping container for radioactive materials must not be less than 4 inches.

(f) All outside shipping containers must be of such design that the gamma radiation will not exceed 200 milliroentgens per hour or equivalent at any point of readily accessible surface. Containers must be equipped with handles and protective devices when necessary in order to satisfy this requirement.

(g) The outside shipping container for radioactive material unless specifically exempt by § 146.25-25 (a), (b), or (c), must be a wooden box (ICC specification 15A or 15B), fiber drum (ICC specification 21A), or a fiberboard box (ICC specification 12B), except that equally efficient containers may be used when approved by the Bureau of Explosives and authorized by the Commandant of the Coast Guard.

(h) Radioactive materials, Group I, liquid, solid, or gaseous, must be packed in suitable inside containers completely surrounded by a shield of lead or other suitable material of such thickness that at any time during transportation the gamma radiation will not exceed 10 milliroentgens per hour at a distance of one meter (39.3 inches). The shield must be so designed that it will not break or open under conditions incident to transportation. The minimum shielding must be sufficient to prevent the escape of any primary corpuscular radiation to the exterior of the outside shipping container.

(i) (1) Radioactive materials, Group II, liquid, solid, or gaseous, must be packed in suitable inside containers completely shielded so that at any time during transportation the radiation measured at right angles to any point on the long axis of the shipping container will not exceed the following specified limits:

(i) Gamma radiation of 10 mrhm.

(ii) Electrically charged corpuscular radiation which is the physical equivalent[1] of 10 mrhm. of gamma radiation.

(iii) Neutron radiation which is the physical equivalent of 2 mrhm. of gamma radiation.

(iv) If more than one of the types of radiation named in subdivisions (i) (ii), and or (iii) of this subparagraph is present, the radiation of each type must be reduced by shielding so that the total does not exceed the equivalent of subdivision (i) (ii), or (iii) of this subparagraph.

(2) The shielding must be designed so as to maintain its efficiency under conditions normally incident to transportation and must provide personnel protection against fast or slow neutrons and all other ionizing radiation originating in the radioactive materials or any part of the aggregate constituting the complete package.

§ 146.25-35 *Stowage and handling on board vessels.* (a) Containers of poisonous articles offered for transportation on board vessels shall, when taken on board a vessel, be stowed in accordance with the provisions applying to the particular character of vessel as shown in §§ 146.25-100 to 146.25-400, inclusive, and with the detailed regulations for stowage in this subpart.

(b) All containers of radioactive materials stowed on board a vessel must be efficiently lashed, chocked, or braced to prevent sifting or leakage by movement of the containers in any direction.

(c) No person shall remain unnecessarily in a hold or compartment or close to a hold, compartment, or deck cargo space containing radioactive materials and the shipper must furnish the carrier with such information and equipment as is necessary for the protection of the carrier's employees, stevedores, or other persons engaged in the handling of such cargo. In no instance shall any person who must necessarily remain in a hold, compartment, or in the proximity of a hold, compartment, or deck cargo space containing radioactive material be exposed to a total of more than 300 milliroentgens of gamma radiation or equivalent in any 7-day period.

(d) All containers of radioactive material (red label) must be carried by the handles when handles are provided.

§ 146.25-40 *Limitation of "On deck" stowage.* When "On deck in open" stowage is permitted for any substances by §§ 146.25-100 to 146.25-400, inclusive, it shall apply only to the waterproof containers in which such substances are packed.

§ 146.25-45 *Limitation on all stowage.* (a) Containers of poisonous articles shall be stowed well away from living quarters, refrigerated cargo and foodstuffs of any description.

[1] In determining compliance with requirements of these regulations, all measurements of radiation must be made with a Landsverk-Wollan Electrometer Model L-100, or equally efficient standardized meter.

[2] For purposes of the regulations in this part 1 millicurie is that amount of any radioactive material which disintegrates at the rate of 37 million atoms per second.

[1] For the purposes of the regulations in this part the "Physical Equivalent" of a roentgen is that dose of any ionizing radiation which results in the absorption in tissue of ionizing energy equivalent to 93 ergs per gram of tissue. This is approximately the dose which is imparted to soft tissue by 1 roentgen of gamma or X-rays but it may be imparted by corpuscular radiation which is not measured in terms of roentgens.

(b) Cyanides, or cyanide mixtures shall not be stowed with corrosive liquids.

(c) Enclosed compartments in which are stowed any extremely dangerous poisons, Class A, or radioactive materials, Class D, shall not be left open to entrance by persons unfamiliar with the type of cargo being transported.

(d) No radioactive materials, Groups I, II, or III, shall be stowed on board a vessel in any hold, compartment, or deck space so that the total gamma radiation or equivalent in any space or area continuously occupied by passengers, crew, or shipments of animals will exceed 40 milliroentgens per 24 hours at any time during transportation. Any hold, compartment, or enclosed deck space containing radioactive materials shall be so ventilated that there will be no accumulation of radioactive gases in that hold, compartment, or enclosed deck space.

(e) A container of radioactive materials, red label (Groups I and II), must not be placed closer than 15 feet to any package containing undeveloped film. If more than one such container is present, the distance must be computed from the table in paragraph (f) of this section by adding the number of units shown on the labels on the packages.

(f) The distance in the table of this paragraph must be measured from the nearest point of the radioactive material container or containers. One unit equals 1 milliroentgen per hour at a distance of 1 meter (39.3 inches) for hard gamma radiation or the amount of radiation which has the same effect on film as 1 milliroentgen per hour per meter of hard gamma rays or radium of filtered by ½ inch of lead.

Distances for Stowage

Total number of units	*Minimum distance in feet to nearest undeveloped film*
1 to 10	15
11 to 20	20
21 to 30	25
31 to 40	30

(g) Not more than 40 units of radioactive materials, red label (Groups I and II), shall be stowed together in any 1 area or place. If the shipment exceeds 40 units, a distance of at least 60 feet must separate increments of not more than 40 units each.

§ 146.25-50 *Care following leakage or sifting of poisonous articles.* (a) Compartments or holds in which have been stowed packages containing arsenic or arsenical compounds, calcium cyanide, potassium cyanide, or sodium cyanide, or radioactive ores of low activity shall, in the event any leakage or sifting from the containers has occurred, be thoroughly cleaned after the cargo is unloaded and before the hold is used for stowage of other cargo.

(b) In the event of breakage of containers of radioactive materials, other than the ores of low activity referred to in § 146.25-25 (c), or should any radioactive material, other than the ores of low activity referred to in § 146.25-25 (c), be found on board during or after discharge, the section of the vessel containing this cargo must be isolated as far as possible from danger of human contact. No persons shall be allowed to handle the material or to remain in the vicinity until qualified personnel are present to supervise. Great care must be exercised to prevent radioactive material from entering the body through contact, inhalation, or by any other means. The shipper and the District Commander of the United States Coast Guard or his authorized representative having supervision over the port or place where the vessel is located or bound should be notified immediately.

(c) Holds, compartments, decks, equipment, or any other areas of the vessel contaminated by Class D Poisons, other than ores of low activity, through breakage, fire, etc., must not be used again until decontaminated by qualified personnel.

§ 146.25-55 *Exemptions for poisons, Class B.* (a) Poisonous liquids, Class B, as defined in this subpart, except aniline oil, chlorpicrin and chlorpicrin mixtures containing no compressed gas or poisons, liquid, Class A; hydrocyanic acid solutions; methyl bromide; motor fuel antiknock compound; parathion; phenyldichlorarsine; tetraethyl lead; and thiophosgene; in tightly closed inside containers securely cushioned when necessary to prevent breakage, and packed as follows are exempt from specification packaging, marking other than name of contents, and labeling requirements:

(1) In glass or earthenware containers not over 1 quart capacity each, or in metal containers not over 1 gallon capacity each, packed in strong outside wooden boxes or barrels.

(2) In glass or earthenware containers not over 1 pint capacity each, or in metal containers not over 1 quart capacity each, packed in strong outside fiberboard boxes.

(b) Poisonous solids, Class B, except cyanides, other than those specified in paragraph (c) of this section, and beryllium metal powder, in tightly closed inside containers, securely cushioned when necessary to prevent breakage and packed as follows are exempt from specification packaging, marking other than name of contents, and labeling requirements:

(1) In inside glass, earthenware or composition bottles or jars or metal containers or lock-corner sliding-lid wooden boxes, of not over 5 pounds capacity each, or chipboard, pasteboard, or fiber cartons, cans, or boxes, of not over 1 pound capacity each, packed in outside wooden or fiberboard boxes or wooden barrels or kegs. Net weight of contents of outside container not over 100 lbs.

(2) In inside chipboard, pasteboard, or fiber cartons, cans, or boxes, of not over 5 pounds capacity each, packed in outside fiberboard or wooden boxes. Not more than 5 of these cartons shall be packed in any outside container.

(c) Cyanides, when packed and described as follows, are exempted from specification packaging and labeling requirements:

(1) Cyanides or cyanide mixtures in tightly closed glass, earthenware or metal inside containers not over 1 pound each, securely cushioned when necessary to prevent breakage, and packed in outside wooden or fiberboard boxes, or in wooden barrels. Net weight of cyanides or cyanide mixtures in any outside container not over 25 pounds.

(2) Cyanide mixtures in tightly closed glass, earthenware, or metal inside containers, securely cushioned when necessary to prevent breakage, and packed in outside wooden or fiberboard boxes, or in wooden barrels. Net weight of cyanide mixtures in any outside container, not over 5 pounds.

(3) Cyanides of copper, zinc, lead and silver.

(d) Such limited quantity shipments may be accepted on board all vessels subject to the regulations in this part provided the bill of lading or other shipping paper correctly describes the article in accordance with the true name as shown in the commodity list. Stowage shall be "On deck under cover" or "Tween decks" in a compartment not subject to artificial heat.

§ 146.25-60 *Cylinder valve protection.* Cylinders containing a Class A extremely dangerous poison, Class B less dangerous poison or Class C tear gas or irritating substance when offered for transportation on board vessels shall be fitted with valve protection caps or be of dished head design of construction with the valve recessed into the cylinders or otherwise protected, or if of a design other than "valve cap" or "dished head" the cylinder shall be boxed. It is not required that such outside box be a specification container. If the box be of solid construction such box shall be marked "Inside Packages Comply With Prescribed Specifications", and the appropriate label shall be affixed thereto. Cylinders constructed with valves protruding need not be fitted with valve protection caps when such cylinders are shipped boxed.

§ 146.25-100 *Table H—Classification: Class A; extremely dangerous poisons.*

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Bromacetone, liquid	*A clear colorless liquid produced by the action of bromine on acetone.* *The vapors of this liquid are extremely irritating to the eyes.* Stow well away from living quarters and in a space not easily accessible to any persons. Protect from direct rays of the sun and from all sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-33, 3D) with valve protection extension ring or when without extension ring in specification boxes or barrels or in non-specification boxes. Outside containers must be marked "Inside Packages Comply With Prescribed Specifications." Wooden boxes (ICC-15A, 15B, 15C, 16A) WIC, not over 24 lb. net wt.	Not permitted	Not permitted	Not permitted.
Chemical ammunition (containing Class "A" poisons, liquids or gases), nonexplosive. May only be shipped by, for, or to the Departments of the Army, Navy and Air Force of the U. S. Government. NOTE: When chemical ammunition is shipped having ignition elements, bursting charges or detonating fuzes assembled, such shipments shall conform to the regulations prescribed for "Ammunition, Chemical Explosive," under Class "A" Dangerous Explosives.	Consists of projectiles, shells, bombs, and grenades containing Class "A" poisonous gases or liquids, but not equipped or packed with ignition elements, bursting charges, detonating fuzes or explosive components. Marking: Packages will be labeled with the "Poison gas" label and marked "Nonexplosive" and carry the name of the contents. Outside containers and additional requirements as to marking, as set forth by the Department of the Army, Navy, or Air Force regulations, shall be conformed with before shipment.	Poison gas.				
Chlorpicrin and methyl chloride, mixtures.	*Chlorpicrin is a colorless, oily liquid. Its vapors are very irritating and extremely poisonous.* *Methyl chloride is a propelling gas.* Stow away from living quarters and in a space not easily accessible to any persons. Protect from direct rays of the sun and from all sources of artificial heat. Keep cool. Spillage or leakage may be decontaminated by flushing the area with copious quantities of a water solution of a sulfite (i. e. sodium sulfite). In event of leakage, avoid the ignition of methyl chloride vapors in air.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-3A, 3AA, 3B, 3C, 3D, 3P, 4A, 4B, 4C, 33) with valve protection cap. Note: Cylinders less than 18" in length or less than 2" in diameter shall be packed in boxes or crates, and marked with the prescribed name of contents, prescribed label, and the words "This side up", and the notation "Inside Packages Comply With Prescribed Specifications."	Not permitted	Not permitted	Not permitted.
Cyanogen chloride containing less than 0.5 percent water.	*A colorless, volatile liquid or poisonous gas.* *Extremely poisonous.* *Boiling point about 56° F.* *Soluble in water.* Stow away from living quarters and in space not easily accessible to any persons. Protect from direct rays of sun and sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-3A, 3D) with valve protection cap or when without cap in nonspecification strong wooden boxes marked with prescribed name of contents, prescribed label and the words "This side up," and the notation "Inside packages comply with prescribed specifications."	Not permitted	Not permitted	Not permitted.

Table H—Classification: Class A; extremely dangerous poisons—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Cyanogen, gas	*A colorless gas with a pungent penetrating odor.* *Extremely poisonous.* *It is also inflammable.* *Miscible with water.* Stow away from living quarters and in space not easily accessible to any persons. Protect from direct rays of the sun and sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-33, 3D) with valve protection cap or when without cap in non-specification strong wooden boxes marked with prescribed name of contents, prescribed label and the words "This side up," and the notation "Inside packages comply with prescribed specifications."	Not permitted	Not permitted	Not permitted.
Ethyldichlorarsine	*Colorless, mobile liquid with fruit-like odor becoming yellowish on exposure to light and air.* *Extremely poisonous.* Stow away from living quarters and in space not easily accessible to any persons. Protect from direct rays of sun and sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-33, 3D) with valve protection cap or when without cap in non-specification strong wooden boxes marked with prescribed name of contents, prescribed label and the words "This side up," and the notation "Inside packages comply with prescribed specifications."	Not permitted	Not permitted	Not permitted.
Gas identification sets	*Such sets contain poisonous liquids and gases, class "A" and poisonous articles class "C" or contain poisonous liquids or gases, class "A" and class "C" and chlorine.* Stow away from living quarters and in a space not easily accessible to any persons. Protect from direct rays of the sun and all sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover". "On deck under cover". Outside containers: Wooden boxes (ICC-15A, 15B) WIC, not over 100 grams or mls. or a combination of both packed in each outside box.	Not permitted	Not permitted	Not permitted.
Hexaethyl tetraphosphate and compressed gas mixture (must not contain more than 10 percent hexaethyl tetraphosphate by weight).	*Light straw to amber colored liquid and propellant gas.* *May be absorbed through the skin; through digestive organs; or from vapor through respiratory organs.* *Extremely poisonous.* *Miscible with water.* Stow away from living quarters and in space not easily accessible to any persons. Protect from direct rays of the sun and sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Cylinders boxed (ICC-3AA300, 3AA300, 3B300, 4A300, 4B240, 4BA240) charged with not more than 5 lbs. of the mixture and to a maximum filling density of 80 percent of the water capacity. Not more than 12 cylinders in one outside wooden box, nor more than 4 cylinders in 1 outside fiberboard box.	Not permitted	Not permitted	Not permitted.
Hydrocyanic acid (prussic) liquid. Hydrocyanic acid liquefied.	*A colorless, volatile liquid having an odor, and taste of bitter almonds.* *Both the acid and its vapors are intensely poisonous.* *Vapors are inflammable and form explosive mixtures in air.* *Miscible with water.* Stow well away from living quarters and in a space not easily accessible to any persons. Protect from direct rays of the sun and all sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-33, 3D) with valve protection cap or when without cap in non-specification strong wooden boxes marked with prescribed name of contents, prescribed label and the words "This side up," and the notation "Inside packages comply with prescribed specifications." Steel cylinders (ICC-3A480, 3AA480) with valve protection cap. Wooden boxes (ICC-15A) with inside metal containers, having the liquid acid completely absorbed in inert material, not over 60 lb. net wt.	Not permitted	Not permitted	Not permitted.
Hydrocyanic acid (prussic), unstabilized.			Not permitted	Not permitted	Not permitted	Not permitted.

			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Lewisite	*A colorless to brown or violet colored liquid having a geranium-like odor.* *Very irritant.* *Decomposed by water.* Stow well away from living quarters and in a space not easily accessible to any persons. Protect from direct rays of the sun and all sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-33, 3D) with valve protection cap or when without cap in nonspecification strong wooden boxes marked with prescribed name of contents, prescribed label and the words "This side up," and the notation "Inside packages comply with prescribed specifications."	Not permitted	Not permitted	Not permitted.
Methyldichlorarsine	*A colorless, mobile liquid having an agreeable odor.* *Very irritant.* *Decomposed by water.* Stow away from living quarters and in a space not easily accessible to any persons. Protect from direct rays of the sun and all sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-33, 3D) with valve protection cap or when without cap in nonspecification strong wooden boxes marked with prescribed name of contents, prescribed label and the words "This side up," and the notation "Inside packages comply with prescribed specifications."	Not permitted	Not permitted	Not permitted.
Monochloracetone, unstabilized.			Not permitted	Not permitted	Not permitted	Not permitted.
Mustard gas	*A colorless oily liquid with a faint mustard odor.* *Vapors of this liquid are extremely poisonous and have a blistering effect on the skin.* *Extreme danger exists due to absence of marked odor and the fact that poisonous and irritating effects are not immediately apparent.* Stow well away from all living quarters and in a space not easily accessible to any persons. Protect from direct rays of sun and all sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-33, 3D) with valve protection cap or when without cap in nonspecification strong wooden boxes marked with prescribed name of contents, prescribed label and the words "This side up," and the notation "Inside packages comply with prescribed specifications."	Not permitted	Not permitted	Not permitted.
Nitrogen dioxide, liquid. Nitrogen peroxide (tetroxide.)	*A yellow liquid at ordinary temperatures. Boils at about 71° F. Liquid evaporates rapidly in air, even at lower temperatures.* *Vapors in air are toxic, but not explosive or inflammable.* *Has corrosive action in contact with skin.* *Soluble in water producing nitric acid.* Stow well away from all living quarters and in a space not easily accessible to any persons. Protect from direct rays of sun and all sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover" Outside containers: Steel cylinders (ICC-33, 3D) with valve protection cap or when without cap in nonspecification strong wooden boxes marked with prescribed name of contents, prescribed label and the words "This side up," and the notation "Inside packages comply with prescribed specifications." Steel cylinders (ICC—3A480, 3AA480, 25) with valve removed; valve opening closed by a solid metal plug covered with gastight valve protection cap. Tank cars (ICC-106A500, 106A500X).	Not permitted	Not permitted	Not permitted.

			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Parathion and compressed gas mixture (must not contain more than 10 percent parathion by weight).	*A deep-brown to yellow liquid and compressed gas mixture.* *Slightly soluble in water.* *Extremely poisonous.* *May be absorbed through the skin; through digestive organs; or from vapor through respiratory organs.* Stow well away from living quarters and in a space not easily accessible to any persons. Protect from direct rays of the sun and all sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover" Outside containers: Cylinders boxed (ICC-3AA300, 3AA300, 3BA300, 4AA300, 4BA240, 4BAA240) charged with not more than 5 lbs. of the mixture and to a maximum filling density of 80 percent of the water capacity. Not more than 12 cylinders in one outside wooden box, nor more than 4 cylinders in 1 outside fiberboard box.	Not permitted	Not permitted	Not permitted.
Phenylcarbylamine chloride.	*A pale yellow, oily liquid having an onion-like ordor.* *Very irritant.* *Immiscible in water.* Stow away from living quarters and in a space not easily accessible to any persons. Protect from direct rays of the sun and all sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-33, 3D) with valve protection cap or when without cap in nonspecification strong wooden boxes marked with prescribed name of contents, prescribed label and the words "This side up," and the notation "Inside packages comply with prescribed specifications."	Not permitted	Not permitted	Not permitted.
Phosgene (*Diphosgene*). Diphosgene.	*A colorless gas with a stifling, choking effect.* *Extremely poisonous.* Stow well away from living quarters and in a space not easily accessible to any persons. Protect from direct rays of the sun and from all sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-33, 3D) with valve protection cap or when without cap in non-specification strong wooden boxes marked with prescribed name of contents, prescribed label and the words "This side up," and the notation "Inside packages comply with prescribed specifications." Not more than 180 lb. of phosgene may be carried in each cylinder.	Not permitted	Not permitted	Not permitted.
Poisonous liquid or gas, N. O. S.	*May be any poisonous liquid or gas so classified in accordance with the definition for Class "A" poisons contained herein.* Stow well away from living quarters and in a space not easily accessible to any persons. Protect from direct rays of the sun and all sources of artificial heat. Keep Cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Steel cylinders (ICC-33, 3D) with valve protection cap or when without cap in non-specification strong wooden boxes marked with prescribed name of contents, prescribed label and the words "This side up", and the notation "Inside packages comply with prescribed specifications."	Not permitted	Not permitted	Not permitted.
Police grenades, poison gas, Class A.	*Loaded or charged devices designed to eject poisons.* *These devices are commonly so constructed that when they function the contents are ejected but there is no projection of the grenade or any portion of the grenade such as to cause physical injury.* Stow well away from living quarters. Protect from direct rays of the sun and sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck protected." "On deck under cover." Outside containers: Wooden boxes, metal strapped (ICC-15A, 15B, 15C) with inside containers (ICC-2C) not over 24 grenades nor 75 lb. gr. wt. in any outside container.	Not permitted	Not permitted	Not permitted.

Tetraethyl pyrophosphate and compressed gas mixture (must not contain more than 10 percent tetraethyl pyrophosphate by weight).	*A tight, straw colored, mobile liquid and compressed gas mixture.* *Miscible with water.* *Extremely poisonous.* *May be absorbed through the skin, through digestive organs, or from vapor through respiratory organs.* Stow away from living quarters and in space not easily accessible to any persons. Protect from direct rays of the sun and sources of artificial heat. Keep cool.	Poison gas	Stowage: "On deck under cover." Outside containers: Cylinders, boxed (ICC-3AA300, 3AA300, 3B300, 4A300, 4B240, 4BA240) charged with not more than 5 lb. of mixture and to a maximum filling density of 80 percent of the water capacity. Not more than 12 cylinders in one outside wooden box, nor more than 4 cylinders in 1 outside fiberboard box.	Not permitted	Not permitted	Not permitted.
Tetraethyl dithio pyrophosphate and compressed gas mixture (must not contain more than 10 percent tetraethyl dithio pyrophosphate by weight).	*Mixtures of the organic phosphate with methyl chloride as the propellant.* Areas contaminated by spillage or leakage should be isolated and flushed with copious quantities of water or dilute alkali solution. Avoid breathing fumes and avoid contact with human tissue.	Poison gas	Stowage: "On deck under cover." Outside containers: Cylinders, boxed (ICC-3A300, 3AA300, 3B300, 4A300, 4B240, 4BA240) charged with not more than 5 lb. of the mixture and to a maximum filling density of 80 percent of the water capacity. Not more than 12 cylinders in one outside wooden box, nor more than 4 cylinders in 1 outside fiberboard box.	Not permitted	Not permitted	Not permitted.

NOTE: § 146.25-100 is inapplicable to the transportation of military explosives. See § 146.29-1.

§ 146.25-200 *Table H—Classification: Class B; less dangerous poisons.*

Table H—Classification: Class B; less dangerous poisons—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation: Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Aniline oil, liquid	*A liquid varying in color from almost colorless to brown. Its vapors will produce a yellow stain on wood. Poisonous by absorption through the skin; through digestive organs; in form of vapor and dust through the respiratory organs; into the digestive canal by contaminated food. Will contaminate foodstuffs and damage textiles. Slightly miscible with water.* Stow well away from living quarters. Protect from direct rays of the sun and sources of artificial heat. Note: Examine packages carefully for signs of leakage and reject any showing such signs. Marking: A returnable package notice will be shellacked in places upon the head of returnable drums.	Poison	Stowage: "On deck in open." "On deck under cover." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 915 lb. net wt. (ICC-17C) STC, not over 55 gal. cap. (ICC-17E) STC, not over 5 gal. cap. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Tank cars, (ICC-103, 103A, 103W, 103A-W).	Not permitted	Not permitted	Not permitted.
Arsenic acid, liquid	*A concentrated, aqueous solution. Has considerable corrosive effect on iron and steel. Will contaminate foodstuffs. Miscible with water.* Stow away from living quarters. Do not stow with corrosive liquids (white label).	Poison	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." Outside containers: Carboys, boxed, glass (ICC-1A) not over 13 gal. cap. Carboys in kegs, glass (ICC-1C) not over 15 gal. cap. Carboys boxed, glass (ICC-1D) not over 6½ gal. cap. Steel barrels or drums: (ICC-5, 5A, 5B) not over 110 gal. cap. (ICC-17C, 17E) STC, not over 55 gal. cap. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene. Tank cars (ICC-103, 103A, 103W, 103A-W).	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Carboys, boxed, glass (ICC-1A) not over 13 gal. cap. Carboys in kegs, glass (ICC-1C) not over 15 gal. cap. Carboys boxed, glass (ICC-1D) not over 6½ gal. cap. Steel barrels or drums: (ICC-5, 5A, 5B) not over 110 gal. cap. (ICC-17C, 17E) STC, not over 55 gal. cap. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene.	Ferry stowage (AA)	Ferry stowage (BB).
Arsenic chloride (arsenous), liquid Arsenic trichloride, liquid.	*Fuming colorless oily liquid. Caustic and corrosive. Do not breathe fumes. Will contaminate foodstuffs.* Stow away from living quarters. Do not stow with corrosive liquids (white label).	Poison	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." Outside containers: Carboys, boxed, glass (ICC-1A) not over 5 gal. cap. Steel barrels or drums: (ICC-5, 5A, 5B) not over 110 gal. cap. (ICC-17C, 17E) STC, not over 55 gal. cap. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene. Tank cars (ICC-103, 103A, 103W, 103A-W).	Stowage: "On deck under cover." "Tween decks readily accessible." Outside containers: Carboys, boxed, glass (ICC-1A) not over 5 gal. cap. Steel barrels or drums: (ICC-5, 5A, 5B) not over 110 gal. cap. (ICC-17C, 17E) STC, not over 55 gal. cap. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene.	Ferry stowage (AA)	Ferry stowage (BB).
Arsenic, solid	*Steel-gray, brittle, metal-like crystalline mass. Odorless and tasteless. Is poisonous but in this form is not particularly dangerous unless involved in a fire or brought in contact with strong acids. Insoluble in water.* Stow away from acids (white label).	Poison.	Steel barrels or drums: (ICC-5, 5A, 5B) not over 110 gal. cap. (ICC-17C, 17E) STC, not over 55 gal. cap. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C), not over 600 lb. net wt. (ICC-11A) not over 115 lb. net wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. net wt. Fiberboard boxes (ICC-12B, 12C) WIC, not over 50 lb. net wt. Wooden kits (ICC-18B) WPL, not over 30 lb. net wt. Fiber drums: (ICC-21A) not over 225 lb. net wt. (ICC-21B) not over 200 lb. net wt. Plywood drums (ICC-22A) not over 115 lb. net wt. Tank cars (ICC-103, 103A, 103W, 103A-W).	Steel barrels or drums: (ICC-5, 5A, 5B) not over 110 gal. cap. (ICC-17C, 17E) STC, not over 55 gal. cap. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene.	Steel barrels or drums: (ICC-5, 5A, 5B) not over 110 gal. cap. (ICC-17C, 17E) STC, not over 55 gal. cap. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene. Tank cars (ICC-103, 103A, 103W, 103A-W).
Arsenic trioxide, solid Arsenic, white, solid Arsenous acid, solid.	*White, transparent, glassy amorphous lumps or white powder. Odorless, tasteless. Poisonous if taken internally. Care shall be taken not to breathe air laden with fine powder. Will contaminate foodstuffs. Soluble in water.* Stow away from living quarters.	Poison.	Note: For import shipments of Arsenic (arsenic trioxide) the following non-specification containers may be accepted: Strong outside wooden barrels having strong, tight, metal drums enclosed, or strong, tight, metal-strapped, wooden boxes of material not less than ⅞ in. thick throughout, with inside sift-proof cloth container.	Note: For import shipments of Arsenic (arsenic trioxide) the following non-specification containers may be accepted: Strong outside wooden barrel having strong, tight, metal drums enclosed, or strong, tight, metal-strapped, wooden boxes of material not less than ⅞ in. thick throughout, with inside sift-proof cloth containers.	Note: For import shipments of Arsenic (arsenic trioxide) the following non-specification containers may be accepted: Strong outside wooden barrels having strong, tight, metal drums enclosed, or strong, tight, metal-strapped, wooden boxes of material not less than ⅞ in. thick throughout, with inside sift-proof cloth containers	Note: For import shipments of Arsenic (arsenic trioxide) the following non-specification containers may be accepted: Strong outside wooden barrels having strong, tight, metal drums enclosed, or strong, tight, metal-strapped, wooden boxes of material not less than ⅞ in. thick throughout, with inside sift-proof cloth containers.

Arsenic iodide, solid	*In the form of finely divided orange-red scales or powder.* *Is odorless.* *Decomposed by sunlight.* *Poisonous if taken internally.* *Care should be taken not to breathe the air laden with fine powder of this substance.* *Will contaminate foodstuffs.* Stow away from living quarters.	Poison.				
Arsenic pentoxide, solid	*Is a white amorphous material not inflammable or corrosive, but highly poisonous.* *Will dissolve gradually and become liquid by absorbing moisture from the air.* *Soluble in water.* Stow well away from living quarters. Do not stow with acids (white label). Keep dry.	Poison.				
Arsenic sulfide (powder), solid	*May be red, or the yellow arsenic sulfide, in the form of an amorphous powder or solid.* *Will contaminate foodstuff.* *Insoluble in water.* Stow away from living quarters. Do not stow with acids (white label). Keep dry.	Poison	Stowage: "On deck under cover." "Tween decks." "Under deck." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B, 6B, 6C) not over 1,760 lb. gr. wt. (ICC-6A) not over 880 lbs gr. wt. (ICC-17E, 17H, 37D) STC, not over 300 lb. gr. wt. Fiber drums: (ICC-21A) not over 225 lb. net wt. (ICC-21B) not over 200 lb. net wt. Plywood drums (ICC-22A) not over 115 lb. net wt. Authorized only for calcium arsenate and arsenical insecticides and fungicides containing 10.0 percent or less of arsenic trioxide (As_2O_3). Triplex bags (ICC-36A, 36B) not over 100 lb. net wt. Paper bags: (ICC-44B) with inside paper bags, ICC-2D, not over 50 lb. net wt. (ICC-44C, 44D) not over 50 lb. net wt.	Ferry stowage (AA). Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B, 6B, 6C) not over 1,760 lb. gr. wt. (ICC-6A) not over 880 lb. gr. wt. (ICC-17E, 17H, 37D) STC, not over 300 lb. gr. wt. (ICC-37H) STC, not over 200 lb. net wt. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 600 lb. net wt. (ICC-11A) not over 115 lb. net wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. net wt. Wooden kits (ICC-18B) WPL, not over 30 lb. net wt. Fiberboard boxes (ICC-12B, 12C) WIC, not over 50 lb. net wt. Fiber drums: (ICC-21A) not over 225 lb. net wt. (ICC-21B) not over 200 lb. net wt. Plywood drums (ICC-22A) not over 115 lb. net wt. Authorized only for calcium arsenate and arsenical insecticides and fungicides containing 10.0 percent or less of arsenic trioxide (As_2O_3). Triplex bags (ICC-36A, 36B) not over 100 lb. net wt. Paper bags: (ICC-44B) with inside paper bags, ICC-2D, not over 50 lb. net wt. (ICC-44C, 44D) not over 50 lb. net wt.	Ferry stowage (BB). Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B, 6B, 6C) not over 1,760 lb. gr. wt. (ICC-6A) not over 880 lb. gr. wt. (ICC-17E, 17H, 37D) STC, not over 300 lb. gr. wt. (ICC-37H) STC, not over 200 lb. net wt. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 600 lb. net wt. (ICC-11A) not over 115 lb. net wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. net wt. Wooden kits (ICC-18B) WPL, not over 30 lb. net wt. Fiberboard boxes (ICC-12B, 12C) WIC, not over 50 lb. net wt. Fiber drums: (ICC-21A) not over 225 lb. net wt. (ICC-21B) not over 200 lb. net wt. Plywood drums (ICC-22A) not over 115 lb. net wt. Tank cars (ICC-103, 103A, 103W, 103A-W). Authorized only for calcium arsenate and arsenical insecticides and fungicides containing 10.0 percent or less of arsenic trioxide (As_2O_3). Triplex bags (ICC-36A, 36B) not over 100 lb. net wt. Paper bags: (ICC-44B) with inside paper bags, ICC-2D, not over 50 lb. net wt. (ICC-44C, 44D) not over 50 lb. net wt.
Brucine, solid (dimethoxy strychnine).	*White crystaline powder.* *Slightly soluble in water.* Stow away from living quarters and foodstuffs.	Poison.				
Cacodylic acid, solid (dimethylarsenic).	*Colorless, odorless crystals.* *Will gradually liquefy in air.* *Soluble in water.* Stow away from living quarters and foodstuffs.	Poison.				
Calcium arsenate, solid.	*White powder, decomposes on heating.* *Very slightly soluble in water.* Stow away from living quarters and foodstuffs.	Poison.				
Calcium arsenite, solid.	*White, amorphous or granular powder.* *Insoluble in water.* Stow away from living quarters and foodstuffs.	Poison.

			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Chemical ammunition containing Class "B" poisons, liquids or gases, (nonexplosive). NOTE: When chemical ammunition is shipped having ignition elements, bursting charges, detonating fuzes or other explosive components, such shipments shall conform to the regulations prescribed for "Ammunition, chemical, explosive" under Class "A" Dangerous Explosives.	Consisting of projectiles, shells, bombs, grenades, and other containers filled with gases, liquids, or chemicals, class B, without ignition elements, bursting charges, detonating fuzes, or other explosive components. Marking: Packages will be labeled as prescribed by these regulations for gases, liquids, or chemicals contained therein, and marked with the name of the contents.	Poison	See correct shipping name of article contained therein for stowage and containers.	See correct shipping name of article contained therein for stowage and containers.	See correct shipping name of article contained therein for stowage and containers.	See correct shipping name of article contained therein for stowage and containers.
Chlorpicrin, absorbed	*Chlorpicrin absorbed in an efficient absorbing material.* *Properties and hazards same as chlorpicrin, liquid.*	Poison	Stowage: "On deck under cover." Outside containers: Wooden boxes metal strapped (ICC–15A) WIC which must be hermetically sealed metal cans of not over 1 quart capacity each. Not over 24 lb. of chlorpicrin in any outside container.	Not permitted	Not permitted	Not permitted.
Chlorpicrin, liquid. Chlorpicrin, mixtures (containing no compressed gas or poisonous liquid, Class A).	*A colorless, oily liquid. Vapors are very irritating and extremely poisonous.* *Mixtures of chlorpicrin with non-poisonous liquids.* Stow away from living quarters and in a space not easily accessible to any persons. Protect from direct rays of the sun and from all sources of artificial heat. Keep cool. Spillage or leakage may be decontaminated by flushing the area with copious quantities of a water solution of a sulfite (i. e., sodium sulfite).	Poison	Stowage: "On deck under cover." Outside containers: Wooden boxes, (ICC–15A, 15B, 15C, 16A) WIC, not over 24 lb. net wt. Fiberboard boxes (ICC–12B) WIC, not over 12 lb. of liquid in any outside container. Authorized only for chlorpicrin mixtures, in addition to the above containers: Steel drums (ICC–5A) not over 33 gal. cap. Steel cylinders.	Not permitted	Not permitted	Not permitted.

Barium cyanide solid	*Colorless crystals.* *Soluble in water.* Hazards and precautions same as "cyanides dry" above.	Poison.				
Cyanide of calcium, solid. Calcium cyanide solid.	*White or grayish powder.* *Decomposes on heating.* *Soluble in water.* Hazards and precautions same as "cyanides dry" above.	Poison.				
Cyanide of potassium, solid. Cyanide of sodium, solid. Potassium cyanide. Sodium cyanide.	*White amorphous or crystalline mass, with an odor of bitter almonds.* *Gradually liquefies in air.* *Extremely poisonous.* *Do not handle with bare hands.* *In the presence of moisture and carbon dioxide will decompose and give off hydrocyanic acid gas which is poisonous and rapidly fatal when present in the air even in small amounts.* *Soluble in water.* Do not stow with acids (white label). Do not stow with carbon dioxide cylinders. Stow away from living quarters and foodstuffs. Keep dry.	Poison.				
Mercuric cyanide, solid. Mercury cyanide, solid.	*White or colorless crystals or powder.* *Decomposes on heating.* *Soluble in water.* Hazards and precautions same as "cyanides dry" above.	Poison.				
Nickel cyanide, solid	*Apple green plates or powder.* *Decomposes on heating.* *Insoluble in water.* Hazards and precautions same as "cyanides dry" above.	Poison.				
Cyanide of copper			No restrictions	No restrictions	No restrictions	No restrictions.
Cyanide of lead			No restrictions	No restrictions	No restrictions	No restrictions.
Cyanide of silver			No restrictions	No restrictions	No restrictions	No restrictions.
Cyanide of zinc			No restrictions	No restrictions	No restrictions	No restrictions.
Cyanide of potassium, liquid. Cyanide of sodium, liquid.	*Colorless liquid, extremely poisonous having an odor of bitter almonds.* *Vapors are poisonous. In the event of leakage and exposure to air, hydrocyanic acid gas can be evolved which is poisonous and rapidly fatal when present in the air even in small amounts.* *Do not allow to contact the skin.* Do not stow with acids (white label). Do not stow with carbon dioxide. Stow away from living quarters and foodstuffs.	Poison	Stowage: "On deck in open." "On deck under cover." "Tween decks." "Under deck." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) without galvanizing inside, not over 110 gal. cap. (ICC-17E, 37D) STC, not over 30 gal. cap. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. gr. wt. Tank cars (ICC-103, 103A, 103W, 103A-W).	Not permitted	Not permitted	Not permitted.

Table H—Classification: Class B; less dangerous poisons—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation: Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Dinitrobenzol, liquid	*Colorless to pale yellow liquid.* *Flashpoint variable depending on solvent, may be low.* *Slightly soluble in water.* Stow away from living quarters and foodstuffs.	Poison	Sto'wage: "On deck in open." "On deck under cover." "Tween decks." "Under deck." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 110 gal. cap. and not exceeding 1,760 lb. gr. wt. (ICC-17C, 17E) STC, not over 55 gal. cap. and not exceeding 880 lb. gr. wt. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. and not exceeding 600 lb. net wt. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene. Tank cars (ICC-103, 103A, 103W, 103A-W).	Stowage: "On deck in open." "On deck under cover." "Tween decks." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 110 gal. cap. and not exceeding 1,760 lb. gr. wt. (ICC-17C, 17E) STC, not over 55 gal. cap. and not exceeding 880 lb. gr. wt. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. and not exceeding 600 lb. net wt. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B), WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene.	Ferry stowage (AA) Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 110 gal. cap. and not exceeding 1,760 lb. gr. wt. (ICC-17C, 17E) STC, not over 55 gal. cap. and not exceeding 880 lb. gr. wt. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. and not exceeding 600 lb. net. wt. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B), WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene.	Ferry stowage (BB). Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 110 gal. cap. and not exceeding 1,760 lb. gr. wt. (ICC-17C, 17E) STC, not over 55 gal. cap. and not exceeding 880 lb. gr. wt. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. and not exceeding 600 lb. net wt. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B), WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene. Tank cars (ICC-103, 103A, 103W, 103A-W). Ferry stowage (BB).
Dinitrobenzol, solid	*A yellow crystalline solid.* *Poisonous when taken internally and also when in contact with the skin.* *Do not breathe dust-laden air.* *Slightly soluble in water.*	Poison	Stowage: "On deck in open." "On deck under cover." "Tween decks." "Under deck." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B, 6B, 6C) not over 1760 lb. gr. wt. (ICC-6A) not over 880 lb. gr. wt. (ICC-17E, 17H, 37D) STC, not over 300 lb. gr. wt. (ICC-37H) STC, not over 200 lb. net wt. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 600 lb. net wt. (ICC-11A) not over 300 lb. net wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. net wt. Wooden kits (ICC-18B) WPL, not over 30 lb. net wt. Fiberboard boxes (ICC-12B, 12C) WIC, not over 50 lb. net wt. Fiber drums: (ICC-21A) not over 225 lb. net wt. (ICC-21B) not over 200 lb. net wt. Plywood drums (ICC-22A) not over 115 lb. net wt. Tank cars (ICC-103, 103A).	Stowage: "On deck in open." "On deck under cover." "Tween decks." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B, 6B, 6C) not over 1760 lb. gr. wt. (ICC-6A) not over 880 lb. gr. wt. (ICC-17E, 17H, 37D) STC, not over 300 lb. gr. wt. (ICC-37H) STC, not over 200 lb. net wt. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 600 lb. net wt. (ICC-11A) not over 300 lb. net wt. Wooden boxes (ICC-15A, 15B, 15C 16A, 19A) WIC, not over 100 lb. net wt. Wooden kits (ICC-18B) WPL, not over 30 lb. net wt. Fiberboard boxes (ICC-12B, 12C) WIC, not over 50 lb. net wt. Fiber drums: (ICC-21A) not over 225 lb. net wt. (ICC-21B) not over 200 lb. net wt. Plywood drums (ICC-22A) not over 115 lb. net wt.	Ferry stowage (AA) Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B, 6B, 6C) not over 1760 lb. gr. wt. (ICC-6A) not over 880 lb. gr. wt. (ICC-17E, 17H, 37D) STC, not over 300 lb. gr. wt. (ICC-37H) STC, not over 200 lb. net wt. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 600 lb. net wt. (ICC-11A) not over 300 lb. net wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. net wt. Wooden kits (ICC-18B) WPL, not over 30 lb. net wt. Fiberboard boxes (ICC-12B, 12C) WIC, not over 50 lb. net wt. Fiber drums: (ICC-21A) not over 225 lb. net wt. (ICC-21B) not over 200 lb. net wt. Plywood drums (ICC-22A) not over 115 lb. net wt.	Ferry stowage (BB). Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B, 6B, 6C) not over 1760 lb. gr. wt. (ICC-6A) not over 880 lb. gr. wt. (ICC-17E, 17H, 37D) STC, not over 300 lb. gr. wt. (ICC-37H) STC, not over 200 lb. net wt. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 600 lb. net wt. (ICC-11A) not over 300 lb. net wt. Mercurous gluconate, solid.	*Metal-organic compound in powder form. Slightly soluble in water.*	Poison.				
Mercurous iodide, solid.	*Bright yellow, amorphous powder. Odorless. Sublimes at 140° C. Decomposes in light. Insoluble in water.*	Poison.				
Mercurous nitrate, solid.	*Short, prismatic crystals. Effloresces and becomes anhydrous in dry air. Decomposes in water.*	Poison.				
Mercurous oxide, black, solid.	*Black to grayish-black powder. Insoluble in water. Decomposes at 100° C.*	Poison.				
Mercurous sulfate, solid.	*White crystalline powder. Almost insoluble in water. Decomposes on heating.*	Poison.				
Mercury acetate, solid.	*White crystalline powder. Decomposes on heating. Soluble in water.*	Poison.				
Mercury bichloride, solid.	*White crystals or powder. Very poisonous. Soluble in water.*	Poison.				
Mercury bisulfate, solid.	*White crystalline powder. Decomposed by water.*	Poison.				
Mercury compounds, N. O. S. (solid).	*Any compound of mercury that classifies as a Less Dangerous Poison, Class B, in accordance with these regulations.*	Poison.				
Methyl bromide, liquid (*bromomethane*).	*Colorless, transparent, volatile liquid. Chloroform-like odor. Noninflammable. Exists as gas under usual temperatures. Liquid form has boiling point of 40° F.* Stow away from living quarters and foodstuffs. Do not stow with acids (white label). Keep cool.	Poison	Stowage: ~~"On deck protected."~~ "On deck under cover." Outside containers: Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) with inside metal cans containing not over 1 lb. each. Nicotine sulfate, solid	*White crystals.* *Soluble in water.* Stow away from living quarters and foodstuffs.	Poison.				
Nicotine tartarate	*White to reddish-white crystals.* *Melts at about 88° to 90° C.* *Very soluble in water.* Stow away from living quarters and foodstuffs.	Poison.				
Nitrobenzol, liquid (oil of mirbane).	*A heavy, oily liquid, yellow or brownish color, having the odor of bitter almonds.* *Ignites at a temperature of about 203° F. Gives off inflammable vapor.* *Is in the form of bright yellow crystals below a temperature of about 48° F.* *The vapors given off by this liquid are poisonous when inhaled.* *Is a powerful narcotic poison when induced into the digestive organs.* *May also be poisonous by absorption into the skin.* *Will contaminate foodstuffs.* *Slightly soluble in water.* Stow away from living quarters and foodstuffs. Protect from direct rays of the sun and all sources of artificial heat. Keep cool.	Poison	Stowage: "On deck in open." "On deck under cover." "Under deck." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 55 gal. cap. (ICC-17C, 17E) STC, not over 55 gal. cap. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Woolen boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. gr. wt. Fiberboard boxes (ICC-12B) (WIC) not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene. Tank cars (ICC-103, 103A, 103W, 103A-W).	Not permitted.	Not permitted.	Not permitted.
Nitrochlorbenzene, ortho, liquid.	*A heavy, oily, yellow liquid.* *Immiscible with water.* Hazards and precautions similar to "Nitrobenzol" above.	Poison.

Ferry stowage (AA). Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 55 gal. cap., and not exceeding 880 lb. gr. wt. (ICC-17C, 17E) STC, not over 55 gal. cap., and not exceeding 880 lb. gr. wt. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap., and not exceeding 600 lb. net wt. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes, (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene.	Ferry stowage (BB). Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 55 gal. cap., and not exceeding 880 lb. gr. wt. (ICC-17C, 17E) STC, not over 55 gal. cap., and not exceeding 880 lb. gr. wt. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap., and not exceeding 600 lb. net wt. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes, (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene. Tank cars (ICC-103, 103A, 103W, 103A-W).

Table H—Classification: Class B; less dangerous poisons—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Parathion, liquid	*A deep brown to yellow liquid. Slightly soluble in water. Extremely poisonous. May be absorbed through the skin; through digestive organs; or from vapor through respiratory organs.* Stow away from living quarters and foodstuffs.	Poison	Stowage: "On deck in open." "On deck under cover." "Tween decks." "Under deck." Outside containers: Steel barrels or drums (ICC-5, 5A, or 5B) not over 55 gal. cap. Steel drums (ICC-17C) STC, not over 55 gal. cap. Wooden boxes (ICC-15A, 15B) WIMC, not over 100 lb. net wt. Authorized only for parathion, liquid: Cylinders as prescribed for any compressed gas except acetylene.	Not permitted	Not permitted	Not permitted.
Parathion mixtures, liquid (*containing more than 50% parathion by weight*)	Liquid parathion mixtures (solutions, emulsions or emulsifiable liquids) containing more than 50% parathion by wt. Properties same as those listed above.	Poison	Stowage: "On deck in open." "On deck under cover." "Tween decks." "Under deck." Outside containers: Steel barrels or drums (ICC-5, 5A, 5B) not over 55 gal. cap. Steel drums (ICC-17C) STC, not over 55 gal. cap. Wooden boxes (ICC-15A, 15B, 15C) WIMC, not over 100 lb. gr. wt. Steel drums (ICC-17E) STC, not over 55 gal. cap. authorized only for mixtures which are nonflammable. NOTE: Mixtures containing not more than 25% by wt. parathion, in inside metal containers not over 8 fluid ounces capacity each packed in strong outside containers together with sufficient absorbent material to completely absorb the liquid in the event of leakage are exempt from specification packaging, marking other than name of contepts, and labeling requirements.	Stowage: "On deck in open." "On deck under cover." "Tween decks."	Ferry stowage (AA)	Ferry stowage (BB).
Parathion mixtures, liquid (*containing not more than 50% parathion by wt.*)	*Liquid parathion mixtures (solutions, emulsions, or emulsifiable liquids) containing not more than 50% parathion by wt.* Hazards and precautions similar to "parathion, liquid" above. Stow away from living quarters and food stuffs.	Poison	Stowage: "On deck in open." "On deck under cover." "Tween decks." "Under deck." Outside containers: Steel barrels or drums (ICC-5, 5A, 5B) not over 55 gal. cap. Steel drums (ICC-17C) STC, not over 55 gal. cap. Wooden boxes (ICC-15A, 15B, 15C) WIMC, not over 100 lb. gr. wt. Steel drums (ICC-17E) STC, not over 55 gal. cap. authorized only for mixtures which are nonflammable. NOTE: Mixtures containing not more than 25% by wt. parathion, in inside metal containers not over 8 fluid ounces capacity each packed in strong outside containers together with sufficient absorbent material to completely absorb the liquid in the event of leakage are exempt from specification packaging, marking other than name of contents, and labeling requirements.	Outside containers: Steel barrels or drums (ICC-5, 5A, 5B) not over 55 gal. cap. Steel drums (ICC-17C) STC, not over 55 gal. cap. Wooden boxes (ICC-15A, 15B, 15C) WIMC, not over 100 lb. gr. wt. Steel drums (ICC-17E) STC, not over 55 gal. cap. authorized only for mixtures which are nonflammable. NOTE: Mixtures containing not more than 25% by wt. parathion, in inside metal containers not over 8 fluid ounces capacity each, packed in strong outside containers together with sufficient absorbent material to completely absorb the liquid in the event of leakage are exempt from specification packaging, marking other than name of contents, and labeling requirements. Ferry stowage (AA).	Outside containers: Steel barrels or drums (ICC-5, 5A, 5B) not over 55 gal. cap. Steel drums (ICC-17C) STC, not over 55 gal. cap. Wooden boxes (ICC-15A, 15B, 15C) WIMC, not over 100 lb. gr. wt. Steel drums (ICC-17E) STC, not over 55 gal. cap. authorized only for mixtures which are nonflammable. NOTE: Mixtures containing not more than 25% by wt. parathion, in inside metal containers not over 8 fluid ounces capacity each, packed in strong outside containers together with sufficient absorbent material to completely absorb the liquid in the event of leakage are exempt from specification packaging, marking other than name of contents, and labeling requirements. Ferry stowage (BB).
Parathion mixtures, dry	*Parathion mixtures in which the liquid is absorbed in concentrations greater than 2% but not exceeding 5% in a dry inert material so as to form a dry mixture. Poisonous. Do not breath air laden with this substance. Do not allow in contact with the skin.* Stow away from living quarters and foodstuffs.	Poison	Stowage: "On deck in open." "On deck under cover." "Tween decks." "Under deck." Outside containers: Fiberboard boxes (ICC-12B, 12C) WIC, not over 65 lb. gr. wt. Wooden boxes (ICC-15A, 15B) WIC, not over 150 lb. gr. wt. Steel barrels or drums (ICC-5, 5B, 6A, 6C) not over 55 gal. cap. Steel drums (ICC-17C, 17H) STC, not over 55 gal. cap. Steel drums (ICC-37H) STC, not over 100 lb. net wt. Fiber drums (ICC-21A, 21B) not over 200 lb. net wt. NOTE: Dry mixtures containing not more than 2% by weight of parathion, and in which the liquid is absorbed in an inert material, are exempt from specification packing, marking other than name of contents, and labeling requirements.	Stowage: "On deck in open." "On deck under cover." "Tween decks." "Under deck." Outside containers: Fiberboard boxes (ICC-12B, 12C) WIC, not over 65 lb. gr. wt. Wooden boxes (ICC-15A, 15B) WIC, not over 150 lb. gr. wt. Steel barrels or drums (ICC-5, 5B, 6A, 6C) not over 55 gal. cap. Steel drums (ICC-17C, 17H) STC, not over 55 gal. cap. Steel drums (ICC-37H) STC, not over 100 lb. net wt. Fiber drums (ICC-21A, 21B) not over 200 lb. net wt. NOTE: Dry mixtures containing not more than 2% by weight of parathion, and in which the liquid is absorbed in an inert material, are exempt from specification packing, marking other than name of contents, and labeling requirements.	Outside containers: Fiberboard boxes (ICC-12B, 12C) WIC, not over 65 lb. gr. wt. Wooden boxes (ICC-15A, 15B) WIC, not over 150 lb. gr. wt. Steel barrels or drums (ICC-5, 5B, 6A, 6C) not over 55 gal. cap. Steel drums (ICC-17C, 17H) STC, not over 55 gal. cap. Steel drums (ICC-37H) STC, not over 100 lb. net wt. Fiber drums (ICC-21A, 21B) not over 200 lb. net wt. NOTE: Dry mixtures containing not more than 2% by weight of parathion, and in which the liquid is absorbed in an inert material, are exempt from specification packing, marking other than name of contents, and labeling requirements.	Outside containers: Fiberboard boxes (ICC-12B, 12C) WIC, not over 65 lb. gr. wt. Wooden boxes (ICC-15A, 15B) WIC, not over 150 lb. gr. wt. Steel barrels or drums (ICC-5, 5B, 6A, 6C) not over 55 gal. cap. Steel drums (ICC-17C, 17H) STC, not over 55 gal. cap. Steel drums (ICC-37H) STC, not over 100 lb. net wt. Fiber drums (ICC-21A, 21B) not over 200 lb. net wt. NOTE: Dry mixtures containing not more than 2% by weight of parathion, and in which the liquid is absorbed in an inert material, are exempt from specification packing, marking other than name of contents, and labeling requirements.

Table H—Classification: Class B; less dangerous poisons—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Perchloro-methyl-mercaptan	*An orange-red heavy liquid. Volatile when exposed to sun or heat. Non-inflammable. Gives off vapors that are irritating and suffocating. May be poisonous by skin absorption. Not affected by light, but fumes on exposure to moist air. Insoluble in water. Do not breathe vapors or allow liquid to contact the skin.* Stow well away from living quarters and foodstuffs. Do not stow with acids (white label). Keep cool.	Poison	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." Outside containers: Wooden barrels or kegs (ICC-11A, 11B) WIC, not over 100 lb. net wt. Wooden boxes (ICC-15A, 15B, 15C, 16A) WIC, not over 100 lb. net wt.	Not permitted	Not permitted	Not permitted.
Phenyldichlorarsine, liquid	*A poisonous material used in warfare. Irritating to the lungs. Do not breathe vapors.* Stow away from living quarters and foodstuffs. Keep cool.	Poison	Stowage: "On deck in open" Outside containers: Steel barrels or drums (ICC-5A) not over 30 gal. cap.	Not permitted	Not permitted	permitted
Poisonous liquids, N. O. S.	*May be any liquid classifying as a Less Dangerous Poison, Class B, in accordance with the definitions contained in these regulations, provided such liquid is not otherwise specified by name in these regulations.* Stow away from living quarters and foodstuffs. Do not stow with acids (white label). Keep cool and well away from all sources of artificial heat.	Poison	Stowage: "On deck in open." "On deck under cover." "Tween decks." "Under deck." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 55 gal. cap., and not exceeding 880 lb. gr. wt. (ICC-17C, 17E) STC, not over 55 gal. cap., and not exceeding 880 lb. gr. wt. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap., and not exceeding 600 lb. net wt. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene. Tank cars (ICC-103, 103A, 103W, 103A-W).	Stowage: "On deck in open." "On deck under cover." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 55 gal. cap., and not exceeding 880 lb. gr. wt. Wooden barrels or kegs: (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene.	Ferry stowage (AA) Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 55 gal. cap., and not exceeding 880 lb. gr. wt. (ICC-17C, 17E) STC, not over 55 gal. cap., and not exceeding 880 lb. gr. wt. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap., and not exceeding 600 lb. net wt. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene.	Ferry stowage (BB). Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 55 gal. cap., and not exceeding 880 lb. gr. wt. (ICC-17C, 17E) STC, not over 55 gal. cap., and not exceeding 880 lb. gr. wt. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap., and not exceeding 600 lb. net wt. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 100 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene. Tank cars (ICC-103, 103A, 103W, 103A-W).

Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 55 gal. cap. (ICC-17C, 17E) STC, not over 55 gal. cap. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene.	Ferry stowage (AA). Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 55 gal. cap. (ICC-17C, 17E) STC, not over 55 gal. cap. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A), WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene.	Ferry stowage (BB). Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B) not over 55 gal. cap. (ICC-17C, 17E) STC, not over 55 gal. cap. (ICC-37D) STC, not over 10 gal. cap. Wooden barrels or kegs: (ICC-10A, 10B, 10C) not over 50 gal. cap. (ICC-11A, 11B) WIC, not over 200 lb. gr. wt. Wooden boxes (ICC-15A, 15B, 15C, 16A, 19A) WIC, not over 150 lb. gr. wt. Fiberboard boxes (ICC-12B) WIC, not over 65 lb. gr. wt. Cylinders as prescribed for any compressed gas except acetylene. Tank cars (ICC-103, 103A, 103W, 103A-W).
Sodium aside	*White hexagonal crystals.* *Decomposes when heated.* *Soluble in water.* *In contact with moist air and acids, will give off poisonous gas.* Stow away from living quarters and foodstuffs. Keep cool.	Poison	Stowage: "On deck in open." "On deck under cover." "Under deck." Outside containers: Wooden boxes (ICC-15A) WIC with securely closed paper bag inside ICC-2J. Not over 100 lb. net wt.	Not permitted.	Not permitted.	Not permitted.
Tetraethyl lead, liquid.	*Colorless liquid.* *Absorption of this liquid through the skin or inhalation of the vapors is poisonous.* *Insoluble in water.* Stow away from living quarters and foodstuffs. Keep cool.	Poison	Stowage: "On deck in open." "On deck under cover." Outside containers: Steel barrels or drums (ICC-5, 5A) not over 110 gal. cap. Wooden boxes (ICC-15A) with inside glass or earthenware containers of not over 1 pint capacity each or metal cans within ICC-2A. Outside container not over 100 lb. net wt. Cylinders as prescribed for any compressed gas except acetylene.	Stowage: "On deck in open." "On deck under cover." Outside containers: Steel barrels or drums (ICC-5, 5A) not over 110 gal. cap. Wooden boxes (ICC-15A) with inside glass or earthenware containers of not over 1 pint capacity each or metal cans within ICC-2A. Outside container not over 100 lb. net wt. Cylinders as prescribed for any compressed gas except acetylene.	Ferry stowage (AA). Outside containers: Steel barrels or drums (ICC-5, 5A) not over 110 gal. cap. Wooden boxes (ICC-15A) with inside glass or earthenware containers of not over 1 pint capacity each or metal cans within ICC-2A. Outside container not over 100 lb. net wt. Cylinders as prescribed for any compressed gas except acetylene.	Ferry stowage Outside containers: Steel barrels or drums (ICC-5, 5A) not over 110 gal. cap. Wooden boxes (ICC-15A) with inside glass or earthenware containers of not over 1 pint capacity each or metal cans within ICC-2A. Outside container not over 100 lb. net wt. Cylinders as prescribed for any compressed gas except acetylene.

Zinc arsenite, solid	*Colorless powder* *Insoluble in water.* Stow away from living quarters and foodstuffs.	Poison.				

NOTE: § 146.25-200 is inapplicable to the transportation of military explosives. See § 146.29-1.

§ 146.25-300 *Table II—Classification: Class C; tear gas or irritating substances.*

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation: Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Brombenzyl cyanide, liquid.	*A dark brown viscous liquid which solidifies at about 75° F., forming white or yellowish crystals.* *Vapors are heavier than air.* *The vapors given off by this material are intensely irritating to the eyes and have a strong corrosive action on the throat and lungs.* Stow well away from living quarters and in a space not easily accessible to any persons. Keep cool.	Tear gas	Stowage: "On deck protected." "On deck under cover." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B, 6B, 6C) not over 110 gal. cap. (ICC-6A) not over 55 gal. cap. (ICC-17C) STC, not over 5 gal. cap. Wooden boxes (ICC-15A, 15 B) WIMC, not over 8 liquid gallons and not over 80 lb. net wt. Cylinders as prescribed for any compressed gas except acetylene.	Not permitted	Not permitted	Not permitted.
Chemical ammunition containing Class "C" poisons, liquids, gases or solids (nonexplosive). NOTE: When shipped with ignition elements, bursting charges, detonating fuzes or other explosive components, such shipments shall conform to the regulations prescribed for "Ammunition, chemical explosive" under Class "A" dangerous explosives.	*Consists of projectiles, shells, bombs, and other containers, except grenades, filled with gases, liquids, or chemicals, Class "C" without ignition elements, bursting charges, detonating fuses, or other explosive components.* Boxes must be marked with name of contents and labeled as prescribed by these regulations for the gases, liquids, or chemicals contained therein.	Tear gas.				
Chloracetophenone, gas, liquid, or solid.	*In solid form is a crystalline body of pale yellow color with a pungent odor.* *Melts at about 138° F.* *Is also shipped in liquid form or in the form of gas.* *Vapors intensely irritating to the eyes.* *Insoluble in water.* Stow well away from living quarters. Keep cool.	Tear gas	Stowage: "On deck in open." "On deck under cover." "Tween decks readily accessible." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B, 6B, 6C) not over 110 gal. cap. (ICC-6A) not over 55 gal. cap. (ICC-17C) STC, not over 5 gal. cap.	Stowage: "On deck in open." "On deck under cover." Outside containers: Steel barrels or drums (ICC-6A, 6B, 6C) not over 30 gal. cap. and not over 480 lb. gr. wt.	Not permitted	Not permitted.
Diphenylaminechlorarsine, gas, liquid or solid.	*A yellow crystalline substance.* *In solid form, capable of giving off irritating vapors.* *Is also shipped in liquid form or in the form of gas.* Stow well away from living quarters. Keep cool.	Tear gas.	Wooden boxes (ICC-15A, 15B) WIMC, not over 8 liquid gallons and not over 80 lb. net wt. Cylinders as prescribed for any compressed gas except acetylene.	Wooden boxes (ICC-15A, 15B) WIMC, not over 8 liquid gallons and not over 80 lb. net wt.		
Diphenylchlorarsine solid.	*A white crystalline substance giving off irritating vapors.* Stow well away from living quarters. Keep cool.	Tear gas.				
Monochloracetone, stabilized.	*A clear liquid with pungent odor irritating to the eyes.* *Soluble in water.* Stow well away from living quarters.	Tear gas	Stowage: "On deck protected." "On deck under cover." Outside containers: Metal barrels or drums: (ICC-5, 5A) not over 5 gal. cap. (ICC-17C) STC, not over 5 gal. cap. Wooden boxes (ICC-15A, 15B, 15C, 16A) WIC, not over 24 lb. net wt. of liquid.	Not permitted	Not permitted	Not permitted.

Table H—Classification: Class C; tear gas or irritating substances—Continued

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation: Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Poisonous liquids, N. O. S.	*Any liquid classifying as a poison, Class "C", in accordance with these regulations.* Stow well away from living quarters. Keep cool.	Tear gas	Stowage: "On deck in open." "On deck under cover." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B, 6B, 6C) not over 110 gal. cap. and not over 1760 lb. gr. wt. (ICC-6A) not over 55 gal. cap. and not over 880 lb. gr. wt. (ICC-17C) STC, not over 5 gal. cap. Wooden boxes (ICC-15A, 15B) WIMC, not over 8 liquid gallons and not over 80 lb. net wt. Cylinders as prescribed for any compressed gas except acetylene.	Not permitted	Not permitted	Not permitted.
Poisonous solids, N. O. S.	*Any solid classifying as a poison, Class "C", in accordance with these regulations.* Stow well away from living quarters. Keep cool.	Tear gas.				
Tear gas grenades. Tear gas candles.	*Devices containing lachrymatory (tear producing) substances. These devices are commonly so constructed that when they function, the contents are ejected, but there is no projection of any portion of the grenades which might cause physical injury.* Stow well away from living quarters. Keep cool. NOTE: Grenades or other similar devices may be shipped completely assembled when shipments are made by, for, or to the National Military Establishment of the United States Government, providing the functioning element is so packed that it cannot accidentally function.	Tear gas	Stowage: "On deck in open." "On deck under cover." Outside containers: Wooden boxes (metal strapped) (ICC-15A, 15B, 15C) not more than 24 grenades and 24 functioning devices, nor over 75 lb. gr. wt. Steel barrels or drums (ICC-37D) STC, not more than 24 grenades and 24 functioning devices, nor over 75 lb. gr. wt.	Stowage: "On deck in open." Outside containers: Wooden boxes (metal strapped) (ICC-15A, 15B, 15C) not more than 24 grenades and 24 functioning devices, nor over 75 lb. gr. wt. Steel barrels or drums (ICC-37D) STC, not more than 24 grenades and 24 functioning devices, nor over 75 lb. gr. wt.	Ferry stowage (AA) Outside containers: Wooden boxes (metal strapped) (ICC-15A, 15B, 15C) not more than 24 grenades and 24 functioning devices, nor over 75 lb. gr. wt. Steel barrels or drums (ICC-37D) STC, not more than 24 grenades and 24 functioning devices, nor over 75 lb. gr. wt.	Ferry stowage (BB). Outside containers: Wooden boxes (metal strapped) (ICC-15A, 15B, 15C) not more than 24 grenades and 24 functioning devices, nor over 75 lb. gr. wt. Steel barrels or drums (ICC-37D) STC, not more than 24 grenades and 24 functioning devices, nor over 75 lb. gr. wt.
Tear gas material, liquid or solid, N. O. S.	*May be any liquid or solid material used as a tear-producing gas.* Stow well away from living quarters. Keep cool.	Tear gas	Stowage: "On deck in open." "On deck under cover." Outside containers: Steel barrels or drums: (ICC-5, 5A, 5B, 6B, 6C) not over 110 gal. cap. and not over 1760 lb. gr. wt. (ICC-6A) not over 55 gal. cap. and not over 880 lb. gr. wt. (ICC-17C) STC, not over 5 gal. cap. Wooden boxes (ICC-15A, 15B) WIMC, not over 8 liquid gallons and not over 80 lb. net wt. Cylinders as prescribed for any compressed gas except acetylene.	Not permitted	Not permitted	Not permitted.
Xylyl bromide	*A colorless liquid or crystals producing a gas having lachrymatory effects. Used for military purposes. Insoluble in water.* Stow well away from living quarters. Keep cool.	Tear gas.				

NOTE: § 146.25-300 is inapplicable to the transportation of military explosives. See § 146.29-1.

§ 146.25-400 *Table H—Classification: Class D: radioactive materials.*

Descriptive name of article	Characteristic properties, cautions, markings required	Label required	Required conditions for transportation: Cargo vessel	Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
Radioactive materials, groups I and II.	Group I: Radioactive materials that emit gamma rays only or both gamma and electrically charged corpuscular rays. Group II: Radioactive materials that emit neutrons and either or both gamma and electrically charged corpuscular rays. Do not stow with explosives, flammable liquids, compressed flammable gases, corrosive liquids, or poisonous gases or liquids, in cylinders, projectiles, or bombs, or with undeveloped films. Observe instructions and safety precautions as set forth in this subpart.	Radioactive materials group I or group II: Red.	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." Outside containers: Wooden boxes (ICC-15A, 15B) WIC. Fiberboard boxes (ICC-12B) WIC. Fiber drums (ICC-21A) WIC. Other approved containers. Packaging and shielding requirements of this subpart must be complied with.	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." Outside containers: Wooden boxes (ICC-15A, 15B) WIC. Fiberboard boxes (ICC-12B) WIC. Fiber drums (ICC-21A) WIC. Other approved containers. Packaging and shielding requirements of this subpart must be complied with.	Ferry stowage (AA) Outside containers: Wooden boxes (ICC-15A, 15B) WIC. Fiberboard boxes (ICC-12B) WIC. Fiber drums (ICC-21A) WIC. Other approved containers. Packaging and shielding requirements of this subpart must be complied with.	Ferry stowage (BB). Outside containers: Wooden boxes (ICC-15A, 15B) WIC. Fiberboard boxes (ICC-12B) WIC. Fiber drums (ICC-21A) WIC. Other approved containers. Packaging and shielding requirements of this subpart must be complied with.
Radioactive materials, group III.	Group III: Radioactive materials that emit electrically charged corpuscular rays only, i.e., alpha or beta, etc., or any other radioactive material that is so shielded that the gamma radiation at the surface of the package does not exceed 10 milliroentgens per 24 hours at any time during transportation. Do not stow with explosives, flammable liquids, compressed flammable gases, corrosive liquids, or poisonous gases or liquids, in cylinders, projectiles, or bombs, or with undeveloped films. Observe instructions and safety precautions as set forth in this subpart.	Radioactive materials, group III: Blue.	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." Outside containers: Wooden boxes (ICC-15A, 15B) WIC. Fiberboard boxes (ICC-12B) WIC. Fiber drums (ICC-21A) WIC. Other approved containers. Packaging and shielding requirements of this subpart must be complied with.	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." Outside containers: Wooden boxes (ICC-15A, 15B) WIC. Fiberboard boxes (ICC-12B) WIC. Fiber drums (ICC-21A) WIC. Other approved containers. Packaging and shielding requirements of this subpart must be complied with.	Ferry stowage (AA) Outside containers: Wooden boxes (ICC-15A, 15B) WIC. Fiberboard boxes (ICC-12B) WIC. Fiber drums (ICC-21A) WIC. Other approved containers. Packaging and shielding requirements of this subpart must be complied with.	Ferry stowage (BB). Outside containers: Wooden boxes (ICC-15A, 15B) WIC. Fiberboard boxes (ICC-12B) WIC. Fiber drums (ICC-21A) WIC. Other approved containers. Packaging and shielding requirements of this subpart must be complied with.
Radioactive materials as described under § 146.25-25 (a) and (b).	Do not stow with explosives, flammable liquids, compressed flammable gases, corrosive liquids, or poisonous gases or liquids, in cylinders, projectiles or bombs. Observe instructions and safety precautions as set forth in this subpart.	No label required.	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck." Outside containers: Strong outside containers with or without inside container, meeting the applicable requirements of § 146.25-25.	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck." Outside containers: Strong outside containers with or without inside container, meeting the applicable requirements of § 146.25-25.	Ferry stowage (AA) Outside containers: Strong outside containers with or without inside container, meeting the applicable requirements of § 146.25-25.	Ferry stowage (BB). Outside containers: Strong outside containers with or without inside container, meeting the applicable requirements of § 146.25-25.
Radioactive materials as described under § 146.25-25 (c).	Do not stow with explosives, flammable liquids, compressed flammable gases, corrosive liquids, or poisonous gases or liquids, in cylinders, projectiles, or bombs. Observe instructions and safety precautions as set forth in this subpart.	No label required.	Stowage: "On deck protected." "On deck under cover." "Tween decks readily accessible." "Under deck." Outside containers: Strong outside containers with or without inside container, meeting the applicable requirements of § 146.25-25.	Not permitted	Not permitted	Not permitted.

10. Sections 146.28–1 and 146.28–2 are amended to read as follows:

§ 146.28–1 *Scope.* The regulations contained in the sections under the heading "Subpart—Temporary Amendments to Regulations" are supplementary and amendatory to the regulations in this part and are effective for the duration of the National Emergency proclaimed by the President on December 16, 1950 (Proclamation 2914, 3 CFR, 1950 Supp.), except as hereafter modified or rescinded.

§ 146.28–2 *Reused single-trip containers.* Notwithstanding the provisions of § 146.05–10 (h), single-trip containers may be, for the duration of the National Emergency proclaimed by the President on December 16, 1950 (Proclamation 2914, 3 CFR, 1950 Supp.), reused if retested and approved for service in accordance with the regulations of the Interstate Commerce Commission in effect at the time of shipment.

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended; 50 U. S. C. 1275)

11. Section 146.28–3 *The Captain of the Port to establish conditions for loading and unloading cargo* is canceled.

12. Section 146.28–5 *Additional containers for cyanides* is canceled.

13. Section 146.28–9 *Additional containers for poisonous solids* is canceled.

14. Section 146.28–10 *Additional containers for blasting caps* is canceled.

15. Section 146.28–11 *Additional containers for airplanes flares* is canceled.

16. Section 146.28–12 *Additional containers for empty cartridge cases primed* is canceled.

17. Section 146.28–16 *Additional containers for sodium hydrosulfite* is canceled.

18. Section 146.28–18 *Additional containers for batteries, electric, wet* is canceled.

19. Section 146.28–19 *Additional containers for nitrogen dioxide, liquid (nitrogen peroxide, nitrogen tetroxide)* is canceled.

20. Section 146.28–22 is amended to read as follows:

§ 146.28–22 *Increase of weight limitation for Class B poisonous solids.* Class B poisonous solids other than such poisonous solids for which special requirements are prescribed may be accepted for transportation on board vessels when packed in metal drums (ICC–17E, 17H, and 37D) having a gross weight not over 375 pounds in lieu of 300 pounds now specified.

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended; 50 U. S. C. 1275)

21. The center heading following § 146.28–22 "Subpart—Transportation of Military Explosives on Board Vessels During Present Emergency" is changed to read "Subpart—Transportation of Military Explosives on Board Vessels During National Emergency or War."

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended; 50 U. S. C. 1275)

22. Section 146.29–1 is amended to read as follows:

§ 146.29–1 *Regulations declared inapplicable.* Sections 146.02–11, 146.02–21, 146.03–3, 146.06–9, 146.06–19, 146.09–1 to 146.09–6, inclusive, 146.10–6 (b), 146.20–15 to 146.20–51, inclusive, 146.20–85, 146.20–90, 146.20–100 to 146.20–300, inclusive, 146.23–4 (d), 146.23–7 (a), (b), and (c); 146.24–55, the entries "Chemical ammunition containing Class 'A' poisons, liquids or gases," "Chemical ammunition containing Class 'B' poisons, liquids or gases," and "Chemical ammunition containing Class 'C' liquids, gases or solids," appearing in sections 146.25–100, 146.25–200, and 146.25–300, 146.27–3 to 146.27–6, inclusive, and 146.27–100 are hereby declared inapplicable to the transportation of military explosives during the National Emergency proclaimed by the President on December 16, 1950 (Proclamation 2914, 3 CFR, 1950 Supp.), or during a war in which the United States may be engaged, or during any other National Emergency proclaimed by the President.

(R. S. 4405, as amended, 4472, as amended, 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended; 50 U. S. C. 1275)

23. Section 146.29–3 is amended to read as follows:

§ 146.29–3 *Effective date.* The regulations contained in this subpart are hereby declared effective during the National Emergency proclaimed by the President on 16 December 1950 (Proclamation 2914, 3 CFR, 1950 Supp.), or during a war in which the United States may be engaged or during any other National Emergency proclaimed by the President.

(R. S. 4405, as amended, 4472, as amended, 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended; 50 U. S. C. 1275)

24. Section 146.29–6 is amended by changing paragraph (a) and subparagraph (b) (6) to read as follows:

§ 146.29–6 *Definitions and abbreviations.* • • •

(a) *Military explosives.* Military explosives consist of all Interstate Commerce Commission's Classes A, B, and C explosives shipped by, for, or to the Departments of the Army, Navy, or Air Force of the United States Government, or similar types of explosives shipped by, for, or to the government of any country whose defense is deemed vital to the defense of the United States. These explosives are divided into two classes, as follows:

(1) *Ammunition.* Ammunition consists of all types of shells, projectiles, cartridges, grenades, bombs, mines, torpedoes, torpedo warheads, propellant powder charges, pyrotechnics, rockets, chemical, smoke or incendiary ammunition, or other "made up" explosive devices that are utilized by the armed forces in the prosecution of a war.

(2) *Explosives in bulk.* Explosives in bulk consist of any high explosives, black powder, and low explosives or smokeless powder in accordance with the definitions in §§ 146.20–1, 146.20–7, and 146.20–9, when such substances are shipped in containers other than containers such as shells, bombs, grenades, mines, torpedoes, powder bags in individual containers, cartridges, fuzes, detonators, caps, primers, and similar "made up" ammunition devices.

• • •

(b) *Related terms.* • • •

(6) *Definitions of other dangerous articles.* For definitions of:

(i) Inflammable liquids see §§ 146.21–1 and 146.21–5;

(ii) Inflammable solids and oxidizing materials see §§ 146.22–1, 146.22–2, and 146.22–3;

(iii) Corrosive liquids see §§ 146.23–1 and 146.23–2;

(iv) Compressed gases see §§ 146.24–1 and 146.24–5;

(v) Poisons, Class A, see § 146.25–5, Class B, see § 146.25–10, Class C, see § 146.25–15;

(vi) Combustible liquids see §§ 146.26–1 and 146.26–2; and,

(vii) Hazardous articles see §§ 146.27–1 and 146.27–2.

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended; 50 U. S. C. 1275)

25. Section 146.29–23 is amended by changing paragraph (1) to read as follows:

§ 146.29–23 *Handling and slinging of explosives.* • • •

(1) Wire rope or wire rope assemblies, including splices or fittings thereof, used in handling ammunition and explosives shall be kept bare to permit ready inspection of its safe working condition. Mechanical type endings may be used in lieu of hand splices provided such endings have a minimum breaking strength equal to the catalog strength of wire rope from which it is made.

(R. S. 4405, as amended, 4472, as amended, 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended; 50 U. S. C. 1275)

26. Section 146.29–100 is amended by changing the description of small arms ammunition (Class I), and requirements regarding "jato units" as follows:

(A) The "description" for Class I (small-arms ammunition w/o explosives bullets, mechanical time fuze w/o booster and like items) is amended by changing it to read as follows:

§ 146.29–100 *Military ammunition and explosives in bulk.* • • •

DESCRIPTION

Small arms ammunition is fixed ammunition designed to be fired from a pistol, revolver, rifle, or shotgun held by the hand, or by the hand and shoulder, or machine guns of caliber less than .75, or blank remover cartridges for pilot seat ejectors and canopy removing catapults, and consists of a metallic or paper cartridge case, a primer and a propelling charge, with or without bullet, shot, tear gas material, tracer components or incendiary compositions or mixtures, but not including bullets loaded with high explosives.[1] (For small arms ammunition with explosive bullets or projectiles see Class IV–B).

[1] The U. S. Army and Navy definition is based on tactical considerations. This Coast Guard definition shall take precedence in all cases involving transportation, handling and stowage as cargo on board merchant vessels which are subject to the regulations in this part.

27. Section 147.05–100 *Table S—Classification: Ships' stores and supplies of a dangerous nature* is amended by changing the requirements for "ships' signal and emergency equipment" as follows:

Table S—Classification: Ships' stores and supplies of a dangerous nature

Description name of article	Characteristic properties, cautions, required, markings required	Label required	Required conditions for transportation		
			Passenger vessel	Ferry vessel, passenger or vehicle	R. R. car ferry, passenger or vehicle
•	•	•	•	•	•
Ships' signal and emergency equipment. Cartridges for line throwing appliances.	A metallic case containing primer and powder in one unit and discharged by percussion. *The hazard of such cartridges is nil.* Protect from fire.	No label required.	Stowage: Within the box containing the line throwing appliance and its equipment, and stowed at the discretion of the master.	Not carried as emergency equipment on ferry vessels.	Not carried as emergency equipment on car ferries.
Distress signal rockets.	Rockets or shells throwing stars of any color or description.	No label required.	Stowage: Vessel's portable magazine chest.[1]	Not carried as emergency equipment on ferry vessels.	Not carried as emergency equipment on car ferries.
Parachute flare distress signal cartridges.	Approved parachute flare distress signals when in metal containers with screw cap contained in a portable watertight case.	No label required.	Stowage: In place in the emergency and motor lifeboats. Additional signals may be stowed in a location discretionary with the master.	Not carried as emergency equipment on ferry vessels.	Not carried as emergency equipment on car ferries.
Powder charges for line throwing appliances (mounted-type gun).	Powder charges used in projecting lines when mounted but not more than 5 ounces of powder enclosed in a fabric bag.	No label required.	Stowage: Vessel's portable magazine chest. Container: Metal cans having tight top closing means.	Not carried as emergency equipment on ferry vessels.	Not carried as emergency equipment on car ferries.
Self-igniting pilot lights (flare).	A flare signal light used for signaling a pilot.	No label required.	Stowage: Vessel's portable magazine chest.	Not carried as emergency equipment on ferry vessels.	Not carried as emergency equipment on car ferries.
Signals, distress: (Combination flare and smoke.) (Floating lights.) (Red flares.) (Smoke signals.)	Distress signals furnished as equipment in lifeboats, life rafts and in pilothouse or navigating bridge.	No label required.	Stowage: In place within the lifeboat or life raft or buoyant apparatus. Additional lights may be stowed in the pilothouse or navigating bridge. Container: The container shall be constructed in accordance with Specification requirements of the Commandant of the Coast Guard.	Not carried as emergency equipment on ferry vessels.	Not carried as emergency equipment on car ferries. Stowage: In place within the lifeboat, life raft and pilothouse. Container: The container shall be constructed in accordance with Specification requirements of the Commandant of the Coast Guard.
Water lights: (Buoy lights.) (Life raft lights.)	A cylinder constructed in accordance with the requirements of the Commandant of the Coast Guard, loaded with a composition of calcium carbide and calcium phosphide designed to produce a brilliant white light without explosion when in contact with water.	No label required.	Stowage: In place attached to ring buoys, life rafts, and buoyant apparatus as required by Commandant of the Coast Guard. Spares shall be stowed in vessel's portable magazine chest. Containers: Cylinders built to specifications of, and approved by Commandant of the Coast Guard.	Stowage: In place attached to ring buoys, life rafts, as required by Commandant of the Coast Guard. Spares shall be stowed in vessel's portable magazine chest. Containers: Cylinders built to specifications of, and approved by Commandant of the Coast Guard.	Stowage: In place attached to ring buoys, life rafts, as required by Commandant of the Coast Guard. Spares shall be stowed in vessel's portable magazine chest. Containers: Cylinders built to specifications of, and approved by Commandant of the Coast Guard.

Other items of ammunition or component parts of ammunition having similar hazard characteristics to small arms ammunition are also included in this class.

(B) Under Class X, "Explosive bombs, mines, torpedoes, etc.", at the end of the description under the heading *"Includes but is not limited to—"* the items "Jato assist take-off units" is deleted.

(R. S. 4405, as amended, 4472, as amended. 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended, 50 U. S. C. 1275)

(C) At the end of the description under Class X, "Explosive bombs, mines, torpedoes, etc.", the note regarding "jet units" and "Jet thrust units (Jato)" are added.

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, 245, as amended; 50 U. S. C. 1275)

[1] Containers: The container shall be constructed of copper of not less than No. 22 B. W. G. thickness, or No. 23 B. W. G. copper, or equal monel or nickel alloy, with seams locked, jointed and soldered. The cover or top may be of cast brass not less than ⅛" thickness, or of reinforced copper of not less than ¼" thickness. The cover shall have a fitted gasket, together with threaded means, clamps or dogs to provide a W. T. seal (bayonet type closures are not permitted). The cover shall be easily removable without recourse to tools. The case shall have a capacity of not less than 6 cubic feet.

(R. S. 4405, as amended, 4472, as amended; 46 U. S. C. 375, 170. Interpret or apply sec. 5, 55 Stat. 244, as amended; 50 U. S. C. App.

Dated: July 9, 1952.

A. C. RICHMOND,
Rear Admiral, U. S. Coast Guard,
Acting Commandant.

[F. R. Doc. 52–7700; Filed, July 16, 1952; 8:45 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter G—Procurement

ARMY PROCUREMENT PROCEDURE

MISCELLANEOUS AMENDMENTS

The following amendments to Subchapter G are issued.

PART 590—GENERAL PROVISIONS

Part 590 is amended as indicated below:

1. Section 590.305 (c) is rescinded and the following substituted therefor:

§ 590.305 *Specifications; general.*

* * *

(c) *Description in lieu of specifications.* (1) A Federal or Military Specification or Standard will not be prepared when it is not in the best interest of the Government to do so. Instances where such a determination may be economically sound occur when the volume of procurement is not sufficient to justify the preparation of a specification or standard; when the character of the item is of minor significance and purchasing offers no problem; or for spare parts, components, or materials required for repair or maintenance of existing equipment; or for similar items required for maintenance and operation of existing facilities or installations.

(2) The exceptions outlined in subparagraph (1) of this paragraph may be described in proposals or contracts by use of a purchase description, provided it adequately specifies all of the essential requirements of the item or items. When the product cannot be adequately described because of its technically involved construction or composition, the name of one or preferably more commercial products may be used, followed by the words "or equal," so as not to limit competition to the particular make or makes specified. Such references to manufacturers' brand names and numbers are intended to be descriptive, but not restrictive, and are for the sole purpose of indicating to prospective bidders the requirements that must be met.

(3) Heads of Procuring Activities will insure that necessary discretion is exercised in preparation of purchase descriptions, evaluation of bids, and award of contracts when such descriptions are used. Repeated use of a purchase description for large dollar volume purchases of any item other than one of minor significance indicates a need for a specification. In these instances, necessary action will be taken to provide for issuance of adequate Military or Federal Specifications as appropriate. Special precaution will be exercised to prevent the phrase "or equal" being used to procure proprietary products under the guise of competitive bidding procedures, to the exclusion of other similar products at least of equal quality and performance that meet the actual needs. Use of the phrase "or equal" is not intended as a device to substantiate a determination that no other product is equal in quality and performance to the product or products specifically listed in the invitation for bids or request for proposal. In instances where a proper determination has been made that one, and only one, supplier can furnish the required item or items, procurement should be accomplished by negotiation in accordance with Part 402 of this title and Part 592 of this chapter. In any case of rejection of low bidder offering products "as equal" to the specific product or products listed in an invitation for bid or request for proposal followed by "or equal," determination of "equality" will be based on factual data.

2. Subpart H is rescinded and the following substituted therefor:

SUBPART H—PROCUREMENT ACTION REPORTING

§ 590.800 *Scope of subpart.* This subpart sets forth (a) instructions for the preparation of the Procurement Action Report and (b) reference to Munitions Board requirements regarding actions taken under the authority of Title II, First War Powers Act, 1941, as amended. It implements the Armed Services Procurement Regulation generally rather than a specific part or section thereof.

§ 590.801 *General.* To conform with the provisions of Public Law 413, 80th Congress, Armed Services Procurement Act of 1947, and with instructions of the President of the United States, and to provide the Assistant Chief of Staff, G–4, Department of the Army, with management data essential to staff control over Army procurement, procurement action reports will be prepared on the forms and submitted at the times prescribed in this subpart. Heads of Procuring Activities (as defined in § 400.201–4 of this title) may issue implementing instructions, as required, to their Contracting Officers. A copy of each such implementation will be forwarded, as issued, to the Assistant Chief of Staff, G–4, Department of the Army, Attn: Chief, Purchases Branch.

§ 590.802 *Data to be included.* Data reported will cover all procurement actions (see § 590.807) transacted under the provisions of the Armed Services Procurement Regulation and this procedure by all Contracting Officers of the Army Establishment. Procurement actions for civil functions, such as Engineers Civil Works and Alaskan Communications System, are not included in this reporting requirement.

§ 590.803 *Forms.* Reports will be prepared on DA Form 337 (Procurement Action Report, Monthly Summary) and DD Form 350 (individual Procurement Action Report) (Reports Control Symbol CSGLD–525). Supply of forms will be requisitioned through normal publications supply channels.

§ 590.804 *Number of copies and routing.* (a) The original of each DD Form 350 will be forwarded to the Assistant Chief of Staff, G–4, Department of the Army, Attn: Chief, Purchases Branch, in all cases except where the head of a technical service required the original of the report for coding purposes. In cases where the original of the report is forwarded to the head of the technical service, a copy of the report will be forwarded to the Assistant Chief of Staff, G–4, Department of the Army, Attn: Chief, Purchases Branch. Heads of Procuring Activities may require extra copies of DD Form 350 to be furnished by their Contracting Officers. The original of DA Form 377 will be forwarded to the Assistant Chief of Staff, G–4, Department of the Army, Attn: Chief, Purchases Branch, and a copy of the report will be forwarded to the appropriate Heads of Procuring Activities. Letters of transmittal to accompany submission of both the individual and monthly reports will not be used.

(b) For each unclassified or restricted procurement action having a value of over $10,000 and subject to the Walsh-Healey Public Contracts Act (Subpart F, Part 411 of this title), two additional copies of the top portion of DD Form 350 (first 13 items) will be prepared by the installation which effects the procurement and forwarded direct to Department of Labor, Washington 25, D. C., Attn: Wage, Hour and Public Contracts Division. These additional copies will not be prepared for actions bearing a security classification higher than restricted.

(c) One additional copy of DD Form 350 will be submitted to the Assistant Chief of Staff, G–4, Department of the Army, Attn: Chief, Purchases Branch, when the dollar value of the action reported is $500,000 or more.

(d) One additional copy of DD Form 350 will be submitted to the Assistant Chief of Staff, G–4, Department of the Army, Attn: Chief, Purchases Branch, in the case of each action involving Mutual Security Assistance funds, including purchases made within or outside the United States with such funds.

(e) A supplementary report will be prepared for each contract or amendment involving new procurement for $1,000,000 or more to be performed in labor shortage areas (those classified in Group I by the Department of Labor). Four copies of this supplementary report will be appended to the four additional copies of DD Form 350 and forwarded to Assistant Chief of Staff, G–4, Department of the Army, Attn: Chief, Purchases Branch. The supplementary report will contain the following information:

(1) Manpower requirements (on basis of information obtained from contractor).

(i) Current total employment (number of persons) of contractor at place of manufacture shown in item 6 of DD Form 350. Indicate month.

(ii) Estimated employment at the same facility for work solely on the new contract during the peak month of operation on that contract. State month and year.

(iii) Net additional manpower required (actual new hires) at the same facility for work on new contract to attain employment shown in subdivision (ii) of this subparagraph. (This figure cannot be larger than the figures noted in subdivision (i) of this subparagraph but may in some instances be smaller due to transfer of employees from other military or civilian work which is phasing out.)

(2) If the entry in subparagraph (1) (iii) of this paragraph is 200 or more:

(i) A brief statement of information and advice furnished by local Employment Service Office.

(ii) A brief explanation of the overriding factors which made placement of the contract in the labor shortage area necessary or advisable despite adverse manpower conditions. (In the case of formally advertised procurements, the making of an award, pursuant to existing procurement directives, to a Contractor located in a Group I area will be considered as a sufficient overriding factor for this purpose.)

§ 590.805 *Frequency and due dates.* The procurement action reporting forms (DD Form 350 and DA Form 377) will be submitted as follows:

(a) Class I installations and activities will forward the original DA Form 377 and the original of each DD Form 350 at the same time. These forms for the completed calendar month will be forwarded not later than the 5th day of the following month.

(b) Class II installations and activities will prepare DD Form 350 for each reportable procurement action and forward this form within four working days after the date an individual action as described in § 590.807 is transacted. DA Form 377 will be forwarded not later than the 10th day of the following month. (See § 590.809 (a).)

(c) Oversea Purchasing Offices will prepare DD Form 350 for each reportable procurement action and forward this form within four working days after the date an individual action as described in § 590.807 is transacted. DA Form 377 will be forwarded not later than the 10th day of the following month. (See § 590.809 (a).)

(d) As soon as practicable after an individual procurement action is transacted, the additional copies of DD Form 350 with attached four copies of supplementary report required by § 590.804 (e), will be forwarded by procuring installations of the Army establishments in the continental United States to the Assistant Chief of Staff, G–4, Department of the Army (Chief, Purchases Branch). However, submission of these extra copies and the attached report will not be allowed to delay transmission of the other copies of DD Form 350 within the required period.

(e) Negative DA Forms 377 will be submitted by all reporting activities when appropriate.

§ 590.806 *Reporting activities.* The Procurement Action Report (DA Form 377 and DD Form 350) will be prepared by all Contracting Officers of the Army Establishment in the continental United States, its Territories and possessions, major oversea commands, attachés and foreign missions), designated as such pursuant to § 590.450, transacting purchases, procurements or executing contracts payable from appropriated funds (§ 590.251).

§ 590.807 *Procurement actions to be reported.* (a) A "procurement action" means any type of agreement or order for the procurement of supplies or services which obligates funds as set forth in § 590.806. It includes, by way of description and without limitation, awards and notices of awards; contracts of a fixed-price, cost, cost-plus-a-fixed-fee, exchange, or time and material; delivery orders, job orders, task orders or task letters issued against open end or indefinite quantity contracts; letter orders, letters of intent, and purchase orders. It includes modifications (amendments, change orders, and supplemental agreements) with respect to any of the foregoing (Subpart D, Part 402 of this title). It also includes the purchasing, renting, leasing, or otherwise obtaining supplies or services from either private sources or Governmental agencies outside the Department of Defense. (For interdepartmental procurement see §590.808, Item 15.) It includes requisitions transferring supplies or services within, or between the military departments or the joint procurement agencies of the Department of Defense. (For interservice procurement, see § 590.808, Item 15.)

(b) Term contracts, open-end contracts, indefinite quantity contracts, or agreements for obtaining supplies, which do not include specific quantities or total dollar value, will not be reported by the activity which executes such contract. Activities which execute individual purchase instruments or orders against such contracts will report each individual action of $10,000 or over on DD Form 350 and will report the sum of all purchases irrespective of dollar value on DA Form 377. Similarly, job orders against Army Establishment manufacturing installations will not be reported, but contracts for materials necessary to accomplish the job order will be reported.

(c) Except as indicated in paragraph (d) of this section DD Form 350 will be submitted for individual procurement actions where the dollar value is $10,000 or more. Except as indicated in paragraph (d) of this section DD, Form 350 will be submitted for each modification (amendment, change order, or supplemental agreement) increasing or decreasing the value of a contract by $10,000 or more, regardless of value of basic contract and regardless of whether basic contract was executed prior to effective date of Public Law 413, 80th Congress (May 19, 1948).

(d) The following procurement actions or modifications thereto will be reported in every instance without regard to any dollar value limitation:

(1) Action negotiated under section 2 (c) (1) which prior to the declaration of the National Emergency would have been negotiated under sections 2 (c) (11) and 2 (c) (16) of Public Law 413;

(2) All procurement actions involving MSA funds;

(3) All letter contracts;

(4) Definitive contracts superseding letter contracts regardless of whether additional funds are obligated.

§ 590.808 *Instructions for preparation of DD Form 350 (Individual Procurement Action Report)*—(a) *Item 1; report number.* This number will represent the serial number of DD Form 350 submitted by each office, installation, activity, or individual within the current fiscal year, suffixed by the last two digits of the fiscal year. The report covering the first procurement action taken in fiscal year 1953 by each office will bear the number "1–53," and consecutively thereafter for subsequent procurement actions. The report covering the first procurement action taken in each succeeding fiscal year, beginning July 1, will again bear the number "1," followed by the last two digits of the fiscal year. The numbering will be in accordance with the date of the report, Item 39, and not according to the date of the procurement action, Item 11. If the report covers a modification (amendment, change order, or supplemental agreement) with respect to a procurement action previously reported, also enter the number of the most recent procurement action report number related to the contract involved.

(b) *Item 2; department.* Enter "Army" if not so pre-printed.

(c) *Item 3; bureau, technical service, or command.* Enter the name of the Procuring Activity having responsibility for the procurement action; such as Quartermaster Corps, European Command, Third Army, National Guard, etc. (See § 590.809 (d).)

(d) *Item 4; procuring office and address.* Enter title, address, and station number in sufficient detail to establish readily the identity of the office, installation, activity, or individual preparing the report.

(e) *Item 5a; contractor name and business address.* Enter the name and business address, including street or post office box, of the contractor or vendor with whom the procurement action was transacted.

(f) *Item 5b; division of.* In cases where the contractor or vendor identifies himself as a division of a parent company, enter the name of the present company concerned.

(g) *Item 6; place of manufacture.* Enter the actual location of the vendor's place of business from which the items will be supplied or the plant in which the items will be produced. If the items are to be supplied from a vendor or plant to which the contractor subcontracts the order, or for which the contractor acts as a broker or factor, the name and location of the vendor or plant from which the items will be supplied will be entered. In case of construction and design contracts, enter actual site of construction and design. If more than one location is entered, and one of the locations is a surplus labor area, the surplus labor area must be listed first. (See Item 17.) If the supply or production source is unknown, not available, or identical with Item 5a, so indicate.

(h) *Item 7; contractual instrument number.* Enter the complete number of the contract to which this report pertains in accordance with § 590.803.

(i) *Item 8; kind of procurement action.* Place an "X" mark in the appropriate box to show whether:

(1) Action is a preliminary instrument such as a letter of intent or letter contract;

(2) Action is a new definitive contract (includes Purchase Order and notice of award);

(3) Action is a definitive contract superseding a preliminary instrument, if this is the case, record under item 10 only the change (debit or credit) from value reported for preliminary instrument; (if there is no change in dollar value from the preliminary instrument, the report must still be prepared and submitted, but no entry will be made in Item 10);

(4) Action is an order other than Purchase Order such as Job Order, Task Order, or Delivery Order against open-end contracts;

(5) If the action is a modification, place another "X" mark in the appropriate box to show whether it is an amendment,

(6) Change order or,

(7) Supplemental agreement, and enter the number thereof.

(j) *Item 9a; item number.* For identification of item numbers in block 25 on all procurements involving MSA funds.

(k) *Item 9b; description of commodity or service and end use of commodity.* Enter a brief, explicit description of the major items being procured. This description must be in sufficient detail to permit identification of the commodity for determining purchase assignment. In making this determination, the use of the commodity is frequently a deciding factor, especially in the case of spare parts for trucks, for radios, for clocks, etc. Accordingly, the use of the commodity will be indicated, where applicable, in addition to the brief description of the item. Heads of Procuring Activities may require, by supplemental instructions, detailed lists of all the separate items to be appended. If the description of the item bears a security classification, enter only the word "classified."

(l) *Item 9c; unit.* Enter, if practicable, the unit of measure of the item being procured: viz, each, ton, square feet, etc.

(m) *Item 9d; quantity.* Enter, if practicable, the quantity of the item being procured. In case of amendments or supplemental agreements enter only the increase or decrease in quantity.

(n) *Item 9e; unit price.* Insert unit price which appears in the contract.

(o) *Item 9f; commodity code or class.* Use first two digits of the Standard Commodity Code Classification, Volume No. 1, 1946.

(p) *Item 9g; DDCP No.* A notation will be made in item 9g showing the Department of Defense Claimant Program Code Number (applicable to use of DO ratings); this may be abbreviated as DDCP 04, etc.

(q) *Item 10; value of procurement action.* Enter the total value (in whole dollars only omitting cents) of the procurement action being reported on the form. If the action is a modification (amendment, change order, or supplemental agreement), enter for this item only the value of the specific action being reported. If an increase, indicate by the symbol DD (for debit), if a decrease, indicate by the symbol CR (for credit). Contracts terminated for any reason will be reported as decreases. The new contract or purchase against a defaulting contractor will then be reported in the usual manner.

(r) *Item 11; date of procurement action.* Enter the day, month, and year the procurement action (as defined in § 590.807 (a)) was taken. This should be the date upon which a binding agreement was reached.

(s) *Item 12; estimated completion date.* Enter month and year provided in the contract for the completion of the contract or, if such date is not included in the contract, an estimated date on which performance under the contract is expected to be completed.

(t) *Item 13; contract subject to Walsh-Healey Act.* Place an "X" mark in appropriate box to show whether contract is subject to Walsh-Healey Public Contracts Act in accordance with Subpart F, Part 411 of this title. If contract is subject to Walsh-Healey Public Contracts Act, place an "X" in appropriate box to show whether contractor is manufacturer or regular dealer in accordance with § 400.201–9 of this title and § 590.201–9. Generally, the Walsh-Healey Public Contracts Act is not applicable to procurement effected outside the United States, its territories and possessions (see § 601.602 of this chapter).

(u) *Item 14; appropriation identification.* Enter the appropriation identifications limited to the following serial numbers and in the exact order specified in this paragraph. Enter opposite each appropriation identification the corresponding dollar obligation. Where more than five different appropriation symbols are involved, enter only the five against which the largest obligations are being made. However, all MSAP obligations will be listed regardless of the number of obligations. When there is insufficient space to enter the appropriation identification in Item 14, the space provided in Item 24 "Remarks," may be used.

(1) Appropriation number.
(2) Project number.
(3) Object class.
(4) Operating agency.

Do not include any other numbers such as special limitations, allotment serial numbers, special codes, etc., unless specifically directed by the Head of the Procuring Activity concerned.

(v) *Item 15; contract placement.* Place an "X" mark in appropriate box to show whether action is:

(1) *Interservice.* The term "interservice" refers to procurements within the Department of Defense only. It covers:

(i) Orders placed by one military Department against contracts entered into by another military Department.

(ii) Orders placed by activities of one military Department against contract entered into by other activities of the same military Department.

(iii) Orders placed against contracts entered into by joint procuring agencies, viz: ASPPA, ASMPA.

(2) *Interdepartmental.* The term "interdepartmental" refers to procurements from or through Federal departments, agencies, institutions and corporations other than those of the Department of Defense. It covers:

(i) Orders placed by a military Department or agencies thereof, against contracts entered into by any Federal department, agency, institution, or corporation outside the Department of Defense.

(ii) Contracts placed by a military Department, or agency thereof, with any Federal department, agency, institution, or corporation outside the Department of Defense. If subparagraph (1) *Interservice*, or (2) *Interdepartmental* of this paragraph has been checked in Item 15, do not fill out remainder of form except for date of report and signature, Item 39.

(3) *Advertised.* Secured on bids as a result of formal advertising. (See § 401.101 of this title.)

(4) *Negotiated.* Negotiated in accordance with the exceptions authorized by Public Law 413, 80th Congress, and described in §§ 402.201 through 402.217 of this title and §§ 592.201 through 592.217 of this chapter.

(5) Modification authorized by existing contract, which was advertised.

(6) Modification authorized by existing contract, which was negotiated. Unless the modifying action being reported is authorized by the provisions of the basic contract and has been transacted pursuant to such provisions (viz, change order authorized by changes clause), do not check either subparagraph (5) of this paragraph or this subparagraph.

(w) *Item 16; negotiated under exception P. L. 413.* All negotiated procurement for the duration of the present emergency will be accomplished under § 402.201 of this title and contracts will cite as authority section 2 (c), (1) Armed Services Procurement Act of 1947 and Presidential Proclamation 2419.

(x) *Item 17; was contract placed for performance in a surplus labor area?* The surplus labor areas referred to are those certified by Office of Defense Mobilization for preferential treatment in accordance with ODM Defense Manpower Policy No. 4. If Item 17 (a) 1 is checked, one of the entries in item 6 must be a surplus labor area. If Item 17 (a) 1 is checked, specify the notification number of the area. If Item 17 (b) 1 is checked, one of the following entries will be made including both the numerical designation and the type of preferential treatment:

(1) Meeting the price.
(2) Set-aside.
(3) Price differential.

(y) *Item 18; small business.* (a) Check (1) or (2) in accordance with the opinion of the contracting officer.

(b) If the contractor represents that the aggregate number of employees of the contractor and its subsidiaries and affiliates is more than 500 check (1) if less than 500 check (2).

(c) Check (1) if preferential treatment was given. Check (2) if preferential treatment was not given.

(d) If (c) (1) has been checked, one of the following entries will be made including both the numerical designation and the type of preferential treatment:

(1) Joint determination.
(2) Set-aside.
(3) Price differential.

(z) *Item 19; type of contract.* Place an "X" mark in appropriate box to show whether contract is:

(1) Fixed price, including price escalation clause in accordance with § 596.151 of this chapter;

(2) Fixed price, including price redetermination clause in accordance with § 596.152–1 or § 596.152–3 of this chapter;

(3) Fixed price, with downward revision only in accordance with § 596.152–2 of this chapter;

(4) Fixed price;

(5) Incentive fixed price (ceiling ----------);

(6) Incentive cost-plus-a-fixed-fee;

(7) Cost;

(8) Cost-plus-a-fixed-fee;

(9) Time and material.

(aa) *Item 20; contract purpose.* Place an "X" mark in the appropriate box to show purpose of contract in accordance with listing. Descriptions of the general purposes of different types of contracts are given in this paragraph, but such examples are not to be construed as being restrictive to the matter set forth, as they include other purposes than those related to the general classification outlined in this paragraph. It is left to the discretion of the Contracting Officer to determine and check the most applicable purpose if two or more purposes are involved.

(1) *Supply.* Applies when procurement is for supplies and is accomplished with appropriated funds.

(2) *Architectural, engineering.* Applies to contracts for the performance of architectural and engineering services.

(3) *Construction (real property).* Applies to the construction, alteration or repair of buildings, bridges, roads, or other real property.

(4) *Lease.* Applies to the lease of personal property which involves the expenditure of appropriated funds.

(5) *Maintenance, buildings and ground.* Applies to supplies and nonpersonal services, involving maintenance of buildings and grounds.

(6) *Maintenance, equipment.* Applies to maintenance of equipment, munitions and supplies excluding construction. Also applies to ship repair.

(7) *Industrial mobilization.* For application, see § 402.216 of this title and § 592.216 of this chapter.

(8) *Research and development.* For application, see §§ 402.205 and 402.211 of this title and §§ 592.205 and 592.211 of this chapter.

(9) *Personal services.* For application see § 402.204 of this title and § 592.204 of this chapter.

(10) *Nonpersonal services.* Applies to laundry, dry cleaning, etc.

(11) *Transportation.* Applies to tug services, stevedoring, freight handling, drayage, ocean transportation, motor van services, repair of railroad equipment, towage, lighterage, truck services, salvage services, and lumber handling. Does not apply to Government bills of lading, transportation services procured by transportation request, various forms of transportation agreements which do not involve receipt of or expenditure of funds such as switching agreements, rate and traffic agreements, track and interchange agreements, participation in railroad codes and rules and acceptance of quotations under section 22 of the Interstate Commerce Act.

(12) *Utilities.* Applies to electric power, water, gas, etc.

(13) *Facilities (industrial).* Applies to facilities type contract.

(14) *Other (specify).* Any procurement with appropriated funds which does not fall in any of the above categories will be listed under this purpose and specified.

(bb) *Item 21; procurement under Buy American Act.* Place an "X" mark in appropriate box to show if procurement was or was not made under an exception to the Buy American Act in accordance with Subpart A, Part 405 of this title.

(cc) *Item 22; contractor estimates that.* Approximate percentage will be subcontracted. Subcontract means: Any contract, purchase order, or any other document entered into by the prime contractor for the acquisition of supplies, materials, or services used directly in the performance of the prime contract. (To be filled in only on contracts of $25,000 and over.)

(dd) *Item 23; security classification of Procurement Action.* Place an "X" mark in appropriate box to show the security classification of the contract described. The security classification indicated herein will correspond to the highest classification appearing on the Security Requirement Check List (DD Form 254).

(ee) *Item 24; remarks.* (1) When procurement action is effected under Mutual Security Assistance Program, the following information will be entered under this item (i) MSAP Procurements; (ii) the dollar value of the MSAP procurement value of the contract being reported (Item 10) includes procurement for requirements other than MSAP.

(2) Letter contracts for obligation or payment of funds will be identified in Item 24 by a remark showing the approving authority (by title), the estimated contract cost and the expiration date of the letter contract (day, month, year).

(3) Information regarding the approving authority should be reported in Item 24 for the following negotiated contracts:

(i) Construction and Rehabilitation at Installations: When contract exceeds $100,000 enter remark as follows: "Negotiated Award (CRI) approved by ----------" title.

(ii) Architect - engineer contracts: When such contract is otherwise required to be reported on DD Form 350 enter remark as follows: "Negotiated Award (AE) approved ----------" title.

(iii) Research and Development Contracts: When contract exceeds $25,000 enter remark as follows: "Negotiated Award (R&D) approved by ----------" title.

(iv) Negotiated Contracts in General: When contracts exceed $100,000 enter remark as follows: "Negotiated Award (Gen) approved by ----------" title.

(4) Enter any other comments to supplement or amplify the information shown in the body of the report which are considered essential to a proper understanding of the report. This space may also be used for additional data when required by Heads of Procuring Activities or major oversea commanders.

(ff) *Item 25; delivery schedule.* Enter date schedule of first delivery and partial deliveries thereafter through contract completion for all procurement involving MSA funds.

(gg) *Item 26; pricing.* Includes transportation—self-explanatory.

(hh) *Item 27; contractor represents that.* Place an "X" mark in appropriate box to show whether contractor represents that he has employed or retained a company or person (other than a full-time employee) to solicit or secure this contract.

(ii) *Item 28.* Omit unless Head of Procuring Activity requires item to be reported.

(jj) *Item 29.* Enter percent of profit or fee charged by the prime contractor. Applies to negotiated contracts only.

(kk) *Item 30; planning status.*

1. *Planned Producer—Planned Item.* (To be used when contractor is supplying a planned item for which he is the planned producer).

3. *Planned Producer—Not Planned Item.* (To be used when item is not a planned item being made by a planned producer).

5. *Not Planned Producer—Planned Item.* (To be used when the contractor is supplying a planned item for which he is not the planned producer).

7. *Not Planned Producer—Not Planned Item.* (To be used when item is not a planned item and producer is not a planned producer).

(ll) *Item 31; total prior to this action.* Insert total amounts previously obligated on this contract. Applicable only in case of modifications to the contract.

(mm) *Item 32; total including this action.* Insert total amount of all funds obligated on the contract including the amount now being reported.

Items 33 through 36 are to be filled in only for those fixed price supply contracts over $300,000 which contain a price redetermination clause, and all reportable modifications thereto. Insert percent of the total amount of the contract will be used for:

(nn) *Item 33.* Purchase of materials.

(oo) *Item 34.* Payment of direct labor.

(pp) *Item 35.* Payment of overhead.

(qq) *Item 36.* Payment of General and Administrative Expense.

(rr) *Item 37.* (This item will be filled in only upon direction of the Head of the Procuring Activity concerned as it is not required by Office, Assistant Chief of Staff, G–4.) Enter a statement to the effect that the procurement is or is not exempt from the General Ceiling Price Regulation, issued by the Economic Stabilization Agency, and if not exempted, to indicate, when applicable, if the procurement was made under the emergency or hardship provisions of section 9 or 13 respectively of Supplemental Regulation 1 to the General Ceiling Price Regulation.

(ss) *Item 38.* Reserved for future use.

(tt) *Item 39; date of report.* (1) Enter the day, month, and year on which the report is prepared.

(2) The form will be signed by the Contracting Officer or his authorized representative and name of signing individual typed in spaces provided therefor.

(uu) *Security classification of DD Form 350.* DD Form 350 will be stamped in the upper and lower margins with the appropriate security classification in accordance with Army Regulations. The security classification so stamped need not necessarily correspond to the security classification of the contract (Item 23) but is rather a matter for the discretion of the preparing officer and is dependent upon the information appearing on the form.

§ 590.809 (Regarding the preparation of DA Form 377 will be promulgated at an early date.)

§ 590.810 *Retention of procurement action reports.* Individual Procurement Action Report (DD Form 350) and Procurement Action Report—Monthly Summary (DA Form 377) or comparable forms submitted by contracting officers to higher headquarters indicating the status of Procurement Actions may be destroyed after 6 months. Such material is considered nonrecord material under paragraph 22, SR 345–250–90.

§ 590.811 *Reports in connection with actions taken under the authority of Title II, First War Powers Act, 1941, as amended.* Reports referred to in headnote will be submitted as required in § 590.918. Such reports are additional to reporting requirements otherwise set forth in this subpart.

3. Section 590.903–3 (c) is rescinded and the following substituted therefor:

§ 590.903–3 *To Assistant Chief of Staff, G–4, Department of the Army.* • • •

(c) To redelegate all or part of the authority delegated to the Head of a Procuring Activity, as defined in § 400.201–4 of this title: *Provided, however,* That such authority shall not be delegated below the level of the head of a Procuring Activity, or Acting Head of a Procuring Activity in the official absence of the Head of a Procuring Activity, without specific approval of the Under or Assistant Secretary for procurement.

PART 591—PROCUREMENT BY FORMAL ADVERTISING

Part 591 is amended by adding paragraph (a) (3) and (4) to § 591.405 as follows:

§ 591.405 *Mistakes in bids*—(a) *Submission to higher authority.* • • •

(3) The Contract Officer's statement of findings and recommendations required under § 401.405–2 (b) (iv) of this title will be submitted so as to reach the Assistant Chief of Staff, G–4, Washington 25, D. C., Attn: Chief, Purchases Branch, in duplicate.

(4) The status of contract awards and performance is an essential consideration in determining appropriate action in mistake in bid cases. Accordingly, the Contracting Officer's statement, or other papers in the file, will clearly indicate whether or not an award has been made for the supplies involved in an alleged mistake in bid; and in the event an award has been made, the status of performance and payments under the contract will be shown.

PART 600—FEDERAL, STATE, AND LOCAL TAXES

Part 600 is amended as indicated below:

1. Section 600.401 (c) is added as follows:

§ 600.401 *Fixed-price contracts.* • • •

(c) The following clauses are applicable only overseas and are to be included in all fixed-price contracts to be performed in foreign countries in which tax agreements have been executed:

(1) *Clause for use in fixed-price contracts between the Government of the United States and foreign contractors (except foreign governments).*

TAXES

(a) The contractor warrants that the contract prices, including the prices in subcontracts hereunder, do not include any tax or duty which the Government of the United States and the Government of ---------- have agreed shall not be applicable to expenditures in ---------- by the United States or any tax or duty from which the contractor, or any subcontractor hereunder, is exempt under the laws of ----------. If any such tax or duty has been included in the contract prices through error or otherwise, the contract prices shall be correspondingly reduced.

(b) If for any reason after the contract date, the contractor is relieved in whole or in part from the payment or the burden of any tax or duty included in the contract prices, the contract prices shall be correspondingly reduced.

(2) *Clause for use in fixed-price contracts between governments.*

TAXES

(a) The contract prices, including the prices in subcontracts hereunder, do not include any tax or duty which the Government of the United States and the Government of ---------- have agreed shall not be applicable to expenditures in ---------- by the United States, or any other tax or duty not applicable to this contract under the laws of ----------. If any such tax or duty has been included in the contract prices through error or otherwise, the contract prices shall be correspondingly reduced.

(b) If, after the contract date, the Government of the United States and the Government of ---------- shall agree that any tax or duty included in the contract prices shall not be applicable to expenditures in ---------- by the United States, the contract prices shall be reduced accordingly.

2. Section 600.402 is added as follows:

§ 600.402 *Cost-type contracts.* The following clauses are applicable only overseas and are to be included in all cost-type contracts to be performed in foreign countries in which tax agreements have been executed:

(a) *Clause for use in cost-type contracts between the Government of the United States and foreign contractors (except foreign governments).*

TAXES

Any tax or duty from which the United States Government is exempt by agreement with the Government of ----------, or from which the contractor or any subcontractor hereunder is exempt under the laws of ----------, shall not constitute an allowable cost under this contract.

(b) *Clause for use in cost-type contracts between governments.*

TAXES

Any tax or duty from which the United States Government is exempt by agreement with the Government of ----------, or from which any subcontractor hereunder is exempt under the laws of ----------, shall not constitute an allowable cost under this contract.

PART 601—LABOR

Part 601 is amended as indicated below:

1. Section 601.450 is rescinded and the following substituted therefor:

§ 601.450 *Predeterminations of prevailing wage rates.* The Secretary of Labor requires a separate request for wage rates for each contract to be awarded by a contracting agency, except with respect to issuance of wage predeterminations for certain military construction or except where it can be shown that unusual circumstances make it impractical to obtain a wage predetermination for each contract. With respect to wage predeterminations for military construction, the Secretary of Labor will issue "installation" or "54–A predeterminations," which may be used for a period of not to exceed 90 days and will be applicable to all contracts awarded at the installation within that period. During the 90-day period, the Secretary of Labor may review and modify any existing predetermination. Modifications expire on the expiration date of the original predetermination. With respect to the unusual circumstances' exception, it will be necessary to explain fully the circumstances which make it necessary to request an area predetermination.

(a) *Responsibility for obtaining predeterminations.* The Chief of Engineers is responsible for obtaining from the Secretary of Labor and for furnishing to the Procuring Activity upon request all predeterminations of prevailing wage rates under the Davis-Bacon Act required in connection with the awarding of contracts of the Army Establishment.

(b) *Responsibility for requesting predeterminations.* The office responsible for the preparation of specifications or the negotiation of contracts for projects in excess of $2,000 is responsible for requesting the appropriate predetermination of wage rates to be contained in the contract. The preparing office will forward such request to the Chief of Engineers, Attn: Legal Division, through appropriate Division Engineer offices, unless direct communication is authorized by appropriate authority. The Chief of Engineers will obtain the predetermination of wage rates from the Secretary of Labor, and forward such predetermination to the requesting office through channels. When contract specifications are prepared, they should include a current wage predetermination. If the wage predetermination is not available when invitations for bid are issued, the specifications will contain a statement that wage rates will be supplied by addendum to the specifications. Contracting Officers will not open bids on projects subject to the provisions of the Davis-Bacon Act until the requested predetermination of wage rates has been incorporated in the specifications. No

negotiated contract, either preliminary (letter contract) or definitives, will be executed until the applicable wage determinations have been obtained.

(c) *Manner of requesting predeterminations.* Requests for predetermination of wage rates will be made as follows:

(1) Request will be forwarded on Form DB–11, in triplicate, leaving date, first two lines, and signature block blank. (These forms may be obtained from the appropriate Division Engineer's office.)

(2) Classifications requested will be limited to those which it is reasonably sure will be used.

(3) In emergencies, requests may be made by teletype or telephone direct to Chief of Engineers, Attn: Legal Division, stating reason why special handling is necessary. Appropriate Division Engineer offices will be furnished copies or records of such direct communications.

(4) A request for a review of a predetermination must be made if bids are not opened or if an award is not made by the expiration date of the predetermination. Predeterminations expire 90 days after the date of the original predetermination. Requests for review will be processed and forwarded in the same manner as requests for original predeterminations.

(5) All requests should be forwarded so as to reach the Chief of Engineers, Attn: Legal Division, at least 30 days prior to advertising or expiration date.

(d) *Enforcement responsibility.* Reference is made to § 411.404 (c) of this title, which places on the Contracting Officer the responsibility for obtaining from contractors weekly payroll records so that such records shall be available for determination as to whether the contractor has complied with the statute.

(e) *Copies of payrolls.* Contracting Officers will obtain copies of these payrolls and check the payrolls at such times and to the extent necessary for the purpose of assuring that all contractors and subcontractors are complying with the applicable laws.

(f) *Contracting officers visits.* Contracting officers also will make such visits to the project and make such checks as are necessary to assure that the contractor is not violating the Davis-Bacon Act by misclassification, disproportionate use of apprentices, or other means. Reference to the above standards should be incorporated in the specifications of the contract. Examples: Use of men classified laborers and receiving laborer's wage rates to do journeymen's work; and the employment of an unusually large number of apprentices as compared to journeymen, with the apprentices actually doing journeymen's work. With regard to apprentices, attention is directed to the fact that the Secretary of Labor is now issuing wage determinations setting up the following-prescribed standards for the employment of apprentices for the various building trades, and by direction of the Assistant Secretary (R&M), the following clause will be inserted in all applicable contracts:

Apprentices employed pursuant to this determination of wage rates must be registered in a bona fide apprenticeship program registered with a State apprenticeship agency recognized by the Federal Committee on Apprenticeship, U. S. Department of Labor; or if no such recognized agency exists in a State, it shall mean a program registered with the Bureau of Apprenticeship, U. S. Department of Labor.

(g) *Notification of contractor.* In the event misclassification of mechanics or laborers is discovered which results in workers receiving less than the prescribed minimum rates of wage for the work actually being performed, the contractor will be notified immediately of the corrective action to be taken and the Contracting Officer will make a report on Standard Form 1093 (Schedule of Deductions from Payments to Contractor) executed as completely as possible from his records to the Disbursing Officer. The amounts to be withheld will be equal to the estimated corrective payments required. Such funds will be withheld until evidence satisfactory to the Contracting Officer is furnished showing that corrective payments have been made to the mechanics or laborers involved.

(h) *Cooperation with the Department of Labor.* In the event an investigation of the work being performed under any contract is made by the Department of Labor and thereafter it is indicated to the Contracting Officer that violations of the Davis-Bacon Act, Copeland Act, and/or Eight-Hour Law have been discovered, the Contracting Officer will cooperate to the fullest extent practicable with the representative of the Department of Labor in initiating necessary and appropriate corrective action as outlined herein to insure that such violations will not continue.

2. Section 601.603 is rescinded and the following substituted therefor:

§ 601.603 *Responsibilities of contracting officers*—(a) *Publications to be furnished contracting officers.* The Secretary of Labor has published a document entitled "Walsh-Healey Public Contracts Act, Rulings and Interpretations No. 3, October 1, 1945." This publication, as amended, contains a compilation of the text of the act, the regulations of the Secretary of Labor relating thereto, and pertinent rulings and interpretations. Amendments to this document are published from time to time. The Heads of the Procuring Activities are responsible for furnishing these publications to each of their Contracting Officers.

(b) *Forms.* Contracting Officers, when the Walsh-Healey Act is applicable, will be responsible for forwarding to the contractor at the place of manufacture Department of Labor Forms PC 12 (Rev. 3/49) and PC 13 (Rev. 1/50). These forms may be requisitioned from the adjutant general depots in the same manner as the DD Forms 350 (Rev. 53). (See § 590.804 (b) of this chapter.)

(c) *Report of violations of the act.* Report of any violation of representations or stipulations required by the Walsh-Healey Act will be made through channels to The Judge Advocate General for transmission to the Department of Labor.

PART 602—GOVERNMENT PROPERTY

Part 602 is amended by adding paragraph (a) (3) to § 602.602–4 as follows:

§ 602.602–4 *Reporting for screening.* (a) • • •

(3) Items concerned are eligible for replacement under standards established by appropriate regulation for Government-wide application. Example: General Services Administration Personal Property Management Regulation No. 18, Revised.

[Proc. Cir. 14, June 24, 1952] (R. S. 161; 5 U. S. C. 22. Interpret or apply 62 Stat. 21; 41 U. S. C. Sup., 151–161)

[SEAL] WM. E. BERGIN,
Major General, U. S. Army,
The Adjutant General.

Chapter VI—Department of the Navy

Subchapter D—Procurement, Property, Patents, and Contracts

PART 736—DISPOSITION OF PROPERTY

Part 736 is revised to read as follows:

CROSS REFERENCE: For joint procurement regulations of the Armed Forces, see Chapter IV of this title.

Sec.
736.1 General.
736.2 Dispositions under contracts.
736.3 Sale of personal property.
736.4 Disposition of real property.
736.5 Disposition of real and personal property under special statutory authority.
736.6 Certification prior to disposition.

AUTHORITY: §§ 736.1 to 736.6 issued under 22 Stat. 296, as amended, 599, 29 Stat. 133, as amended, 38 Stat. 771, 47 Stat. 751, 54 Stat. 717, as amended, 55 Stat. 839, as amended, 60 Stat. 858, 61 Stat. 675, as amended, 61 Stat. 774, as amended, 63 Stat. 377; 34 U. S. C. 544, 492, 5 U. S. C. 150p, 34 U. S. C. 549–550, 546d, 50 U. S. C. App. 1172, 611, 34 U. S. C. 546h, 553a, 522a, 41 U. S. C. 201. Interpret or apply 22 Stat. 296, as amended, 599, 26 Stat. 194, 38 Stat. 406, as amended, 38 Stat. 1064, 44 Stat. 836, 1096, 45 Stat. 1430, 49 Stat. 885, as amended, 53 Stat. 811, as amended, 54 Stat. 681, as amended, 57 Stat. 69, as amended, 60 Stat. 897, 61 Stat. 774, as amended, 62 Stat. 647; 34 U. S. C. 544, 492, 543, 551, 31 U. S. C. 686, 34 U. S. C. 551a, 546a, 546b, 40 U. S. C. 304a, 50 U. S. C. 98a, 34 U. S. C. 546e, 50 U. S. C. App. 1301–3, 34 U. S. C. 546f–k, 522a, E. O. 9262, Nov. 5, 1942, 7 F. R. 9105, 3 CFR, 1943 Cum. Supp.; E. O. 9986, Aug. 16, 1948, 13 F. R. 4755, 3 CFR, 1948 Supp.; E. O. 10210, Feb. 2, 1951, 16 F. R. 1049; 3 CFR, 1951 Supp.

§ 736.1 *General.* Real and personal property of the Navy, exclusive of battleships, aircraft carriers, destroyers, and submarines, may be disposed of under the authority contained in the Federal Property and Administrative Services Act of 1949, as amended. 63 Stat. 377; 41 U. S. C. 201) (hereinafter referred to as the "Federal Property Act"). The authority to dispose of battleships, aircraft carriers, destroyers, and submarines is contained in the acts of August 5, 1882 (22 Stat. 296; 34 U. S. C. 491) and March 3, 1883 (22 Stat. 599; 34 U. S. C. 492), and Executive Order 9986 dated August 16, 1948. The Federal Property

Act, as amended, places the responsibility for the disposition of excess and surplus property located in continental United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands with the Administrator of General Services, and for such property located in foreign areas, with the head of each executive agency. Accordingly, in disposing of its property, the Navy Department is subject to implementing regulations of the Administrator of General Services and the Secretary of Defense. In general, property of the Navy which becomes excess to its needs, may not be disposed of to the general public until it has been determined to be surplus after screening such property with the other military departments of the Department of Defense and all other agencies of the Government, and after it has been offered for donation to the educational institutions.

(a) The Navy Department is authorized to sell by competitive bid its surplus personal property under the authority of the Federal Property Act, and the act of March 3, 1883 (22 Stat. 599; 34 U. S. C. 492), and to transfer real property excess to the needs of the Navy and under its control to the General Services Administration for ultimate disposition by that Agency. The Navy Department is also authorized to transfer real and personal property to other departments or agencies of the Government, and to sell, transfer and otherwise dispose of vessels and other personal property under special statutory authority.

(b) This part sets forth the general procedures and authority with respect to the disposition of property under the control of the Navy Department except disposition of property to foreign governments under the authority of such statutes as the Aid to American Republics Act (54 Stat. 396; 22 U. S. C. 521), the Greece, Turkey Aid Act (61 Stat. 103, as amended; 22 U. S. C. 1401–1409), and the Mutual Defense Assistance Control Act of 1951 (65 Stat. 644).

(c) The Navy Property Redistribution and Disposal Regulations issued by the Department cover the disposition of all Naval property including disposition under the Federal Property Act, as amended. The Bureau of Supplies and Accounts Manual contains information for the guidance of field personnel and will be revised to reflect current changes. These publications will be available through the Office of Naval Material, Washington 25, D. C., and at the offices of the Commandants of the several Naval Districts.

§ 736.2 *Dispositions under contracts.* (a) Property in which the Government has an interest in connection with any procurement contract, other than property referred to in paragraph (b) of this section, may be sold to the contractor or otherwise disposed of in accordance with the terms and conditions set forth in the contract, and in paragraph 405.3 of Navy Property Redistribution and Disposal Regulation No. 1 (August 1, 1951), either upon termination of the contract for the convenience of the Government or upon completion of the contract.

(b) Facilities, plant equipment and material provided by the Government to a contractor incident to the procurement of supplies or materials for the Navy, may, subject to applicable statutory authority, be disposed of in accordance with the terms and conditions of the contract in respect of providing such facilities, plant equipment and material.

§ 736.3 *Sale of personal property.* (a) The sale to the general public of personal property determined to be excess to the needs of the Navy is authorized by the Federal Property Act, as amended, the act of March 3, 1883 (22 Stat. 599; 34 U. S. C. 492) and regulations of the Administrator of General Services (see § 736.1 (a).) The following authorized selling activities will conduct sales under competitive bid procedures after it has been determined the personal property to be sold is excess to the needs of the Navy and is also not required by other departments or agencies of the Government or for donation to educational institutions:

NAVAL SHIPYARDS

Portsmouth, N. H.
Brooklyn, N. Y.
Philadelphia, Pa.
Mare Island, Vallejo, Calif.
San Francisco, Calif.
Naval Base, Charleston, S. C.
Bremerton, Wash.
Boston, Mass.
Pearl Harbor, T. H.

NAVAL SUPPLY CENTERS

Oakland, Calif.
Norfolk, Va.
Pearl Harbor, T. H.

NAVAL SUPPLY DEPOTS

Newport, R. I.
Bayonne, N. J.
Mechanicsburg, Pa.
San Diego, Calif.
Scotia, N. Y.
Clearfield, Ogden, Utah.
Seattle, Wash.
San Pedro, Calif.
Great Lakes, Ill.
Guantanamo Bay, Cuba.
Guam, Marianas Islands.

NAVAL AIR STATIONS

Quonset Point, R. I.
Corpus Christi, Tex.
Alameda, Calif.
Seattle, Wash.
Lakehurst, N. J.
Miami, Fla.
Jacksonville, Fla.
Pensacola, Fla.
San Diego, Calif.
Dallas, Tex.
Olathe, Kans.
Memphis, Tenn.

NAVAL AMMUNITION DEPOTS

Crane, Ind.
McAlester, Okla.
Hastings, Nebr.

NAVAL STATIONS

Key West, Fla.
Orange, Tex.
New Orleans, La.
Astoria, Oreg.
Bermuda.
San Juan, P. R.
Trinidad, British West Indies.
Balboa, Rodman, Canal Zone.
Kodiak, Alaska.
Adak, Alaska.
Subic Bay, Luzon, Philippines.
Sangley Point, Luzon, Philippines.
Argentia, Newfoundland.

MARINE CORPS AIR STATIONS DESIGNATED BY COMMANDANT OF THE MARINE CORPS

Naval Supply Officer, Marine Corps Air Station, Cherry Point, N. C.
Naval Supply Officer, Marine Corps Air Station, El Toro, Calif.

AUTHORIZED SELLING ACTIVITIES MARINE CORPS

Marine Corps Depot of Supplies, Philadelphia, Pa.
Marine Corps Depot of Supplies, San Francisco, Calif.
Marine Corps Recruit Depot, Parris Island, S. C.
Marine Corps School, Quantico, Va.
Marine Corps Supply Depot, Camp Lejeune, N. C.
Marine Corps Supply Depot, Camp Joseph H. Pendleton, Oceanside, Calif.

OTHER NAVAL ACTIVITIES

Naval Academy, Annapolis, Md.
Naval Submarine Base, New London, Conn.
Naval Aviation Supply Depot, Philadelphia, Pa.
Naval Training Center, Bainbridge, Md.
Naval Advance Base Supply Depot, Port Hueneme, Calif.
Naval Gun Factory, Washington, D. C.
Naval Supply Activity, Brooklyn, N. Y.
Naval Ordnance Plant, Louisville, Ky.
Naval Ordnance Plant, Forest Park, Ill.
Naval Advance Base Supply Depot, Davisville, R. I.
Headquarters Support Activities, Naples, Italy.
Naval Advanced Base, Bremerhaven, Germany.
U. S. Fleet Activities, Sasebo, Japan.
U. S. Fleet Activities, Yokosuka, Japan.
Naval Ordnance Plant, York, Pa.

The following selling activities are authorized to sell contractor inventory, in which the Navy has an interest, located in private contractor plants, which has been determined to be surplus and which is not retained or disposed of by the contractor concerned:

CHIEF OF NAVAL RESEARCH, NAVY DEPARTMENT, WASHINGTON, D. C.

Supervising Inspectors of Naval Material at:
Atlanta, Ga.
Boston, Mass.
Brooklyn, N. Y.
Chicago, Ill.
Cleveland, Ohio.
Houston, Tex.
Los Angeles, Calif.
San Francisco, Calif.
Seattle, Wash.
Upper Darby, Pa.

(b) Sale by the above listed activities are by competitive bid, invitations being solicited orally, by sales letter or by sales catalog. A deposit, generally 25 percent of the amount bid, is required of each bidder. Each selling activity maintains individual bidder's lists for purposes of soliciting invitations to bid. In addition to selling property at its own location, each of the above listed activities also sells property located at non-selling activities in the general vicinity of the selling activity.

(c) In foreign areas, property is sold as above but such sales must conform to the foreign policy of the United States and also have no adverse effect on the economic conditions of the country in which the property is located. In addition, property in foreign areas is sold with the stipulation that it cannot be imported into the United States unless

the Secretary of Agriculture (in the case of agricultural commodities, food or cotton or woolen goods), or the Secretary of Commerce (in the case of any other property) has determined that the importation of such property would relieve domestic purchases or otherwise be beneficial to the economy of the United States. The Chief of the Bureau of Supplies and Accounts may authorize the disposal of foreign excess property without competitive bids where such negotiated sale is most practicable and most advantageous to the Government because of the nature of the property, its location, and the potential market, or for other reasons.

§ 736.4 *Disposition of real property.* Real property determined to be excess to the needs of the Navy shall be transferred to the General Services Administration for disposition under the Federal Property Act, as amended, except for certain leasehold interests and buildings located on land owned or controlled by the Navy which land is not surplus or expected to become surplus. The latter type of real property may be disposed of by the Navy.

§ 736.5 *Disposition of real and personal property under special statutory authority.* In addition to the authority to sell personal property to the general public and to transfer real property to the General Services Administration under the provisions of §§ 736.3 and 736.4 the Navy Department has further authority to dispose of personal and real property as hereinafter described.

(a) *Disposition to other government agencies.* The Navy Department is authorized to transfer real and personal property to other governmental departments or agencies under statutes applicable to particular agencies, the act of June 30, 1932 (sec. 601, 47 Stat. 417; 31 U. S. C. 686), and, as to certain personal property, under directives of the General Services Administration.

(b) *Dispositions in the public interest or in the interest of national defense.* Real and personal property under the control of the Navy Department not excess to its needs and not for the time being required for public use may be leased, when the Secretary of the Navy shall deem it to be advantageous to the Government, to such lessee or lessees and upon such terms and conditions as in his judgment will promote the national defense or will be in the public interest. Such leases shall be for a period of not exceeding five years unless the Secretary determines that a longer period will promote the national defense or will be in the public interest. Such leases are authorized by the act of August 5, 1947 (61 Stat. 774; 34 U. S. C. 522a). The Navy Department may also transfer, sell, or otherwise dispose of certain real and personal property where such transfer, sale or other disposition has been determined to be in the interest of national defense, under the authority of the act of July 2, 1940 (54 Stat. 712; 50 U. S. C. App. 1171), as made applicable to the Navy Department by Executive Order 9262 dated November 5, 1942 (7 F. R. 9105). Leases of Government-owned real property where the estimated annual rental is in excess of $25,000 must be cleared with the Armed Services Committees of Congress in accordance with the act of September 28, 1951 (Pub. Law 155, 82d Cong.).

(c) *Disposition of strategic materials.* Strategic materials may be disposed of by the Navy Department under the authority described in § 736.3 only when such property is excess to the needs of the Navy and when the Munitions Board determines that the amounts of such material to be disposed of are so small as to make transfer thereof under the act of July 23, 1946 (60 Stat. 596; 50 U. S. C. 98a) economically impractical, or such materials are not necessary for stockpile requirements determined in accordance with section 2 of said act.

(d) *Disposition of vessels.* Vessels may be sold by the Navy Department under the authority of the acts of August 5, 1882 (22 Stat. 296; 34 U. S. C. 491), March 3, 1883 (22 Stat. 599; 34 U. S. C. 492) and Executive Order 9986 (3 CFR, 1948 Supp.) but subject to the provisions of the act of March 10, 1951 (65 Stat. 4). Vessels may be sold for scrapping or for use under such authority or, if such sale is not feasible, the Bureau of Ships may arrange for the demolition of a vessel and sale of the resulting materials by an authorized selling activity as set forth in § 736.3. Vessels subject to the act of December 17, 1943 (57 Stat. 604; 34 U. S. C. 498c–12), shall be transferred by the Navy Department to the U. S. Maritime Administration, and vessels may be so transferred upon the request of the Administration under the act of June 24, 1948 (62 Stat. 647).

(e) *Exchange or sale of property for replacement purposes.* Under the authority of section 201 (c) of the Federal Property Act, as amended, and regulations of the General Services Administration, the Navy Department is authorized in the procurement of new equipment, to exchange and sell similar items which are not excess to its needs, and apply the exchange allowance or proceeds of sale in whole or part payment for the items procured. Under such authority, sales may be made separately and the proceeds applied to the purchase of new equipment.

(f) *Donations and loans of personal property.* (1) Certain personal property of the Navy, including vessels, which become surplus, may be donated or loaned under the authority contained in the Federal Property Act and the act of August 7, 1946 (60 Stat. 897; 34 U. S. C. 546f) to:

(i) Schools of special interest to the Armed Services listed below which have been designated as service educational activities by the Secretary of Defense:

Culver Military Academy, Culver, Ind.
Boles School, Jacksonville, Fla.
Tabor Academy, Marion, Mass.
Admiral Billard Academy, New London, Conn.
Admiral Farragut Academy, Pine Beach, N. J.
Admiral Farragut Academy, St. Petersburg, Fla.
Maine Maritime Academy, Castine, Maine.
California Maritime Academy, Vallejo, Calif.
Massachusetts Maritime Academy, State Pier, Buzzard's Bay, Mass.
New York State Maritime Academy, Fort Schuyler, Bronx, New York, N. Y.

Boy Scouts of America and their affiliated organizations, including the Air Explorers Division and the Sea Scouts.
Civil Air Patrol.

(ii) Accredited schools, colleges and universities and educational institutions which have been exempted from taxation under section 101 (6) of the Internal Revenue Code, and to State Departments of Education for use by tax exempt educational institutions. Applications for donation shall be approved by Federal Security Administration and the Administrator of General Services and may be filed with the field representative of the Federal Security Agency located nearest the applicant.

(iii) States, territories, or possessions of the United States and political subdivisions, municipal corporations, veterans associations, soldiers' monument associations, state museums, and non-profit educational museums, subject to the approval of the Curator for the Navy, and as to loans or donations under the act of August 7, 1946 (secs. 1 and 2, 60 Stat. 897; 34 U. S. C. 546f and 546g) subject to objection by a concurrent resolution of the Congress.

(2) Applications other than those to be filed with the field representative of the Federal Security Agency shall be filed with the Navy Department and referred to the cognizant Bureau for action except applications for vessels and district craft shall be referred to the Chief of Naval Operations, applications for boats to the Bureau of Ships, and applications for barges, floating drydocks, and other floating construction equipment to the Bureau of Yards and Docks. Detailed instructions with respect to such applications are set forth in Navy Property Redistribution and Disposal Regulations.

§ 736.6 *Certification prior to disposition.* The transfer, sale, exchange, or other disposition of naval weapons, ships, boats, aircraft, munitions, supplies or equipment shall not be made unless and until the Chief of Naval Operations, in accordance with the act of June 28, 1940 (sec. 14, 54 Stat. 681 as amended; 34 U. S. C. 546e), has certified that such material is not essential to the defense of the United States.

Dated: July 10, 1952.

DAN. A. KIMBALL,
Secretary of the Navy.

[F. R. Doc. 52-7844; Filed, July 16, 1952; 8:52 a. m.]

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter VI—National Production Authority, Department of Commerce

[CMP Regulation No. 1, Interpretation 1 of July 16, 1952]

CMP REG. 1—BASIC RULES OF THE CONTROLLED MATERIALS PLAN

INT. 1—WHO ARE PRODUCERS OF CLASS A AND CLASS B PRODUCTS

The following interpretation is issued to CMP Regulation No. 1, including the amendments and directions thereto:

1. A person is deemed to be the producer or manufacturer of a Class A

product or of a Class B product only if he performs the manufacturing operations which result in the conversion of controlled material or of another Class A product into such Class A product or Class B product. A person who subcontracts or otherwise delegates the complete production of a Class A product or a Class B product is not deemed to be the producer or manufacturer of such product, even if he designs the product, provides the material and equipment for its production, finances and supervises such production, and distributes the finished product under his own trade name or trade-mark. A person who is not a producer or manufacturer, within the meaning of this interpretation, is not entitled to apply for or receive an authorized production schedule or allotment. Neither may such a person avail himself of the self-authorization privileges conferred upon producers of Class B products by Direction 1 to CMP Regulation No. 1.

2. Nothing in this interpretation shall be construed to prohibit a producer from authorizing a production schedule and making an allotment, in the manner and subject to the conditions prescribed in CMP Regulation No. 1, for the production of a Class A product by a secondary consumer producing such Class A product for him.

(64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154)

Issued July 16, 1952.

NATIONAL PRODUCTION AUTHORITY,
By JOHN B. OLVERSON,
Recording Secretary.

[F. R. Doc. 52-7935; Filed, July 16, 1952; 11:13 a. m.]

[NPA Order M-6A, Schedule 2, Direction 1 of July 16, 1952]

M-6A—STEEL DISTRIBUTORS

SCHEDULE 2—EARMARKED STOCKS—OIL COUNTRY CASING, OIL COUNTRY TUBING, AND OIL COUNTRY DRILL PIPE

DIR. 1—ADDITIONAL RESTRICTIONS ON DELIVERY OF OIL COUNTRY CASING AND TUBING

This direction under Schedule 2 to NPA Order M-6A is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this direction, consultation with industry representatives has been rendered impracticable due to the need for immediate action.

Sec.
1. What this direction does.
2. The direction.

AUTHORITY: Sections 1 and 2 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this direction does.* Schedule 2 prohibits deliveries of oil country casing, tubing, and drill pipe by steel distributors except pursuant to authorized controlled material orders. Because of the work stoppage in the steel producing industry, there is need to protect existing stocks of oil country casing and tubing for emergency purposes. The purpose of this direction is to provide that during this period of work stoppage, no oil country casing and tubing shall be delivered by a steel distributor except pursuant to authorized controlled material orders bearing the allotment symbols A, B, C, or E, and a digit, Z-2, or H-2E. The allotment symbol H-2E is the symbol used by petroleum and gas operators to procure emergency requirements of oil country casing and tubing, and its use is authorized by the Petroleum Administration for Defense under NPA Order M-46.

SEC. 2. *The direction.* From the effective date of this direction until a date to be specified by revocation of this direction, no steel distributor (except steel distributors located in the Dominion of Canada) shall make delivery of, nor shall any person accept delivery from any steel distributor of, any oil country casing or tubing unless such delivery is made pursuant to an authorized controlled material order bearing the allotment symbol A, B, C, or E, and a digit, Z-2, or H-2E.

This direction shall take effect July 16, 1952.

Issued July 16, 1952.

NATIONAL PRODUCTION AUTHORITY,
By JOHN B. OLVERSON,
Recording Secretary.

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

Subchapter A—General Rules and Regulations

[S. O. 865-E]

PART 95—CAR SERVICE

DEMURRAGE ON FREIGHT CARS

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 14th day of July A. D. 1952.

Upon further consideration of Service Order No. 865 (15 F. R. 6197, 6256, 6330, 6452, 7800; 16 F. R. 320, 819, 1131, 2040, 2894, 3619, 5175, 6184, 7359, 8583, 9901, 10994, 11313, 12096, 13102; 17 F. R. 896, 1857, 2850, 3166, 3886, 4169, 4823, 4824, 5193, 5467, 5771, 5772, 5953), and good cause appearing therefor: It is ordered, that:

Section 95.865 *Demurrage on freight cars*, of Service Order No. 865 be, and it is hereby suspended until 7:00 a. m., August 1, 1952.

It is further ordered, that this order shall become effective at 7:00 a. m., July 16, 1952; that a copy of this order and direction be served upon each State railroad regulatory body and upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies secs. 1, 15, 24 Stat. 379, as amended, 384, as amended; 49 U. S. C. 1, 15)

By the Commission, Division 3.

[SEAL] W. P. BARTEL,
Secretary.

PART 95—CAR SERVICE

CONTROL OF TANK CARS; APPOINTMENT OF AGENT

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 14th day of July, A. D. 1952.

Upon further consideration of the provisions of Service Order No. 873 (16 F. R. 1131, 7359; 17 F. R. 482), and good cause appearing therefor: It is ordered, that:

Section 95.873 *Control of tank cars; appointment of agent*, of Service Order No. 873 be, and it is hereby amended by substituting the following paragraph (e) hereof for paragraph (e) thereof:

(e) *Expiration date.* This section shall expire at 11:59 p. m., January 15, 1953, unless otherwise modified, changed, suspended, or annulled by order of this Commission.

It is further ordered, that this amendment shall become effective at 11:59 p. m., July 15, 1952, that a copy of this order and direction be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Comission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies secs. 1, 15, 24 Stat. 379, as amended, 384, as amended; 49 U. S. C. 1, 15)

By the Commission, Division 3.

[SEAL] W. P. BARTEL,
Secretary.

Subchapter B—Carriers by Motor Vehicle

[Ex Parte MC-37]

PART 170—COMMERCIAL ZONES AND TERMINAL AREAS

MISCELLANEOUS AMENDMENTS

At a session of the Interstate Commerce Commission, Division 5, held at its office in Washington, D. C., on the 9th day of July A. D. 1952.

Section 202 (c) of the Interstate Commerce Act (49 U. S. C. 302 (c)) and the transportation of passengers and property by motor vehicle, in interstate or foreign commerce, wholly within a municipality, or within a zone adjacent to, and commercially a part of, any such municipality, being under consideration, and good cause appearing therefor:

It is ordered, (1) That the above-entitled proceeding insofar as it relates to the terminal areas of motor carriers of passengers be and it is hereby discontinued, and (2) that the order entered in this proceeding on February 11, 1952, promulgating §§ 170.35, 170.37, 170.41, 170.45 and 170.48 (17 F. R. 1726) is hereby vacated insofar as it relates to motor carriers of passengers and set aside and the following revision, is hereby substituted in lieu thereof:

§ 170.35 *Operating authority to serve particular municipality, construction.* A certificate or permit issued by the Commission to any motor carrier of property pursuant to the provisions of Part II of the Interstate Commerce Act or to any freight forwarder under Part IV of the act, authorizing service at a particular municipality, shall be construed as authorizing service at all points or places which are within the commercial zone of that municipality as defined by the Commission and not beyond the territorial limits, if any, fixed in such certificate or permit on the authority granted except that this finding shall not apply in the case of a certificate or permit authorizing service by a motor carrier of property or freight forwarder at any municipality at which the commercial zone exemption provided by section 203 (b) (8) of the act has been removed in whole or in part by this Commission.

§ 170.37 *Operating authority to serve particular municipality, construction.* A certificate or permit issued by the Commission to any motor carrier of property pursuant to the provisions of Part II of the Interstate Commerce Act or to any freight forwarder under Part IV of the act, authorizing service at a particular municipality, at which the commercial zone exemption, provided by section 203 (b) (8) of the act, has heretofore been removed, or is hereafter removed if such removal takes place prior to issuance of said certificate or permit, shall be construed as authorizing service at all places within such municipality and also at all points (not beyond the territorial limits, if any, fixed in such certificate or permit on the authority granted) within the zone within which, and to the same extent to which, local operations may still be conducted under the exemption provided by section 203 (b) (8) of the act: *Provided, however*, That this finding shall not apply to certificates or permits authorizing a motor carrier of property to serve any municipality in Los Angeles County, Calif., New York, N. Y., or any municipality in Westchester or Nassau Counties, N. Y., or any municipality in New Jersey any part of which is within 5 miles of New York City.

§ 170.41 *Operating authority to serve particular unincorporated community, construction.* A certificate of permit issued to a motor carrier of property pursuant to the provisions of Part II of the Interstate Commerce Act (49 U. S. C. 301 et seq.) or to any freight forwarder under Part IV of the act (49 U. S. C. 1001 et seq.) authorizing service at a particular unincorporated community having a post office of the same name shall be construed as authorizing service at all points which are within the United States and not beyond the territorial limits, if any, fixed in such certificate or permit on the authority granted, as follows: (a) All points within 2½ miles of the post office in such unincorporated community if it has a population of less than 2,500, within 4 miles if it has a population of 2,500 but less than 25,000; and within 5½ miles if it has a population of 25,000 or more, (b) at all points in any municipality any part of which is within the limits described in (a) of this section and (c) at points in any municipality wholly surrounded, or so surrounded except for a water boundary, by any municipality included under the terms of paragraph (b) of this section.

§ 170.45 *Terminal areas of motor carriers and freight forwarders at municipalities served.* The terminal area within the meaning of section 202 (c) of the Interstate Commerce Act (49 U. S. C. 302 (c)) of any motor carrier of property subject to Part II or of any freight forwarder subject to Part IV thereof, at any municipality authorized to be served by such motor carrier of property or freight forwarder, within which transportation by motor vehicle in the performance of transfer, collection, or delivery services may be performed by, or for, such motor carrier of property or freight forwarder without compliance with the provisions, other than those in section 204 (49 U. S. C. 304) relative to qualifications and maximum hours of service of employees and safety of operation and equipment, of Part II of the act consists of and includes all points or places which are (a) within the commercial zone, as defined by this Commission, of that municipality, and (b) not beyond the limits of the operating authority of such motor carrier of property or freight forwarder.

§ 170.48 *Terminal areas of motor carriers and freight forwarders at unincorporated communities served.* The terminal area within the meaning of section 202 (c) of the Interstate Commerce Act (49 U. S. C. 302 (c)) of any motor carrier of property subject to Part II (49 U. S. C. 301 et seq.) or any freight forwarder subject to Part IV thereof (49 U. S. C. 1001 et seq.), at any unincorporated community having a post office of the same name which is authorized to be served by such motor carrier of property or freight forwarder, within which transportation by motor vehicle in the performance of transfer, collection, or delivery services may be performed by, or for, such motor carrier of property or freight forwarder without compliance with the provisions, other than those in section 204 (49 U. S. C. 304) relating to qualifications and maximum hours of service of employees and safety of operations and equipment, of Part II of the act, consists of (a) all points or places in the United States which are located within the limits of the operating authority of the motor carrier of property or freight forwarder involved, and within 2½ miles of the post office at such authorized unincorporated point if it has a population less than 2,500, within 4 miles if it has a population of 2,500 but less than 25,000, or within 5½ miles if it has a population of 25,000 or more; (b) all of any municipality any part of which is included under (a) of this section; and (c) any municipality wholly surrounded by any municipality included under paragraph (b) of this section, or so wholly surrounded except for a water boundary.

NOTE: In the application of the foregoing §§ 170.35 to 170.48, inclusive, distances and population data shall be determined in the same manner as provided in § 170.17.

It is further ordered, That this order shall become effective July 15, 1952, and shall remain in effect until modified or revoked in whole or in part by further order of the Commission.

Notice of this order shall be given to the general public by depositing a copy hereof in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director of the Division of the Federal Register.

(49 Stat. 546, as amended; 49 U. S. C. 304. Interpret or apply 49 Stat. 543, as amended; 49 U. S. C. 302)

By the Commission, Division 5.

[SEAL] W. P. BARTEL, *Secretary.*

[F. R. Doc. 52-7861; Filed, July 16, 1952; 8:55 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF THE TREASURY

Bureau of Internal Revenue

[26 CFR Part 29]

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1941

FILING OF JOINT RETURN AFTER SEPARATE RETURN HAS BEEN FILED

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Commissioner of Internal Revenue, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 62 and 3791 of the Internal Revenue Code (53 Stat. 32, 467; 26 U. S. C. 62; 3791).

[SEAL] JOHN B. DUNLAP, *Commissioner of Internal Revenue.*

In order to conform Regulations 111 (26 CFR Part 29) to section 312 of the Revenue Act of 1951, approved October 20, 1951, relating to the filing of a joint return after a separate return has been filed, such regulations are amended as follows:

PARAGRAPH 1. There is inserted immediately preceding § 29.51-1, the following:

SEC. 312. JOINT RETURN AFTER FILING SEPARATE RETURN (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Change of election.* Section 51 of the Internal Revenue Code (relating to making of individual returns) is hereby amended by adding at the end thereof the following new subsection:

(g) Joint return after filing separate return—

(1) *In general.* If an individual has filed a separate return for a taxable year for which a joint return could have been made by him and his spouse under subsection (b) of this section, and the time prescribed by law for filing the return for such taxable year has expired, such individual and his spouse may nevertheless make a joint return for such taxable year. A joint return filed by the husband and wife in such a case shall constitute the return of the husband and wife for such taxable year, and all payments, credits, refunds, or other repayments made or allowed with respect to the separate return of either spouse for such taxable year shall be taken into account in determining the extent to which the tax based upon the joint return has been paid.

(2) *Payments required before joint return can be made.* A joint return can be made under paragraph (1) only if there is paid in full at or before the time of the filing of the joint return—

(A) All amounts previously assessed with respect to either spouse for such taxable year;

(B) All amounts shown as the tax by either spouse upon his separate return for such taxable year; and

(C) Any amount determined, at the time of the filing of the joint return, as a deficiency with respect to either spouse for such taxable year if, prior to such filing, a notice under section 272 (a) of such deficiency has been mailed.

(3) *Time for making joint return.* A joint return cannot be made under paragraph (1)—

(A) After the expiration of three years from the last date prescribed by law for filing the return for such taxable year (determined without regard to any extension of time granted to either spouse);

(B) After there has been mailed to either spouse, with respect to such taxable year, a notice of deficiency under section 272 (a), if the spouse, as to such notice, files a petition with the Tax Court of the United States within the time prescribed in such section;

(C) After either spouse has commenced a suit in any court for the recovery of any part of the tax for such taxable year; or

(D) After either spouse has entered into a closing agreement under section 3760 with respect to such taxable year, or after any civil or criminal case arising against either spouse with respect to such taxable year has been compromised under section 3761.

(4) *Elections made in separate return.* If a joint return is made under this subsection, any election (other than the election to file a separate return) made by either spouse in his separate return for such taxable year with respect to the treatment of any income, deduction, or credit of such spouse shall not be changed in the making of the joint return where such election would have been irrevocable if the joint return had not been made.

(5) *Death of spouse.* If a joint return is made under this subsection after the death of either spouse, such return with respect to the decedent can be made only by his executor or administrator.

(6) *Additions to the tax.* Where the amount shown as the tax by the husband and wife on a joint return made under this subsection exceeds the aggregate of the amounts shown as the tax upon the separate return of each spouse—

(A) *Negligence.* If any part of such excess is attributable to negligence or intentional disregard of rules and regulations (but without intent to defraud) at the time of the making of such separate return, then 5 per centum of the total amount of such excess shall be assessed, collected, and paid in the same manner as if it were a deficiency;

(B) *Fraud.* If any part of such excess is attributable to fraud with intent to evade tax at the time of the making of such separate return, then 50 per centum of the total amount of such excess shall be so assessed, collected, and paid, in lieu of the 50 per centum addition to the tax provided in section 3612 (d) (2).

(7) *Rules for application of sections 275 and 291.* For the purposes of section 275 (relating to period of limitations upon assessment and collection), and for the purposes of section 291 (relating to delinquent returns), a joint return made under this subsection shall be deemed to have been filed—

(A) Where both spouses filed separate returns prior to making the joint return—on the date the last separate return was filed (but not earlier than the last date prescribed by law for filing the return of either spouse);

(B) Where only one spouse filed a separate return prior to the making of the joint return, and the other spouse had less than $600 of gross income for such taxable year—on the date of the filing of such separate return (but not earlier than the last date prescribed by law for the filing of such separate return); or

(C) Where only one spouse filed a separate return prior to the making of the joint return, and the other spouse had gross income of $600 or more for such taxable year—on the date of the filing of such joint return.

(8) *Rule for application of section 322.* For the purposes of section 322 (relating to refunds and credits), a joint return made under this subsection shall be deemed to have been filed on the last date prescribed by law for filing the return for such taxable year (determined without regard to any extension of time granted to either spouse).

(9) *Additional time for assessment.* If a joint return is made under this subsection, the period of limitations provided in sections 275 and 276 on the making of assessments and the beginning of distraint or a proceeding in court for collection shall with respect to such return include one year immediately after the date of the filing of such joint return (computed without regard to the provisions of paragraph (7) of this subsection).

(10) *Rule for application of section 3809 (a).* For the purposes of section 3809 (a) (relating to criminal penalties in the case of fraudulent returns) the term "return" includes a separate return filed by a spouse with respect to a taxable year for which a joint return is made under this subsection after the filing of such separate return.

(b) *Effective date.* The amendment made by subsection (a) shall be applicable only with respect to taxable years beginning after December 31, 1950.

PAR. 2. Section 29.51-1, as amended by Treasury Decision 5893, approved April 4, 1952, is further amended as follows:

(A) By striking therefrom the second undesignated paragraph of (b) (1),

commencing "A joint return may not be made", and inserting in lieu thereof the following:

With respect to taxable years beginning prior to January 1, 1951, a joint return may not be made by a husband and wife for a taxable year if a separate return has been filed by one of the spouses for such year and the time for filing the return of such spouse has expired. For taxable years beginning after December 31, 1950, see subparagraph (3) of this paragraph. For any taxable year where a joint return has been filed, separate returns may not be made by the spouses after the time for filing the return of either has expired. See, however, subparagraph (2) of this paragraph for the right of an executor to file a late separate return for a deceased spouse and thereby disaffirm a timely joint return made by the surviving spouse.

(B) By inserting in the first sentence of (b) (2), after "except as provided by section 51 (b), as amended by the Revenue Act of 1948," the following: "or by section 51 (g), as added by the Revenue Act of 1951,".

(C) By inserting immediately preceding the last sentence of the first undesignated paragraph of (b) (2), which sentence begins "For the purposes of this subparagraph", the following: "Section 51 (g), as added by the Revenue Act of 1951, provides, for taxable years beginning after December 31, 1950, that a joint return may be made, under certain conditions, after separate returns have been filed even though the time prescribed by law for filing the return for such year has expired. See § 29.51–1 (b) (3). A joint return made under section 51 (g) after the death of either spouse shall, with respect to the decedent, be made only by his executor or administrator. Thus where no executor or administrator has been appointed, a joint return cannot be made under section 51 (g)."

(D) By adding immediately after (b) (2) the following new subparagraph:

(3) *Joint return after filing separate return*—(i) *In general.* Section 51 (g), as added by the Revenue Act of 1951, provides, for taxable years beginning after December 31, 1950, where an individual has filed a separate return for a taxable year for which a joint return could have been made by him and his spouse under section 51 (b), and the time prescribed by law for filing the return for such taxable year has expired, such individual and his spouse may, under conditions hereinafter set forth, make a joint return for such taxable year. The joint return filed pursuant to section 51 (g) shall constitute the return of the husband and wife for such year, and all payments, credits, refunds, or other repayments, made or allowed with respect to the separate return of either spouse are to be taken into account in determining the extent to which the tax based on the joint return has been paid.

For the purpose of this section, the determination whether an individual is married at any time during the taxable year shall be made in accordance with the provisions of section 51 (b) (5). See § 29.51–1 (b) (1). The fact that the taxpayer and his spouse are divorced or legally separated at any time after the close of the taxable year for which separate returns are filed shall not deprive them of their right to file a joint return for such taxable year pursuant to section 51 (g).

(ii) *Payments required before joint returns can be made.* A joint return may not be made under section 51 (g) for a taxable year unless at or before the time of the filing of such joint return the following amounts are paid:

(a) All amounts previously assessed with respect to either spouse for such taxable year;

(b) All amounts shown as the tax by either spouse upon his separate return for such taxable year; and

(c) Any amount determined, at the time of the filing of the joint return, as a deficiency with respect to either spouse for such taxable year if, prior to such filing, a notice under section 272 (a) of such deficiency has been mailed.

(iii) *Time for making joint return.* A joint return may not be made under section 51 (g) with respect to a taxable year:

(a) After the expiration of 3 years from the last day prescribed by law for filing the return for such taxable year determined without regard to any extension of time granted to either spouse. Thus where an extension of time for filing returns has been granted by the Commissioner or his representative in accordance with section 53 (a), the extension shall be disregarded in determining the last day upon which a joint return may be filed after separate returns have been filed.

(b) After there has been mailed to either spouse, with respect to such taxable year, a notice of deficiency under section 272 (a), if the spouse, as to such notice, files a petition with the Tax Court of the United States within the time prescribed in section 272 (a), that is, within 90 days (or 150 days if notice is addressed to taxpayer outside the States of the Union and the District of Columbia) after the mailing of the notice, excluding Saturday, Sunday or a legal holiday in the District of Columbia as the ninetieth day;

(c) After either spouse has commenced a suit in any court for the recovery of any part of the tax for such taxable year; or

(d) After either spouse has entered into a closing agreement under section 3760 with respect to such taxable year, or after any civil or criminal case arising against either spouse with respect to such taxable year has been compromised under section 3761.

(iv) *Elections made in separate return.* If a joint return is made under section 51 (g), any election, other than the election to file a separate return, made by either spouse in his separate return for the taxable year with respect to the treatment of any income, deduction or credit of such spouse shall not be changed in the making of the joint return where such election would have been irrevocable if the joint return had not been made. Thus, if one spouse has made an irrevocable election to adopt and use the elective inventory method under section 22 (d), this election may not be changed upon making the joint return under section 51 (g).

(v) *Additions to the tax.* Where the amount shown as the tax by the husband and wife on a joint return made under section 51 (g) exceeds the aggregate of the amounts shown as tax on the separate return of each spouse, and such excess is attributable to negligence, intentional disregard of rules and regulations, or fraud at the time of the making of such separate returns, there shall be assessed, collected, and paid in the same manner as if it were a deficiency an additional amount as provided in the two succeeding sentences. If any part of such excess is attributable to negligence, or intentional disregard of rules and regulations, at the time of the making of such separate return, but without any intent to defraud, this additional amount shall be 5 percent of the total amount of the excess. If any part of such excess is attributable to fraud with intent to evade tax at the time of the making of such separate return, this additional amount shall be 50 percent of the total amount of the excess. The latter addition is in lieu of the 50 percent addition to the tax provided in section 3612 (d) (2).

(vi) *Rules for application of sections 275 and 291.* For the purpose of section 275, relating to the period of limitations upon assessment and collection, and section 291, relating to delinquent returns, a joint return made under section 51 (g) shall be deemed to have been filed, giving due regard to any extension of time granted to either spouse, on the following dates:

(a) Where both spouses filed separate returns, prior to making the joint return under section 51 (g), on the date the last separate return of either spouse was filed for the taxable year, but not earlier than the last date prescribed by law for the filing of the return of either spouse;

(b) Where only one spouse was required and did file a return prior to the making of the joint return under section 51 (g), on the date of the filing of the separate return, but not earlier than the last day prescribed by law for the filing of such return; and

(c) Where both spouses were required to file a return, but only one spouse did so file, on the date of the filing of the joint return under section 51 (g).

(vii) *Rule for application of section 322.* For the purpose of section 322, relating to refunds and credits, a joint return made under section 51 (g) shall be deemed to have been filed on the last date prescribed by law for filing the return for such taxable year, determined without regard to any extension of time granted to either spouse for filing the return or paying the tax.

(viii) *Additional time for assessment.* In the case of a joint return made under section 51 (g), the period of limitations provided in sections 275 and 276 shall include 1 year immediately after the date of the actual filing of such joint return. The expiration of the 1 year is to be determined without regard to the rules provided in subdivision (vi) of this subparagraph, relating to the application of sections 275 and 291 with respect to a joint return made under section 51 (g).

(ix) *Rule for application of section 3809 (a).* For the purposes of section 3809 (a), relating to criminal penalties in the case of a fraudulent return, the term "return" includes a separate return filed by a spouse for the taxable year for which a joint return is subsequently made under section 51 (g).

PAR. 3. Section 29.275–1, as amended by Treasury Decision 5516, approved May 27, 1946, relating to the period of limitation upon assessment of tax, is further amended by inserting at the end thereof the following:

(r) In the case of a joint return made under section 51 (g), the period of limitations shall include 1 year immediately after the date of the actual filing of such return, computed without regard to the provisions of section 51 (g) (7).

PAR. 4. Section 29.275–2, relating to the period of limitation upon collection of tax, is amended by inserting at the end thereof the following:

(f) In the case of a joint return made under section 51 (g), the period of limitations shall include 1 year immediately after the date of the actual filing of such return, computed without regard to the provisions of section 51 (g) (7).

PAR. 5. Section 29.322–7, as amended by Treasury Decision 5837, approved April 5, 1951, relating to limitations upon the crediting and refunding of taxes paid, is further amended by inserting immediately preceding the last paragraph of (a) the following: "In the case of a filing of a joint return under section 51 (g), the joint return shall be deemed to have been filed on the last date prescribed by law for filing the return for such taxable year, determined without regard to any extension of time granted to either spouse for filing the return or paying the tax. See § 29.51–1 (b) (3)."

DEPARTMENT OF AGRICULTURE

Bureau of Entomology and Plant Quarantine

[7 CFR Part 319]

INDIAN CORN OR MAIZE, BROOMCORN, AND RELATED CROPS

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given under section 4 of the Administrative Procedure Act (5 U. S. C. 1003) that the Secretary of Agriculture, pursuant to the authority conferred by section 5 of the Plant Quarantine Act of 1912 (7 U. S. C. 159), is considering the amendment of § 319.41–3 of the regulations supplemental to Notice of Quarantine No. 41 relating to Indian corn or maize, broomcorn, and related crops (7 CFR 319.41–3) by deleting from the first sentence of the second paragraph thereof the phrase "to the five months' period between October 1 of any year and the end of February of the succeeding year, both dates inclusive," and substituting therefor the phrase "to those shipments accompanied by on-board bills of lading dated within the period September 15 through February 15 of the succeeding year, both dates inclusive," so that the paragraph read as follows:

For broomcorn and brooms and similar articles made of broomcorn, permits will be issued by the Chief of the Bureau of Entomology and Plant Quarantine for such ports as may be designated therein, except that permits will be issued for the entry of broomcorn originating in countries other than those in the North or South American Continents or the West Indies only through the ports of Baltimore, Boston, and New York, or through other northeastern ports which may from time to time be designated in the permit, and at which facilities for treatment of infested material may be available, such entry to be limited to those shipments accompanied by on-board bills of lading dated within the period September 15 through February 15 of the succeeding year, both dates inclusive. Permits will not be issued for the entry of broomcorn from any source through ports on the Pacific coast.

The purpose of this amendment would be to eliminate the possibility that now exists of a boat shipment of foreign broomcorn arriving ahead of schedule or being unavoidably delayed, so that it arrives prior to or after the inclusive dates during which such entry is authorized. Instead of limiting entry to a 5-month period each year, the amendment would provide for a 5-month period during which on-board bills of lading covering such shipments must be dated. Date of departure from a foreign port would be the qualifying condition rather than the date of arrival in the United States. Such dates of departure can be controlled by exporters and importers. In the ordinary course these shipments would then arrive during the period now specified, with no penalties involved for earlier or later arrival due to unforseeable conditions on the voyage. This would permit a more orderly scheduling of purchases by American importers. It would relieve foreign exporters of uncertainty as to whether their shipments would meet entry deadlines, with the possibility of having shipments refused entry upon arrival. In effect, this would be a relaxation of restrictions now in effect and would be to the advantage of both American importers and foreign exporters.

All persons who desire to submit written data, views, or arguments in connection with this matter should file the same with the Chief of the Bureau of Entomology and Plant Quarantine, Agricultural Research Administration, United States Department of Agriculture, Washington 25, D. C., within 20 days after the date of the publication of this notice in the FEDERAL REGISTER.

(Sec. 5, 37 Stat. 316; 7 U. S. C. 159)

Done at Washington, D. C., this 11th day of July 1952.

[SEAL] CHARLES F. BRANNAN, *Secretary of Agriculture.*

Production and Marketing Administration

[7 CFR Part 907]

HANDLING OF MILK IN MILWAUKEE, WIS., MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), hereinafter referred to as the "act", and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Milwaukee, Wisconsin, marketing area.

Interested parties may file exceptions to this recommended decision with the Hearing Clerk, Room 1353, South Building, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 12th day after its publication in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. A public hearing on proposed amendments to the order was held by the Production and Marketing Administration, United States Department of Agriculture, on May 19–20, 1952, pursuant to notice thereof which was issued on May 8, 1952 (17 F. R. 4353). Proposals to amend the order were submitted by the Milwaukee Cooperative Milk Producers Association, the Pure Milk Products Cooperative, the Blochowick Dairy et al., Wern Farms, and the Dairy Branch, Production and Marketing Administration.

The material issues of record related to:

1. Revision of the price differentials over the basic formula price for Class I milk and Class II milk;

2. Revision of the "supply-demand price adjustment" provision;

3. Revision of the alternate basic price formula which employs market prices of butter and cheddar cheese;

4. Adoption of a new price formula to be applicable to milk used in cheese (Class IV milk);

5. Revision of the provisions relating to milk priced under another marketing agreement or order and disposed of within the marketing area;

6. Inclusion of a "bracket schedule" for Class I and Class II milk prices;

7. Revision of the provisions relating to transfers of milk, skim milk and cream from a handler to the plant of a producer-handler;

8. Adoption of a rule under which a handler shall have the option to pay producers on either base and excess prices or a blended price for all de-

liveries for the months of April, May and June;

9. Several proposed changes in order language for clarity and administrative purposes; and

10. The emergency character of marketing conditions and the need for immediate change in the order provisions.

Issues numbered (1), (2), (4), (6), (9), and (10) above were discussed in a decision of the Secretary issued June 13, 1952. The remaining issues are decided herein. Findings and conclusions with respect to issues (3), (5), (7), and (8) are set forth below:

Findings and conclusions. The following findings and conclusions on the issues decided herein are hereby made upon the basis of the record of the hearing:

(1) A milk price formula based on Cheddar cheese price quotations for Wisconsin primary markets should be adopted to replace the "butter-cheese" formula as one of the basic price formulas in the order (issue No. 3).

The basic formula price used to determine Class I and Class II prices is currently the highest of three formula prices computed for the preceding month. The formulas involved are: the average condensary pay price, the butter-nonfat dry milk solids formula, and the butter-cheese formula. Class I and Class II prices for the month are determined by adding to this basic formula price the appropriate Class I and Class II price differentials subject to an adjustment based on changes in the supply-demand relationship. A proposal was made to introduce an additional basic price formula based on cheese price quotations as follows: 2.75 times the simple average, as published by the Department, of prices per pound for "Cheddars" on the Wisconsin Cheese Exchange at Plymouth, Wisconsin, for the trading days that fall within the month, with the result multiplied by 3.5.

The record shows that the proposal is designed to produce a formula which will correspond to competitive prices paid by Wisconsin cheese factories for milk used in the manufacture of cheese. It was stated that the factor 2.75 is intended to be a figure which when multiplied by the Wisconsin Cheese Exchange quotation for Cheddars will approximate the price per pound of butterfat paid to farmers by competitive cheese factories. Considerable evidence was submitted for the record which related this formula price to the average price paid farmers by Wisconsin cheese factories as reported by the Department and by the Wisconsin State Department of Agriculture. In essence this formula is designed to measure the value of milk used for cheese from the standpoint of competitive "pay" prices as differentiated from a "cost and yield" method.

Reduced to its simplest form this formula is 9.625 times the average Cheddar cheese price (3.5 times 2.75= 9.625). The average paying price of Wisconsin cheese factories as reported by the Department for 1950 and 1951 divided by the average cheese price quotation on the Wisconsin Exchange for those two years gives a factor of 9.45 compared to the 9.625 that was proposed. Inasmuch as this formula is designed to reflect average pay prices it is concluded that the factor of 9.45 should be used in place of 9.625.

Since the production of cheese has been increasing in recent years and represents a major use of milk in the State of Wisconsin and the Milwaukee supply area, it is concluded that a formula based on Cheddar cheese would be appropriate as one of the basic price formulas under the Milwaukee order. A similar formula has been recommended for Order 41 and the inclusion of the formula in Order 7 will assist also in keeping a close alignment of class prices between the two markets. Under current conditions the butter-cheese formula does not fully reflect the value of milk utilized by cheese factories in the production area. In view of the adoption of the new cheese price formula the butter-cheese formula should be deleted.

In connection with the adoption of the new cheese formula, price quotations for cheese from Wisconsin primary markets should be used instead of Wisconsin Exchange prices at Plymouth. It was testified that price quotations are reported four days a week (excluding Friday) for "Wisconsin primary markets" which are based on actual sales of cheese. There have been only a few instances in the past several years when sufficient sales have not been made on the Wisconsin primary markets on which to base a report. The Wisconsin Cheese Exchange at Plymouth, Wisconsin, on the other hand meets each Friday so that a quotation is available for only one day of each week.

The volume of cheese sold on the Wisconsin Exchange is small in relation to the total volume of cheese sold on Wisconsin primary markets. Moreover, there have been numerous occasions when no sales of cheese were made through the Wisconsin Cheese Exchange and at times such condition has existed for a considerable period. It has been necessary therefore to use prices for weeks when no sales were reported which were derived from either bids or offers rather than from actual sales. For the purposes of the order the price of cheese at Wisconsin primary markets is the more representative report to use in reflecting prices actually received by manufacturers of cheese.

The types of transaction on which the two cheese quotations discussed above are based are similar—both are for the same type of cheese and are for cheese loaded for shipping at assembly points. The quotations differ, however, in that the price at primary markets includes a charge for certain services, such as paraffining and assembly, which is not included in the Exchange price but is made as a separate charge to the purchaser. Over the past two years the primary markets' price has averaged higher than the Exchange price by approximately 1.3 cents per pound and deduction of this amount should be made in adopting the primary market price.

(2) Neither the provisions which specify the conditions for determining the order under which a handler shall operate when he makes sales in two or more marketing areas as defined in the several milk orders, nor the provisions to require a plant that receives milk subject to the class price provisions of the Chicago order to make payments to producers under this order by the amounts the Milwaukee Class I and Class II prices exceed the zone prices for comparable classifications under the Chicago order should be adopted (issue 5).

A proposal was made to amend the order on the question of which order shall apply to a handler when sales are made under two or more orders, and on the question of prices to be charged under such conditions. Concerning the first feature of the proposal, which deals with a method to determine the milk marketing order to be applied to a handler making sales in several markets in which marketing orders are effective, no supporting testimony was offered nor argument made on behalf of the proposal. The problem to which this proposal is directed was dealt with originally by a provision in the order suspended January 1, 1952. The lack of information in this record on both the problem and the proposed solution permits no recommendation to be made on this matter.

Milk is distributed regularly in the Milwaukee marketing area from two plants subject to Order 41 for the Chicago marketing area. Class I and Class II prices applicable to milk at such plants are comparable. After giving effect to zone location adjustments, to prices for similar classifications under the Milwaukee order, Milwaukee handlers contend that other plants under the Chicago order, if located in any zone beyond zone 3 as established under such order, are required to pay lesser class prices than Milwaukee handlers because of increased location allowances as the distance of the plants from Chicago increases, and that any such Chicago plant would have a price advantage over local plants if milk therefrom were to enter the Milwaukee market on wholesale or retail routes. It was proposed that any such difference in prices in favor of the Chicago plant be paid by the plant operator to the market administrator of Order 7 for distribution to producers under the latter order.

Intermarket relationships such as this raise questions as to the application of cooling, pricing, and classification provisions under the orders involved and as to the specific requirements to be imposed when milk sold from one market into another. It may be noted in this connection, however, that factors other than class prices, such as transportation and processing costs (which are not covered by order provisions), enter into an outside distributor's cost of milk sold in competition with local handlers. In the interest of equity to both the outside distributor and local handlers, it is necessary under present circumstances to maintain a reasonably close alignment of class prices under the orders concerned, taking into account the approximate cost of moving milk between markets. In the present instance the record does not indicate that the location adjustments allowed handlers under the Chicago order will serve to give undue competitive advantage to Chicago handlers who may choose to enter the Milwaukee market from a location beyond zone 3 and thus work undue hardship on handlers regulated by the Milwaukee order. In view of the above it is concluded that the second feature of the proposal, which deals with the pricing of milk between markets, should not be adopted.

(3) The classification provisions relating to transfers of milk, skim milk and cream from a handler to the plant of a producer-handler should be revised (issue 7).

The order provides that milk or skim milk transferred by a handler to the plant of a producer-handler shall be Class I milk and cream transferred shall be Class II milk. It was proposed that this rule of classification be modified to permit classification according to actual use if the buyer and seller mutually agree that a Class III or Class IV use was made.

A producer-handler with specialty milk sales in the marketing area also operates an ice cream manufacturing business and purchases skim milk and cream occasionally from a Milwaukee handler for ice cream purposes. Milk meeting the health standards for regular bottled milk is not eligible for bottling in the plant of such producer-handler. At least one handler regulated by the order disposes of temporary excesses of producer milk in his plant to such producer-handler as an outlet for milk not needed for Class I and Class II milk operations. Such milk is utilized in the manufacture of ice cream which is a Class III milk use according to order classification. In view of the above circumstances it is not necessary to distinguish, for classification purposes, between transfers to other handlers and to producer-handlers. It is concluded, therefore, that the special rule governing transfers to producer-handlers should be eliminated and that milk transferred to the plant of a producer-handler may be classified according to actual use if utilization other than Class I or Class II is mutually indicated in writing by both buyer and seller, with the proviso (which applies to all handlers) that the amount reported as Class III or Class IV milk shall not exceed the total use in such class in the transferee plant after the subtraction therefrom of other source milk in such plant.

(4) The proposal that handlers should have the option of paying producers in April, May, and June on either the base and excess plan or a "blended" price should not be adopted.

It was proposed that handlers be given the option of paying producers on either the base and excess plan or a "blended" price in the months of April, May, and June. In support the proponent handler stated that the requirement of payment on the base and excess plan has made it difficult to compete with the Chicago handlers in procuring additional milk supplies. It was testified that such procurement is retarded by (a) prospective producers expressing objection to producing under a base-excess plan, and (b) offers of premiums by Chicago handlers over and above the minimum uniform price announced under the Chicago order.

The reasons for the base-excess plan of payment for milk in the Milwaukee market were set forth in detail in the decision of the Secretary at the time of original promulgation of the order. Notice of such decision, which was issued September 27, 1950, is taken. The present record does not indicate with any certainty that the procurement difficulties related on the record have been caused by the existence of the base-excess plan rather than by the payment of premiums by Chicago handlers, or that such problem has seriously affected total market supplies. It may be noted that bases are in effect only during the three months named above. The majority of handlers, as well as major producer groups, contend that the base-excess plan continues to be of advantage to the market in the encouragement it gives to a better adjusted milk supply. Average returns to Milwaukee producers are fully comparable to those of Chicago producers. In view of these circumstances and the general basis for the plan set forth in the decision of September 27, 1950, which is not disturbed by evidence contained in the present record, it is concluded that the base-excess plan should be retained as provided in the order.

General findings. (a) The proposed, marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Rulings on briefs. Briefs were filed on behalf of certain Milwaukee producers and handlers. The briefs contained proposed findings of fact, conclusions and argument with respect to the proposals discussed at the hearing. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that such suggested findings and conclusions contained in the brief are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions are denied on the basis of the facts found and stated in connection with the conclusions in this decision.

Recommended marketing agreement and order. The following proposed amendments to the order are recommended as the detailed and appropriate means by which these conclusions may be carried out. The proposed amendments to the marketing agreement are not included because the regulatory provisions thereof would be the same as those contained in the proposed amendments to the order:

1. Add to the introductory language of § 907.33 (preceding paragraph (a)) following the word "handler" the phrase, "including any producer-handler."

2. Delete from § 907.45 (a) the phrase "except a producer-handler" and substitute therefor the phrase "including a producer-handler."

3. Delete § 907.45 (c).

4. Delete § 907.50 (b) and substitute therefor the following:

(b) The price per hundredweight computed from the following formula:

(1) From the simple average of the daily prices paid per pound, using the mid-point of any price as one price, for Wisconsin State Cheddars in cars or truck loads, f. o. b. Wisconsin assembling points, as reported by the U. S. D. A. for the trading days during the month, subtract 1.3 cents, and then multiply by 2.7.

(2) Multiply such result by 3.5.

5. Delete the period at the end of § 907.90 and add the following: "except where the text of such section(s) of the order indicate that such section(s) should apply."

6. Delete the semicolon and the word "or" at the end of § 907.91 (a) (1) and substitute in lieu thereof a period.

Filed at Washington, D. C., this 11th day of July 1952.

Dated: July 11, 1952.

[SEAL] ROY W. LENNARTSON,
Assistant Administrator.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 230]

DEFINITIONS OF TERMS USED IN THE ACT; FORM AND CONTENT OF PROSPECTUSES

NOTICE OF PROPOSED RULE MAKING

For some years the Commission has been exploring the advisability of recommending appropriate amendment of the Securities Act of 1933 in order better to achieve its basic purpose of affording investors a maximum of timely disclosure in an understandable form. It seems clear that the two basic problems are (1) devising some means, consistent with the statutory prohibition of selling effort before the effective date of the registration statement, for achieving more widespread dissemination of information during the waiting period, and (2) obtaining a statutory prospectus which is reasonably concise and readable.

The Commission has tentatively concluded that it would not be justified in recommending new legislation to the Congress until it has done everything possible to achieve these two results under its existing powers. This approach also has the advantage of permitting a degree of flexibility and experimentation. If the suggestions which the Commission now offers for public comment are adopted, actual experience may indicate modifications from time to time. Moreover, the proposals now offered are not necessarily a substitute for new legislation. In the event legislative action seems desirable, all parties concerned should be in a better position to consider statutory amendment in the light of the experience with the administrative changes now proposed.

These proposals, as announced in this release, consist partly of new rules and partly of a new statement of policy with reference to acceleration of the registration statement.

In 1950 the Commission announced that it was considering a proposal to amend its rules under the Securities Act of 1933 to do two things (a) permit the circulation to investors of "identifying statements" containing certain limited information taken from registration statements and prospectuses, and (b) facilitate and encourage advance distribution of proposed prospectuses (so-called "red herring prospectuses"). See Securities Act Release No. 3396 (November 14, 1950). No amendment was adopted at that time. The present proposals contain certain modifications. The Commission has the comments submitted in 1950 and invites any further comments that interested persons may wish to make. The proposals and the factors prompting their consideration are described in full below so as to make reference to the earlier release unnecessary.

In the absence of an exemption, the Securities Act prohibits the use of the mails or interstate facilities to make any sale or attempt to dispose of a security prior to the effective date of a registration statement, and requires the inclusion of material information in prospectuses used after that date. However, it does not prohibit the dissemination of information as such. Indeed, the concept of the waiting period is based on the premise that information will in fact be disseminated.

The report of the Committee on Interstate and Foreign Commerce on the bill that became the Securities Act (H. R. Rep. No. 85, 73d Cong., 1st Sess., pp. 12–13) stated that underwriters who wished to inform dealers of the nature of a security to be offered for sale after the effective date of the registration statement would be free to circulate the offering circular (prospectus) itself, if clearly marked in such a manner as to indicate that no offers to buy should be sent or would be accepted until the effective date of the registration statement. This practice is expressly permitted by Rule 131 under the Securities Act, relating to the circulation of the so-called "red herring prospectus" before the effective date, and it is not proposed to change this rule.

In Releases 464 and 802 under the Securities Act the Commission's General Counsel early expressed the opinion that the definitions of the terms "sale" and "sell" in section 2 (3), and hence the prohibitions of section 5, did not extend to certain summaries of salient information contained in registration statements—provided, among other conditions, that the material did not attempt to dispose of the security in process of registration and was not used after the effective date unless accompanied or preceded by a copy of the statutory prospectus. The proposed action would not affect the status of such summaries.

I. The proposed Rule 132 is designed to permit, under certain conditions, the use of a brief "identifying statement" which would set forth generally the nature of the security to be offered. Certain categories of information would be required and certain additional categories would be permitted. Among other things, the identifying statement would set forth "the general type of business of the issuer"; it is contemplated that this statement regarding the nature of the business would not exceed a line or two. The identifying statement would be intended for use as a screening device to locate persons who might be interested in receiving a "red herring prospectus" or final prospectus and not to facilitate solicitations in advance of the effective date. The proposed rule would be in the form of a definition of the terms "sale" and "offer" for purposes of section 5. The anti-fraud provisions would not be affected.

The rule would require that the identifying statement include a form for requesting copies of prospectus. Persons requesting prospectuses before the effective date of the registration statement could be given the "red herring prospectus" provided for in the present Rule 131.

Rule 132 would condition use of the identifying statement upon the filing of a form of such statement as a part of the registration statement ten days in advance, unless the Commission accelerated the period. Any person using the identifying statement would add to this form his name and (after the effective date) the price of the security. The identifying statement could be circulated or published by the issuer or by underwriters and dealers either before or after the effective date of the registration statement. In order to make certain that a form of identifying statement would always be available for use by dealers, the Commission would amend its various registration forms to require that each registration statement be accompanied by a form of identifying statement.

II. In Securities Act Release No. 3177, issued on December 5, 1946, at the time of the adoption of Rule 131 on "red herring prospectuses," the Commission referred to its power under section 8 (a) to accelerate the effectiveness of a registration statement where adequate information respecting the issuer has been available to the public. That release states:

The Commission, in considering requests for acceleration of the effective date of registration statements, will consider whether adequate dissemination has been made of copies of the proposed form of prospectus, as permitted by the rule. The determination of what constitutes adequate dissemination must, of course, remain a question of fact in each case after consideration of all pertinent factors. It would, however, involve as a minimum the distribution, a reasonable time in advance of the anticipated effective date, of copies of such proposed form of prospectus to all underwriters and dealers who may be invited to participate in the distribution of the security.

In connection with the present proposals, the Commission, in determining whether to grant acceleration, would consider also (1) whether the identifying statement has been made available to all underwriters and dealers who might be invited to participate in the distribution and (2) whether copies of the "red herring prospectus" had been made available in reasonable quantity to such underwriters and dealers, taking into consideration the number of requests that they might expect to receive from customers and the amount of securities that might be available to them for distribution.

III. In order to facilitate the use of proposed prospectuses in the pre-effective period and to avoid the necessity of duplicating the information contained in them at a later date, it is proposed to amend Rule 431 to provide generally that a final prospectus meeting the requirements of the act may consist of the latest proposed prospectus under Rule 131 plus a document containing such additional information that both together contain all the information required by the Act. The amendment would remove a provision which now limits the rule to offerings by an issuer to its existing stockholders.

IV. The proposals outlined above are designed to assist distributors in locating persons interested in receiving the prospectus and to make prospectuses more readily available to prospective investors. A related problem is that a prospectus may not be useful to an investor if it is unduly long and complex. As a part of the present proposal, the Commission is therefore considering the adoption of a policy of refusing acceleration where it is satisfied that there has been no bona fide effort to make the prospectus reasonably concise and readable.

The text of the proposed rule and amendment follows:

§ 230.132 *Definition of "offer to sell," "offer for sale," "attempt or offer to dispose of," and "solicitation of an offer to buy" as used in section 2 (3) in connection with certain identifying statements.* (a) For purposes of section 5 only, sending or giving to any person or publishing, after the filing of a registration statement under the Securities Act, a copy of an identifying statement as defined in paragraph (b) of this section shall not in itself constitute an "offer to sell," "offer for sale," "attempt or offer to dispose of," or "solicitation of an offer to buy" as used in section 2 (3) of the act: *Provided*, That:

(1) The identifying statement is not used until ten days after it has been filed as a part of the registration statement, unless the Commission notifies the issuer that it may be used earlier.

(2) When used before the effective date of the registration statement, the identifying statement contains the following legend in type as large as that used generally in the body thereof:

The offer of these securities is subject to the registration and prospectus requirements of the Federal Securities Act. Information about the issuer, the securities, and the circumstances of the offering is contained in the registration statement and prospectus required by that act. The registration statement is not yet effective. No offer to buy or sell the securities should be made and no offer to purchase the securities will be accepted until the registration statement has become effective.

(3) When used after the effective date of the registration statement, the identifying statement contains the following legend in type as large as that used generally in the body thereof;

The offer of these securities is subject to the registration and prospectus requirements of the Federal Securities Act. Information about the issuer, the securities, and the circumstances of the offering is contained in the registration statement and prospectus required by that act.

(4) The identifying statement indicates from whom copies of the prospectus (or of a proposed prospectus used pursuant to § 230.131 (Rule 131)) may be obtained and includes a detachable form for use in requesting such copies, which form shall be substantially as follows:

Please send me a copy of the prospectus (or proposed prospectus) relating to ------
Name ----------
Address ----------

(b) For the purposes of this section, the term "identifying statement" means a written communication or advertisement which contains the information specified in subparagraphs (1) to (6) inclusive of this paragraph, to the extent that those clauses are applicable, and in addition briefly states no more than the information specified in subparagraphs (7) to (12) inclusive of this paragraph:

(1) The title of the security;

(2) The name of the issuer;

(3) The general type of business of the issuer;

(4) The price of the security;

(5) The price at which, the conditions upon which, and the time when, the security may be redeemed or converted or exchanged or, if the security is a right or warrant or is offered by means of a right or warrant, the terms of such right or warrant with respect to price and the conditions and time of exercise;

(6) Whether the security is being offered in connection with a financing by the issuer or a distribution by a person directly or indirectly controlling or controlled by the issuer, or under direct or indirect common control with the issuer;

(7) The stated rate of return or the yield or both if the security has a fixed interest or dividend provision and if the issuer's earnings for the past three full fiscal years will reasonably support a conclusion as to yield;

(8) Whether the security is listed on any securities exchange;

(9) Whether, in the opinion of counsel, the security is a legal investment for savings banks, fiduciaries, insurance companies, or other similar investors under the laws of any State or Territory or the District of Columbia;

(10) The extent to which the issuer has agreed to pay any tax with respect to the security or measured by the income therefrom;

(11) Whether the issue represents new financing or a refunding operation;

(12) The title and number of shares or other units or (in the case of debt securities) principal amount of each class of outstanding securities.

(c) The identifying statement as filed need not state from whom prospectuses or proposed prospectuses may be obtained, or contain any information as to price, even though such information is available. The information specified in this paragraph shall be inserted by the person who sends, gives or publishes the statement if it is then on file with the Commission.

(d) This section shall not apply to the sending or giving or publishing of any identifying statement if, at the time such identifying statement is sent or given or published, the registration statement is the subject of pending proceedings under section 8 (b), 8 (d), or 8 (e) of the act, or of an order entered under any of such sections.

§ 230.431 *Prospectuses supplementing preliminary material supplied previously.* A prospectus may consist of a copy of the latest proposed form of prospectus meeting the requirements of § 230.131 (Rule 131) and a document containing such additional information that both together contain all of the information required to be included in a prospectus for registered securities: *Provided*, That:

(a) The proposed form of prospectus is sent or given before the effective date of the registration statement;

(b) The proposed form of prospectus is incorporated by reference into and made a part of the document; and

(c) The document is attached to the proposed form of prospectus or is sent or given within ten days after the sending or giving of the proposed form of prospectus.

All interested persons are invited to submit views and comments on these proposals in writing to the Securities and Exchange Commission at its principal office, 425 Second Street NW., Washington, D. C., on or before August 4, 1952.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

JULY 10, 1952.

NOTICES

DEPARTMENT OF THE TREASURY

United States Coast Guard

[CGFR 52-39]

TERMINATION OF APPROVAL OF EQUIPMENT, CORRECTION TO PRIOR DOCUMENT, AND CHANGE IN NAME OF MANUFACTURER

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950, 15 F. R. 6521, and in compliance with the authorities cited below, the following approvals of equipment are terminated because the items of equipment covered are no longer being manufactured for marine service or the company has gone out of business, and the following corrections in FEDERAL REGISTER Volume 17, Number 117 of the issue for Saturday, June 14, 1952, shall be made, and the following change in address of manufacturer of approved equipment shall be made:

LIFE PRESERVERS, CORK (JACKET TYPE)

Termination of Approval No. A-293, Model 31, adult cork life preserver, U. S. C. G. Specification Subpart 160.003, manufactured by Western Canvas Products Co. (formerly Western Sportswear Mfg. Co.), 417 East Pine Street, Seattle 22, Wash. (Approved by Coast Guard letter dated May 8, 1945, to Western Sportswear Mfg. Co.)

Termination of Approval No. A-294, Model 35, child cork life preserver, U. S. C. G. Specification Subpart 160.003, manufactured by Western Canvas Products Co. (formerly Western Sportswear Mfg. Co.), 417 East Pine Street, Seattle 22, Wash. (Approved by Coast Guard letter dated May 8, 1945, to Western Sportswear Mfg. Co.)

(R. S. 4405, 4417a, 4426, 4488, 4491, 4492, 35 Stat. 428, 49 Stat. 1544, 54 Stat. 164, 166, 346, and sec. 5 (e), 55 Stat. 244, as amended; 46 U. S. C. 367, 375, 391a, 396, 404, 481, 489, 490, 526e, 526p, 1333, 50 U. S. C. 1275, 46 CFR 25.4-1, 33.3-1, 59.55, 76.52, 94.52, 113.44, 160.003)

CLEANING PROCESS FOR LIFE PRESERVERS

NOTE: When buoyancy fillers are not removed from envelope covers during cleaning process.

Termination of Approval No. 160.006/10/0, Western Canvas cleaning process for kapok life preservers, as outlined in attachment to letter dated October 14, 1947, from Western Canvas Products Co., 417 East Pine Street, Seattle 22, Wash. (Approved FEDERAL REGISTER dated November 19, 1947.)

(R. S. 4405, 4417a, 4426, 4492, 4488, 4491, sec. 11, 35 Stat. 428, 49 Stat. 1544, 54 Stat. 164, 166, 346, and sec. 5 (e), 55 Stat. 244, 245, as

amended; 46 U. S. C. 367, 375, 391, 396, 404, 475, 481, 489, 526e, 526p, 1333, 50 U. S. C. App. 1275; 46 CFR 160.006)

BUOYANT CUSHIONS, KAPOK, STANDARD

Termination of Approval No. 160.007/50/0, Standard kapok buoyant cushion, U. S. C. G. Specification Subpart 160.007, manufactured by Armond's, 3709–3711 Winchester Avenue, Atlantic City, N. J. (Approved FEDERAL REGISTER dated July 31, 1947.)

(R. S. 4405, 4491, 54 Stat. 164, 166, as amended; 46 U. S. C. 375, 489, 526e, 526p; 46 CFR 25.4–1, 160.007)

CORRECTION TO PRIOR DOCUMENT

In FEDERAL REGISTER Volume 17, Number 117 of the issue for Saturday, June 14, 1952, the following corrections shall be made:

1. Under the heading "Flashlights, Electric, Hand," Approval No. 161.008/10/0, shall be corrected by changing the number of the assembly dwg. from "G-1108" to "C-1108."

2. Under the heading "Structural Insulation," Approval No. 164.007/6/1, shall be corrected by changing the term "BX Spuntex" to "BX Spintex."

CHANGE IN NAME OF MANUFACTURER

The name of the Hillsboro Transportation Company, Hillsboro, Ohio, has been changed to R-Way Mfg. Co., Hillsboro, Ohio, for Coast Guard Approval No. 160.007/82/0 published in the FEDERAL REGISTER dated June 23, 1949, for standard kapok buoyant cushions.

CONDITIONS OF TERMINATION OF APPROVALS

The termination of approvals of equipment made by this document shall be made effective upon the thirty-first day after the date of publication of this document in the FEDERAL REGISTER. Notwithstanding this termination of approval on any item of equipment, such equipment manufactured before the effective date of termination of approval may be used on merchant vessels so long as it is in good and serviceable condition.

Dated: July 10, 1952.

[SEAL] A. C. RICHMOND,
Rear Admiral, U. S. Coast Guard,
Acting Commandant.

[F. R. Doc. 52-7865; Filed, July 16, 1952; 8:55 a. m.]

[CGFR 52-37]

APPROVAL OF EQUIPMENT

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), and in compliance with the authorities cited below, the following approvals of equipment are prescribed and shall be effective for a period of five years from date of publication in the FEDERAL REGISTER unless sooner canceled or suspended by proper authority:

BUOYANT CUSHIONS, KAPOK, STANDARD

NOTE: Approved for use on motorboats of Classes A, 1, or 2 not carrying passengers for hire.

Approval No. 160.007/118/0, Standard kapok buoyant cushion, U. S. C. G. Specification Subpart 160.007, manufactured by Elvin Salow Co., Boston, Mass., for Brunal Supply Co., 30 Edgar Road East, Linden, N. J.

(R. S. 4405, 4491, 54 Stat. 164, 166, as amended; 46 U. S. C. 375, 489, 526e, 526p; 46 CFR 25.4–1, 160.007)

BUOYS, LIFE, RING, CORK OR BALSA WOOD

Approval No. 160.009/40/0, 30-inch cork ring life buoy, U. S. C. G. Specification Subpart 160.009, manufactured by George Broom & Sons, Twenty-seventh Avenue and Commodore Way, Seattle, Wash.

(R. S. 4405, 4417a, 4426, 4462, 4488, 4491, sec. 11, 35 Stat. 428, 49 Stat. 1544, 54 Stat. 164, 166, 346, and sec. 5 (e), 55 Stat. 244, as amended; 46 U. S. C. 367, 375, 391a, 396, 404, 475, 481, 489, 526e, 526p, 1333, 50 U. S. C. 1275; 46 CFR 25.4–1, 33.01–5, 33.40–1, 59.56, 60.49, 76.53, 94.53, 113.46, 160.009)

WINCHES, LIFEBOAT

Approval No. 160.015/53/0, Type C–70A lifeboat winch, approval is limited to mechanical components and for a maximum working load of 5,500 pounds pull at the drums (2,750 pounds per fall), identified by arrangement dwg. No. 3325 dated February 20, 1950, manufactured by Welin Davit and Boat Division of Continental Copper & Steel Industries, Inc., Perth Amboy, N. J.

Approval No. 160.015/54/0, Type A–150AH lifeboat winch, approval is limited to mechanical components and for a maximum working load of 15,000 pounds pull at the drums (7,500 pounds per fall), identified by arrangement dwg. No. 2917–24, dated February 14, 1950, manufactured by Welin Davit and Boat Division of Continental Copper & Steel Industries, Inc., Perth Amboy, N. J.

Approval No. 160.015/58/0, Type G. W. lifeboat winch, approval is limited to mechanical components and for a maximum working load of 11,000 pounds pull at the drums (5,500 pounds per fall), identified by arrangement dwg. No. 1494–1 revised May 13, 1952, manufactured by C. C. Galbraith & Son, Inc., 99 Park Place, New York 7, N. Y.

Approval No. 160.015/59/0, Type A–190A lifeboat winch, approval is limited to mechanical components and for a maximum working load of 19,000 pounds pull at the drums (9,500 pounds per fall), identified by arrangement dwg. No. 3340 dated August 11, 1950, and revised March 21, 1951, manufactured by Welin Davit and Boat Division of Continental Copper & Steel Industries, Inc., Perth Amboy, N. J.

Approval No. 160.015/61/0, Type A–54A lifeboat winch, approval is limited to mechanical components and for a maximum working load of 5,400 pounds pull at the drums (2,700 pounds per fall), identified by arrangement dwg. No. 3341 dated August 8, 1950 and revised May 21, 1951, manufactured by Welin Davit and Boat Division of Continental Copper and Steel Industries, Inc., Perth Amboy, N. J.

(R. S. 4405, 4417a, 4426, 4488, 4491, 49 Stat. 1544, 54 Stat. 346, and sec. 5 (e), 55 Stat. 244, 245, as amended; 46 U. S. C. 367, 375, 391a, 404, 481, 489, 1333, 50 U. S. C. App. 1275; 46 CFR 33.10–5, 59.3a, 60.21, 76.15a, 94.14a, 160.015)

DAVITS, LIFEBOAT

Approval No. 160.032/129/0, gravity davit, type 30–70, approved for maximum working load of 20,500 pounds per set (10,250 pounds per arm) using 2 part falls, identified by general arrangement dwg. No. DG-301–1 dated June 5, 1951, and revised June 6, 1951, manufactured by Marine Safety Equipment Corp., Point Pleasant, N. J.

Approval No. 160.032/130/0, gravity davit, type G. D. 30–72–7.6, approved for maximum working load of 22,000 pounds per set (11,000 pounds per arm) using 2 part falls, identified by general arrangement dwg. No. 1497–1 dated May 8, 1951, and revised May 13, 1952, manufactured by C. C. Galbraith & Son, Inc., 99 Park Place, New York 7, N. Y.

(R. S. 4405, 4417a, 4426, 4481, 4488, 4491, 49 Stat. 1544, 54 Stat. 346, and sec. 5 (e), 55 Stat. 244, as amended; 46 U. S. C. 367, 375, 391a, 404, 474, 481, 489, 1333, 50 U. S. C. 1275; 46 CFR 160.032)

HAND PROPELLING GEAR, LIFEBOAT

Approval No. 160.034/6/1, Double Gear Type hand propelling gear identified by arrangement dwg. No. 1857 dated November 4, 1940, revised April 17, 1952, submitted by Welin Davit and Boat Division of Continental Copper & Steel Industries, Inc., Perth Amboy, N. J. (Supersedes Approval No. 160.034/6/0 published in the FEDERAL REGISTER, July 31, 1947.)

(R. S. 4405, 4417a, 4426, 4488, 4491, 49 Stat. 1544, 54 Stat. 346, and sec. 5 (e), 55 Stat. 244, 245 as amended; 46 U. S. C. 367, 375, 391a, 404, 481, 489, 1333, 50 U. S. C. App. 1275; 46 CFR 33.15–1, 33.15–5, 59.11, 160.034)

LIFEBOATS

Approval No. 160.035/11/2, 16.0' x 5.7' x 2.3' steel oar-propelled lifeboat, 12-person capacity, identified by general arrangement dwg. No. G–1612 dated June 12, 1951, and revised May 5, 1952, manufactured by C. C. Galbraith & Son, Inc., 99 Park Place, New York 7, N. Y. (Supersedes Approval No. 160.035/11/1 published in the FEDERAL REGISTER, October 4, 1951.)

Approval No. 160.035/279/0, 30.0' x 10.0' x 4.13' aluminum hand propelled lifeboat, 70-person capacity, identified by construction and arrangement dwg. No. 30–1B dated December 15, 1950, and revised June 5, 1952, manufactured by Marine Safety Equipment Corp., Point Pleasant, N. J.

(R. S. 4405, 4417a, 4426, 4481, 4488, 4491, 4492, 35 Stat. 428, 49 Stat. 1544, 54 Stat. 346, and sec. 5 (e), 55 Stat. 244, as amended; 46 U. S. C. 367, 375, 391a, 396, 404, 474, 481, 489, 490, 1333, 50 U. S. C. 1275; 46 CFR 33.01–5, 59.13, 76.16, 94.15, 113.10, 160.035)

KITS, FIRST-AID

Approval No. 160.041/3/0, First-aid Kit, Model No. 600 M, dwg. No. 100A dated February 25, 1952, manufactured by Medical Supply Co., 1027 West State Street, Rockford, Ill.

(R. S. 4405, 4417a, 4488, 4491, 49 Stat. 1544, 54 Stat. 346, 55 Stat. 244, as amended; 46 U. S. C. 367, 375, 391a, 481, 489, 1333, 50 U. S. C. 1275; 46 CFR 160.041)

BOILERS, HEATING

Approval No. 162.003/1/1, AGITAIR hot water heating boiler, forced circulation coil type, dwg. No. WH–102, revision III, dated May 27, 1952, WH–103A, revision IV dated May 27, 1952, and WH–100 revised May 29, 1952, maximum design pressure 30 p. s. i., approval limited to bare boiler, manufactured by Air Devices, Inc., 17 East Forty-second Street, New York 17, N. Y. (Supersedes Approval No. 162.003/1/0 published in the FEDERAL REGISTER, July 31, 1947.)

Approval No. 162.003/4/1, Class "OB" steel plate hot water heating boiler, dwg. Nos. G–260 dated October 30, 1951, G–262 dated May 28, 1952, and G–412 dated November 9, 1951, maximum design pressure 30 p. s. i., approval limited to bare boiler, manufactured by Bethlehem Foundry & Machine Company, Bethlehem, Pa. (Supersedes Approval No. 162.003/4/0 published in the FEDERAL REGISTER, July 31, 1947.)

Approval No. 162.003/23/1, Model No. 29M2, steel plate steam heating boiler, dwg. No. 266.091, revision F, dated May 20, 1952, maximum design pressure 30 p. s. i., approval limited to bare boiler, manufactured by Pacific Steel Boiler Division, United States Radiator Corporation, Detroit 31, Mich. (Supersedes Approval No. 162.003/23/0 published in the FEDERAL REGISTER, July 31, 1947.)

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

MONTANA

ORDER PROVIDING FOR WITHDRAWAL OF LANDS FOR STOCK DRIVEWAY PURPOSES; NO. 18 AMENDED

JULY 9, 1952.

Notice of the order providing for withdrawal of lands for public stock watering and stock driveway purposes, Montana No. 19 dated April 18, 1952 (17 F. R. 3804), is amended in its entirety to read as follows:

By virtue of the authority contained in section 10 of the act of December 29, 1916, 39 Stat. 865, as amended by the act of January 29, 1929, 45 Stat. 1144 (43 U. S. C. 300), and in section 7 of the act of June 28, 1934, 48 Stat. 1272, as amended by the act of June 26, 1936, 49 Stat. 1976 (43 U. S. C. 315f), and pursuant to the authority delegated by the Director, Bureau of Land Management in § 2.22 (a) (1) of Order No. 427, dated August 16, 1950 (15 F. R. 5639), it is ordered as follows:

The following described public lands in Montana are hereby classified as necessary and suitable for stock driveway purposes, and are withdrawn from all disposal under the public land laws and reserved, subject to valid existing rights, for the use of the general public, the reservation to be known as Stock Driveway Withdrawal Montana No. 18:

MONTANA PRINCIPAL MERIDIAN

T. 23 N., R. 22 E.,
Sec. 20, lot 2.
Sec. 21, lots 1, 3, 4.

The area described above aggregates 118.81 acres.

The withdrawal made by this order shall be subject to provisions of prior Power Site Reserves No. 500 dated July 19, 1915, and No. 757 dated February 7, 1922, and Power Site Classification No. 301 dated August 31, 1937, so far as such orders affect the above described lands.

MAX CAPLAN,
Acting Regional Administrator.

MONTANA

NOTICE OF FILING OBJECTIONS TO ORDER WITHDRAWING PUBLIC LANDS FOR STOCK DRIVEWAY PURPOSES; NO. 18

For a period of 60 days from the date of publication of the above entitled order, persons having cause to object to the terms thereof may present their objections to the Secretary of the Interior. Such objections should be in writing, should be addressed to the Secretary of the Interior, and should be filed in duplicate in the Department of the Interior, Washington 25, D. C. In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where the proponents of the order can explain its purpose, intent, and extent. Should any objection be filed, whether or not a hearing is held, notice of the determination by the Secretary as to whether the order should be rescinded, modified or let stand will be given to all interested parties of record and the general public.

MAX CAPLAN,
Acting Regional Administrator.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

CHIEF, FOREST SERVICE

REVOCATION OF DELEGATION OF AUTHORITY WITH RESPECT TO WITHDRAWAL OF LANDS

By virtue of the authority vested in the Secretary of Agriculture, I, Charles F. Brannan, Secretary of Agriculture, do hereby cancel the delegation to the Chief, Forest Service, dated December 16, 1949 (14 F. R. 7674), respecting withdrawal of lands under his jurisdiction. The authority vested in me by Executive Order No. 10355, dated May 26, 1952, to approve or concur in public land orders issued by the Secretary of the Interior under said Executive Order respecting the withdrawal and reservation of lands under the jurisdiction of this Department will be exercised by the Under Secretary and the Assistant Secretary pursuant to the delegation of authority to such officers to perform the duties and exercise the powers and functions of the Secretary of Agriculture, dated April 25, 1941 (6 F. R. 2204).

(5 U. S. C. 22; E. O. 10355 (17 F. R. 4831))

Done at Washington, D. C., this 11th day of July 1952. Witness my hand and the seal of the Department of Agriculture.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

[Docket No. 3094 et al.]

CONTINENTAL AIR LINES, INC.; WICHITA FALLS-DALLAS SERVICE

NOTICE OF HEARING

In the matter of the applications of Continental Air Lines, Inc., for amendment of its certificate of public convenience and necessity for route No. 29 which propose extension of service from Wichita Falls, Texas, to Dallas, Texas, via Fort Worth, Texas.

Notice is hereby given that pursuant to the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a), 402 (h) and 1001 of said act, the above-entitled proceeding is assigned for hearing on September 4, 1952, at 10:00 a. m., e. d. s. t., in Room 5859, Commerce Building, Fourteenth Street and Constitution Avenue NW., Washington, D. C., before Examiner Curtis C. Henderson.

Without limiting the scope of the issues presented by the applications, particular attention will be directed to the following matters:

1. Whether public convenience and necessity require amendment of the certificate of public convenience and necessity held by Continental Air Lines, Inc., for route No. 29 so as to authorize air transportation from Wichita Falls, Texas, to Dallas, Texas, via Fort Worth, Texas;

2. Whether public convenience and necessity require amendment of the certificate of public convenience and necessity held by Mid-Continent Airlines, Inc., for route No. 26 so as to authorize air transportation from Tulsa, Oklahoma, to Fort Worth and Dallas, Texas, as coterminal points;

3. Whether public convenience and necessity require amendment of the certificate of public convenience and necessity held by Braniff Airways, Inc., for route No. 9 so as to eliminate the restriction which requires that Wichita Falls, Texas, and Lubbock, Texas, shall not be served by the same flight; and

4. Whether Continental Airlines, Inc., Mid-Continent Airlines, Inc., and Braniff Airways, Inc., each are fit, willing and able to conduct properly the air transportation proposed by them and to conform to the provisions of the Act and the requirements of the Board thereunder.

For further details of the issues involved in this proceeding, interested parties are referred to the applications, orders of the Civil Aeronautics Board and the Prehearing Conference Report which are on file with the Docket Section of the Board.

Notice is further given that any person, other than parties of record, desiring to be heard in this proceeding should file with the Board on or before September 4, 1952, a statement setting forth the issues of fact or law upon which he desires to controvert.

Dated at Washington, D. C., July 14, 1952.

By the Civil Aeronautics Board.

[SEAL] FRANCIS W. BROWN,
Chief Examiner.

[Docket No. G-1941]

EAST TENNESSEE NATURAL GAS CO.

ORDER FIXING DATE OF HEARING

JULY 10, 1952.

On April 18, 1952, East Tennessee Natural Gas Company (Applicant), a Tennessee corporation having its principal place of business at Knoxville, Tennessee, filed an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain natural gas transmission facilities, subject to the jurisdiction of the Commission, as described in the application on file with the Commission and open to public inspection.

The Commission finds:

(1) This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, Applicant having requested that its application be heard under the shortened procedure provided by the aforesaid rule for noncontested proceedings, and no request to be heard, protest or petition having been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on May 8, 1952 (17 F. R. 4247).

(2) It is reasonable and good cause exists for fixing the date of hearing in this proceeding less than 15 days after publication of this order in the FEDERAL REGISTER.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on July 22, 1952, at 9:30 a. m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by such application as supplemented: *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceedings pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: July 11, 1952.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G-1971]

SOUTHERN NATURAL GAS CO.

ORDER FIXING DATE OF HEARING

JULY 10, 1952.

On June 4, 1952, Southern Natural Gas Company (Applicant), a Delaware corporation having its principal place of business at Birmingham, Alabama, filed an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain natural gas transmission facilities, subject to the jurisdiction of the Commission, as described in the application on file with the Commission and open to public inspection.

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, Applicant having requested that the application be heard under the shortened procedure provided by the aforesaid rule for noncontested proceedings, and no request to be heard, protest, or petition having been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER of June 17, 1952 (17 F. R. 5441).

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on July 29, 1952 at 9:30 a. m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: July 11, 1952.

By the Commission.

[Docket No. G-1984]

TREASURE STATE PIPE LINE CO.

NOTICE OF APPLICATION

JULY 11, 1952.

Take notice that Treasure State Pipe Line Company (Applicant), a Montana corporation, address, Great Falls, Montana, filed, on June 27, 1952, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction, and operation, of certain natural-gas facilities for the exportation of natural gas from the United States into the Dominion of Canada, as hereinafter described.

Applicant, a wholly-owned subsidiary of Hard Rock Oil Co., proposes to construct, and operate a valve connection and meter at a point on its existing pipeline facilities along the international boundary where said facilities will connect with the distribution facilities of Coutts Gas Company, Limited, and at that point to sell and deliver natural gas produced in the Cut Bank Gas Field of Montana, for resale and distribution in the town of Coutts, Alberta, Canada. Applicant proposes to purchase the natural gas to be exported from its parent, Hard Rock Oil Co.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 C. F. R. 1.8 or 1.10) on or before the 30th day of July 1952. The application is on file with the Commission for public inspection.

[Docket No. G-1985]

OHIO FUEL GAS CO.

NOTICE OF APPLICATION

JULY 11, 1952.

Take notice that The Ohio Fuel Gas Company (Applicant), an Ohio corporation, address, Columbus, Ohio, filed on June 30, 1952, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of facilities required in connection with the expansion of underground storage of natural gas by conversion of six natural gas producing pools to storage use, including a storage compressor station with 6,000 horsepower in gas engine compressor units, approximately 78.2 miles of storage project well and gathering lines ranging in size from 3½-inch to 20-inch pipe, approximately 14.2 miles of 20-inch, 4.6 miles of 8⅝- and 10¾-inch connecting lines, and appurtenant facilities. Applicant also proposes to abandon approximately 75.3 miles of existing well and gathering lines ranging in size from 2⅜-inch to 12¾-inch pipe.

Applicant proposes to convert one natural gas producing pool in Ashland and Richland Counties, in Ohio, to storage use as a part of its existing Weaver Storage Area, to provide an additional 6,000,000 Mcf of storage capacity above existing reserves estimated to be 500,000 Mcf. Applicant also proposes to develop a new storage area in Holmes, Wayne, and Ashland Counties, in Ohio, to be known as its Holmes Storage Area, by conversion of four existing natural gas producing pools having an estimated 4,400,000 Mcf of remaining reserves into storage pools having an estimated 20,500,000 Mcf of storage capacity above existing reserves. Applicant proposes also, to develop a new storage area in Guernsey and Coshocton Counties, in Ohio, to be known as its Guernsey Storage Area, by conversion of one existing natural gas producing pool having an estimated 1,500,000 Mcf of remaining reserves into a storage pool having an estimated 4,600,000 Mcf of storage capacity above existing reserves. Applicant estimates the potential storage capacity of the proposed storage pools will be approximately 31,100,000 Mcf making a total of 143,350,000 Mcf of capacity in all of its storage areas.

The total estimated capital cost of the proposed construction is $4,880,000. Applicant proposes to finance the cost of construction with funds from its parent company, The Columbia Gas System, Inc.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 30th day of July 1952.

The application is on file with the commission for public inspection.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 52-7837; Filed, July 16, 1952; 8:50 a. m.]

[Docket No. G-1987]

CITIES SERVICE GAS CO.

NOTICE OF APPLICATION

JULY 10, 1952.

Take notice that Cities Service Gas Company (Applicant), a Delaware corporation, with its principal place of business in Oklahoma City, Oklahoma, filed on June 30, 1952, pursuant to section 7 (b) of the Natural Gas Act, an application for approval and permission to abandon the following described natural-gas facilities:

Approximately 9.2 miles of 6-inch and 8-inch gas pipeline beginning near the center of Section 15, Township 26 South, Range 5 East, and extending Southwesterly to the southwest quarter (SW¼) of Section 23, Township 27 South, Range 4 East; also, five (5) miles of 3-inch gas pipeline beginning at above 6-inch line in the Northeast Quarter (NE¼) of Section 13, Township 27 South, Range 4 East and extending Easterly and Southerly to the Northeast Quarter (NE¼) of Section 22, Township 27 South, Range 5 East, all in Butler County, Kansas.

The application recites that the 6-inch and 8-inch pipeline was installed in 1906; that the facilities to be reclaimed have been maintained for a number of years between Augusta and El Dorado to provide a gas supply for the oil production operations of City Service Oil Company in the Haverhill Field. City Service Oil Company has advised Applicant it is electrifying its operations in said field, and no longer will need gas.

Protests and petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 30th day of July 1952. The application is on file with the Commission for public inspection.

[F. R. Doc. 52-7829; Filed, July 16, 1952; 8:47 a. m.]

[Docket No. G-1988]

CITIES SERVICE GAS CO.

NOTICE OF APPLICATION

JULY 10, 1952.

Take notice that Cities Service Gas Company (Applicant), a Delaware corporation, with its principal place of business in Oklahoma City, Oklahoma, filed on June 30, 1952, an application for (1) a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of approximately 2,700 feet of 8-inch pipeline from a point on its 26-inch pipeline in Ford County, Kansas, to a point on the 26-inch and/or 24-inch gas pipeline of Natural Gas Pipeline Company of America in Ford County, Kansas, together with a meter, regulator station and appropriate appurtenances at a convenient point on said 8-inch gas pipeline estimated to cost $15,200, and (2) authorization to make a temporary sale of natural gas to Natural Gas Pipeline Company of America through facilities described in (1) above.

The application recites that reduction of well-allowables in the Guymon-Hugoton Field, Texas County, Oklahoma, has reduced deliveries to Natural Gas Pipeline Company of America from a contract quantity of 76,000 Mcf daily to 40,000 Mcf daily, creating a temporary, acute shortage of gas supply for that company.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 30th day of July 1952.

The application is on file with the Commission for public inspection.

[Docket No. G-1993]

SOUTHERN NATURAL GAS CO.

NOTICE OF APPLICATION

JULY 10, 1952.

Take notice that Southern Natural Gas Company (Applicant), a Delaware corporation, address P. O. Box 2563, Birmingham 2, Alabama, filed on July 3, 1952, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain transmission pipe-line facilities hereinafter described.

Applicant proposes to construct and operate a 3,300 horsepower compressor station consisting of three 1,100 horsepower units and appurtenances to be located at a point on Applicant's Logansport supply line in DeSoto Parish, Louisiana. Purpose of the facilities is to permit the taking of gas at the declining wellhead pressures existent in the Logansport Gas Field of Shelby and Panola Counties, Texas and DeSoto Parish, Louisiana, and the delivery of such gas to Applicant's Perryville compressor station in Ouachita Parish, Louisiana.

The estimated cost of the proposed facilities is $1,021,500, and such cost is proposed to be financed from current funds.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 30th day of July 1952. The application is on file with the Commission for public inspection.

[F. R. Doc. 52-7838; Filed, July 16, 1952; 8:50 a. m.]

SECURITIES AND EXCHANGE COMMISSION

PROVIDENCE INSURANCE CO.

ORDER FOR PROCEEDINGS AND NOTICE OF HEARING

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C., on the 11th day of July 1952.

In the matter of Providence Investment Company, Suite 2A, 139 North Virginia Street, Reno, Nevada.

I. The Commission's public official files disclose that Providence Investment Company, a corporation, hereinafter referred to as registrant, is registered as a broker-dealer pursuant to section 15 (b) of the Securities Exchange Act of 1934.

II. The Records Officer of the Commission has filed with the Commission a statement, a copy of which is attached hereto and made a part hereof,[1] stating that registrant did not file with the Commission reports of his financial condition during the calendar years 1950 and 1951, as required by section 17 (a) of the Securities Exchange Act of 1934 and Rule X-17A-5 adopted thereunder.

III. The information reported to the Commission by its Records Officer as set forth in paragraph II hereof tends, if true, to show that registrant violated section 17 (a) of the Securities Exchange Act of 1934 and Rule X-17A-5 adopted under said section.

IV. The Commission, having considered the aforesaid information, deems it necessary and appropriate in the public interest and for the protection of investors that proceedings be instituted to determine:

(a) Whether the statement referred to in paragraph II hereof is true;

(b) Whether registrant has wilfully violated section 17 (a) of the Securities Exchange Act of 1934 and Rule X-17A-5 adopted under said section;

(c) Whether, pursuant to section 15 (b) of the Securities Exchange Act of 1934, it is in the public interest to revoke registration of registrant; and

(d) Whether, pursuant to section 15 (b) of the Securities Exchange Act of 1934, pending final determination, it is necessary or appropriate in the public interest or for the protection of investors to suspend the registration of registrant.

V. *It is ordered*, That registrant be given an opportunity for hearing as set forth in paragraph IV hereof on the 18th day of August 1952 at the main office of the Securities and Exchange Commission, located at 425 Second Street NW., Washington 25, D. C., before a Hearing Examiner to be designated by the Commission. On such date the Hearing Room Clerk in Room 193, North Building, will advise the parties and the Hearing Examiner as to the room in which such hearing will be held. The Commission will consider any motion with respect to a change of place of said hearing if said motion is filed with the secretary of the Commission on or before August 11, 1952. Upon completion of any such hearing in this matter the Hearing Examiner shall prepare a recommended decision pursuant to Rule IX of the Rules of Practice unless such decision is waived.

It is further ordered, That in the event registrant does not appear personally or through a representative at the time and place herein set or as otherwise ordered, the Hearing Room Clerk shall file with the Records Officer of the Commission a written statement to that effect and thereupon the Commission will take the record under advisement for decision.

This order and notice shall be served on registrant personally or by registered mail forthwith, and published in the FEDERAL REGISTER not later than fifteen (15) days prior to August 18, 1952.

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision upon the matter except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of section 4 (c) of the Administrative Procedure Act, it is not deemed to be subject to the provisions of the section delaying the effective date of any final Commission action.

By the Commission.

INVESTMENT BOND AND SHARE CORP. ET AL.

ORDER APPROVING PLAN AND PERMITTING DECLARATION TO BECOME EFFECTIVE

JULY 11, 1952.

In the matter of Investment Bond and Share Corporation and its subsidiaries

and William J. Walsh, Edwin Joseph Smail, John F. Baker, George M. Baker, Catherine E. Baker, Katherine M. Baker, John T. Walsh, William F. Walsh, Janice G. Walsh, Anne W. Smail, Edwin W. Smail, Barbara S. Johnson, Wallace D. Johnson, and Baker, Walsh & Co., respondents, File No. 59–98; and Investment Bond and Share Corporation and its subsidiaries, File No. 54–198.

Investment Bond and Share Corporation ("IBS"), a registered holding company, having filed a plan and amendments thereto pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("act") designed to effect compliance with section 11 (b) of the act;

Jacksonville Gas Corporation ("Jacksonville"), a public utility subsidiary of IBS, having filed a declaration regarding the acquisition from IBS of certain outstanding shares of common stock of Jacksonville and having agreed that the condition hereinafter recited might be imposed by the Commission;

The Commission having instituted a proceeding pursuant to section 11 (b) of the act, among others, with respect to IBS, Baker, Walsh & Co. and William J. Walsh, Edwin Joseph Smail, John F. Baker, George M. Baker, Catherine E. Baker, Katherine M. Baker, John T. Walsh, William F. Walsh, Janice G. Walsh, Anne W. Smail, Edwin W. Smail, Barbara S. Johnson, Wallace D. Johnson; and

Public hearings having been held after appropriate notice, and the Commission having considered the record and having issued its findings and opinion on July 10, 1952, finding said plan, as amended, to be necessary to effectuate the provisions of section 11 (b) of the act and, if modified in certain respects, to be fair and equitable to the persons affected thereby, and having found that the declaration of Jacksonville satisfies the applicable provisions of the act; and

IBS on July 11, 1952, having filed an amendment to said plan containing the modifications suggested by the Commission in its findings and opinion dated July 10, 1952, and

The Commission having considered said amendment and deeming it appropriate and in accordance with the Commission's findings and opinion dated July 10, 1952:

It is ordered, Pursuant to section 11 (e) that said plan, as now amended, be and it hereby is, approved.

It is further ordered, That the declaration of Jacksonville regarding the acquisition of its common stock from IBS be, and the same hereby is, permitted to become effective, forthwith, subject to the following condition:

Except to the extent this condition may subsequently be removed by the Commission, all of Jacksonville's capital surplus and all except $100,000 of Jacksonville's earned surplus as of December 31, 1951 (after giving effect to the repurchase of not more than 4,460 shares of common stock) shall be restricted against payment of any cash dividends or other cash distributions to holders of common stock of Jacksonville for a period of three years from the effective date of the Plan, and thereafter shall be restricted against payment of such dividends or other cash distributions to holders of common stock except after giving the Florida Railroad and Public Utilities Commission at least thirty days notice of intention to make such payment and after obtaining the affirmative vote of holders of not less than two-thirds of the outstanding common stock of Jacksonville.

It is further ordered, That jurisdiction is reserved with respect to all fees and expenses that may have been or may be incurred in connection with this proceeding and that jurisdiction is continued with respect to the proceeding instituted by the Commission pursuant to, among others, section 11 (b) of the act and is reserved for the purpose of entertaining such further proceedings and entering such further orders as may be necessary or appropriate to ensure that the determinations herein made and the action herein ordered are duly accomplished in a manner consistent with the provisions of the act.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-2891]

CONSOLIDATED NATURAL GAS CO. ET AL.

ORDER GRANTING APPLICATION AND PERMITTING DECLARATION TO BECOME EFFECTIVE WITH RESPECT TO ISSUANCE AND SALE OF COMMON STOCK AND PROMISSORY NOTES BY SUBSIDIARIES TO PARENT COMPANY

JULY 11, 1952.

In the matter of Consolidated Natural Gas Company, the East Ohio Gas Company, Hope Natural Gas Company, the Peoples Natural Gas Company, New York State Natural Gas Corporation, the River Gas Company; File No. 70–2891.

Consolidated Natural Gas Company ("Consolidated"), a registered holding company, and its public utility subsidiaries, the East Ohio Gas Company ("East Ohio"), Hope Natural Gas Company ("Hope"), the Peoples Natural Gas Company ("Peoples"), and the River Gas Company ("River"), and its non-utility subsidiary, New York State Natural Gas Corporation ("New York Natural"), having filed a joint application-declaration pursuant to sections 6 (b), 9 (a), 10 and 12 of the Public Utility Holding Company Act of 1935 ("act"), and Rule U-43 promulgated thereunder with respect to the following proposed transactions:

East Ohio proposes to issue and sell to Consolidated 30,000 shares of its $100 par value capital stock for an aggregate consideration of $3,000,000. Such stock is to be issued from time to time within the twelve-month period ending June 30, 1953, as financing is required by East Ohio in the carrying out of its construction program.

Hope proposes to borrow from Consolidated an aggregate amount of $5,000,000 on notes maturing as follows: $500,000 on March 31, 1964, and $500,000 on each March 31 thereafter to and including March 31, 1973.

Peoples proposes to borrow from Consolidated an aggregate amount of $5,000,000 on notes maturing as follows: $500,000 on March 31, 1954, and $500,000 on each March 31 thereafter to and including March 31, 1963.

New York Natural proposes to borrow from Consolidated an aggregate amount of $15,000,000 on notes maturing as follows: $500,000 on March 31, 1957, and $500,000 on each March 31 thereafter to and including March 31, 1963; $1,000,000 on March 31, 1964, and $1,000,000 on each March 31 thereafter to and including March 31, 1973; $500,000 on March 31, 1974; $500,000 on March 31, 1975; and $500,000 on March 31, 1976.

River proposes to borrow from Consolidated an aggregate amount of $100,000 on notes maturing as follows: $10,000 on March 31, 1954, and $10,000 on each March 31 thereafter to and including March 31, 1963.

All of such notes to be issued by the subsidiary companies to Consolidated will bear interest at the rate of 3¼ percent per annum, will be non-negotiable, and will be issued from time to time within the twelve-month period ending June 30, 1953, as financing is required by such subsidiaries in carrying out their construction program.

The Public Utilities Commission of Ohio by Order dated June 10, 1952, approved the proposed issuance and sale of common stock by East Ohio. The Pennsylvania Public Utility Commission by order dated June 30, 1952, approved the proposed issuance and sale of notes by Peoples.

The record not having been completed with respect to the proposed issuance and sale of notes by Hope, and the issuance and sale of notes by River; and

Due notice having been given of the filing of the application-declaration and a hearing not having been requested of or ordered by the Commission, and the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and in the interest of investors and consumers that said application-declaration be granted and permitted to become effective, subject to a reservation of jurisdiction with respect to the proposed issuance and sale of notes by Hope, and the issuance and sale of notes by River:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of said act, that said application-declaration with respect to the issuance and sale by East Ohio of 30,000 shares of its common stock to Consolidated, the issuance and sale of $5,000,000 principal amount of notes by Peoples to Consolidated, and the issuance and sale of $15,000,000 principal amount of notes by New York Natural to Consolidated be, and hereby is, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24 of the general rules and regulations promulgated under the act.

It is further ordered, That jurisdiction be, and it hereby is, reserved over the issuance and sale of $5,000,000 principal amount of notes by Hope to Consolidated, and the issuance and sale of $100,000 principal amount of notes by River to Consolidated until a further order shall have been issued with respect thereto by this Commission.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-2898]

AMERICAN & FOREIGN POWER CO., INC.

NOTICE OF FILING CONCERNING LOAN AGREEMENT

JULY 11, 1952.

Notice is hereby given that American & Foreign Power Company, Inc. ("Foreign Power"), a registered holding company and a subsidiary of Electric Bond and Share Company, also a registered holding company, has filed a declaration pursuant to the Public Utility Holding Company Act of 1935 and has designated sections 6 (a), 7 and 12 (c) thereof and Rule U-42 of the rules and regulations promulgated thereunder as applicable to the proposed transactions which are summarized as follows:

Foreign Power previously entered into a loan agreement with certain banks under which Foreign Power had authority to borrow $15,000,000. Pursuant to that agreement, Foreign Power borrowed the amount of $10,000,000 prior to the year 1952 and on June 30, 1952, exercised its right to borrow the remaining $5,000,000. These loans have been evidenced by promissory notes bearing interest at the rate of 3½ percent per annum, and maturing serially up to 1954. By reason of repayments, there is now outstanding $12,500,000 due by Foreign Power to the banks under that agreement.

Foreign Power proposes to enter into a new agreement with the banks to refund the $12,500,000 principal amount of loans presently outstanding into a new loan, and to have the right to borrow an additional $5,000,000 prior to July 1, 1953. The promissory notes evidencing the principal amount of $12,500,000 will be dated as of June 30, 1952, will bear interest at the rate of 3¾ percent per annum payable quarterly and are to be repaid in ten equal installments payable semi-annually on December 31 and June 30 of each year commencing on December 31, 1952, and ending on June 30, 1957.

Loans made pursuant to the right to borrow the additional $5,000,000 will be evidenced by promissory notes, dated as of the date of such issuance, maturing at the same time as the refunding loan, and bearing interest at the rate which will be ¾ of 1 percent above the prime rate of Bankers Trust Company to commercial borrowers for ninety days maturities in effect at the time of the borrowing, but not less than 3¾ percent nor more than 4 percent per annum. Loans made pursuant to this agreement may be utilized solely for advances by Foreign Power to its subsidiaries for construction purposes or to be used for the purpose of property additions of Foreign Power's subsidiaries. With respect to the unused balance under the loan agreement, a commitment fee of ½ of 1 percent will be payable while the commitment is in effect.

The proposed new agreement would eliminate the present restriction on the payment of dividends by Foreign Power which provides that if Foreign Power pays any dividend on its capital stocks it must apply an amount equal to at least 50 percent of such dividends to prepayment of installments of principal on the loans then outstanding. The new agreement provides that if Foreign Power pays a dividend on its capital stock aggregating in excess of $5,722,168.80 in any one twelve month period ending on June 30, it will apply an amount equal to at least 50 percent of the amount of such excess to prepayments of installments of principal of the promissory notes then outstanding, such prepayments to be in inverse order of their maturities. This provision will terminate when the total amount outstanding under the loan agreement is not in excess of $5,000,000.

The promissory notes in the amount of $12,500,000 are to be secured by $18,750,000 aggregate principal amount of First and Refunding Mortgage Bonds 4¼ percent Dollar Series, due 1980, of Cuban Electric Company, a subsidiary of Foreign Power. Prior to each additional borrowing by Foreign Power, it will deposit as additional security an aggregate principal amount of mortgage bonds of Cuban Electric Company equal to 150 percent of the aggregate principal amount of such additional borrowing. The agreement also contains certain provisions for substitution of this collateral.

Notice is further given that any interested person may, not later than July 25, 1952 at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said declaration which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after July 25, 1952, said declaration, as filed or as amended, may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transaction as provided in Rules U-20 (a) and U-100 thereof. All interested persons are referred to said declaration which is on file in the office of this Commission for a statement of the transactions therein proposed.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-2867]

COLUMBIA GAS SYSTEM, INC. AND MANUFACTURERS LIGHT AND HEAT CO.

ORDER AUTHORIZING ISSUANCE AND SALE OF INSTALLMENT PROMISSORY NOTES BY SUBSIDIARY AND ACQUISITION THEREOF BY PARENT COMPANY AND CAPITAL CONTRIBUTION BY PARENT COMPANY TO SUBSIDIARY

JULY 11, 1952.

The Columbia Gas System, Inc. ("Columbia"), a registered holding company, and The Manufacturers Light and Heat Company ("Manufacturers"), a subsidiary company of Columbia, having filed a joint application-declaration and an amendment thereto with this Commission pursuant to sections 6 (b), 9, 10 and 12 (b) of the Public Utility Holding Company Act of 1935 and Rule U-45 promulgated thereunder, with respect to the following proposed transactions:

Manufacturers proposes to issue and sell and Columbia proposes to acquire $11,000,000 principal amount of 3⅝ Percent Installment Promissory Notes. Manufacturers represents that the proceeds in the amount of $11,000,000 to be derived from Columbia would be used to finance, in part, its construction program estimated to cost $14,840,479. Manufacturers states that such 3⅝ percent notes would be issued at such times and in such amounts as are necessary, not to exceed in the aggregate $11,000,000 principal amount, and that none of such notes would be sold subsequent to March 31, 1953.

Such 3⅝ percent notes to be issued by Manufacturers would be registered and the principal amounts thereof would be payable in twenty-five equal annual installments on February 15 of each of the years 1954 to 1978, inclusive. Interest on the unpaid principal amount of said notes would be payable semi-annually on February 15 and August 15.

In addition, Columbia proposes to make a capital contribution to Manufacturers by forgiving $11,000,000 principal amount of 2¾ percent open account loans owing to Columbia and due June 1, 1952. Columbia would increase its investment in the common stock of Manufacturers by $7,999,800.40 and would charge $199.60 (the amount of the contribution which is applicable to the minority interest) to operating expense. Manufacturers would credit $8,000,000 to its capital surplus.

The Pennsylvania Public Utility Commission having expressly authorized the proposed issuance and sale of the notes by Manufacturers; and

Due notice having been given of the filing of the joint application-declaration and a hearing not having been requested or ordered by the Commission; and the Commisison finding that the applicable provisions of the act and the rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and the interest of investors and consumers that said joint application-declaration, as amended, be granted and permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of said act, that said joint application-declara-

Reference Room

tion, as amended, be, and the same hereby is, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

UNITED STATES TARIFF COMMISSION

TUNA FISH

NOTICE OF HEARING

On July 1, 1952, the United States Tariff Commission announced that it had instituted a general investigation under the provisions of section 332 of the Tariff Act of 1930, as amended, of the domestic tuna industry including the effect of imports of fresh or frozen tuna fish on the livelihood of American fishermen (17 F. R. 6059).

On the 10th day of July 1952 the Tariff Commission ordered that a public hearing be held in connection with this investigation, beginning at 10 a. m. on November 17, 1952, in the Hearing Room, Tariff Commission Building, 8th and E Streets NW., Washington, D. C., at which all interested parties will be given opportunity to appear and to be heard with respect to the subject matter of the investigation.

Request to appear at the hearing. Interested parties desiring to appear and to be heard at the public hearing should notify the Secretary of the Commission in writing at its offices in Washington, D. C. in advance of the date set for the hearing.

I hereby certify that the above hearing was ordered by the United States Tariff Commission on the 10th day of July 1952.

Issued: July 11, 1952.

HARD FIBER CORDS AND TWINES

NOTICE OF INVESTIGATION

The United States Tariff Commission, on the 11th day of July 1952 under the authority of section 7 of the Trade Agreements Extension Act of 1951, approved June 16, 1951, and section 332 of the Tariff Act of 1930, instituted an investigation to determine whether the products described below are, as a result in whole or in part of the duty or other customs treatment reflecting the concession granted on such products under the General Agreement on Tariffs and Trade, being imported into the United States in such increased quantities, either actual or relative, as to cause or threaten serious injury to the domestic industry producing like or directly competitive products.

Tariff Act of 1930:	*Description of products*
Par. 1005 (b)	Cords and twines (whether or not composed of three or more strands, each strand composed of two or more yarns), tarred or untarred, single or plied, wholly or in chief value of manila (abaca), sisal, henequen, or other hard fiber.

Inspection of application. An application for an investigation under section 7 with respect to hard fiber wrapping twine classifiable under paragraph 1005 (b) of the Tariff Act of 1930, as modified, was filed July 7, 1952, in behalf of the Cordage Institute, New York, N. Y., and others. The application is available for public inspection at the office of the Secretary, United States Tariff Commission, 8th and E Streets NW., Washington, D. C., and in the New York office of the Tariff Commission, located in Room 437 of the Customhouse, where it may be read and copied by persons interested.

I certify that the above investigation was instituted by the Tariff Commission on the 11th day of July 1952.

Issued: July 11, 1952.

[SEAL] DONN N. BENT, *Secretary.*

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27209]

COKE REFUSE AND COKE DUST FROM SOUTH CHICAGO, ILL., AND STOCKTON, IND. TO VIRGINIA, MINN.

APPLICATION FOR RELIEF

JULY 14, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. G. Raasch, Agent, for carriers parties to his tariff ICC No. 416.

Commodities involved: Coke refuse and coke dust, carloads.

From: South Chicago, Ill., and Stockton, Ind.

To: Virginia, Minn.

Grounds for relief: Competition with rail carriers, competition with water, or water-rail carriers.

Schedules filed containing proposed rates: R. G. Raasch, Agent, ICC No. 416, supl. 181.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] W. P. BARTEL, *Secretary.*

[F. R. Doc. 52-7858; Filed, July 16, 1952; 8:54 a. m.]

[4th Sec. Application 27210]

CRUDE RUBBER FROM POINTS IN TEXAS AND LOUISIANA TO POINTS IN NEW JERSEY, NEW YORK AND PENNSYLVANIA

APPLICATION FOR RELIEF

JULY 14, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to his tariff ICC Nos. 3967 and 3906.

Commodities involved: Crude rubber, artificial, synthetic or neoprene, carloads.

From: Baytown, Borger, Houston and Port Neches, Tex., Lake Charles and West Lake Charles, La.

To: Points in New Jersey, New York and Pennsylvania.

Grounds for relief: Competition with rail carriers, circuitous routes, to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, ICC No. 3967, supl. 139; F. C. Kratzmeir, Agent, ICC No. 3906, supl. 132.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

VOLUME 17 NUMBER 140

Washington, Friday, July 18, 1952

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter B—Economic Regulations

[Regs. Serial No. ER-172]

PART 298—CLASSIFICATION AND EXEMPTION OF AIR TAXI OPERATORS

SPECIAL ECONOMIC REGULATION; TEMPORARY EXEMPTION OF AIR TAXI OPERATORS FROM LIMITATION ON SCOPE OF SERVICE

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 14th day of July 1952.

By notice of proposed rule-making issued concurrently herewith the Board is circulating for public comment a proposal of the National Air Taxi Conference that § 298.7 (d) of the Economic Regulations be rescinded or modified so as to permit operations by air taxi operators between points between which air transportation service by helicopter is rendered by a holder of a certificate of public convenience and necessity authorizing such service. This proposal was contained in a petition filed with the Board on June 12, 1952, by National Air Taxi Conference, which also alleged that the action of the Board in promulgating Part 298 did not comply with section 4 of the Administrative Procedure Act, to the extent that adequate notice of the prohibition contained in § 298.7 (d) was not given. While the Board is not convinced that the notice was legally insufficient, particularly in view of the fact that the restriction was inserted as a result of comment received, it believes that, in this case where the general purpose of the proposed regulation was to liberalize the rules affecting air taxi operators, it would have been desirable to have called specific attention to the possibility that existing authority might be curtailed.

The Board believes that absolute fairness to all parties requires that, during the pendency of the rule-making proceeding above referred to, air taxi operators be placed in the same position they occupied in this regard prior to the adoption of Part 298 and that they be so placed promptly without the delays occasioned by following the notice and public procedure provisions of the Administrative Procedure Act.

Accordingly, the Board finds that the enforcement of § 298.7 (d), to the extent that it prohibits irregular operations by air taxi operators over the routes by certificated air carriers by helicopter during the pendency of such rule-making proceeding before the Board, (1) would be an undue burden on air taxi operators whose operations would be so restricted because of the limited extent of the operations of such air taxi operators and the unusual circumstances involved in the manner in which the prohibition of § 298.7 (d) was imposed, and (2) is not in the public interest. The Board further finds that for the reasons set forth herein notice and public procedure on the temporary exemption hereinafter set forth are contrary to the public interest. Since such temporary exemption is a rule relieving restriction it may be made effective immediately.

In view of the foregoing, the Board hereby makes and promulgates the following Special Economic Regulation effective immediately.

Notwithstanding the provisions of § 298.7 (d) of the Economic Regulations, Air Taxi Operators may, pending final action by the Board in the above mentioned rule-making proceeding and subject to all other pertinent terms, conditions, and restrictions of Part 298, offer and perform irregular service between points between which scheduled helicopter service is provided by the holder of a certificate of public convenience and necessity authorizing such service. Restrictions on regularity identical to those provided in § 298.7 (b) shall apply to such operations.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply sec. 416, 52 Stat. 1004; 49 U. S. C. 496)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended June 19, 1937.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

REVISED BOOKS

TITLE 32 of the Code of Federal Regulations

Title 32, containing the regulations of the Department of Defense and other related agencies, has been completely revised. Originally a single book, Title 32 is being reissued as two books as follows:

Parts 1–699 ($5.00)
Part 700 to end (to be announced)

These books contain the full text of regulations in effect on December 31, 1951

Order from
Superintendent of Documents, Government Printing Office, Washington 25, D. C.

TITLE 17—COMMODITY AND SECURITIES EXCHANGES

Chapter II—Securities and Exchange Commission

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

EXEMPTION OF CERTAIN TRANSACTIONS FROM SECTION 16 (b)

Due to a clerical error the percentage figure in § 240.16b–7 (Rule X-16B–7) appeared as "95" instead of as "85." The figure "85" should be substituted wherever the figure "95" appears.

The foregoing action shall be effective June 9, 1952.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

JULY 8, 1952.

[F. R. Doc. 52–7885; Filed, July 17, 1952; 8:46 a. m.]

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Federal Security Agency

PART 141—TESTS AND METHODS OF ASSAY FOR ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

PART 146—CERTIFICATION OF BATCHES OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

MISCELLANEOUS AMENDMENTS

By virtue of the authority vested in the Federal Security Administrator by the provisions of section 507 of the Federal Food, Drug, and Cosmetic Act (52 Stat. 1040, 1055, as amended by 59 Stat. 463, 61 Stat. 11, 63 Stat. 409; 21 U. S. C. 357), the regulations for tests and methods of assay for antibiotic and antibiotic-containing drugs (21 CFR, 1951 Supp., 141) and certification of batches of antibiotic and antibiotic-containing drugs (21 CFR, 1951 Supp., 146; 17 F. R. 2600) are amended as indicated below:

1a. In § 141.1 *Sodium penicillin • • •; potency*, paragraph (c) *Working standard*, third sentence, change the words "use for 1 day only" to "use for 2 days only."

b. Section 141.1, paragraph (e) *Preparation of plates*, fourth sentence is changed to read: "The test organism is M. pyogenes var. aureus (P. C. I. 209–P or American Type Culture Collection 6538P)."

2. Section 141.35 (a) (2) is amended to read:

§ 141.35 *Penicillin-streptomycin ointment • • •* (a) *Potency • • •*

(2) *Streptomycin content.* Proceed as directed in § 141.101, except paragraph (k) of that section, and in lieu of the directions in § 141.101 (e) prepare the sample as follows: To assay by the cup-plate method, accurately weigh the container and contents and place 0.5 to 1.0 gram into a separatory funnel containing approximately 50 milliliters of peroxide-free ether. Reweigh the container to obtain the weight of the ointment used in the test. Shake ointment and ether until homogenous. Shake with a 20-milliliter portion of buffer solution at *p*H 8.0. Remove the buffer layer and repeat the extraction with three 20-milliliter quantities of buffer. Combine the extracts and make up to 100 milliliters with buffer. To a 5.0-milliliter aliquot add sufficient penicillinase and let stand for ½ hour at 37° C. to inactivate penicillin. After inactivation make the proper estimated dilutions in buffer at *p*H 8.0. To assay by the turbidimetric method, accurately weigh 1.0–2.0 grams of the sample into a separatory funnel containing approximately 50 milliliters of peroxide-free ether. Shake ointment and ether until homogeneous. Shake with a 20-milliliter portion of distilled water. Remove the aqueous layer and repeat the extraction with three 20-milliliter quantities of distilled water. Combine the extracts and make to an appropriate measured volume. Remove an aliquot, and if the ratio of the content of penicillin to the content of streptomycin is equal to or greater than one unit for each microgram add sufficient penicillinase to completely inactivate the penicillin used in the test. Dilute an aliquot to 30.0 micrograms per milliliter with distilled water and place 1-milliliter amounts of this in tubes for assay. Its content of streptomycin is satisfactory if it contains not less than 85 percent of the number of milligrams per gram of ointment that it is represented to contain.

3. Section 141.36 (a) (2) and (3) are amended to read:

§ 141.36 *Penicillin-streptomycin bougies • • •* (a) *Potency • • •*

(2) *Streptomycin content.* Using 12 bougies, proceed as directed in § 141.101 except paragraph (k) of that section, and in addition to the directions for the preparation of the sample in § 141.101 (e), if the cup-plate method is used, add sufficient penicillinase to the solution under test to completely inactivate the penicillin present. If the turbidimetric method is used, inactivation with penicillinase is not necessary unless the ratio of the content of penicillin to the content of streptomycin is equal to or greater than 1.0 unit for each microgram. Its content of streptomycin is satisfactory if it contains not less than 85 percent of the number of milligrams that it is represented to contain.

(3) *Dihydrostreptomycin content.* Proceed as directed in subparagraph (2) of this paragraph, using the dihydrostreptomycin working standard as a standard of comparison. Its content of dihydrostreptomycin is satisfactory if it contains not less than 85 percent of the number of milligrams it is represented to contain.

4. Section 141.39 (c) is amended to read:

§ 141.39 *Penicillin and streptomycin • • •*

(c) *Toxicity.* Proceed as directed in § 141.4, using as a test dose 0.5 milliliter of a solution of the sample containing 1.0 milligram of streptomycin or dihydrostreptomycin per milliliter.

5. Section 141.46 (c) is amended to read:

§ 141.46 *Procaine penicillin in streptomycin sulfate solution • • •*

(c) *Toxicity.* Proceed as directed in § 141.4, using as a test dose 0.5 milliliter of a solution of the sample containing 1.0 milligram of streptomycin or dihydrostreptomycin per milliliter.

6. Section 141.101 *Streptomycin sulfate* • • • is amended as follows:

a. In paragraph (d) *Standard curve,* the first two sentences are changed to read: "Prepare daily in 0.10 M potassium phosphate buffer (pH 7.8 to 8.0) from the stock solution described in § 141.101 (c) concentrations of 0.6, 0.7, 0.8, 0.9, 1.0, 1.1, 1.2, 1.3, 1.4, and 1.5 micrograms per milliliter solutions."

b. In paragraph (f) *Preparation of spore suspension,* change the figures "32° C.–35° C." to read "37° C.".

c. In paragraph (g) *Preparation of plates,* delete the last sentence.

d. In paragraph (h) *Plate assay,* last sentence, change the figures "32° C.–35° C." to read "37° C.".

e. In paragraph (j) *Turbidimetric assay,* subparagraphs (1), (2), and (3) are amended to read as follows:

(1) Employ the agar described in paragraph (b) of this section (adjusted to a final *p*H 7.0) for maintaining the test organism, which is Klebsiella pneumoniae (P. C. I. 602) noncapsulated. Transfer stock cultures every 2 weeks for test purposes. Transfer the organism to fresh agar slants and incubate overnight at 37° C. Suspend the growth from two or three of these slants in sterile distilled water and add approximately 5 milliliters of culture suspension to each of two Roux bottles containing the agar described in paragraph (b) of this section. Incubate the bottles overnight at 37° C., harvest the growth, and suspend in sufficient sterile distilled water to give a light transmission reading of 65 percent, using a filter at 6,500 Angstrom units in a photoelectric colorimeter. Keep the resulting suspension of organisms in the refrigerator and use for a period not to exceed 2 weeks. Prepare a daily inoculum by adding 6.0 milliliters of this suspension to each 100 milliliters of the nutrient broth prepared as directed in § 141.1 (b) (3), cooled to a temperature of approximately 15° C.

(2) *Working standard solutions.* Add the amounts tabulated below of a 1,000 micrograms per milliliter solution prepared from the stock solution described in paragraph (c) of this section to 100-milliliter volumetric flasks containing sterile distilled water and bring to volume to give the working stock solutions tabulated below. These 9 flasks are well stoppered and maintained at approximately 15° C. for 1 month. Prepare the final dilutions daily by adding 4.2 milliliters of each of these 9 working stock solutions to 9.6 milliliters of sterile distilled water. Add 1.0 milliliter of each final dilution to each of six 14 x 124 millimeter tubes (total 54 tubes). Add 9.0 milliliters of inoculated broth described in subparagraph (1) of this paragraph to each tube and place immediately in a 37° C. water bath for 4 hours. The final concentration of streptomycin per milliliter of broth is also included in the table below.

Amount of standard solution (1,000 micrograms/ml.)	Working concentration/ml. (also percent concentration)	Final concentration (micrograms/ml.) after addition of distilled water and broth
Ml.	*Micrograms*	*Micrograms*
6.0	60	1.5
7.0	70	2.1
8.0	80	2.4
9.0	90	2.7
10.0	100	3.0
11.0	110	3.3
12.0	120	3.6
13.0	130	3.9
14.0	140	4.2

(3) *Preparation of sample.* Dilute the sample under test with sterile distilled water to contain 100 micrograms per milliliter (estimated). To 4.2 milliliters of the sample add 9.6 milliliters sterile distilled water. Add 1.0 milliliter of this dilution to each of six 14 x 124 millimeter tubes. Add 9.0 milliliters of the inoculated broth described in subparagraph (1) of this paragraph to each tube and place immediately in a 37° C. water bath for 4 hours. A control tube containing 1.0 milliliter of distilled water and 9.0 milliliters of the inoculated broth is similarly incubated. After incubation, add 4 drops of formalin to each tube and read the light transmission in a photoelectric colorimeter, using a broad band filter having a wave length of 5,300 Angstrom units.

7. In § 141.201 *Aureomycin hydrochloride,* subparagraph (8) of paragraph (a) *Potency* is amended as follows:

a. In subparagraph (8) (i), third sentence, change the figures "32° C. –35° C." to read "37° C.".

b. In subparagraph (8) (ii) change the third, fourth, and fifth sentences to read: "To prepare solutions for the standard curve, make further dilutions of the stock solution to contain 0.1 microgram per milliliter in phosphate buffer solution. To a triplicate series of 18 x 105 millimeter tubes add 0.1, 0.2, 0.3, 0.4, 0.5, 0.6, 0.7, 0.8, 0.9, and 1.0 milliliter, respectively, of the 0.1 microgram per milliliter solution. Adjust volumes of all tubes to 1.0 milliliter with the buffer solution."

c. In subparagraph (8) (ii), eighth sentence, change the figures "32° C. –35° C." to read "37° C.".

d. In subparagraph (8) (iii), fourth sentence, change the figures "32° C.–35° C." to read "37° C.".

8. Section 141.401 (a) (1) is amended to read:

§ 141.401 *Bacitracin*—(a) *Potency*—(1) *Plate assay.* Using the standard curve technique, proceed as directed in § 141.1 (h), with the following exceptions:

(i) Use the bacitracin working standard and dissolve in 1-percent phosphate buffer to make an appropriate stock solution. The stock solution when refrigerated may be used for 2 weeks. The stock solution may also be preserved for at least 2 months by freezing in small aliquots. Each aliquot should be sufficient for 1 day's use only. Make all dilutions of the stock solution for the assay with 1-percent phosphate buffer.

(ii) Dissolve the sample to be tested in 1-percent phosphate buffer and make dilutions with the same solvent to one unit per milliliter (estimated).

(iii) The test organism is Micrococcus flavus, which is maintained at refrigerator temperature on slants of nutrient agar prepared as directed in § 141.1 (b) (1). Inoculate a Roux bottle containing this agar from a stock slant of the organism and incubate 18 hours at 32° C.–35° C. Wash off the growth in 25 milliliters of sterile physiological saline solution. If an aliquot of this bulk suspension, when diluted 1:50 in physiological saline solution, gives 75 percent light transmission in a suitable photoelectric colorimeter equipped with a filter having a wave length of 6,500 Angstrom units, the bulk suspension is satisfactory for use. It may be necessary to adjust the bulk suspension by dilution so that an aliquot of the adjusted suspension diluted 1:50 gives 75 percent light transmission. (The adjusted bulk suspension only, and not the 1:50 dilution of it, is used in preparing the seed layer.) Add 0.3 to 0.5 milliliter of the adjusted bulk suspension to 100 milliliters of agar which has been melted and cooled to 48° C.

9. In § 141.410 *Bacitracin - neomycin tablets,* paragraph (b) *Neomycin used in making the tablets,* the first sentence of subparagraph (1) (v) is changed to read: "The test organism is M. pyogenes var. aureus (P. C. I. 209–P or American Type Culture Collection 6538P) which is maintained on agar described in § 141.1 (b) (1)."

10. In § 146.402 *Bacitracin ointment,* subparagraph (1) (iv) of paragraph (c) *Labeling,* change the figure "18" to read "24".

11. In § 146.409 *Bacitracin-polymyxin ointment,* paragraph (a) (4) is amended by changing the period at the end of the subparagraph to a comma and adding the clause: "except that if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for 18 months at room temperature such drug as prepared by him complies with the standards of identity, strength, quality, and purity prescribed for the drug, the blank shall be filled in with the date which is 18 months after the month during which the batch was certified."

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Interpret or apply sec. 507, 59 Stat. 463, as amended; 21 U. S. C. and Sup. 357)

This order, which provides for minor revisions in the tests and methods of assay for penicillin, penicillin-streptomycin ointment, penicillin-streptomycin bougies, and streptomycin, aureomycin, bacitracin, and bacitracin-neomycin tablets; for a change in the toxicity test for penicillin and streptomycin and procaine penicillin in streptomycin sulfate solution; for a change in the expiration date for bacitracin ointment from 18 to 24 months; and for a change in the expiration date for bacitracin-polymyxin ointment from 12 to 18 months if the person who requests certification has proved that this drug as prepared by him is stable for such period of time, shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the changes set forth above.

Dated: July 14, 1952.

[SEAL] JOHN L. THURSTON,
Acting Administrator.

[F. R. Doc. 52-7917; Filed, July 17, 1952; 8:54 a. m.]

TITLE 27—INTOXICATING LIQUORS

Chapter I—Bureau of Internal Revenue, Department of the Treasury

[Regs. 6]

PART 6—INDUCEMENTS FURNISHED TO RETAILERS

PREAMBLE. 1. These regulations, "Regulations No. 6—Inducements Furnished to Retailers" (27 CFR Part 6) are a republication of Regulations No. 6, 1936 edition (27 CFR Part 6).

2. These regulations consist only of previously approved material but the text has been rearranged and renumbered to conform to the Federal Register regulations (13 F. R. 5929).

3. These regulations shall, on and after July 1, 1952, supersede Regulations No. 6, 1936 edition (27 CFR Part 6).

4. These regulations shall not affect or limit any act done or any liability incurred under any regulations superseded hereby, or any suit, action, or proceeding had or commenced in any civil, administrative, or criminal cause and proceeding prior to the effective date of these regulations, nor shall these regulations release, acquit, affect, or limit any offense committed in violation of previously existing regulations, or any penalty, liability or forfeiture incurred prior to such date.

5. It is found that compliance with the notice and public rule-making procedure and effective date limitations of the Administrative Procedure Act (5 U. S. C. 1001, et seq.), and the notice and public hearing requirements of the Federal Alcohol Administration Act (27 U. S. C. 201, et seq.) is unnecessary in connection with the issuance of the regulations in this part for the reason that the changes made are of a technical and clarifying nature and do not adversely affect the legitimate industry.

SUBPART A—SCOPE OF REGULATIONS

Sec.
6.1 Inducements furnished to retailers.

SUBPART B—DEFINITIONS

6.5 Meaning of terms.
6.6 Retailer.
6.7 Retail establishment.
6.8 Industry member.

6.26 Advertising service.
6.27 Consumer advertising specialties.
6.28 Retailer advertising specialties.
6.29 Samples.
6.30 Newspaper cuts.
6.31 Merchandise.

AUTHORITY: §§ 6.1 to 6.31 issued under 53 Stat. 375; 26 U. S. C. 3176. Interpret or apply sec. 5, 49 Stat. 981 as amended; 27 U. S. C. 205.

SUBPART A—SCOPE OF REGULATIONS

§ 6.1 *Inducements furnished to retailers.* The regulations in this part, issued pursuant to section 5 of the Federal Alcohol Administration Act (27 U. S. C. 205), contain the substantive requirements relative to the furnishing of inducements to retailers of distilled spirits, wine and malt beverages. No procedural requirements are prescribed.

SUBPART B—DEFINITIONS

§ 6.5 *Meaning of terms.* As used in this part, unless the context otherwise requires, terms shall have the meanings ascribed in this subpart.

§ 6.6 *Retailer.* "Retailer" shall mean any person engaged in the sale of distilled spirits, wine or malt beverages to consumers.

§ 6.7 *Retail establishment.* "Retail establishment" shall mean any premises where distilled spirits, wine or malt beverages are sold or offered for sale to consumers, whether for consumption on or off the premises where sold.

§ 6.8 *Industry member.* "Industry member" shall mean any person engaged in business as a distiller, brewer, rectifier, blender, or other producer, or as an importer or wholesaler, of distilled spirits, wine or malt beverages, or as a bottler, or warehouseman and bottler, of distilled spirits, but shall not include an agency of a State or political subdivision thereof, or an officer or employee of such agency.

§ 6.9 *Product.* "Product" shall mean distilled spirits, wine or malt beverages, as defined in the Federal Alcohol Administration Act.

§ 6.10 *Other terms.* Any other term defined in the Federal Alcohol Administration Act and used in this part shall have the meaning assigned to it by such act.

SUBPART C—UNLAWFUL INDUCEMENTS AND EXCEPTIONS

UNLAWFUL INDUCEMENTS

§ 6.20 *Application.* Except as provided in this part, it is unlawful for any industry member to induce, by furnishing, giving, renting, lending, or selling any equipment, fixtures, signs, supplies, money, services, or other thing of value, directly or indirectly or through an affiliate, any retailer to purchase any products from such industry member to the exclusion in whole or in part of such products sold or offered for sale by other industry members in interstate or foreign commerce, if such inducement is made in the course of interstate or foreign commerce or if such industry member engages in the practice of using such means to such an extent as substantially to restrain or prevent transactions in interstate or foreign commerce in any such products, or if the direct effect of such inducement is to prevent, deter, hinder, or restrict other industry members from selling or offering for sale any such products to such retailer in interstate or foreign commerce: *Provided,* That in the case of malt beverages, this part shall apply to transactions between a retailer in any State and a brewer, importer, or wholesaler of malt beverages outside such State only to the extent that the law of such State imposes requirements similar to the requirements of section 5 (b) of the Federal Alcohol Administration Act (27 U. S. C. 205 (b)), with respect to similar transactions between a retailer in such State and a brewer, importer, or wholesaler of malt beverages in such State, as the case may be: *Provided further,* That this part shall not operate to exempt any person from the requirements of any State law or regulation.

EXCEPTIONS

§ 6.21 *General.* An industry member may furnish to a retailer, under the conditions and within the limitations prescribed, the equipment, signs, supplies, services, or other things of value specified in §§ 6.22–6.31: *Provided,* That such furnishing is not conditioned directly or indirectly on the purchase of distilled spirits, wine, or malt beverages.

§ 6.22 *Equipment.* Tapping accessories, such as rods, vents, taps, hoses, washers, couplings, vent tongues, and check valves may be sold to a retailer and installed in his establishment if such tapping accessories are sold at a price not less than the cost thereof to the industry member selling the same, and if the price thereof is collected within 30 days of the date of sale.

§ 6.23 *Signs.* Signs, posters, placards, designs, devices, decorations or graphic displays, bearing advertising matter and for use inside a retail establishment, may be furnished, given, rented, loaned, or sold to a retailer if they have no value to the retailer except as advertisements and if the total value of all such materials furnished by any industry member and in use at any one time in any retail establishment does not exceed $10: *Provided,* That the industry member shall not directly or indirectly pay or credit the retailer for displaying such materials or for any expense incidental to their operation. The value of such materials shall include all expenses incurred directly or indirectly by any industry member in connection with the purchase, manufacture, transportation,

assembly, and installation of such materials and of accessories thereto.

§ 6.24 *Supplies.* Carbonic acid gas or ice may be sold to a retailer, if sold in accordance with the reasonable open market price thereof in the locality where sold, and if the price thereof is collected within 30 days of the date of sale.

§ 6.25 *Coil cleaning service.* Coil cleaning service may be furnished, given, or sold to a retailer of malt beverages.

§ 6.26 *Advertising service.* The names and addresses of retailers selling the products of any industry member may be listed in an advertisement of such industry member, if such listing is the only reference to any retailer in the advertisement and is relatively inconspicuous in relation to the advertisement as a whole.

§ 6.27 *Consumer advertising specialties.* Consumer advertising specialties, such as ash trays, bottle or can openers, corkscrews, paper shopping bags, matches, printed recipes, wine lists, leaflets, blotters, post cards, and pencils, which bear advertising matter, may be furnished, given, or sold to a retailer for unconditional distribution by him to the general public, if the retailer is not paid or credited in any manner directly or indirectly for such distribution service.

§ 6.28 *Retailer advertising specialties.* Retailer advertising specialties, such as trays, coasters, beer mats, menu cards, meal checks, paper napkins, foam scrapers, back bar mats, tap markers, thermometers, clocks, and calendars, which bear advertising matter, and which are primarily valuable to the retailer as point of sale advertising media, may be furnished, given, or sold to a retailer if the aggregate cost to any industry member of such retailer advertising specialties furnished, given, or sold in connection with any one retail establishment in any one calendar year does not exceed $10.

§ 6.29 *Samples.* Not more than 2 gallons of any brand of malt beverages, and not more than 1 pint of any brand of distilled spirits or wine, may be furnished or given as a sample to a retailer who has not previously purchased that particular product: *Provided*, That 2 quarts of any brand of distilled spirits or wine, may be furnished or given as a sample to any agency of a State or political subdivision thereof which has not purchased that particular product.

§ 6.30 *Newspaper cuts.* Newspaper cuts, mats, or engraved blocks for use in retailers' advertisements, may be furnished, given, rented, loaned, or sold by an industry member to a retailer selling his products.

§ 6.31 *Merchandise.* Merchandise, such as groceries and drugs, may be sold to a retailer, without limit as to quantity or value, by an industry member who is also engaged in business as a bona fide vendor of such merchandise, if such merchandise is sold in accordance with the reasonable open market price thereof in the locality where sold, and if such merchandise is not sold in combination with distilled spirits, wine, or malt beverages and is itemized separately on the industry member's invoices and other records: *Provided*, That equipment, fixtures, signs, supplies, and consumer and retailer advertising specialties may be furnished only as provided elsewhere in this part.

6. These regulations shall be effective as of July 1, 1952.

[SEAL] DWIGHT E. AVIS,
Deputy Commissioner of Internal Revenue.

Approved: June 26, 1952.

JOHN B. DUNLAP,
Commissioner of Internal Revenue.

E. H. FOLEY,
Acting Secretary of the Treasury.

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter B—Claims and Accounts

PART 536—CLAIMS AGAINST THE UNITED STATES

PAYMENT FOR ARREST AND DELIVERY OF MEMBERS ABSENT WITHOUT LEAVE, DESERTERS, AND ESCAPED MILITARY PRISONERS

Section 536.32 is rescinded and the following substituted therefor:

§ 536.32 *Payment for arrest and delivery of service members absent without leave, deserters, and escaped military prisoners—*(a) *Services or expenses for which payment will be made.* Agencies or persons who return absentees and deserters to military control, when authorized by the appropriate military authority, will be reimbursed reasonable expenses incurred incident to the return of the absentee or deserter not to exceed $50. Reasonable expenses will include reimbursement:

(1) For travel performed by privately owned conveyance at a rate not to exceed 7 cents a mile from place of apprehension or civil police headquarters to place of return to military control and return to place of apprehension or civil police headquarters.

(2) Of actual and necessary expenses including taxicab fare or bus fare when necessary for travel performed by citizen or officer and prisoner.

(3) For cost of all necessary meals consumed by the prisoner, not to exceed the normal rate for meals for the area concerned, upon presentation of proof that the cost was actually incurred by the delivering or apprehending officer.

(4) For telephone and telegraph communication costs in connection with the apprehension and delivery of the prisoner to military authority.

(5) For damages to the apprehending officer's property whenever such damages are caused directly by the absentee and result from the apprehension.

(6) For any other reasonable expenses incurred in the actual delivery of the prisoner as may be deemed justifiable and reimbursable by the certifying officer.

(b) *Official vehicles and personal services.* Reimbursement will not be made for transportation performed by official vehicles or for personal services of delivering officer.

(c) *Cost of confinement of military prisoners in nonmilitary facilities.* Civil agencies which confine military prisoners, when authorized by the appropriate military authority, may be reimbursed for cost of all necessary meals consumed by the prisoner while in confinement, not to exceed the normal rate for meals for the area concerned upon presentation of proof that the cost was actually incurred by the civil agency.

(d) *Payment procedure—*(1) *To whom paid.* (i) Payments mentioned in paragraphs (a) and (b) of this section will be made to the person or persons actually making the arrest of an absentee, a deserter, or an escaped military prisoner and the turn-over or delivery of the service member arrested. If two or more persons join in performing these services payment may be made to them jointly. Payment will be made whether the absentee, deserter, or escaped military prisoner surrenders or is apprehended. Payment will not be made merely for information leading to an arrest, or for an arrest not followed by the return to military control of the service member arrested.

(ii) Payments mentioned in paragraph (c) of this section will be made to the civil agency having jurisdiction over the nomilitary facility in which the military prisoner is confined.

(2) *By whom paid.* (i) Payments mentioned in paragraph (a) and (b) of this section will be made by finance officers or their class B agent officers, and will be in full satisfaction of all expenses of arresting and delivering the absentee, deserter, or escaped military prisoner.

(ii) Payments mentioned in paragraph (c) of this section will be made by finance officers or their class B agent officers, and will be in full satisfaction of the expense incurred for the cost of meals consumed by the prisoner while he is confined in a nonmilitary facility.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[General Ceiling Price Regulation, Supplementary Regulation 63, Amdt. 2 to Area Milk Price Regulation 11]

GCPR, SR 63—AREA MILK PRICE ADJUSTMENTS

AMPR 11—LOS ANGELES DISTRICT (OTHER THAN LOS ANGELES COUNTY MARKETING AREA)

ADDITION OF APPENDIX COVERING INYO-MONO MARKETING AREA

Pursuant to the Defense Production Act of 1950, as amended (Pub. Law 774, 81st Cong., Pub. Law 96, 82d Cong.), Executive Order 10161 (15 F. R. 6105) and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Amendment 2 to Area Milk Price Regulation 11 pursuant to Supplementary Regulation 63 to the General Ceiling Price Regulation (16 F. R. 9559) is hereby issued.

STATEMENT OF CONSIDERATIONS

This Amendment 2 to Area Milk Price Regulation 11 is issued to establish and adjust ceiling prices for sales of fluid milk and certain milk products in the Inyo-Mono Marketing Area, which consists of Inyo and Mono counties in the State of California. The amendment extends the coverage of AMPR 11 to these counties and adds Appendix III to provide ceiling prices for sales of fluid milk and other milk products.

Although Mono County falls within the Reno OPS District, Inyo County, which comprises the major part of the marketing area, lies within the Los Angeles OPS District. Section 17 of GCPR, SR 63 provides that the District Director of the Office of Price Stabilization in whose district is located the major part of a milk marketing area will have authority to issue area milk price regulations adjusting ceiling prices for milk in such marketing area. It is appropriate, therefore, that the prices of milk in the Inyo-Mono Marketing Area be adjusted by an order of the Los Angeles District Director.

Prior to this amendment, ceiling prices for fluid milk sold in the Inyo-Mono area were governed by the provisions of the GCPR and therefore frozen at the levels of December 19, 1950 to January 25, 1951, plus increases based upon increased prices paid to producers.

On February 1, 1952, the State of California Bureau of Milk Control issued Inyo-Mono Order No. 10, which adjusted minimum prices, as well as margins, on fluid milk in the area above the levels of the GCPR. These adjusted minimum prices and margins were inoperative until the issuance of this amendment to AMPR 11 which permits sellers in the area to charge prices corresponding to the state minimum prices.

The adjustment granted by this amendment is in accordance with provisions of section 402 of the Defense Production Act of 1950, as amended. This section provides that ceiling prices for sales of fluid milk shall not be less than the minimum prices established by a state regulatory body.

Studies and information available to the District Director indicate the advisability of effecting at this time increases in the ceiling prices of fluid milk by-products. This amendment, therefore, also accomplishes increases in the ceiling prices of these fluid milk items.

In the formulation of this amendment, the District Director of the Office of Price Stabilization has consulted with local industry representatives to the extent practicable, and has given consideration to their recommendations. In his judgment the provisions of this amendment are generally fair and equitable and are necessary to effectuate the purpose of Title IV of the Defense Production Act of 1950, as amended by the Defense Production Act Amendments of 1951.

The District Director of the Office of Price Stabilization gave due consideration to the national effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950, as amended, to prices prevailing during the period from May 24, 1950 to June 24, 1950, inclusive; and to all relevant factors of general applicability.

AMENDATORY PROVISIONS

Area Milk Price Regulation 11 is amended by adding thereto Appendix III—Inyo-Mono Marketing Area, which appears hereafter.

APPENDIX III

INYO-MONO MARKETING AREA

This appendix provides ceiling prices for milk and cream (excluding sour cream) in the Inyo-Mono Marketing Area, which comprises Inyo and Mono Counties, California.

1. For standard milk (including homogenized) ceiling prices are as follows.

Size of container	Wholesale f. o. b. purchaser's business location	Retail, store, carry-out	Retail, home-delivered
10 gallons or more bulk, per gallon	$0.73		
1 gallons and less than 10 gallons, bulk, per gallon	.74		
1 gallon and less than 5 gallons, bulk, per gallon	.75		
Gallon bottle	.79	$0.88	$0.92
Half-gallon container (fiber or glass)	.395	.44	.46
Quart container (fiber or glass)	.1975	.22	.23
Pint container (fiber or glass)	.11	.12	.13
Third-quart or ½-pint container (fiber or glass)	.074		
Half-pint container (fiber or glass)	.06		

2. For the following items the ceiling price is the base period price plus the following additions.

Type of sale	Container size				
	Per gallon bulk or package	½ gallon	Quart	Pint	½ pint
Half and half	$0.06	$0.03	$0.015	$0.01	$0.005
Table cream	.08	.04	.02	.01	.005
All-purpose cream	.16	.08	.04	.02	.01
Whipping cream	.16	.08	.04	.02	.01
Other retail sales of standard milk (including homogenized)	.08	.04	.02		

The "other retail sales" referred to above are retail sales f. o. b. distributor's processing plant or producer's ranch.

3. For standard milk (including homogenized) sold in remote areas where the retail store carry-out base period price was in excess of 20 cents per quart or the retail home-delivered base period price was in excess of 21 cents per quart, the ceiling price for all kinds of sales shall be the applicable price provided in subdivision 1, above, plus an amount proportionate (according to container size) to either of such excesses.

For other kinds of fluid milk (such as buttermilk, chocolate drink, non-fat milk, and special grades of milk) the ceiling price shall be the ceiling price as hereinbefore provided for standard milk in the same sized container plus or minus, as the case may be, the dollars-and-cents difference between the seller's base period prices for such kind of milk and standard milk. Ceiling prices so determined under this subdivision shall be reported in accordance with section 3 of this regulation.

4. The prices herein provided are based upon a producer paying price of $1.63 per pound of butterfat for Class I fluid milk purchased f. o. b. processor's plant. This price is set forth in Inyo-Mono Order No. 9 issued by the State of California Bureau of Milk Control, effective February 1, 1952.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

This amendment is effective as of July 10, 1952.

GEORGE J. SEROS,
District Director, Los Angeles District Office.

JULY 16, 1952.

[F. R. Doc. 52-7947; Filed, July 16, 1952; 4:40 p. m.]

[General Overriding Regulation 32]

GOR 32—ADJUSTMENT OF CEILING PRICES FOR MATERIALS TO THE MINIMUM PRICES FIXED BY STATE LAWS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this General Overriding Regulation 32 is hereby issued.

STATEMENT OF CONSIDERATIONS

This regulation establishes a method, pursuant to section 402 (1) of the act, as amended, for the adjustment of ceiling prices for materials to the minimum sales price fixed by an applicable State minimum price law (other than a fair trade law) or regulation.

In certain of the States, laws have been enacted establishing or authorizing the establishment of minimum prices for sales or deliveries within the State of certain materials. In a few cases the minimum prices established by these laws are higher than the ceiling price established by the appropriate regulations or orders of the Director of Price Stabilization. The Congress has provided in its recent amendments to the act that, "No rule, regulation, order, or amendment thereto issued under this title shall fix a ceiling on the price paid or received on the sale or delivery of any material in any State below the minimum sales price of such material fixed by the State law (other than any so-called 'fair trade law') now in effect or regulation issued pursuant to such law." In explanation of this provision the Senate Committee on Banking and Currency stated, "This new subsection, therefore, provides that ceiling prices for materials sold or delivered in any State shall not be below the minimum prices of such materials as fixed by that State's minimum price law which is now in effect. General so-called fair trade laws have been excepted from this amendment. Under this new provision the President shall adjust ceiling prices in a given State to make them not less than the level of prices established by such

State's minimum price laws where it is shown that the ceilings are less than the minimum price level."

The Conference Report stated, with respect to this provision, that "It was the intent of the conferees that this provision apply only to State minimum price laws which are presently enforced and in effect, and not to State minimum price laws which are not now enforced or which are dormant". Accordingly, this adjustment only applies where the State law was enforced and in effect on June 30, 1952. This regulation, therefore, requires certification from an appropriate State official as to whether the State law, on which reliance is placed for adjustment of ceiling prices, was enforced and in effect on June 30, 1952.

This general overriding regulation permits the filing of applications for adjustment by individual sellers of materials subject to a minimum price under a State minimum price law or regulation. Because of the interest which a State may have in the maintenance of a minimum level of prices for certain materials sold or delivered in the State, it is further provided that an application for the adjustment of the ceiling prices of certain materials, to which a State minimum price law or regulation is applicable may be filed by a State official responsible for its enforcement, or administration.

In the formulation of this regulation, special circumstances have rendered consultation within industry representatives, including trade association representatives, impracticable.

REGULATORY PROVISIONS

Sec.
1. What this regulation does.
2. Who may apply.
3. Where to apply; form of application.
4. What the application shall contain.
5. Action on application.
6. When adjustment may be put into effect.
7. Definitions.

AUTHORITY: Sections 1 to 7 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101-2110, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.

SECTION 1. *What this regulation does.* This regulation provides a procedure whereby ceiling prices may be adjusted to the minimum price established by any State minimum price law (other than a fair trade law), which was enforced and in effect on June 30, 1952, and which is in effect at the time an application is filed under this regulation, or by a regulation issued pursuant to such a State law and currently in effect. These adjustments will apply only to commodities sold or delivered in the particular State to which the law or regulation applies.

SEC. 2. *Who may apply.* If your ceiling price for a material is below the level of minimum prices established for that material by a State's minimum price law (other than a fair trade law) enforced and in effect on June 30, 1952, and in effect at the time of your application, or by a regulation issued pursuant to such a State law and currently in effect, you may file an application requesting that your ceiling price for that material, when sold or delivered in that State, be raised to the minimum level of prices established for this material by the State law or regulation. Also, any State official responsible for the enforcement or administration of a minimum price law or regulation may file an application requesting that the ceiling prices for sale or delivery in a State of any material be raised to the minimum level of prices established for that material by that State's law (other than a fair trade law) in effect on June 30, 1952, and in effect at the time of the filing of the application, or by a regulation issued pursuant to such a State law and currently in effect.

SEC. 3. *Where to apply; form of application.* The application shall be submitted in an original and one copy, and shall be signed by the seller or the appropriate State official, as the case may be. It shall be filed with the Office of the Recording Secretary of the Office of Price Stabilization, Washington 25, D. C.

SEC. 4. *What the application shall contain.* The application shall contain:

(a) *Whether filed by an individual or State official.* (1) A certified copy of the applicable State law (other than a fair trade law) and, if the minimum price is established by a regulation, a certified copy of the regulation. If a copy of such law or regulation has been furnished in connection with one application filed under this general overriding regulation, the certifying official may merely refer to the former application with which the copy was furnished.

(2) A certificate, from the appropriate State official that this law was enforced and in effect on June 30, 1952, and that the law, and where appropriate, a regulation issued pursuant to that law, are currently in effect. If a minimum price level is established by regulation, the certificate shall also include a statement that the regulation was authorized by law and lawfully adopted and issued. Moreover, there should be furnished a certificate by the appropriate State official that the law, and where applicable, the regulation, have not been held invalid by the decision of any court of competent jurisdiction. If an appropriate State official has furnished any of this information in connection with one application filed under this general overriding regulation and the information has remained full and correct, as to that information the appropriate State official may merely refer to the former application with which the information was furnished.

(3) An identification of the material, for which an adjustment is sought under this regulation.

(4) If the established minimum price is a single dollars-and-cents price per defined unit, for example, 10 cents per pound, the amount of that price in dollars-and-cents per defined sales unit of the material.

If the minimum price is computed in accordance with a prescribed formula, the minimum price level per defined sales unit of the material computed under that formula and an explanation of how that minimum price level was computed. If there has been any change in the minimum price or minimum price levels since June 30, 1952, the price or price level as of June 30, 1952 and as of the date of the application.

(5) If the established minimum price or minimum price level varies with the type of seller involved, for example, chain store, independent store, wholesaler, retailer, etc., the information requested in (4) above should state the class of sellers to which the applicant belongs or the several sellers on whose behalf the State official is applying belong. Moreover, in that case, the application should contain sufficient information descriptive of the particular seller or groups of seller involved to enable the Director to determine which minimum price or price level is applicable to the particular seller or group of sellers for whom ceiling price increases are sought.

(6) The ceiling prices requested in the application.

(b) *If filed by an individual seller.* (1) The seller's name and address.

(2) The seller's current ceiling prices for sales or deliveries in that State of the material in question.

(c) *If filed by a State official.* (1) His name, title and his authority in the enforcement or administration of the minimum price law or regulation.

(d) *Additional information.* The Director may request additional information if he deems it necessary or appropriate.

SEC. 5. *Action on application.* If it is proved, to the satisfaction of the Director of Price Stabilization, that the ceiling prices for the specific material or materials in a State of the particular seller or group of sellers involved in the application are below the minimum level of prices established for them by the State law or regulation in effect on June 30, 1952 and as of the date of the application, he will issue an order permitting the particular seller or group of sellers to raise their ceiling prices to that level.

SEC. 6. *When adjustment may be put into effect.* A seller may not use for any material an adjusted ceiling price proposed under this regulation, until the Director of Price Stabilization has specifically authorized such adjusted ceiling price.

SEC. 7. *Definitions.* As used in this regulation, unless the context otherwise requires, the term:

(a) "Director of Price Stabilization" includes any official to whom the Director of Price Stabilization delegates any function, power or authority referred to in this regulation.

(b) "Material" includes any raw material, article, commodity, product, supply, component, technical information and process.

(c) "You" means the person subject to this regulation. "Your" and "yours" are construed accordingly.

Effective date: This General Overriding Regulation 32 is effective July 17, 1952.

NOTE: The reporting requirements of this general overriding regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 17, 1952.

Chapter IV—Salary and Wage Stabilization, Economic Stabilization Agency

Subchapter A—Salary Stabilization Board

[Interpretation 13]

INT. 13—RELATION OF GSSR 2 TO CERTAIN STOCK PURCHASE PLANS

This interpretation deals with the relation of General Salary Stabilization Regulation 2 (Profit-sharing and Other Bonuses) to stock offerings by employers to their employees at a price below the fair market value of the stock.

1. Q. May a corporation pay its employees bonuses in the form of corporate stock?

A. Yes. See paragraph 2.05 of Interpretation 3.

2. Q. May a corporation, which during the period from 1946 to 1950, inclusive, had a practice of offering to its employees at a net price below the fair market value of the stock, consider as a bonus payment: (a) The difference between the net price and the fair market value of the stock offered to any participating employee; or (b) employer contributions toward the purchase of the stock by an employee, in lieu of or in addition to offering the stock at a net price below the fair market value?

A. Yes.

3. Q. May bonus payments of the type referred to in paragraph 2, which were made during the years 1946 to 1950, inclusive, be considered part of the "base period bonus fund" defined in section 2 of General Salary Stabilization Regulation 2?

A. No. Such bonus payments constitute a special base period bonus fund available only for use in connection with further stock offerings to employees of the corporation in accordance with the corporation's past practice.

4. Q. What is the amount of the special base period bonus fund for such bonus payments?

A. The amount of the special base period bonus fund may be either of the following:

(a) The amount representing the difference between the aggregate fair market value of all the stock offered during the calendar year 1950 and the aggregate offering price of such stock on the date of the offering in the calendar year 1950, together with the aggregate of any contributions made by the employer toward the purchase of stock in such calendar year; or

(b) The amount representing one-third of the total difference between the aggregate fair market value of all the stock offered during any three of the five calendar years 1946 to 1950 and the aggregate offering price of such stock on the date of the offering during the years selected, together with the aggregate of any contributions made by the employer during the years selected.

5. Q. What is the maximum amount of such bonus payments which can be paid in a current calendar year?

A. The amount of the special base period bonus fund.

6. Q. How is the amount of such bonus payments which may be paid during a current calendar year computed?

A. In the same manner as the amount of such bonus payments was computed in previous calendar years for purposes of determining the special base period bonus fund (see paragraph 4).

7. Q. Is there any limitation upon the maximum bonus payment which may be made to an individual employee in a current calendar year?

A. Yes. The maximum bonus payment to any individual employee may not exceed the highest amount (either in the form of the difference between the purchase price of stock and the fair market value thereof or of employer contributions towards the purchase of stock, or both) paid to any individual employee during any of the calendar years used in the computation of the special base period bonus fund.

8. Q. Must the amount of the special base period bonus fund be adjusted in order to take account of increases or decreases during the current calendar year in the number of employees eligible to participate in the offering?

A. The special base period bonus fund may be increased, and must be decreased, by the percentage by which the number of employees eligible to participate in the offering exceeds, or is less than, the average number of employees eligible to participate in offerings made during the calendar year or calendar years used in determining the special base period bonus fund.

9. Q. What documents or reports should a corporation, making bonus payments of the type referred to in paragraphs 2 to 8 of this interpretation, file with the Office of Salary Stabilization?

A. The corporation, within thirty days after the first date of a stock offering, should file a copy of its current stock purchase plan and of any stock purchase plan under which an offering was made during the five calendar years 1946 to 1950. If the corporation increases its special base period bonus fund because of increases in the number of employees eligible to participate in an offering, it should file a report setting forth the pertinent facts in the manner provided in paragraph (b) of section 10 of General Salary Stabilization Regulation 2.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Issued by the Office of Salary Stabilization on July 11, 1952.

JOSEPH D. COOPER,
Executive Director.

AUTHORITY: Sections 1 to 20 issued under sec. 704, 64 Stat. 816 as amended; Pub. Law 139, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply Title VI, 64 Stat. 812, as amended, Pub. Law 139, 82d Cong.; 50 U. S. C. App. Sup. 2131-2135, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp., E. O. 10296, Oct. 2, 1951, 16 F. R. 10103; 3 CFR, 1951 Supp.

GENERAL

SECTION 1. *Statement of purpose.* In order to reduce serious inflationary pressures and to assist in limiting the volume of new residential construction to a level which can be maintained with the materials and labor available in the light of national defense requirements,

restrictions on residential real estate credit" (applicable where construction was started after noon of August 3, 1950) have been imposed, with the concurrence of the Housing and Home Finance Administrator, by Regulation X (chapter XV of this title) issued by the Board of Governors of the Federal Reserve System (hereinafter called the "Board"). Related credit restrictions (applicable to both new and old residential property) are contained in regulations of the Federal Housing Commissioner and the Administrator of Veterans' Affairs. Actions restricting residential credit were taken under the authority of Title VI of the Defense Production Act of 1950, approved September 8, 1950, and amendments thereto and of Executive Order 10161, issued September 9, 1950. In order to assist the provision of housing needed for in-migrant defense workers or military personnel and their families where the failure to provide such housing would impede national defense activities, residential credit restrictions were relaxed or modified in critical defense housing areas designated by the Housing and Home Finance Administrator.

In addition thereto, and pursuant to the provisions of Title I of the Defense Housing and Community Facilities and Services Act of 1951, approved September 1, 1951, and of Executive Order 10296, dated October 2, 1951, the Director of Defense Mobilization is authorized, upon a finding that certain conditions set forth in the Defense Housing and Community Facilities and Services Act of 1951 exist, to designate specified areas as critical defense housing areas. The Housing and Home Finance Administrator is also authorized under said Defense Housing and Community Facilities and Services Act of 1951 and under paragraph number 3 of Executive Order 10296, upon such a finding and designation by the Director of Defense Mobilization, to suspend or relax residential real estate credit restrictions imposed under the authority of the Defense Production Act of 1950, as amended. Residential credit controls in such areas continue to be administered by the Board with respect to real estate credit which is subject to said Regulation X and by the Federal Housing Administration and the Veterans' Administration, respectively, with respect to real estate credit assisted under the programs of those two agencies. However, such credit controls of the Board, the Federal Housing Administration and the Veterans' Administration are suspended or relaxed by those agencies with respect to housing for which the Housing and Home Finance Administrator approves exceptions from credit restrictions.

It is the purpose of this regulation, issued by the Housing and Home Finance Administrator, to prescribe uniform conditions and procedures under which exceptions from credit restrictions are made available in the designated critical defense housing areas in order to assure that the housing for which such exceptions are granted (whether or not such housing is financed with Government assistance) will meet the needs of the in-migrant defense workers or military personnel and their families. This procedure for granting exceptions from credit restrictions is in addition to other programs of the Housing and Home Finance Agency designed to assist in meeting such needs in critical defense housing areas. The approval of an application under this regulation (or under Housing and Home Finance Agency Regulation CR 2) is hereby required as a condition to the approval by the Federal Housing Administration of an application for mortgage insurance under the provisions of Title IX (National Defense Housing Insurance) of the National Housing Act, as amended. With respect to housing for which mortgage insurance assistance is provided under Title IX of the National Housing Act, as amended, all applicable requirements, conditions and restrictions imposed by or pursuant to this regulation are in addition to all applicable requirements, conditions and restrictions imposed by or pursuant to said Title IX.

This regulation does not supersede or in any way modify HHFA Regulation CR 2, which concerns exceptions from credit terms for areas affected by the Savannah River, Paducah (Kentucky), and Idaho Reactor Testing Station installations of the Atomic Energy Commission.

SEC. 2. *What this regulation does.* This regulation lists critical defense housing areas and prescribes, among other things, who may apply for exceptions from residential credit restrictions in such areas; the type of housing eligible; where and how to apply; the basis on which applications will be approved; the rules which applicants and their successors in interest must abide by with respect to holding and offering certain housing for rent or sale to persons engaged in national defense activities and with respect to rents or sales prices which may be charged; and the manner in which eligibility will be determined for the occupancy or purchase of housing for which exceptions from credit restrictions have been granted.

SEC. 3. *Geographical areas affected.* The special exceptions from residential credit restrictions which are authorized under this regulation will be applicable only to credit with respect to residential property located in "critical defense housing areas" as that term is defined in section 7 of this regulation. A critical defense housing area will be designated as such by the Housing and Home Finance Administrator for purposes of this regulation only where such area has been determined by proper authority to be a "critical defense housing area" within the meaning of the Defense Housing and Community Facilities and Services Act of 1951 or the Housing and Rent Act of 1947, as amended.

SEC. 4. *Type of housing eligible.* The special exceptions from residential credit restrictions which are authorized under this regulation for critical defense housing areas will be applicable only to credit with respect to family dwellings which are suitable and intended for year-round occupancy. Only single-family dwellings may be financed pursuant to the exceptions for sales housing and other housing to be built for owner-occupancy referred to in sections 13 through 17 of this regulation. Housing to be held for rent and to be financed pursuant to the exceptions governing rental housing set out in sections 8 through 12 of this regulation may be of any type which meets the requirements of the first sentence of this section. Thus, it may consist of a single-family home or single-family homes (whether detached, semi-detached, or row houses), two-family structures, or structures containing three or more family dwelling units.

SEC. 5. *Programming by HHFA.* Exceptions from residential real estate credit restrictions will be programmed for each critical defense housing area by the Housing and Home Finance Agency on the basis of housing market field surveys, and such exceptions will be approved in accordance with area program schedules of housing needed from time to time to serve in-migrant defense workers or military personnel employed or stationed at defense plants or installations in the area. Detailed area programs will be announced for each critical defense housing area. Such programs will relate to the location of the housing within such critical defense housing area, the number and types of rental or sales units required, the size (by number of bedrooms) of such units, the levels of rentals or sales prices which must be achieved if the housing is to meet the needs of the persons for whom it is intended and similar factors. Exceptions from credit restrictions will be approved pursuant to the detailed procedures, standards, and conditions set out below.

SEC. 6. *Beginning of construction; time limit.* When an application for an exception from credit restrictions is approved under sections 6 through 12 or sections 13 through 17 of this regulation, construction of the housing described in the application should be begun not later than sixty calendar days after the date of the approval, and should be continued with reasonable diligence thereafter. This approval automatically expires unless construction is begun either (a) within such sixty-day period or (b) within any extension of that period which shall have been approved by the local office of the Federal Housing Administration, and is continued with reasonable diligence. Applicants are required to furnish, with respect to units for which an application is approved under this regulation, such information concerning the beginning, progress, and completion of construction as may be requested by the Government.

SEC. 7. *Definitions.* As used in this regulation, the following words, terms, and phrases shall have the meaning set out in this section:

(a) *Beginning of construction.* For the purposes of this regulation, construction shall be deemed to be begun when any essential materials which are to be an integral part of the structure have been incorporated into the site in a permanent form (for example, when footings or other foundations have been poured or placed).

(b) *Completion of construction.* For the purposes of this regulation a dwelling unit shall be deemed to be completed when, in conformity with general practice in the community, it is ready for occupancy.

(c) *Family dwelling.* A "family dwelling" means a house or apartment designed for residential occupancy by two or more persons and which contains kitchen facilities or space designed for kitchen facilities. It does not include hotels, motels, rooming houses, club houses, fraternity or sorority houses, dormitories, or any other structure designed or used either for transient accommodations or for occupancy by single persons or by non-family groups.

(d) *Critical defense housing area.* A "critical defense housing area" (for purposes of this regulation) means an area designated as such by the Housing and Home Finance Administrator in the appendix to this regulation. This designation does not necessarily determine where housing for which credit exceptions will be granted may be located within the designated critical defense housing area. More specific information with respect to the location of such housing may be found in the area programs referred to in section 5 of this regulation. Thus, these area programs may specify geographical places (such as a city, county, or township) within the critical defense housing area where such housing may be located or may set out a minimum standard for determining where such housing may be located, based on reasonable daily commuting distance from the defense plants or installations appearing in the "defense activity list" for the area.

(e) *Defense activity list.* The "defense activity list" means the list of defense plants or installations or defense-supporting service activities for each critical defense housing area appearing in the area program published in the FEDERAL REGISTER or on file in the FHA office for the district in which the area is located.

(f) *Eligible defense worker.* An "eligible defense worker" means (1) a civilian or a member of the Armed Forces employed or stationed at a defense plant or installation listed on the defense activity list for the particular critical defense housing area who is an in-migrant as defined herein and who requires and is without adequate family housing; or (2) a person engaged in a defense-supporting service activity (as defined herein), which defense-supporting service activity appears on the defense activity list for the particular critical defense housing area and who is an in-migrant as defined herein and who requires and is without adequate family housing. However, a member of the Armed Forces otherwise eligible is an eligible defense worker notwithstanding the date when he brought or moved his family from beyond practicable commuting distance. Notwithstanding the foregoing requirement that an eligible defense worker be an in-migrant, a person otherwise eligible who is not an in-migrant but who has since December 19, 1950, been evicted from the family dwelling unit occupied by him or his family or is in receipt of a bona fide notice to remove and surrender possession of such family dwelling unit within a period of 90 days or less, is an eligible defense worker hereunder. Such eviction or notice to surrender possession must be for reasons other than the breach of any of the conditions of tenancy by such defense worker. Exceeding a maximum income limitation in any tenancy agreement, however, shall not be deemed for this purpose a breach of a condition of the tenancy by such defense worker. An "eligible defense worker" employed or stationed in one critical defense housing area shall be deemed an "eligible defense worker" within any contiguous critical defense housing area if the area programs (referred to in section 5 of this regulation) for the respective contiguous critical defense housing areas so prescribes.

(g) *In-migrant.* An "in-migrant" is a person (1) whose residence is beyond maximum practicable commuting distance from his place of work or military station or (2) who has since December 19, 1950 (or such other date as may be announced for the critical defense housing area), brought or moved his family from beyond the maximum practicable commuting distance from his place of work.

(h) *Maximum practicable commuting distance.* "Maximum practicable commuting distance" means a distance within which it is possible to commute daily to the place of employment by established common carrier or by private transportation at a cost per person of not more than $1.00 per round trip and with normal traveling time of not more than three hours per round trip, unless another cost or time shall have been announced for the critical defense housing area.

(i) *Sales price.* "Sales price" means the total consideration paid (including any charge made a condition to the sale) by the buyer for the dwelling accommodations with accompanying land and improvements. The only items which are excluded are those incidental charges, such as closing costs and brokerage fees or commissions or charges, which buyers of such dwelling accommodations customarily assume in the community where such accommodations are located, and which actually have been incurred for services rendered at the buyer's or seller's request in connection with the sale.

(j) *Public offer.* To "publicly offer" dwellings for rental or sale means that the owner will (1) for the period of offer required by this regulation take such affirmative steps as are customary in the community for making a public offering of family dwellings which will give reasonable notice to eligible defense workers, including members of the armed forces, that such dwellings are available for rental or sale, and (2) during construction and until the dwelling units are initially occupied or sold (or, where 4 or more units are involved, until at least 75 percent of the units are initially occupied or sold), maintain in a conspicuous location at the site a sign not less than 2½ feet by 4 feet specifying in words legible at a reasonable distance, the rents or range of rents, or the sales price or range of sales prices, as the case may be, and containing the following language:

Privately Built
Defense Housing
HHFA No. -----

(k) *Defense-supporting service activity.* A defense-supporting service activity as used in this regulation, means any activity (other than activities of defense plants or installations referred to in numbered clause (1) of paragraph (f) of this section) which is directly or indirectly concerned with the activities of defense plants or installations appearing on the defense activity list and which is essential to the efficient operation of such listed defense plants or installations. Defense-supporting service activities may include such activities as police and fire protection, health and educational activities, and the furnishing of transportation and communication services and other public utility services, including installation, operation, and maintenance necessary for such services.

HOUSING TO BE HELD FOR RENT

SEC. 8. *Who may apply for exception from credit restrictions.* With respect to housing programmed by the Housing and Home Finance Administrator for rental occupancy, application for a special defense exception from residential credit restrictions may be made only by a person (including a corporation, partnership, trust, or other legal entity) who is the owner of, or otherwise has effective control over, the land on which there is proposed to be erected a new family dwelling or dwellings which will be held for rental to eligible occupants as prescribed below. Effective control over the land, for the purposes of this section, includes control through ownership, a firm contract to purchase, a written option to purchase which may be exercised at the will of the applicant, or a long-term lease for a term of not less than 50 years.

SEC. 9. *Where and how builders should apply.* Application for an exception from credit restrictions with respect to housing to be held for rental should be made to the appropriate local office of the Federal Housing Administration on HHFA Form No. H-1052. (Local offices of the Federal Housing Administration, which is a constituent agency of the Housing and Home Finance Agency, will receive and process such applications on behalf of the Housing and Home Finance Administrator without regard to whether or not the housing in question will be financed with the aid of FHA mortgage insurance.) An original and three signed copies of the application form must be submitted for each application. Each application must contain a statement that the applicant has a commitment or other assurance in writing from a lending institution or other lender that such lender intends, if the application is approved, to provide the financing for the residential property, including the proposed improvements, described in the application. If the application is approved, two copies of the application form will be returned to the

applicant endorsed to indicate that an exception from the credit restrictions has been approved. One of these copies must be submitted to the lending institution or other lender making the loan. Such lender need not be the lending institution or proposed lender referred to in the application. The applicant will also be notified if the application is rejected. Unless otherwise specifically approved in writing by the local office of the FHA, the approved application (HHFA Form H-1052) is not transferable or assignable.

SEC. 10. *Standards for approving applications.* As among applications otherwise eligible for approval under the terms of this regulation, applications made under sections 8 through 12 of this regulation will be approved for dwelling units within a total number consistent with area programs adopted from time to time by the Housing and Home Finance Administrator pursuant to the surveys referred to in section 5 of this regulation. Applications will be approved on the basis of achieving a maximum contribution toward filling the needs for rental housing of eligible defense workers and military personnel in the designated areas which the proposed housing is intended to serve. For this purpose the local office of the Federal Housing Administration may consider, in approving applications, any or all of the following factors and circumstances:

(a) The proximity of the site of the proposed housing to the defense plants and installations on the defense activity list, and the desirability of the site with respect to transportation, commercial and community facilities and services, utilities, street improvements and similar relevant factors;

(b) The rentals proposed to be charged, the size of units in terms of the number of rooms and bedrooms proposed to be provided, and the relationship between the accommodations proposed and the proposed rentals;

(c) The capacity of the applicant to perform the undertaking for which he applies; and

(d) The order in which applications are filed.

SEC. 11. *Rules and conditions applicable.* (a) In the event that an application for an exception from credit restrictions is approved pursuant to sections 8 through 12 of this regulation, the applicant is hereby required to notify the appropriate local office of the Federal Housing Administration in writing when the construction of the dwelling units described in the application is begun and when such dwelling units are completed. In such event, the applicant is also hereby required for a period of two years after their completion in the case of structures containing one or two family dwelling units, and a period of four years after their completion in the case of structures containing three or more family dwelling units (unless the applicable period is sooner terminated by the Housing and Home Finance Administrator) to:

(1) Publicly offer any such dwelling unit for rent, for a period of at least thirty calendar days after the dwelling unit described in the application has been completed and for a period of at least thirty calendar days after such unit subsequently becomes vacant, to eligible defense workers unless the unit is sooner rented to such a worker;

(2) Require, upon the renting of any such dwelling unit to an eligible defense worker, that such worker fill out in duplicate and submit to the applicant an occupancy eligibility certificate on HHFA Form No. H-1054 (which shall be further executed by the applicant, as indicated therein, who shall forward one copy to the local office of FHA and retain one copy);

(3) Fill out in duplicate a landlord's certificate on HHFA Form No. H-1056 in case such dwelling unit has been publicly offered in good faith for rent to eligible defense workers as required by subparagraph (1) of this paragraph, but subsequently rented to a person other than an eligible defense worker (one copy of such certificate shall be forwarded to the local office of FHA and one copy shall be retained by the applicant or any subsequent owner making such certificate);

(4) Charge not more than the rent or rents and utility and service charges specified in the approved application or not more than such higher rents and utility and service charges as the local office of the Federal Housing Administration shall have approved on the basis of hardship to the applicant or subsequent owner;

(5) Hold the dwelling unit or units for rent unless (i) the property is being sold to a purchaser for investment purposes rather than for his own occupancy, or (ii) prior permission to sell is granted in writing by the Housing and Home Finance Agency, or (iii) a period of at least sixty calendar days has elapsed after the dwelling unit or units described in the application have been completed or after the unit has subsequently become vacant, and the public offer of such unit for rent at the approved rental during said sixty days has not produced a tenant;

(6) Comply with any agreements or conditions made a part of the application HHFA Form No. H-1052, as approved; and

(7) Require that the purchaser, if the property is sold pursuant to subdivision (i) of subparagraph (5) of this paragraph, agree in writing to abide by all the provisions and conditions set forth in this regulation, including this paragraph, which shall be applicable to all successive sales pursuant to said subdivision (i) of subparagraph (5) of this paragraph, made within the period referred to above during which this paragraph is applicable by the first and all successive purchasers for investment purposes.

(b) No purchaser of property for investment purposes (pursuant to paragraph (a) (5) (i) of this section) shall occupy a dwelling unit in such property unless it contains two or more family dwelling units and such purchaser is himself eligible for occupancy of a dwelling pursuant to section 12 of this regulation or unless such occupancy is pursuant to paragraph (c) of this section.

(c) Notwithstanding any provision of this section, if a parcel of real property contains five or more family dwelling units required to be held for rent under sections 8 through 12 of this regulation, the owner of said parcel, or a person actually employed as a resident manager or janitor of said dwelling units, may occupy one of such units. Two such units may be occupied by such owners, resident managers, or janitors if the property required to be held for rent pursuant to said sections contains not less than 20 family dwelling units, and an additional unit may be so occupied for every additional 30 family dwelling units above 20.

(d) Sales in the course of judicial or statutory proceedings are not subject to the provisions of this section.

(e) Written notifications required by this section to be given to the Federal Housing Administration shall be deemed to be given as of the date they are received by the FHA or, if mailed, as of the date they are postmarked.

(f) All requirements, conditions and restrictions with respect to holding for rent, rental charges and utility charges imposed by or pursuant to this regulation are in addition to any applicable requirements, conditions and restrictions which may, under certain circumstances, be imposed with respect to the same housing by or pursuant to the Housing and Rent Act of 1947, as amended, or the National Housing Act, as amended. (Note that rental ceilings approved under this regulation are based primarily on market surveys of needs of eligible defense workers for housing classified by number of rooms and approximate rental rather than on detailed plans and specifications of the housing to be constructed. Rental limitations which may be imposed under certain circumstances by the Office of Rent Stabilization or the Federal Housing Administration are based primarily on the actual accommodations provided or to be provided. Therefore rental limitations imposed under this regulation may in individual cases, be higher or lower than rental limitations imposed under other legal authority. In such event, persons affected by more than one rental limitation or requirement governing the same dwelling unit must comply with whichever one is more restrictive.)

(g) Notwithstanding the requirement in section 11 of this regulation, as in effect on any earlier date, imposing certain obligations for a five-year period, any person affected by such five-year requirement or by like requirements in any form, certificate, or agreement entered into under this regulation, need comply with such obligations only during the two- or four-year period, as the case may be, presently prescribed in paragraph (a) of this section for the type of structure involved.

SEC. 12. *Eligibility for tenancy.* Except as otherwise provided in section 11 or section 20 of this regulation, during the period in which a dwelling unit is required to be held for rent under section 8 through 12 of this regulation, no person other than an "eligible defense worker" as defined in paragraph (f) of section 7 of this regulation, or his family shall be eligible for tenancy or occupancy of such dwelling unit.

SALES HOUSING AND OTHER HOUSING TO BE BUILT FOR OWNER-OCCUPANCY

SEC. 13. *Who may apply for exception from credit restrictions.* With respect to housing in a critical defense housing area which may be programmed by the Housing and Home Finance Administrator for sale to, or construction by, prospective owner-occupants, application for a special defense-area exception from residential credit restrictions may, except as provided in section 20, be made only by (a) an "eligible defense worker" (as defined in paragraph (f) of section 7 of this regulation) who is the owner of, or otherwise has effective control over, the land on which he proposes to erect a new family dwelling for his own occupancy or (b) a person (including a corporation, partnership, trust, or other legal entity) who is the owner of, or otherwise has effective control over, the land on which he proposes to erect a new family dwelling or dwellings for sale to eligible defense workers. Effective control over the land, for the purposes of this section, includes control through ownership, a firm contract to purchase, a written option to purchase which may be exercised at the will of the applicant, or a long-term lease for a term of not less than 50 years.

SEC. 14. *Where and how applications should be made.* Application for an exception from credit restrictions by a builder with respect to a single-family dwelling or single-family dwellings to be erected for sale to eligible defense workers should be made to the appropriate local office of the Federal Housing Administration on HHFA Form No. H-1053. Application for an exception from credit restrictions by an "eligible defense worker" with respect to a single-family dwelling to be erected and occupied by the applicant should be made to the appropriate local office of the Federal Housing Administration on HHFA Form No. H-1053-A. Procedures for the submission, processing and subsequent disposition of such applications will be the same as those set forth in section 9 of this regulation for applications for exceptions from credit restrictions with respect to housing to be held for rental. Unless otherwise specifically approved in writing by the local office of the FHA, the approved application (HHFA Form H-1053 or H-1053-A, as the case may be) is not transferrable or assignable.

SEC. 15. *Standards for approving applications.* As among applications otherwise eligible for approval under the terms of this regulation, applications made under sections 13 through 17 of this regulation will be approved for dwelling units within a total number consistent with area programs adopted from time to time by the Housing and Home Finance Administrator pursuant to the surveys referred to in section 5 of this regulation. Applications will be approved on the basis of achieving a maximum contribution toward filling the needs for sales-type housing of eligible defense workers and military personnel in the designated areas which the proposed housing is intended to serve. For this purpose the local office of the Federal Housing Administration may consider, in approving applications, any or all of the following factors and circumstances:

(a) The proximity of the site of the proposed housing to the defense plants and installations on the defense activity list, and the desirability of the site with respect to transportation, commercial and community facilities and services, utilities, street improvements and similar relevant factors;

(b) The sales prices proposed to be charged, the size of units in terms of the number of rooms and bedrooms proposed to be provided, and the relationship between the proposed type of construction and special features and the proposed sales prices;

(c) The capacity of applicant to perform the undertaking for which he applies; and

(d) The order in which applications are filed.

SEC. 16. *Rules and conditions applicable.* (a) Sales housing: In any case where an application for an exception from credit restrictions is approved pursuant to sections 13 through 17 of this regulation, with respect to the erection of a dwelling or dwellings for sale, the applicant is hereby required to notify the appropriate local office of the Federal Housing Administration in writing when the construction of the dwellings described in the application is begun and when such dwellings are completed, and to:

(1) Publicly offer such dwelling for sale for a period of at least sixty calendar days after the dwelling described in the application has been completed, to eligible defense workers unless the dwelling is sooner purchased by such a worker;

(2) Require, upon the sale of any such dwelling to an eligible defense worker, that such worker fill out in duplicate and submit to the applicant an occupancy eligibility certificate on HHFA Form No. H-1054 (which shall be further executed by the applicant, as indicated therein, who shall forward one copy to the local office of FHA and retain one copy);

(3) Fill out in duplicate a seller's certificate on HHFA Form No. H-1057 in case any such dwelling has been publicly offered in good faith for sale to eligible defense workers, as required by subparagraph (1) of this paragraph, but subsequently sold on excepted credit terms to a person other than an eligible defense worker (one copy of such certificate shall be forwarded to the local office of FHA and one copy retained by the applicant);

(4) Charge not more than the sales price or prices specified in the approved application for such dwelling or dwellings or such higher price or prices as the local office of the Federal Housing Administration shall have approved on the basis of hardship to the applicant;

(5) Comply with any agreements or conditions made a part of the application, HHFA Form No. H-1053, as approved; and

(6) Require the purchaser to agree in writing that, if such purchaser or his family does not reside in the completed dwelling for a period of at least ninety days and he proposes to sell such dwelling (whether prior to or after completion), (i) he will give advance notification in writing to the local office of the FHA that he proposes to sell such dwelling and (ii) he will abide by all the provisions and conditions set forth in this regulation (including this subparagraph) which shall be applicable to all successive sales of said dwelling until it has been occupied for ninety consecutive days after completion by any purchaser or his family. For the purpose of this subparagraph references elsewhere in the regulation to an "applicant" shall be deemed to include subsequent owners and reference to a sixty-day period of public offer after completion of a dwelling shall be deemed to include any subsequent sixty-day period of public offer.

(b) Other housing to be built for owner-occupancy: In any case where an application for an exception from credit restrictions is approved pursuant to sections 13 through 17 with respect to a single-family dwelling to be erected and occupied by an "eligible defense worker", the applicant is hereby required to notify the appropriate local office of the Federal Housing Administration in writing when the construction of the dwelling is begun and when it is completed and to comply with any agreements or conditions made a part of the application, HHFA Form No. H-1053-A, as approved. If the "eligible defense worker" or his family does not reside in the completed dwelling for a period of at least ninety days and he proposes to sell such dwelling (whether prior to or after completion), he is hereby further required to give advance notification in writing to such local office of the FHA that he proposes to sell such dwelling, to certify to such office in writing the actual cost of the dwelling, and thereafter to comply with all requirements of paragraph (a) of this section except that for the purposes of this paragraph, the reference in subparagraph (a) (5) of this section to HHFA Form No. H-1053 shall be deemed to be a reference to HHFA Form No. H-1053-A and the reference in subparagraph (a) (4) of this section to the sales price specified in the approved application shall be deemed to be a reference to the actual cost of the dwelling. Nothing contained in the preceding sentence shall require an applicant with respect to a single-family dwelling to be built for his own occupancy to certify the actual cost of his dwelling or to comply with the sales-price restriction contained in subparagraph (a) (4) of this section if his application for an exception from credit restrictions has been received by the Federal Housing Administration on or before November 20, 1951. If the eligible defense worker" or his family does not reside in the completed dwelling for a period of at least ninety days and he proposes to rent such dwelling, he is hereby further required to give advance notification in writing to such local office

of the FHA that he proposes to rent such dwelling, and thereafter, for a period of two years after such notification or after the completion of the dwelling, whichever is later, to publicly offer such dwelling for rent, for a period of at least thirty calendar days after its completion and for a period of at least thirty calendar days after it subsequently becomes vacant, to eligible defense workers (and only to eligible defense workers) unless the dwelling is sooner rented to such a worker.

(c) Sales in the course of judicial or statutory proceedings are not subject to the provisions of this section.

(d) Written notifications required by this section to be given to the FHA shall be deemed to be given as of the date they are received by the Federal Housing Administration, or, if mailed, as of the date they are postmarked.

(e) Notwithstanding the requirement in section 16 of this regulation, as in effect on any earlier date, imposing certain obligations for a five-year period, any person affected by such five-year requirement or by like requirements in any form, certificate, or agreement entered into under this regulation, need comply with such obligations only during the time or times prescribed in this section for the circumstances involved.

SEC. 17. *Eligibility for purchase.* Except as otherwise provided in section 16 or section 20 of this regulation, no person other than an "eligible defense worker" as defined in paragraph (f) of section 7 of this regulation shall be eligible for purchase of a dwelling for which an exception from credit restrictions has been issued under the provisions of sections 13 through 17 of this regulation.

SPECIAL CREDIT EXCEPTIONS FOR PURCHASERS OF OTHER HOUSING

SEC. 18. *Approval of special credit exceptions.* In addition to the exceptions from credit restrictions approved on the application of builders in accordance with the preceding sections of this regulation, the Housing and Home Finance Agency may, under special circumstances in some areas, program or approve exceptions from credit restrictions for the purchase, by eligible defense workers, of housing which shall have been built in a critical defense housing area without such approved applications by builders. This will be limited to cases where the Housing and Home Finance Agency determines that the housing needs of such defense workers cannot otherwise be met within the time required and that such exceptions will not result in undue inflationary pressures upon the prices of existing housing in the area or in a material volume of other housing programmed for the area under this regulation being made available to persons other than defense workers.

SEC. 19. *Conditions and requirements.* Any relaxation of credit restrictions under the special circumstances referred to in section 18 shall be approved in accordance with such procedures and subject to such conditions and requirements as shall be determined by the Housing and Home Finance Agency to be consistent with the provisions of this regulation and announced for the critical defense housing area, and compliance with conditions and requirements imposed pursuant to this section is hereby required.

SPECIAL CREDIT EXCEPTIONS FOR PERSONS DISPLACED BY DEFENSE ACTIVITIES

SEC. 20. *Special credit exceptions for persons displaced by acquisition of land for defense purposes.* Whenever the Housing and Home Finance Administrator finds that the acquisition of real property in a critical defense housing area as herein defined for the use of a defense plant or installation, whether existing or proposed, has resulted or will result in the displacement of persons from their dwellings, whether owned or rented by them, the Housing and Home Finance Agency may, on the basis of such a finding, consider the housing needs of such persons, along with the housing needs of in-migrant defense workers and military personnel, in preparing the area program schedules referred to in section 5 of this regulation. For purposes of this section 20, a defense plant or installation means any existing or proposed plant or installation in an area for which the Housing and Home Finance Administrator has made the finding referred to in the preceding sentence, which plant or installation (a) appears on a "defense activity list"; or (b) is owned by, or operated by or on behalf of, a military department, the Atomic Energy Commission, or any other Federal department or agency directly, or indirectly and substantially, concerned with national defense; or (c) directly, or indirectly and substantially, serves (through manufacturing, mining, industrial processing of food or other products, transportation, power production, or public or municipal utility services) operations and activities of a military department, the Atomic Energy Commission, or any other Federal department or agency directly, or indirectly and substantially, concerned with national defense. Any person displaced from his home, whether owned or rented by him, as a result of the acquisition on and after June 27, 1950 (by purchase or condemnation) of real property in a critical defense housing area for the use of a defense plant or installation shall for all purposes of this regulation be treated as though he were an eligible defense worker except that with respect to any such person (and with respect to housing occupied or proposed to be occupied by any such person for which an exception from credit restrictions is granted under this regulation) any reference in this regulation to HHFA Form No. H–1054 (Certificate of Eligibility for Occupancy of Defense Housing under Relaxation of Credit Restrictions) shall be deemed to be a reference to HHFA Form No. H–1054–A.

The reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

In the formulation of the aforegoing, consultation with industry representatives was impracticable because special circumstances, namely, that the foregoing was drafted to accomplish purely technical changes and to provide relaxations of earlier regulatory requirements including eligibility standards, caused such consultation to serve no material purpose.

This regulation, as herein amended, is effective as of the 18th day of July 1952.

[SEAL] B. T. FITZPATRICK,
Acting Housing and Home Finance Administrator.

APPENDIX TO CR 3

NOTE: See paragraph (d) of sec. 7 of Regulation.

CRITICAL DEFENSE HOUSING AREAS

Area, Including Geographical Description and Date Designated

1 through 3.[1]

4. San Diego and Oceanside, California (that part of San Diego County west of the San Bernardino meridian), May 2, 1951.

5. Wright-Patterson Air Force Base, Dayton, Ohio. (All of Greene and Montgomery Counties; the Townships of Pike, German, Moorefield, Springfield, Greene, Mad River, Bethel, and the City of Springfield, in Clark County), August 11, 1951.

6. Solano County, California (Solano County), June 29, 1951.

7. Star Lake, New York (the towns of Fine and Clifton in St. Lawrence County), May 23, 1951.

8. Davenport, Iowa; Rock Island, East Moline and Moline, Illinois. Quad Cities (Rock Island County, Illinois, and Scott County, Iowa), June 29, 1951.

9. Lone Star, Texas, Area. (All of Camp and Morris Counties; Precincts 1, 2, and 8, including Hughes Springs, Linden, and Avinger, in Cass County; Precincts 1, 2, 3, and 6, including Jefferson City, in Marion County; Precincts 1, 4, 5, 6, and 7, including Mt. Pleasant, in Titus County; and Precincts 2, 6, and 8, including Ore City, in Upshur County), August 3, 1951.

10. Brazoria County, Texas (Brazoria County), July 3, 1951.

11. Norfolk-Portsmouth, Virginia (Norfolk and Princess Anne Counties and the independent cities of Norfolk, South Norfolk, and Portsmouth), August 11, 1951.

12. Newport News, Virginia (Elizabeth City, Warwick, and York Counties, and the independent cities of Newport News and Hampton), October 3, 1951.

13. Borger, Texas (Hutchison County), July 13, 1951.

14. Wichita, Kansas (Sedgewick County), July 25, 1951.

15. Colorado Springs, Colorado (El Paso County), May 8, 1951.

16. Camp Roberts-Camp Cooke, California (San Luis Obispo County; and judicial townships numbers 4, 5, 8, and 9 in Santa Barbara County), July 3, 1951.

17. Fort Leonard Wood, Rolla, Missouri (Laclede, Phelps and Pulaski Counties), May 23, 1951.

18. Tooele, Utah (that portion of Tooele County lying east of the Great Salt Lake Desert, and precinct 4 in Salt Lake County), July 3, 1951.

19. Las Cruces, New Mexico (precincts 2, 3, 4, 5, 6, 13, 15, 20, 21, 23, 25, 26, 28, and 29 in Dona Ana County, including Las Cruces

[1] Numbers 1 through 3 are reserved for the areas affected by the three Atomic Energy Commission installations of Savannah River (S. C. and Ga.), Paducah (Ky.) and the Idaho Reactor Testing Station (Idaho) for which exceptions from residential credit restrictions are governed by Regulation CR 2 of the Housing and Home Finance Agency. These areas are not affected by this Regulation CR 3.

town and such other villages as are included in such precincts), July 17, 1951.

20. Dover, Delaware (Kent County; and that portion of the city of Milford located in Sussex County), August 3, 1951.

21. Imperial County, California (townships 2 and 3 in Imperial County, including El Centro city and Imperial city), July 13, 1951.

22. Hanford-Kennewick-Pasco, Washington (Benton County; the precincts of Eltopia, Ringold, Fishook, Riverview, and all Pasco precincts in Franklin County; the principals of Burbank, Attalia, Wallula in Walla Walla County; the precincts of Beima, Byron, Mabton, Mabton Rural, North Grandview, South Grandview, Sunnyside 1, 2, 3, Sunnyside Rural 1, 2, 3, 4, Wanita and Wendell Phillips in Yakima County), July 3, 1951.

23. Bremerton, Washington (Kitsap County), June 8, 1951.

24. Patuxent, Maryland (St. Mary's County), August 3, 1951.

25. Valdosta, Georgia (all of Lowndes and Lanier Counties), June 20, 1951.

26. Camp Atterbury, Indiana, area. (The area consists of Bartholomew, Brown, Johnson, Morgan, Shelby and Jackson Counties; the Townships of Clay, Washington, Marion, San Creek and Jackson in Decatur County, all in Indiana), July 25, 1951.

27. Camp Lejeune, North Carolina (Onslow, Carteret, Craven and Jones Counties), August 3, 1951.

28. Sampson Air Force Base, New York (Seneca County; the towns of Geneva, Seneca, Phelps, Manchester, Canandaigua, Hopewell, Gorham, and the city of Geneva, all in Ontario County; the towns of Middlesex, Potter, Benton, Milo, and Torrey in Yates County; and the towns of Arcadia, Galen, Lyons, and Palmyra in Wayne County), August 11, 1951.

29. Florence-Killeen, Texas (Bell and Coryell Counties; and precincts 4 and 5 in Williamson County, including Florence town), August 3, 1951.

30. Mineral Wells-Weatherford, Texas (Palo Pinto and Parker Counties), July 17, 1951.

31. Huntsville, Alabama (Madison County), July 13, 1951.

32. Barstow, California, Area. (Barstow Township and the area within the United States Marine Corps Depot Military Reservation, all in San Bernardino County), July 3, 1951.

33. Lancaster, California (Antelope township in Los Angeles County, judicial township 11 in Kern County), August 11, 1951.

34. Alamogordo, New Mexico (precincts 1, 2, and 3, including Alamogordo town and Tularosa village in Otero County), July 17, 1951.

35. Indianapolis, Indiana (the counties of Marion, Hancock, and Hamilton), October 3, 1951.

36. Sanford, Florida (Seminole County), October 3, 1951.

37. Sidney, Nebraska (Cheyenne County), October 3, 1951.

38. Kingsville, Texas (precincts 1, 2, and 3, including Kingsville city in Kleberg County; precincts 1, 4, 6, and 7, including Alice City and Premont town in Jim Wells County; precincts 3, 4, 5, and 8, including Bishop town and Robstown city in Nueces County), October 3, 1951.

39. Wichita Falls, Texas (Wichita County), October 3, 1951.

40. Presque Isle—Limestone, Maine (the towns of Ashland, Caribou, Castle Hill, Easton, Fort Fairfield, Limestone, Mapleton, Mars Hill, Van Bureu, Washburn, Westfield, the Plantations of Caswell and Hamlin, and the city of Presque Isle, all in Aroostook County), October 3, 1951.

41. Bucks County (Bristol-Morrisville), Pennsylvania (the townships of Bensalem, Bristol, Falls, Middletown, Lower Makefield, Upper Makefield, Newton, Northampton, Wrightstown, the boroughs of Bristol, Newtown, Hulmeville, Langhorne, Langhorne Manor, South Langhorne, Morrisville, Penndel, Tulleytown, and Yardley, all in Bucks County), October 3, 1951.

42. Hartford, Connecticut (the towns of Avon, Bloomfield, Canton, East Granby, East Hartford, Farmington, Glastonbury, Granby, Hartford, Manchester, Newington, Rocky Hill, Simsbury, South Windsor, West Hartford, Wethersfield, and Windsor in Hartford County and the town of Bolton in Tolland County), October 23, 1951.

43. Camp Pickett, Virginia (Nottaway County, Lunenburg County, the districts of Red Oak, Sturgeon, and Totaro in Brunswick County, and the district of Darvills in Dinwiddie County), October 23, 1951.

44. Camp Polk, Louisiana (Vernon Parish and wards 2, 3, 4, 5, 7, and 8, including Merryville town and De Ridder city in Beauregard Parish), October 23, 1951.

45. Camp Breckinridge, Kentucky (Union and Henderson Counties), October 23, 1951.

46. Fort Dix, New Jersey (the townships of Bordentown, Burlington, Chesterfield, Cinnaminson, Delanco, Delran, Eastampton, Edgewater Park, Evesham, Florence, Hainesport, Lumberton, Mansfield, Mapleshade, Medford, Moorestown, Mount Holly, Mount Laurel, New Hanover, North Hanover, Pemberton, Riverside, Southampton, Springfield, Westampton and Willingboro, the cities of Beverly, Bordentown, and Burlington; and the boroughs of Fieldsboro, Medford Lakes, Palmyra, Pemberton, Rivertown, Wrightstown in Burlington County; the townships of Plumsted, Jackson, Lakewood, Brick, Manchester, Berkeley and Dover, and the boroughs of Lakehurst, South Toms River, Beachwood, Pine Beach, Ocean Gate, and Island Heights in Ocean County), October 23, 1951.

47. Camp Rucker, Alabama (Dale County, Coffee County, and Houston County), October 23, 1951.

48. Topeka, Kansas (Shawnee County), October 23, 1951.

49. Benton, Arkansas (Saline County), October 23, 1951.

50. Cocoa-Melbourne, Florida (Brevard County), October 23, 1951.

51. Babbitt, Minnesota (the townships of Argo, Morese, and township 61, ranges 12 and 13, inclusive, and including Ely City in St. Louis County), October 23, 1951.

52. Lorain, Ohio (Lorain County), October 23, 1951.

53. Rapid City-Sturgis, South Dakota township 1 north and township 2 north in ranges 7 east to 9 east, both inclusive, and township 1 south in ranges 7 and 8 east, including Rapid City in Pennington County; and that part of Meade County lying west of the Black Hills Guide Meridian), October 29, 1951.

54. Aberdeen, Maryland (Harford County), October 29, 1951.

55. Bainbridge-Elkton, Maryland (Cecil County), October 29, 1951.

56. Astoria, Oregon (the precincts of Alderbrook, Astoria 1 through 7, Astoria 9 through 17, Hammond, Warrentown, Gearheart, Clatsop, Lewis and Clark, Stanley Acres, and Seaside 1 through 4 all in Clatsop County), November 15, 1951.

57. Inyokern-Ridgecrest-China Lake, California (townships 1 and 10 in Kern County), November 15, 1951.

58. Braidwood (Joliet), Illinois (Will County and the village of Steger in Cook County), November 15, 1951.

59. Tucson, Arizona (districts 1 and 2 of Pima County, including Tucson city), November 15, 1951.

60. Mountain Home, Idaho (Mountain Home precincts 1 and 2, including the village of Mountain Home, in Elmore County), November 15, 1951.

61. Marysville-Yuba, California (Yuba County; the township of Yuba and the town of Yuba city in Sutter County; and the townships of Grass Valley and Nevada, and the cities of Grass Valley and Nevada City in Nevada County), November 15, 1951.

62. Fort Campbell, Kentucky (Christian County, Kentucky, and Montgomery County, Tennessee), November 15, 1951.

63. Fort Sill, Lawton, Oklahoma (Comanche County), November 15, 1951.

64. Camden-Shumaker, Arkansas (Ouachita and Calhoun Counties), November 15, 1951.

65. Camp Stewart, Georgia, Area (Long, Liberty, Tattnall, and Wayne Counties), November 15, 1951.

66. Fort Benning, Georgia, Chattahoochee and Muscogee Counties in Georgia, and precinct 1 in Russell County, Alabama), November 15, 1951.

67. Rantoul (Chanute Air Force Base), Illinois (Champaign and Vermilion Counties), November 15, 1951.

68. Indiantown Gap, Pennsylvania (county of Lebanon), November 15, 1951.

69. Fort Knox, Kentucky (magisterial districts 1, 4, 5, and 6 in Hardin County, magistrial districts 1, 2, 3, and 4 in Meade County, and magisterial districts 1 and 4 in Bullitt County), November 15, 1951.

70. Gulfport-Biloxi-Pascagoula, Mississippi (Jackson and Harrison Counties), November 15, 1951.

71. Alexandria, Louisiana (Parish of Rapides), November 15, 1951.

72. Lake Charles, Louisiana (Calcasieu Parish and wards 1 and 6 of Beauregard Parish), November 15, 1951.

73. Frederick, Maryland (County of Frederick), November 15, 1951.

74. Marietta, Georgia (County of Cobb), November 15, 1951.

75. Fort Bragg, North Carolina (Cumberland and Hoke Counties), November 15, 1951.

76. Fort Meade-Laurel, Maryland (districts 10 and 14 in Prince Georges County and districts 4 and 5 in Anne Arundel County), November 15, 1951.

77. Anniston, Alabama (Calhoun County), November 16, 1951.

78. Pensacola, Florida (Escambia and Santa Rosa Counties), November 16, 1951.

79. Bryan, Texas (Brazos County), November 16, 1951.

80. Key West, Florida (Monroe County), November 16, 1951.

81. Allentown-Bethlehem, Pennsylvania (Northampton and Lehigh Counties in Pennsylvania; and the townships of Greenwich, Lopatcong, Pahatcong, the borough of Alpha and the township of Philipsburg in Warren County, New Jersey), November 16, 1951.

82. New London, Connecticut, Area. (The towns of East Lyme, Goton, Ledyard, Lyme, Montville, New London, North Stonington, Norwich, Old Lyme, Salem, Stonington and Waterford in New London County), December 7, 1951.

83. Whidbey Island, Washington (Island County; and the election precincts of Conway, Dewey, Fidalgo, Fir, Harmony, Milltown, Mount Vernon 1 through 9 inclusive, North Avon, North La Conner, South Avon, South La Conner, Swinomish, and Whitney, and the city of Anacortes, in Skagit County), December 7, 1951.

84. Tullahoma, Tennessee (Bedford, Coffee, Franklin, and Moore Counties), June 20, 1951.

85. San Marcos, Texas (Caldwell, Comal, Guadalupe, and Hayes Counties), June 8, 1951.

86. Othello, Washington (Othello election precinct in Adams County), August 11, 1951.

87. Corona, California (the township of Temescal and Corona City in Riverside County), May 8, 1951.

88. Camp McCoy, Wisconsin (Monroe County), December 7, 1951.

89. Pine Bluff, Arkansas (Jefferson County), December 7, 1951.

90. Bridgeport, Connecticut (the towns of Bridgeport, Easton, Fairfield, Monroe, Strat-

ford and Trumbull in Fairfield County; and the town of Milford in New Haven County), December 7, 1951.

91. Chincoteague, Virginia (Accomac County, Virginia; and election districts 1 and 8 in Worcester County, Maryland), December 7, 1951.

92. Dover-Danville, New Jersey (Morris County), December 7, 1951.

93. Clovis-Portales, New Mexico (Curry County; and election precincts 1, 3, 7, and 13 in Roosevelt County), December 7, 1951.

94. Monterey-Fort Ord, California (the townships of Alisal, Castorville, Gonzales, Monterey, Pacific Grove and Pajaro, including the cities of Carmel, Monterey, Pacific Grove and Salinas, in Monterey County; and the township and city of Watsonville in Santa Cruz County; and the townships of Hollister and San Juan, including the cities of Hollister and San Juan, in San Benito County), December 7, 1951.

95. Hondo, Texas (Medina County), December 7, 1951.

96. La Porte, Indiana (La Porte and Starke Counties), December 7, 1951.

97. Bainbridge, Georgia (Decatur County), December 7, 1951.

98. Carlsbad-Artesia, New Mexico (Eddy County), December 7, 1951.

99. Oxnard-Fort Hueneme, California (Ventura County), December 7, 1951.

100. Pleasanton-Livermore-Haywood, California (the townships of Eden, Murray and Pleasanton, including the cities of Haywood, Livermore, Pleasanton and San Leandro, all in Alameda County), December 7, 1951.

101. Pittsburg, Camp Stoneman, California (townships 5, 6, 8, 9, 13, 16, and 17, including the cities of Antioch, Concord, and Pittsburg, all in Contra Costa County), December 7, 1951.

102. Parris Island, South Carolina, Area (Beaufort County and that part of the town of Yemassee in Hampton County), December 28, 1951.

103. Herlong, California, Area (the township of Honey Lake in Lassen County), December 28, 1951.

104. Brunswick, Maine, Area (Sagadahoc County; and the towns of Brunswick, Freeport, and Harpswell, all in Cumberland County), December 28, 1951.

105. Pioche, Nevada, Area (the townships of Pioche, Caliente, and Panaca in Lincoln County), December 28, 1951.

106. Umatilla-Hermiston, Oregon, Area, (Precincts 28, 29, 30, 31, 32, 32-A, 33, 33-A, 34, 37, 38, and 41, including the Cities of Stanfield, Hermiston, Umatilla and Echo, all in Umatilla County), December 28, 1951.

107. Big Spring, Texas, Area (all of Howard County), December 28, 1951.

108. Utica-Rome, New York, Area (Oneida County; and the towns of Schuyler, Frankfort, Litchfield and Newport in Herkimer County), December 28, 1951.

109. Winter Harbor, Maine, Area (the towns of Gouldsboro and Winter Harbor in Hancock County), December 28, 1951.

110. Hawthorne, Nevada, Area (Hawthorne Township in Mineral County), December 28, 1951.

111. Ishpeming-Negaunee, Michigan, Area (the townships of Ishpeming, Negaunee, Humbolt, Tilden, Ely and Richmond, and the cities of Ishpeming and Negaunee, all in Marquette County), December 28, 1951.

112. Palatka, Florida, Area (Putnam County in northeastern Florida), December 28, 1951.

113. Soda Springs, Idaho, Area (the precincts of Grace Springs 1 and 2, and Soda Springs, all in Caribou County), December 28, 1951.

114. Fort Huachuca, Arizona, Area (District 1, including the cities of Bisbee and Tombstone, in Cochise County), December 28, 1951.

115. Salina Kansas, Area (Saline County), December 28, 1951.

116. Quantico, Virginia, Area (Prince William and Stafford Counties and the independent city of Fredericksburg), December 28, 1951.

117. Kinston, North Carolina, Area (Lenoir County), December 28, 1951.

118. Green Cove Springs, Florida, Area (Clay County), December 28, 1951.

119. Victoria, Texas, Area (Victoria County), December 28, 1951.

120. Flagstaff, Arizona, Area (that part of supervisorial district 1 south of 36° latitude and that part of supervisorial district 2 north of 35° latitude, in Coconino County), January 16, 1952.

121. Yuma, Arizona, Area (that part of Yuma County, Arizona, lying west of 114° longitude and south of 33° latitude), January 16, 1952.

122. Edgemont, South Dakota, Area (the townships of Craven, Cottonwood, Dudley, Plain and Provo, in Fall River County), January 16, 1952.

123. Knob Noster (Sedalia Air Force Base), Missouri, Area. (Johnson County; Pettis County; and the Township of Windsor and the City of Windsor in Henry County), January 16, 1952.

124. Victorville, California, Area (Victor Township, including the town of Victorville, and Oro Grande Township, all in San Bernardino County), January 16, 1952.

125. Midland, Pennsylvania, Area. ((1) That part of Beaver County north and east of the Ohio River, except the following: the townships of Economy and Harmony, the boroughs of Ambridge, Baden and Conway and that portion of the borough of Ellwood City which lies within Beaver County; and (2) the townships of Potter and Center and the borough of Monaca, Beaver County), January 16, 1952.

126. Great Falls, Montana, Area (school districts 1, 5, 8, 9, 10, 17, 24, 25, 29, 48, 50, 52, 71, 72, 73, 74, 85, and 93, including the cities of Great Falls and Belt, all in Cascade County), January 16, 1952.

127. Port Townsend, Washington, Area (the precincts of Center, Chimacum, Coyle, Gardiner, Hadlock, Irondale, Leland, Nordland, Port Discovery, Port Ludlow, Quilcene, Tarboo, Woodman, and all of Port Townsend precincts, in Jefferson County), January 16, 1952.

128. Anaconda, Montana, Area (all of Deer Lodge County), January 16, 1952.

129. Reno, Nevada, Area (the townships of Reno, Sparks, and Verdi, including the cities of Reno and Sparks, all in Washoe County), January 16, 1952.

130. Monmouth County, New Jersey, Area (all of Monmouth County, except the boroughs of Allentown and Roosevelt and the townships of Upper Freehold and Millstone), January 16, 1952.

131. Moultrie, Georgia, Area (Colquitt County in south central Georgia), January 16, 1952.

132. Dahlgren, Virginia, Area (all of King George County and the Washington magisterial district of Westmoreland County), January 30, 1952.

133. Ardmore, Oklahoma, Area (all of Carter County), January 30, 1952.

134. Eglin Air Force Base, Florida (Okaloosa County), January 30, 1952.

135. Townsville, North Carolina, Area (Townsville township, Vance County), January 30, 1952.

136. Wenatchee, Washington (the election precincts of Appleyard, Canyon, Lewis and Clark, Lincoln, Malaga, Millendale, Monitor, Sunny Slope, Suburban, and all Wenatchee City election precincts, in Chelan County; and the election precincts of Cascade, East Wenatchee, Highline, Majestic, North Bridge, Rock Island, South Bridge and Valley in Douglas County), January 30, 1952.

137. Sumter, South Carolina, Area (Sumter County), January 30, 1952.

138. Brady, Texas Area (all of McCulloch County), January 30, 1952.

139. Warner Robins, Georgia, Area (Houston County), January 30, 1952.

140. Baraboo, Wisconsin, Area (Sauk County; and the towns of Arlington, Caledonia, Dekorra, Fort Winnebago, Lewiston, Lodi, Newport, West Point, Pacific and the cities of Lodi, Portage and Wisconsin Dells and the village of Poynette, in Columbia County), January 30, 1952.

141. Trona, California, Area. (Trona Township, including the towns of Trona and West End, San Bernardino County), February 14, 1952.

142. Smyrna, Tennessee, Area. (Districts 1, 2, 3, 4, 5, 6, 7, 9, 13, 15, 16, 17, 19, 21, 22, all in Rutherford County including the Cities of Murfreesboro and Smyrna), February 14, 1952.

143. Altus, Oklahoma, Area. (All of Jackson County) February 27, 1952.

144. Rockdale, Texas, Area. (All of the County of Milam), March 15, 1952.

145. Parsons, Kansas, Area. (All of Labette County), March 15, 1952.

146. Arlington, Washington, Area. (Census Divisions 2 and 3 in Snohomish County), March 15, 1952.

147. Charleston, South Carolina, Area (The Townships of Christ Church, First St. James Goose Creek, Folly Island, James Island, Johns Island, St. Andrews, St. Michael and St. Philip, St. Paul, Second St. James Goose Creek, Sullivans Island and Wadmalow, the City of Charleston and the towns of Mount Pleasant, Hollywood, Meggett, Ravenel and Lincolnville in Charleston County; the Townships of St. Denniss and St. Thomas, and Second St. James Goose Creek in Berkeley County; the Townships of Collins and Dorchester, and the Town of Summerville and the unincorporated community of Pinehurst-Sheppard Park in Dorchester County), March 15, 1952.

148. Orlando, Florida, Area. (Orange County, and Commissioner's Districts 2 and 3 in Osceola County, including the City of Kissimmee), March 15, 1952.

149. Bedford, Massachusetts, Area. (The Towns of Bedford, Billerica, Burlington, Carlisle, Concord, Lexington and Lincoln and the Cities of Waltham and Woburn in Middlesex County), March 15, 1952.

150. Del Rio, Texas, Area. (Justice precinct 1 in Val Verde County), March 15, 1952.

151. Cobalt, Idaho, Area. (The Election Precinct of Forney, including the town of Cobalt in Lemhi County), March 15, 1952.

152. Newport, Rhode Island, Area. (The City of Newport and the Towns of Middletown, Portsmouth and Tiverton, all in Newport County), March 15, 1952.

153. Oscoda, Michigan, Area. (The Townships of Au Sable and Oscoda in Iosco County), March 15, 1952.

154. Indian Head, Maryland, Area. (Charles County), March 15, 1952.

155. Gary-Hammond-East Chicago, Indiana. (All of Lake County, Indiana, except the Townships of Cedar Creek, Eagle Creek and West Creek), March 15, 1952.

156. Lawrence-Olathe, Kansas, Area (Douglas County, including the Cities of Baldwin, Eudora and Lawrence; the Townships of Olathe, Monticello, Spring Hill, Gardner, McCamish and Lexington, including the Cities of DeSoto, Edgerton, Gardner, Olathe and Spring Hill, all in Johnson County, and the City of Bonner Springs, and Delaware Township, including the City of Edwardsville, in Wyandotte County), March 15, 1952.

157. Laredo Air Force Base, Texas, Area. (That portion of Webb County within a 10-mile radius of the Administration Building of the Laredo Air Force Base, including the City of Laredo), March 29, 1952.

158. Port Lavaca, Texas, Area. (All of Calhoun County), March 29, 1952.

159. Yerington, Nevada, Area. (Mason Valley Township including Yerington City, in Lyon County), March 29, 1952.

160. Williamsport, Pennsylvania, Area. (The townships of Anthony, Armstrong, Bastress, Brady, Clinton, Eldred, Fairfield, Hepburn, Limestone, Loyalsock, Lycoming, Mifflin, Mill Creek, Muncy, Muncy Creek, Nippenose, Old Lycoming, Piatt, Porter, Susquehanna, Upper Fairfield, Washington, Watson, Wolf and Woodward; also the borough of Duboistown, Hughesville, Jersey Shore, Montgomery, Montoursville, Muncy, Picture Rocks, Salladasburg, and South Williamsport; and the city of Williamsport, all in Lycoming County), March 29, 1952.

161. New Brunswick-Perth Amboy, New Jersey, Area. (The townships of Piscataway, Raritan, Woodbridge, East Brunswick and North Brunswick; the boroughs of Dunellen, South Plainfield, Middlesex, Matuchen, Highland Park, Carteret, South River, Milltown, and Sayreville; the cities of Perth Amboy, New Brunswick, and South Amboy, all in Middlesex County), March 29, 1952.

162. Bangor, Maine, Area. (The cities of Bangor and Brewer, the town of Orono including the unincorporated community of Orono; also the town of Veazie, all in Penobscot County), March 29, 1952.

163. Harlingen, Texas, Area. (Justice Precincts 3, 4, 6 and 7 in Cameron County, and Justice Precinct 1 in Hidalgo County), April 23, 1952.

164. Cascade, Idaho, Area. (The precincts of Cascade and Alpha in Valley County), April 23, 1952.

165. Condon, Oregon, Area. (The election precincts of East Condon and West Condon, including the city of Condon, in Gilliam County), April 23, 1952.

166. Fremont-Wahoo, Nebraska, Area. (Saunders County; and the Townships of Cotterell, Elkhorn, Maple, Nickerson, Platt, and Union, including the Village of Nickerson and the City of Fremont, in Dodge County), May 8, 1952.

167. Ely, Nevada, Area. (Ely Township, White Pine County), May 8, 1952.

168. Ephrata-Moses Lake, Washington. (Census Divisions 6, 7, 10, 11, and 12 in Grant County), May 8, 1952.

169. Farmington, New Mexico, Area. (The County of San Juan), May 8, 1952.

170. Bridgeport, Washington, Area. (Census Division 2, including the Town of Bridgeport in Douglas County; and Census Division 8, including the Towns of Brewster and Pateros in Okanogan County), May 8, 1952.

171. Republic-Curlew, Washington, Area. (Census County Divisions 2 and 3, including the unincorporated village of Curlew and the Town of Republic in Ferry County), May 8, 1952.

172. Sioux City, Iowa, Area. (Sioux City and the Townships of Woodbury and Liberty all in Woodbury County), May 22, 1952.

173. Lea County, New Mexico, Area (Lea County), May 22, 1952.

174. Poughkeepsie, New York, Area. (The City of Poughkeepsie and the Towns of Poughkeepsie, Hyde Park, Pleasant Valley, La Grange, Wappinger, and East Fishkill, all in Dutchess County), June 14, 1952.

175. Grosse Ile, Michigan, Area. (The Island of Grosse Ile in the Detroit River, Wayne County), June 14, 1952.

176. Bagdad, Arizona, Area. (That part of Supervisorial District 2 lying west of 113° longitude, in Yavapai County), June 14, 1952.

177. Milan, Tennessee, Area. (Carroll, Gibson and Madison Counties), June 14, 1952.

178. Portsmouth, New Hampshire-Kittery, Maine, Area. (Strafford County; the Towns of Brookfield and Wakefield in Carroll County; the Town of Alton in Belknap County; the City of Portsmouth and the Towns of Atkinson, Brentwood, Danville, Deerfield, East Kingston, Epping, Exeter, Fremont, Greenland, Hampstead, Hampton, Hampton Falls, Kensington, Kingston, New Castle, Newfields, Newington, Newmarket, Newton, North Hampton, Northwood, Nottingham, Plaistow, Raymond, Rye, Sandown, Seabrook, South Hampton and Stratham, in Rockingham County, all in New Hampshire; and the Towns of Berwick, Eliot, Kittery, North Berwick, South Berwick and York in York County, Maine), June 28, 1952.

179. Williston, North Dakota, Area. (Williams County and that part of McKenzie County north of the south line of Township 150, all in North Dakota), June 28, 1952.

180. Reedsport, Oregon, Area. (The Precincts of Gardiner, Wade's Flat, Winchester Bay, East Reedsport and West Reedsport, including the City of Reedsport, all in Douglas County), June 28, 1952.

181. Butte, Montana, Area. (The area consists of Silver Bow County, Montana), July 18, 1952.

182. Roseburg, Oregon, Area. (Precincts of Brown, Edenbower East 1 and 2, Edenbower West 1 and 2, Garden Valley, Green, Mill, Parrott and Wilbur, including the City of Roseburg, all in Douglas County), July 18, 1952.

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter II—Corps of Engineers, Department of the Army

PART 202—ANCHORAGE REGULATIONS

SAN FRANCISCO BAY, CALIF.

Pursuant to the provisions of section 7 of the River and Harbor Act of March 4, 1915 (38 Stat. 1053; 33 U. S. C. 471) § 202.224 is hereby amended by redesignating Anchorage No. 1 (Temporary) as Anchorage No. 1 (General) and Anchorage No. 7 (General) as Anchorage No. 7 (Temporary) and modifying the limits of Anchorage No. 1 (General) by the elimination of the northerly portion of the area and the establishment of a 1000-foot wide cable area extending bayward from the foot of Fillmore Street, and enlargement of Anchorage No. 7 (Temporary) as follows:

§ 202.224 *San Francisco Bay, San Pablo Bay, Carquinez Strait, Suisun Bay, San Joaquin River, and connecting waters, Calif.*—(a) *San Francisco Bay*—(1) *Anchorage No. 1 (General).* (i) That portion of San Francisco Bay bounded by the north shore of the City of San Francisco and lines joining points which are the following bearings and distances from Alcatraz Island Light: 201° 40', 2,670 yards; 220° 20', 1,800 yards; 251°, 4,210 yards; 234° 30', 4,410 yards.

(ii) All of this area is a general anchorage with the exception of a 1,000-foot wide cable area, the center line of which extends due north through the anchorage area from a point on the sea wall of the Marina Park, in line with the west curb line of Fillmore Street, San Francisco, within which cable area vessels will not be allowed to anchor.

• • • • • •

(7) *Anchorage No. 7 (Temporary).* (i) That portion of San Francisco Bay bounded by the westerly shore of Treasure Island and the following lines: Beginning at the most westerly corner of Treasure Island at a point bearing 89°, 4,135 yards, from Alcatraz Island Light; thence to points which are the following bearings and distances from Alcatraz Island Light: 73° 30' 3,100 yards, 117° 40', 2,087 yards; 122° 30', 3,730 yards; 101° 40', 4,783 yards.

(ii) This anchorage is a temporary anchorage reserved for the use of vessels entering port while undergoing examination by quarantine, customs, immigration, Coast Guard, and other Government authorities. Upon completion of these examinations, vessels shall promptly move out of this anchorage.

PART 203—BRIDGE REGULATIONS

MOBILE RIVER AND CHICKASAW CREEK, ALA.

Pursuant to the provisions of section 5 of the River and Harbor Act of August 18, 1894 (28 Stat. 362; 33 U. S. C. 499), § 203.491, prescribing special sound signals to govern passage through the Alabama State Highway bridge across Mobile River and the Louisville and Nashville Railroad bridge across Chickasaw Creek at Mobile, Alabama, is prescribed as follows:

§ 203.491 *Mobile River and Chickasaw Creek, Ala.; Alabama State Highway bridge across Mobile River and Louisville and Nashville Railroad Company bridge across Chickasaw Creek at Mobile, Alabama*—(a) *Sound signals for vessels.* (1) For vessels proceeding up or down Mobile River and requiring an opening of the highway bridge only, the vessel will give a signal of three long blasts.

(2) For vessels coming down Mobile River and intending to proceed up Chickasaw Creek, requiring an opening of the railroad bridge, the vessel will give a signal of one long blast, followed after a one minute interval by three long blasts.

(3) For vessels coming up Mobile River and intending to proceed up Chickasaw Creek, requiring an opening of both bridges, the vessel will give a signal of three long blasts, a one minute interval, and one long blast followed by three long blasts.

(4) The owners of or agencies controlling the bridges shall keep a legible copy of these regulations posted conspicuously on both the upstream and downstream sides of the bridges.

(28 Stat. 362; 33 U. S. C. 499) [Regs., June 27, 1952, 823.01-ENGWO]

[SEAL] WM. E. BERGIN,
Major General, U. S. Army,
The Adjutant General.

[F. R. Doc. 52-7920; Filed, July 17, 1952; 8:55 a. m.]

PART 207—NAVIGATION REGULATIONS

MISSISSIPPI RIVER

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U. S. C. 1), and section 5 of the River and Harbor Act of March 3, 1909 (35 Stat. 818; 33 U. S. C. 2), § 207.200 governing navigation of the Mississippi River below the mouth of the Ohio River, including South and Southwest Passes, is amended by changing in subparagraph (c) (1) the stages for the operation of the high water traffic control lights, by a redesignation of subparagraphs (c) (4) and (5) as subparagraphs (c) (5) and (6), and the addition of subparagraph (c) (4) concerning minor changes in the river stages, and amending subparagraph (d) (1) by increasing the safety distance required before a ship may enter either South or Southwest Passes from the Gulf of Mexico, as follows:

§ 207.200 *Mississippi River below mouth of Ohio River, including South and Southwest Passes; use, administration, and navigation.* • • •

(c) *Movement of vessels in vicinity of Algiers Point, New Orleans Harbor*—(1) *Control lights.* When the Mississippi River reaches 10 feet on the Carrollton Gage on a rising stage, and until the gage reads 12 feet on a falling stage, the movement of all tugs with tows and all ships, whether under their own power or in tow, and excluding tugs or towboats without tows or river craft of comparable size and maneuverability operating under their own power, in the vicinity of Algiers Point shall be governed by red and green lights designated and located as follows: Governor Nicholls Light located on the left descending bank at the downstream end of Governor Nicholls Street Wharf, New Orleans, approximately 94.4 miles above Head of Passes; and Gretna Light located on the right descending bank on top of the levee at the foot of Ocean Avenue, Gretna, approximately 96.6 miles above Head of Passes. Governor Nicholls Light has lights visible from both upstream and downstream, and Gretna Light has lights visible from upstream, all indicating by proper color the direction of traffic around Algiers Point. From downstream, Gretna Light always shows green. All lights oscillate through 60 degrees, sweeping the entire width of the river every five seconds. A green light displayed ahead of a vessel (in the direction of travel) indicates that Algiers Point is clear and the vessel may proceed. A red light displayed ahead of a vessel (in the direction of travel) indicates that Algiers Point is not clear and the vessel shall not proceed. Absence of lights shall be considered a danger signal and no attempt shall be made to navigate through the restricted area.

• • • • • •

(4) *Minor changes.* The District Engineer is authorized to waive operation or suspension of the lights whenever prospective river stages make it appear that the operation or suspension will be required for only a brief period of time or when river stages will rise or fall below the critical stage which is established for operation or suspension by only a few tenths on the Carrollton Gage.

(5) *Underpowered vessels.* • • •

(6) *Towing.* • • •

(d) *Navigation of South and Southwest Passes.* (1) No vessel, except tugs, all craft and towboats and tugs without tows, shall enter either South Pass or Southwest Pass from the Gulf until after any descending vessel which has approached within two and one-half (2½) miles of the outer end of the jetties and visible to the ascending vessel shall have passed to sea.

• • • • • •

(35 Stat. 818, 40 Stat. 266; 33 U. S. C. 1, 2) [Regs., June 27, 1952, 800.211-ENGWO]

[SEAL] WM. E. BERGIN,
Major General, U. S. Army,
The Adjutant General.

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 127—INTERNATIONAL POSTAL SERVICE: POSTAGE RATES, SERVICE AVAILABLE, AND INSTRUCTIONS FOR MAILING

MISCELLANEOUS AMENDMENTS

a. In § 127.229 *Ceylon* amend paragraph (a) (4) by adding the following sentence: "Postage rates for articles in the Postal Union (regular) mails other than letters, letter packages, and post cards, $0.69 for first two ounces and $0.49 for each additional two ounces or fraction."

b. In § 127.258 *French settlements in India (Chandernagore, Karikal Mahe, Pondichery and Yanaon)* amend paragraph (a) (5) by adding the following sentence: "Postage rates for articles in the Postal Union (regular) mails other than letters, letter packages, and post cards, $0.65 for first two ounces and $0.45 for each additional two ounces or fraction."

c. In § 127.298 *Madeira Islands* amend paragraph (a) (5) by adding the following sentence: "Postage rates for articles in the Postal Union (regular) mails other than letters, letter packages, and post cards, $0.44 for first two ounces and $0.24 for each additional two ounces or fraction."

d. In § 127.306 *Morocco (French)* amend paragraph (a) (5) by adding the following sentence: "Postage rates for articles in the Postal Union (regular) mails other than letters, letter packages, and post cards, $0.47 for first two ounces and $0.27 for each additional two ounces or fraction."

e. In § 127.333 *Portuguese East Africa (Mozambique)* amend paragraph (a) (5) by adding the following sentence: "Postage rates for articles in the Postal Union (regular) mails other than letters, letter packages, and post cards, $0.69 for first two ounces and $0.49 for each additional two ounces or fraction."

f. In § 127.334 *Portuguese India* amend paragraph (a) (5) by adding the following sentence: "Postage rates for articles in the Postal Union (regular) mails other than letters, letter packages, and post cards, $0.65 for first two ounces and $0.45 for each additional two ounces or fraction."

g. In § 127.336 *Portuguese West Africa (Angola, Guinea, St. Thomas Island, and Prince's Island)* amend paragraph (a) (5) by adding the following sentence: "Postage rates for articles in the Postal Union (regular) mails other than letters, letter packages, and post cards to Angola only, $0.63 for first two ounces and $0.43 for each additional two ounces or fraction."

h. In § 127.348 *Saudi Arabia (Kingdom of)* amend paragraph (a) (5) by adding the following sentence: "Postage rates for articles in the Postal Union (regular) mails other than letters, letter packages, and post cards, $0.60 for first two ounces and $0.40 for each additional two ounces or fraction."

i. In § 127.76 *Group shipments* amend paragraph (b) by deleting "Indonesia (limited to three parcels)" from the list of countries therein.

j. In § 127.278a *Indonesia (Bali, Banka, Billiton, Netherlands Borneo, Celebes, Java, Little Soenda (Sunda), Madoera, Moluccas (Moloques), Rhio (Rioux), Sumatra, and Netherlands Timor)* make the following changes:

1. Amend the section headnote to read as follows:

§ 127.278a *Indonesia (Alor Is., Amboina, Aru Is., Babar, Bali, Banda, Banka, Batjan, Bawean, Bengkalis, Billiton, Bintan, Borneo (Kalimantan), Bura, Buton, Celebes (Sulawesi), Ceram, Flores, Geser, Halmahaira, Java (Djawa), Kai Is., Kalimantan (Borneo), Kangean, Karimun, Kisar, Kundur, Laut, Lombok, Madura, Morotai, Muna, Roti, Salajar, Salibabu, Sambu, Sangir Is., Saparua, Sapudi, Siantan, Siau, Singkep, Sula Is., Sulawesi (Celebes), Sumatra, Sumba, Sumbawa, Tanimbar Is., Tarakan, Tebingtinggi, Ternate, Timor (formerly Netherlands Timor), and Weh).*

2. Delete subparagraph (7) of paragraph (a).

3. Amend subparagraph (8) (ii) of paragraph (a) to read as follows:

(ii) Parasites and predators of harmful insects intended for the control of such insects are admitted only if addressed to the Chief of the Phyto-pathological Institute at Bogor.

4. In paragraph (b) (1) strike out the item "Group shipments: Limited to three parcels." in the tabulated information following the parcel-post rates and insert in lieu thereof "Group shipments: No.".

5. Amend paragraph (b) (5) to read as follows:

(5) *Observations.* (i) Service is restricted to gift parcels.

(ii) The customs declarations must show both the gross and the net weight. In the case of foodstuffs, etc., the gross weight of the whole parcel and the net weight of each kind of merchandise must be indicated.

(iii) Addressees in Indonesia are required to obtain import licenses for all gift parcels exceeding 40 gold francs (about $13) in value. Addressees are also required to obtain special authorization to receive gift parcels which contain any articles which are considered as luxury items by the Indonesian authorities.

6. Amend subdivision (ii) of paragraph (b) (6) to read as follows:

(ii) *For sanitary reasons.* Dry white lead is admitted only for scientific or professional use, or if specially authorized by the President of Indonesia.

7. Add the following paragraph to paragraph (b) (6) (iv):

(c) Sarongs and all cloth bearing batik designs.

(R. S. 161, 396, 398; secs. 304, 309, 42 Stat. 24, 25, 48 Stat. 943; 5 U. S. C. 22, 369, 372)

PROPOSED RULE MAKING

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 240]

SOLICITATION OF PROXIES

PROPOSED RULE MAKING

Notice is hereby given that the Securities and Exchange Commission has under consideration the following proposal for the amendment of its proxy rules under the Securities Exchange Act of 1934.

It is proposed to amend Schedule 14A of the proxy rules by adding thereto a new item calling for information as to the previous vote on any proposal to be acted upon which has been submitted to a record vote of security holders within the past three years. The purpose of the new item would be to inform security holders as to the total number of votes for or against each such proposal and the number of such votes represented by proxy ballots not marked by security holders.

The text of the proposed new item reads as follows:

Item 22. Vote on proposals previously submitted. If the solicitation is to be made on behalf of the management, furnish the following information as to any proposal to be acted upon, other than the election of directors, if substantially the same proposal has been submitted to a vote of security holders within three years prior to the meeting for which proxies are to be solicited:

(a) The total number of affirmative votes and the total number of negative votes cast in regard to such proposal at the time of its

latest previous submission to a vote of security holders; and

(b) The number of such affirmative votes and the number of such negative votes cast pursuant to proxies in which security holders did not specify a choice either for or against such proposal.

All interested persons are invited to submit data, views and comments on the above-mentioned proposal in writing to the Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., on or before August 11, 1952.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

Production and Marketing Administration

NEW HOLLAND SALES STABLES

POSTING OF STOCKYARD

The Secretary of Agriculture has information that the New Holland Sales Stables, New Holland, Pennsylvania, is a stockyard as defined in section 302 of the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 202), and should be made subject to the provisions of the act.

Therefore, notice is hereby given that the Secretary of Agriculture proposes to issue a rule designating the stockyard named above a posted stockyard subject to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 181 et seq.), as is provided in section 302 of that act. Any interested person who desires to do so may submit, within 15 days of the publication of this notice, any data, views or arguments, in writing, on the proposed rule to the Director, Livestock Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C.

Done at Washington, D. C., this 14th day of July 1952.

FRESH PEAS AND CAULIFLOWER GROWN IN ALAMOSA, RIO GRANDE, CONEJOS, COSTILLA, AND SAGUACHE COUNTIES IN COLORADO

NOTICE OF PROPOSED BUDGET AND RATE OF ASSESSMENT

Notice is hereby given that the Secretary of Agriculture is considering the approval of the budget and rate of assessment hereinafter set forth, which were recommended by the Administrative Committee, established pursuant to Marketing Agreement No. 67 and Order No. 10, as amended (7 CFR Part 910) regulating the handling of fresh peas and cauliflower grown in Alamosa, Rio Grande, Conejos, Costilla and Saguache Counties in Colorado, issued under the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.).

Consideration will be given to any data, views, or arguments pertaining thereto, which are filed in triplicate with the Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., not later than 15 days following publication of this notice in the FEDERAL REGISTER. The proposals are as follows:

§ 910.206 *Budget of expenses and rate of assessment.* (a) The expenses necessary to be incurred by the Administrative Committee, established pursuant to Marketing Agreement No. 67 and Order No. 10, as amended, to enable such committee to carry out its functions pursuant to the provisions of the aforesaid marketing agreement and order, as amended during the fiscal year ending May 31, 1953, will amount to $2,000.00.

(b) The rate of assessment to be paid by each handler who first ships fresh peas or cauliflower shall be one-half of one cent ($0.005) per bushel of peas or per crate of cauliflower, or the respective equivalent quantities thereof, handled by him as the first handler thereof during said fiscal year; and

(3) The terms used in this section shall have the same meaning as when used in Marketing Agreement No. 67 and Order No. 10, as amended (7 CFR Part 910).

(Sec. 5, 49 Stat. 753; as amended; 7 U. S. C. and Sup., 608c)

CIVIL AERONAUTICS BOARD

[14 CFR Part 298]

[Economic Regs. Draft Release No. 55]

AIR TAXI OPERATORS; OPERATIONS OVER CERTIFICATED HELICOPTER ROUTES

NOTICE OF PROPOSED RULE MAKING

JULY 14, 1952.

By petition filed with the Board on June 12, 1952, the National Air Taxi Conference, on behalf of seventy-two air taxi operators engaged in air taxi service, has requested the Board to initiate rule-making proceedings looking to the repeal of paragraph (d) of § 298.7 of the Economic Regulations or to the amendment of Part 298 insofar as it currently prohibits irregular air taxi service between points served through helicopter passenger service. Section 298.7 (d) now provides in substance that no service whatever shall be offered or performed by an air taxi operator between any two points between which scheduled helicopter passenger service is provided by the holder of a certificate of public convenience and necessity authorizing such service. Repeal of § 298.7 (d) without more would authorize regular services by air taxi operators between such points.

Section 4 (d) of the Administrative Procedure Act requires the Board to accord to any interested person the right to petition for the issuance, amendment or repeal of a rule, and the Board's Procedural Regulation 302.38 makes provision for such petition. The Board believes that the petition of the National Air Taxi Conference discloses sufficient reasons in support thereof to justify the institution of public rule-making procedures on such petition and an examination de nova of the extent to which operations by air taxi operators between points also served by certificated helicopter operations should be permitted. Accordingly, notice is hereby given that the Board will consider the promulgation of an amendment to Part 298 of the Economic Regulations (14 CFR 298.7), the effect of which, if adopted, would be to grant the relief requested, either in whole or in part. Although no specific proposal for amendment, other than the complete deletion of § 298.7 (d) was made by petitioners, the Board considers that the issues involved in this rule-making proceeding are whether air taxi operators as a class should be permitted to operate, without restriction as to number, flights between points between which certificated helicopter service is rendered, or whether such operations should be permitted upon an infrequent and irregular basis or be otherwise limited, restricted or conditioned, or whether such operations should be entirely prohibited.

Interested persons may participate in the proposed rule-making through the submission of three copies of written data, views, or arguments pertaining thereto, addressed to the Secretary, Civil Aeronautics Board, Washington, D. C. All relevant matter received on or before August 18, 1952, will be considered by the Board before taking action on the proposed rule.

Meanwhile, by special regulation issued concurrently herewith the Board has authorized continuance of irregular operations by air taxi operators between points served for passengers by certificated helicopter service to the same extent as would have been permitted by small irregular operators under Part 291.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply sec. 416, 52 Stat. 1004; 49 U. S. C. 496)

By the Civil Aeronautics Board.

ECONOMIC STABILIZATION AGENCY

Office of Price Stabilization

[Ceiling Price Regulation 32, Supplementary Regulation 2, Section 3, Special Order 20]

MASSINGILL-PAPALOTE FIELD, BEE COUNTY, TEXAS

CRUDE PETROLEUM CEILING PRICES ADJUSTED ON AN IN-LINE BASIS

Statement of considerations. This special order adjusts the ceiling price for the purchase of crude petroleum produced from the Massingill-Papalote Field, Bee County, District II, Texas.

The Office of Price Stabilization has been requested to eliminate the differentials heretofore imposed upon crude petroleum produced from the Massingill-Papalote Field, Bee County, District II, Texas. The two wells comprising this field were reperforated in the same zone and the subsequent production is Refugio Heavy type crude. This crude petroleum is now sold at a lower price than that paid for crude petroleum of comparable quality produced in the same general area. Due to this change in the type of crude, this differential should no longer be imposed.

From the information available to this Office, it appears that the adjusted price will be in line with the ceiling price of comparable Refugio type crude petroleum produced in this same area. This price is $2.90 per barrel for 40° API gravity and above with a 2-cent differential less for each degree of gravity below 40 degrees.

Special provisions: For the reasons set forth in the statement of considerations and pursuant to the provisions of Section 3 of Supplementary Regulation 2 to Ceiling Price Regulation 32, *It is ordered:*

1. That the ceiling price at the lease receiving tank for Refugio crude petroleum produced from the Massingill-Papalote Field, Bee County, Texas shall be: $2.90 per barrel for 40° API gravity and above with a 2-cent differential less for each degree of gravity below 40 degrees.

2. All provisions of Ceiling Price Regulation 32, except as inconsistent with the provisions of this order, shall remain in full force and effect as to the commodities covered by this order.

3. This order may be amended, modified or revoked by the Director of Price Stabilization at any time.

Effective date. This special order shall become effective on July 10, 1952.

ELLIS ARNALL, *Director of Price Stabilization.*

JULY 9, 1952.

[F. R. Doc. 52-7669; Filed, July 9, 1952; 4:40 p. m.]

[Ceiling Price Regulation 61, Supplementary Regulation 3, Special Order No. 1]

PRODUCED BY WESTERN SULPHUR INDUSTRIES, INC.

CEILING PRICES FOR EXPORT SALES AND SALES FOR EXPORT OF SULPHUR

Statement of considerations. In accordance with the provisions of Supplementary Regulation 3 to Ceiling Price Regulation 61, the applicant named in this Special Order, Western Sulphur Industries of Boston, Massachusetts, has applied for the establishment of a ceiling price for sales for export of sulphur produced and sold by Western Sulphur Industries. The applicant has also requested that the Director of Price Stabilization adjust its ceiling price for its export sales of sulphur produced by the applicant and also that the Director establish a ceiling price for export sales of its sulphur by merchant exporters.

The applicant has admitted the information required by Section 3 of Supplemenatry Regulation 3 to Ceiling Price Regulation 61 and has produced evidence which in the judgment of the Director sufficiently satisfies the requirements of this Section of the Regulation.

Upon the basis of the information submitted, it appears that the applicant cannot reasonably be expected to continue to produce sulphur from its deposit for export sales and for sales for export at ceiling prices which are now applicable to such sales. It further appears that the sulphur which the applicant produces is needed for the world market.

It is the opinion of the Director that the ceiling price which is being established by this Special Order for sales for export by the applicant accurately reflects the estimated cost of producing and selling the sulphur. It is also the opinion of the Director that the ceiling price which is being established by this special order for export sales by the applicant and by merchant exporters accurately reflects the estimated cost of producing the sulphur plus a markup which is customary in the export trade.

This special order, therefore, by Section 1, below, establishes a ceiling price of $104.00 per long ton of 2240 pounds for 99½ percent sulphur, in bulk, f. o. b. Sulphurdale, Utah, for sales for export

of sulphur produced by the applicant when sold by the applicant, Western Sulphur Industries.

This special order also, therefore, by section 2, below, establishes a ceiling price of $114.00 per long ton for 99½ percent sulphur in bulk, f. o. b. Sulphurdale, Utah, for export sales by the applicant, Western Sulphur Industries, and for export sales by merchant exporters of sulphur produced by the applicant.

Special provisions. For the reasons set forth in the statement of considerations and pursuant to Supplementary Regulation 3 to Ceiling Price Regulation 61, this special order is hereby issued:

1. The ceiling price for sales for export by Western Sulphur Industries of Boston, Massachusetts, of non-Frasch mined sulphur produced by it, be and hereby is established at $104.00 per long ton of 2240 pounds for 99½ percent sulphur in bulk.

2. The ceiling price for export sales by Western Sulphur Industries and for export sales by merchant exporters of non-Frasch mined sulphur produced by Western Sulphur Industries, be and hereby is established at $114.00 per long ton of 2240 pounds for 99½ percent sulphur in bulk.

3. On or before September 30, 1952, Western Sulphur Industries shall execute and file with the Office of Price Stabilization, Washington 25, D. C., the report required by section 4 (c) of SR 3 to CPR 61.

4. This special order or any provision thereof may be revoked, suspended or amended by the Director of Price Stabilization at any time.

Effective date. This special order shall become effective July 11, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 10, 1952.

[F. R. Doc. 52-7704; Filed, July 10, 1952; 4:47 p. m.]

[Ceiling Price Regulation 83, Section 2, Special Order 1, Amdt. 2]

PACKARD MOTOR CAR CO.

BASIC PRICES AND CHARGES FOR NEW PASSENGER AUTOMOBILES

Statement of considerations. Special Order 1 established a schedule of prices and charges pursuant to section 2 of Ceiling Price Regulation 83 for sellers of new passenger automobiles and factory installed extra equipment manufactured by the Packard Motor Car Company. Subsequent to the issuance of Special Order 1 the Packard Motor Car Company has introduced new items of factory installed extra, special or optional equipment on its Packard new passenger automobiles and a wholesale ceiling price has been approved for these new items. Special Order 1 is, therefore, amended to include the charges for the new items listed in paragraph numbered 1 below of extra, special or optional equipment when installed at the factory, and for the new items listed in paragraph numbered 2 below of extra, special or optional equipment when installed at the factory and when the customer takes delivery at the factory.

Special provisions. For the reasons set forth in the Statement of Considerations and pursuant to section 2 of Ceiling Price Regulation 83, this amendment to Special Order 1, is hereby issued.

1. The following charges for extra, special or optional equipment when installed at the factory are added to the list of extra, special or optional equipment contained in paragraph 2 of Special Order 1:

PACKARD PASSENGER AUTOMOBILES	
Top Boot and Bag (Convertible only)	$40.17
Rear Lamp Extension Equipment (200 and 200 DeLuxe series)	21.87

2. The following charges for extra, special or optional equipment when installed at the factory and when the customer takes delivery at the factory are added to the list of extra, special or optional equipment contained in paragraph 3 of Special Order 1:

PACKARD PASSENGER AUTOMOBILES	
License Plate Frame (all lines and series)	$4.04
Saron Plastic—Sealtuft Seat Covers:	
Touring sedan (2592 and 2562)	45.30
Touring sedan (2572 and 2552)	46.17
Club sedan (2595 and 2565)	45.01
Visor, outside (all lines and series)	22.92

Effective date. This Amendment 2 to Special Order 1 shall become effective July 17, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

FEDERAL POWER COMMISSION

[Docket No. G-1990]

NEW YORK STATE NATURAL GAS CORP.

NOTICE OF APPLICATION

JULY 14, 1952.

Take notice that New York State Natural Gas Corporation (Applicant), a New York corporation with its principal office in New York City, New York, filed on July 2, 1952, an application pursuant to section 7 of the Natural Gas Act for (1) a temporary certificate of public convenience and necessity forthwith, and a permanent certificate in due course authorizing the emergency sale of natural gas on an interruptible basis to Iroquois Gas Corporation (Iroquois), of 3,600 Mcf of natural gas daily, for a period beginning about July 1, 1952, and ending September 15, 1952.

The application recites that Iroquois is making extensive changes in its pipeline system making necessary the purchase of 3,600 Mcf of natural gas daily in addition to volumes now purchased on a firm basis. No new facilities will be required.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 1st day of August 1952. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G-1992]

MISSISSIPPI VALLEY GAS CO. AND MISSISSIPPI GAS CO.

NOTICE OF APPLICATION

JULY 14, 1952.

Take notice that Mississippi Valley Gas Company (Mississippi Valley), a Mississippi corporation, address Jackson, Mississippi, and Mississippi Gas Company (Mississippi Gas), a Delaware corporation, address Meridian, Mississippi, filed on July 2, 1952, a joint application (1) for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Mississippi Valley to acquire by purchase and operate and to acquire by lease and operate certain transmission pipe-line facilities presently owned or leased and operated by Mississippi Gas, and (2) for authorization pursuant to section 7 (b) of the Natural Gas Act for Mississippi Gas to abandon by sale or assignment of lease said transmission pipe-line facilities and to abandon the service rendered therefrom.

The facilities involved consist of Mississippi Gas' gas transmission pipeline system in the Mississippi counties of Clay, Monroe, Chickasaw, and Lee; certain related storage facilities in the Amory gas field of Monroe County, Mississippi; and the gas transmission pipeline system operated by Mississippi Gas in the counties of Winston, Choctaw, Webster, Calhoun, Oktibbeha, and Chickasaw, under lease from North Central Natural Gas District.

The above described facilities are used to transmit natural gas from the pipe line of Southern Natural Gas Company, of which Mississippi Gas is a wholly-owned subsidiary, to a number of towns in the State of Mississippi. Mississippi Valley proposes to continue the same service now rendered by Mississippi Gas.

The purchase price to be paid by Mississippi Valley to Mississippi Gas is $3,300,000, such price to be subject to closing adjustments according to the sales agreement. Mississippi Valley proposes to finance the acquisition by means of a $1,150,000 bank loan to be paid off in installments during the years 1953 to 1956 and a $2,250,000 short-term bank loan to be refinanced under Mississippi Valley's Mortgage and Deed of Trust, as supplemented.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 1st day of August 1952. The application is on file with the Commission for public inspection.

OFFICE OF DEFENSE MOBILIZATION

[CDHA 62]

FINDING AND DETERMINATION OF CRITICAL DEFENSE HOUSING AREAS UNDER THE DEFENSE HOUSING AND COMMUNITY FACILITIES AND SERVICES ACT OF 1951 (PUB. LAW 139, 82D CONG.)

JULY 16, 1952.

Upon a review of the construction of new defense plants and installations, and the reactivation or expansion of operations of existing defense plants and installations, and the in-migration of defense workers or military personnel to carry out activities at such plants or installations, and the availability of housing and community facilities and services for such defense workers and military personnel in each of the areas set forth below, I find that all of the conditions set forth in section 101 (b) of the Defense Housing and Community Facilities and Services Act of 1951 (Pub. Law 139, 82d Cong., 1st Sess.) exist.

Accordingly, pursuant to section 101 of the Defense Housing and Community Facilities and Services Act of 1951 and by virtue of the authority vested in me by paragraph number 1 of Executive Order 10296 of October 2, 1951, I hereby determine that each of said areas is a critical defense housing area.

Hibbing-Grand Rapids, Minnesota, Area. (The area consists of that portion of the State of Minnesota bounded as follows: Beginning at the northeast corner of Great Scott Township and the eastern boundary of range 19 in St. Louis County, and thence directly west along the northern boundary line of township line 59 to the northwest corner of Marcell township in Itasca County; thence directly south along the western boundary line of range 27 to the southwest corner of township 52, range 27 in Aitkin County; thence east along the southern boundary line of township 52 to the southeast corner of Ness Township in St. Louis County; thence north along the eastern boundary line of range line 19 to the northeast corner of Great Scott Township in St. Louis County including Buhl Village, Chisholm City, Fraser City, Hibbing Village, Kinney Village, Meadowlands Village, Orr Village, Hill City, Grand Rapids Village, La Prairie Village, Calumet Village, Marble Village, Taconite Village, Keewatin Village, Nashwauk Village, Warba Village, Zemple Village, Cooley Village, Coleraine Village, Cohasset Village, Bovey Village and Big Fork Village except lands in State and National Forests, all in Aitkin, Itasca and St. Louis Counties, Minnesota.)

Virginia, Minnesota, Area. (The area consists of the following Townships: Biwabik, Owens, T-62-R-17, T-62-R-16, Breitung, Angora, T-61-R-17, Vermillion Lake, Kugler, T-61-R-14, T-60-R-18, Sandy, Pike, Embarrass, Wassa, T-59-R-18 (PT), Wouri, T-59-R-16 (PT), White Mesaba, T-58½-R-17, Missabe Mountain, T-58-R-14, Clinton, Fayal, T-57-R-16, T-57-R-14, McDavitt, T-56-R-17, T-56-R-16, Colvin, T-56-R-14, T-55-R-18, Ellsburg, T-55-R-15, T-55-R-14, Kelsey, Cotton, T-54-R-15, T-54-R-14, Payne, Northland, T-53-R-16, T-53-R-15, Nichols, including Aurora Village, Biwabik City, Iron Junction Village, Eveleth City, Franklin Village, Gilbert City, McKinley Village, Leonidas Village, Virginia City, and Mountain Iron Village, except lands in State and National Forests; all in St. Louis County, Minnesota.)

SECURITIES AND EXCHANGE COMMISSION

[File No. 1-941]

BREWING CORP. OF AMERICA

NOTICE OF APPLICATION TO STRIKE FROM LISTING AND REGISTRATION, AND OF OPPORTUNITY FOR HEARING

JULY 11, 1952.

The New York Stock Exchange, pursuant to section 12 (d) of the Securities Exchange Act of 1934 and Rule X-12D2-1 (b) promulgated thereunder, has made application to strike from listing and registration the Capital Stock, $15 Par Value, of Brewing Corporation of America.

The application alleges that the reasons for striking this security from listing and registration on this exchange are as follows:

(1) As a result of acquisition by Canadian Breweries Limited and acquisition by Canadian Breweries, Inc., its wholly owned subsidiary, of shares of the above security by means of exchange offers and by means of cash purchases, on April 23, 1952, there remained outstanding in the hands of the public only approximately 5,000 shares of the above security having an approximate aggregate market value of $181,000.

(2) The above security is no longer suitable for trading on applicant exchange in view of the reduced number of shares outstanding in the hands of the public after deduction of concentrated holdings, and in view of the inadequate distribution when considered in the light of the indicated aggregate market value of the shares outstanding in the hands of others than Canadian Breweries Limited and its wholly owned subsidiary.

Upon receipt of a request, prior to August 12, 1952, from any interested person for a hearing in regard to terms to be imposed upon the delisting of this security, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person requesting the hearing and the position he proposes to take at the hearing with respect to imposition of terms or conditions. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application, and other information contained in the official file of the Commission pertaining to this matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File No. 70-1542]

MILWAUKEE ELECTRIC RAILWAY & TRANSPORT CO., AND WISCONSIN ELECTRIC POWER CO.

ORDER PERMITTING WITHDRAWAL OF JOINT APPLICATION AND DECLARATION

JULY 10, 1952.

The Milwaukee Electric Railway & Transport Company ("Transport") and its parent, Wisconsin Electric Power Company ("Electric"), a registered holding company, having filed on June 2, 1947, a joint application and declaration pursuant to the applicable provisions of the Public Utility Holding Company Act of 1935 and the general rules and regulations promulgated thereunder wherein it was proposed that Transport would redeem the then outstanding balance of its First Mortgage 4 percent bonds held by Electric, the cash proceeds for such redemption to be provided from the proposed sale by Transport of its transportation properties; and

The Commission having on June 26, 1947, issued its order granting the application and permitting the declaration to become effective; and

The Commission having granted successive extensions of time to June 30,

1948, for carrying out these proposals; and

Applicants-declarants, on June 19, 1952, having requested that they be permitted to withdraw said application and declaration for the reason that the transactions were not carried out as proposed, and the Commission deeming it appropriate to grant such request:

It is ordered, That the joint application-declaration filed herein be, and the same hereby is, permitted to be withdrawn.

By the Commission.

[File No. 812-789]

EQUITY CORP. ET AL.

NOTICE OF APPLICATION

JULY 14, 1952.

In the matter of The Equity Corporation, Industrial Insurance Company and State-Wide Insurance Agency, Inc., File No. 812-789.

Notice is hereby given that the Industrial Insurance Company, (Industrial), 103 Park Avenue, New York, New York, has filed an application pursuant to section 6 (c) of the Investment Company Act of 1940, requesting an order exempting from section 17 (e) (1) of the act a proposed amendment to its agency agreement pursuant to which State-Wide Insurance Agency, Inc. (State-Wide), 800 East Main Street, Richmond, Virginia, and its agents and employees receive commissions arising from the sale of insurance policies by State-Wide as agent for Industrial.

The Equity Corporation (Equity), 103 Park Avenue, New York, New York, a registered investment company, through indirect stock ownership controls both Industrial and State-Wide. Section 17 (e) (1) of the act makes it unlawful for State-Wide, or any person affiliated with it, acting as agent, to accept from any source any compensation for the purchase or sale of any property to or for Industrial or any controlled company of Equity, unless an exemption therefrom is granted pursuant to section 6 (c) of the act. Such an exemption was granted by the Commission on April 27, 1951 with respect to the existing agency contract between State-Wide and Industrial. The present application requests an exemptive order with respect to a proposed amendment to such agency contract. Pursuant to the proposed amended agency arrangement, which will be effective as of April 1, 1952, State-Wide will receive a straight commission of 15 percent of net premiums payable at the time of risk placement. State-Wide will no longer receive a commission representing 10 percent of annual premiums earned, but will receive an additional compensation representing an amount equal to the sum by which loss experience (including adjustment expense) is less than 70 percent of earned premiums, as compared with 60 percent of such premiums as now provided under the existing contract.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application which is on file in the offices of the Commission in Washington, D. C.

Notice is further given that an order granting the application, in whole or in part, and upon such conditions as the Commission may deem necessary or appropriate, may be issued by the Commission at any time after July 25, 1952, unless prior thereto a hearing upon the application is ordered by the Commission, as provided in Rule N-5 of the rules and regulations promulgated under the act. Any interested person may, not later than July 23, 1952, at 5:30 p. m., e. d. s. t., submit to the Commission in writing his views on any additional facts bearing upon this application or the desirability of a hearing thereon, or request the Commission in writing that a hearing be held thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington, D. C., and should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reasons for such request, and the issues of fact or law raised by the application which he desires to controvert.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 52-7883; Filed, July 17, 1952; 8:45 a. m.]

[File No. 812-796]

MASSACHUSETTS INVESTORS TRUST

NOTICE OF APPLICATION

JULY 14, 1952.

Notice is hereby given that Massachusetts Investors Trust (hereinafter called "MIT"), 200 Berkeley Street, Boston 16, Massachusetts, an open-end diversified management investment company registered under the Investment Company Act of 1940, has filed an application under Rule N-17D-1 promulgated under the act with respect to two proposed amendments to its Agreement and Declaration of Trust (hereinafter called the "Indenture"). The application indicates that these proposed amendments, along with other proposed amendments not relevant to this application, will be submitted to shareholders' vote if the application is granted.

The Indenture provides: "The Trustees shall from time to time determine the remuneration to be paid to each Trustee for his services, the retirement pay to be paid to each retired Trustee, and the remuneration to be paid to each member of the Advisory Board." The Indenture now provides that the aggregate of all such payments for any one calendar quarter shall not exceed 5 percent of the gross earnings for that quarter, excluding capital gains and losses, subject to decrease depending upon the number of shares outstanding in excess of 6,000,000. It is proposed that this limitation be changed to provide that the aggregate of all such payments shall not exceed a sum computed under a new formula which is based upon a percentage of average asset value and a percentage of gross earnings, excluding capital gains and losses, without reference to the number of shares outstanding. This proposed amendment also provides that the Trustees shall have the right to establish a reserve to provide for retirement pay to retired Trustees and, from time to time, to credit to such reserve such amounts as they may determine, and to determine what amounts, if any, shall be charged against and paid out of such reserve to retired Trustees; however, the aggregate of payments and credits which shall be subject to the limitation computed under the new formula in any quarter shall include any credits made to such reserve in such quarter, but shall not include any payments charged against said reserve in such quarter.

The other proposed amendment relevant to this application is an amendment to change the retirement age of female employees, which does not include Trustees and members of the Advisory Board, from sixty-five (65) to sixty (60) years of age.

Rule N-17D-1 provides, in part, that "No affiliated person of any registered investment company, or of any company controlled by any such registered company, shall participate in, or effect any transaction in connection with, any bonus, profit-sharing or pension plan or arrangement in which any such registered or controlled company is a participant unless an application regarding such plan or arrangement has been filed with the Commission and has been granted by an order entered prior to the submission of such plan or arrangement to security holders for approval, or prior to the adoption thereof, if not so submitted."

All interested persons are referred to said application which is on file at the Washington, D. C. office of the Commission, for a more detailed statement of the matters of fact and law therein asserted.

Notice is further given that an order granting the application may be issued by the Commission at any time on or after July 25, 1952 unless prior thereto a hearing upon the application is ordered by the Commission, as provided by Rule N-5 of the rules and regulations promulgated under the act. Any interested person may, not later than July 23, 1952, at 5:30 p. m., e. d. s. t., submit to the Commission in writing his views or any additional facts bearing upon this application or the desirability of a hearing thereon, or request the Commission in writing that a hearing be held thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., and should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reasons for such request, and the

issues of fact or law raised by the application which he desires to controvert.

By the Commission.

INTERSTATE COMMERCE COMMISSION

[Sec. 5a, Application 41]

MIDDLE ATLANTIC TERRITORY; SECTION 22 AGREEMENT

APPLICATION FOR APPROVAL OF AGREEMENT

JULY 15, 1952.

The Commission is in receipt of the above-entitled and numbered application for approval of an agreement under the provisions of section 5a of the Interstate Commerce Act.

Filed July 11, 1952, by: C. M. Carter, Attorney-in-Fact, 2111 E Street NW., Washington, D. C.

Agreement involved: An agreement between and among common carriers by motor vehicle relating to rates, classifications, allowances and charges or rules and regulations pertaining thereto governing the transportation of property for the United States Government pursuant to the provisions of section 22 of the Interstate Commerce Act, between points in Middle Atlantic territory, and between points in that territory, on the one hand, and points in New England and Canada, on the other, and procedures for the joint initiation, consideration, and establishment thereof.

The complete application may be inspected at the office of the Commission in Washington, D. C.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 20 days from the date of this notice. As provided by the general rules of practice of the Commission, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing.

By the Commission, Division 2.

[4th Sec. Application 27211]

SPODUMENE ORE FROM KINGS MOUNTAIN, N. C., TO VINELAND, N. J.

APPLICATION FOR RELIEF

JULY 14, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff ICC No. 1188.

Commodities involved: Spodumene ore or concentrates, carloads.

From: Kings Mountain, N. C.

To: Vineland, N. J.

Grounds for relief: Competition with rail carriers, circuitous routes, to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, ICC No. 1188, supl. 50.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 27221]

FOREIGN WOODS FROM SOUTH CAROLINA TO LOUISIANA

APPLICATION FOR RELIEF

JULY 15, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff ICC No. 1226.

Commodities involved: Lumber, logs, flitches and piling of foreign woods, dimension stock, built-up woods, veneer, and carpenter's moulding, carloads.

From Conway, Darlington, Kingstree, Orangeburg, and Sumpter, S. C.

To: Baton Rouge, Bogalusa and New Orleans, La.

Grounds for relief: Competition with rail carriers, circuitous routes, to maintain grouping.

Schedules filed containing proposed rates; C. A. Spaninger, Agent, ICC No. 1226, supl. 29.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[4th Sec. Application 27223]

MOTOR-RAIL-MOTOR RATES BETWEEN BOSTON AND SPRINGFIELD, MASS., AND HARLEM RIVER, N. Y.

APPLICATION FOR RELIEF

JULY 15, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: The New York, New Haven and Hartford Railroad Company and Sommer's Motor Lines, Inc.

Commodities involved: All commodities.

Between: Boston and Springfield, Mass., on the one hand, and Harlem River, N. Y., on the other.

Grounds for relief: Competition with motor carriers.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 27222]

MIXED CARLOADS OF MERCHANDISE FROM PEORIA AND CHICAGO, ILL., TO POINTS IN GEORGIA AND FLORIDA

APPLICATION FOR RELIEF

JULY 15, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. G. Raasch, Agent, for carriers parties to his tariff ICC No. 752.

Commodities involved: Merchandise in mixed carloads.

From: Peoria, Ill., and Chicago, Ill., and points grouped therewith.

To: Specified points in Georgia and Florida.

Grounds for relief: Competition with rail carriers, circuitous routes, competition with motor carriers.

Schedules filed containing proposed rates: R. G. Raasch, Agent, ICC No. 752, supl. 9.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

TITLE 3—THE PRESIDENT

PROCLAMATION 2981

UNITED NATIONS DAY, 1952

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS the founding of the United Nations has given the people of the world an organization through which nations may resolve their differences without resort to war and has made possible greater international cooperation in the economic, political, and cultural fields; and

WHEREAS the United Nations continues to be the only existing international organ which offers mankind a hope for ultimate world peace; and

WHEREAS the realization by citizens of other nations that the overwhelming majority of Americans support the United Nations and its great purposes would help to speed the day when there will in fact be peace on earth, good will toward men; and

WHEREAS the General Assembly of the United Nations has declared that October 24, the anniversary of the entry into force of the United Nations Charter, shall be dedicated each year to the dissemination of information concerning the aims and accomplishments of the United Nations:

NOW, THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, do hereby urge the citizens of this Nation to observe Friday, October 24, 1952, as United Nations Day by sending greetings to friends, relatives, and associates in other countries which are members of the United Nations, and by expressing their confidence in the United Nations, their friendship for other peoples, and their faith in the ultimate demonstration throughout the world of the brotherhood of man.

I also call upon the officials of the Federal, State, and local Governments, the National Citizens' Committee for United Nations Day, representatives of civic, educational, and religious organizations, agencies of the press, radio, television, motion pictures, and other communications media, and all citizens to cooperate in appropriate observance of this day throughout our country.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this 17th day of July in the year of our Lord nineteen hundred and fifty-two, [SEAL] and of the Independence of the United States of America the one hundred and seventy-seventh.

HARRY S. TRUMAN

By the President:

DEAN ACHESON, *Secretary of State.*

PROCLAMATION 2982

TERMINATING THE TURKISH TRADE AGREEMENT PROCLAMATIONS

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

1. WHEREAS, under the authority vested in him by section 350(a) of the Tariff Act of 1930, as amended by the Act of June 12, 1934, entitled "An Act to amend the Tariff Act of 1930" (48 Stat. 943), which amending Act was extended by Joint Resolution of Congress, approved March 1, 1937 (50 Stat. 24), the President of the United States entered into a trade agreement with the President of the Turkish Republic on April 1, 1939 (54 Stat. 1871), and proclaimed such trade agreement by proclamations of April 5, 1939 (54 Stat. 1870), and November 30, 1939 (54 Stat. 1896);

2. WHEREAS the Government of the United States of America and the Government of the Republic of Turkey have agreed to terminate the said trade agreement, effective August 4, 1952;

3. WHEREAS the said section 350(a) of the Tariff Act of 1930 authorities the President to terminate in whole or in part any proclamation carrying out a trade agreement entered into under such section:

NOW, THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, acting under and by virtue of

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended June 19, 1937.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

REVISED BOOKS

TITLE 32
of the
Code of Federal Regulations

Title 32, containing the regulations of the Department of Defense and other related agencies, has been completely revised. Originally a single book, Title 32 is being reissued as two books as follows:

Parts 1–699 ($5.00)
Part 700 to end (to be announced)

These books contain the full text of regulations in effect on December 31, 1951

Order from
Superintendent of Documents, Government Printing Office, Washington 25, D. C.

RULES AND REGULATIONS

TITLE 6—AGRICULTURAL CREDIT

Chapter IV—Production and Marketing Administration and Commodity Credit Corporation, Department of Agriculture

Subchapter B—Export and Diversion Programs

[Amdt. 2]

PART 518—FRUITS AND BERRIES, DRIED AND PROCESSED

DRIED PRUNE AND RAISIN EXPORT PROGRAM SMX 95b

1. Section 518.330 is hereby amended by deleting the entire section and inserting in lieu thereof the following:

§ 518.330 *General statement.* In order to encourage the exportation from the United States of dried fruit, the Secretary of Agriculture, pursuant to the authority conferred by section 32 of Public Law 320, 74th Congress, as amended, hereby announces a Dried Prune and Raisin Export Program, pursuant to which he will make payments to exporters upon the terms and conditions set forth in § 518.331 to § 518.351, inclusive, to United States exporters who comply therewith: *Provided*, That, no export payment will be made if the foreign buyer, in purchasing the dried prunes or raisins exported, makes payment therefor, wholly or in part, with funds appropriated by the Congress of the United States for the fiscal year July 1, 1952, through June 30, 1953, and any export payment so made to any exporter shall be subject to recovery, by the Secretary, if the foreign purchaser has paid for such purchases, in part or in whole, with funds so appropriated.

2. Section 518.333 is hereby further amended to read as follows:

§ 518.333 *Firm sales contracts.* The exporter must, on or after the effective date of this program and prior to 12 o'clock midnight, d. s. t., July 16, 1952, have entered into a firm sales contract (see § 518.331 (g)) covering the sale of dried fruit, as defined in § 518.331 (b), for exportation to an approved country as described in § 518.337: *Provided*, That, with respect to any raisins designated as, or which become, surplus tonnage raisins pursuant to the provisions of Marketing Agreement No. 109 and Order No. 89 (7 CFR Part 989) regulating the handling of raisins produced from raisin variety grapes grown in California, a firm sales contract must have been entered into on or after the effective date of this program and prior to 12 o'clock midnight, d. s. t., August 31, 1952.

3. Section 518.343 (b) is hereby amended by deleting the entire paragraph and inserting in lieu thereof the following:

§ 518.343 *Proof of claim.* • • •

(b) Each sales contract shall show the date of sale, the gross sales price per unit of weight (showing f. a. s. United States port, c. i. f. foreign port, or other basis of such price), the payment to be made to the exporter by the Secretary, the net price per unit of weight to the foreign buyer, the quantity (net weight) of the dried prunes or raisins sold, the country of destination, and shall contain thereon or have attached thereto a signed statement by the exporter that payment by the foreign buyer for the dried fruit does not involve the use of funds appropriated by the Congress of the United States for the fiscal year July 1, 1952, through June 30, 1953. For dried prunes in any pack of mixed dried fruit, each sales contract shall show the information required in the preceding sentence for dried prunes in the mixture.

(Sec. 32, 49 Stat. 774, as amended; 7 U. S. C. 612c)

Effective date. This amendment shall become effective 12 o'clock midnight, d. s. t., July 16, 1952.

Dated this 16th day of July 1952.

[SEAL] S. R. SMITH,
Authorized Representative of the Secretary of Agriculture.

[F. R. Doc. 52-7950; Filed, July 18, 1952; 8:50 a. m.]

Subchapter C—Loans, Purchases, and Other Operations

[1952 C. C. C. Grain Price Support Bulletin 1, Supp. 1, Corn]

PART 601—GRAINS AND RELATED COMMODITIES

SUBPART—1952 CORN LOAN AND PURCHASE AGREEMENT PROGRAM

A price support program has been announced for the 1952 crop of corn. The 1952 C. C. C. Grain Price Support Bulletin 1, (17 F. R. 3521), issued by the Commodity Credit Corporation and containing the general requirements with respect to price support operations for grains and related commodities produced in 1952, is supplemented as follows:

Sec.
601.1601 Purpose.
601.1602 Availability of price support.
601.1603 Eligible corn.
601.1604 Warehouse receipts.
601.1605 Determination of quantity.
601.1606 Determination of quality.
601.1607 Maturity of loans.
601.1608 Determination of support rates.
601.1609 Warehouse charges.
601.1610 Settlement.

AUTHORITY: §§ 601.1601 to 601.1610 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 101, 401, 63 Stat. 1051; 15 U. S. C. Sup., 714c, 7 U. S. C. Sup., 1441, 1421.

§ 601.1601 *Purpose.* This subpart states additional specific requirements which, together with the general requirements contained in the 1952 C. C. C. Grain Price Support Bulletin 1, (17 F. R. 3521), apply to loans and purchase agreements under the 1952-Crop Corn Price Support Program.

§ 601.1602 *Availability of price support*—(a) *Method of support.* Price support will be made available through farm-storage and warehouse-storage loans and through purchase agreements.

(b) *Area.* Farm-storage and warehouse-storage loans and purchase agreements will be available wherever corn is grown in the continental United States except that farm-storage loans will not be available in areas where the PMA State committee determines that corn cannot be safely stored on the farm.

(c) *Where to apply.* Application for price support should be made at the office of the PMA county committee which keeps the farm-program records for the farm.

(d) *When to apply.* Loans and purchase agreements will be available from the time of harvest through May 31, 1953: *Provided*, That in areas where it

is determined by the PMA State committee that producers are not in a position to store corn safely for the full storage period because of infestation by angoumois moths or other insects, adverse climatic conditions, or other factors affecting the safe storage of corn the final date of availability of loans and purchase agreements shall be such earlier date as may be determined by the PMA State committee. Such earlier date shall be not later than thirty days prior to the first day of the 10-day delivery period established in accordance with the provisions of § 601.1607. The PMA State committee shall notify producers in the area through public announcement sufficiently in advance of such date in order to allow producers a reasonable period of time in which to place their corn under loans or purchase agreements. The applicable documents must be signed by the producer and delivered to the PMA county committee not later than the final date of availability of loans and purchase agreements in the area.

(e) *Eligible producer.* An eligible producer shall be an individual, partnership, association, corporation, or other legal entity producing corn in 1952 as landowner, landlord, tenant, or sharecropper.

§ 601.1603 *Eligible corn.* At the time the corn is placed under loan or delivered under a purchase agreement, it must meet the following requirements:

(a) The corn must be of the classes Yellow Corn (Class I), White Corn (Class II), or Mixed Corn (Class III) and must have been produced in the continental United States in 1952 by an eligible producer.

(b) The corn must be ear or shelled corn: *Provided*, That irrespective of the provisions of the mortgage supplement relating to delivery of ear corn upon payment of the cost of shelling, the corn must be shelled before delivery is made under loans or purchase agreements.

(c) (1) The beneficial interest in the corn must be in the person tendering the corn for loan or for delivery under a purchase agreement, and must always have been in him, or must have been in him and a former producer whom he succeeded before the corn was harvested, or, such corn must have been purchased by an eligible producer who will operate a different farm in 1953 from that operated in 1952. In the latter case the number of bushels being placed under loan or purchase agreement must not be in excess of the total number of bushels produced by the producer on the farm operated by him in 1952.

(2) To meet the requirements of succession to a former producer, the rights, responsibilities and interest of the former producer with respect to the farming unit on which the corn was produced shall have been substantially assumed by the person claiming succession. Mere purchase of the crop prior to harvest, without acquisition of any additional interest in the farming unit, shall not constitute succession. The county committee shall make determinations concerning succession.

(d) Corn placed under loan must, except for moisture content, grade No. 3 or better, or No. 4 on the factor of test weight only, but otherwise No. 3 or better, and must meet the following moisture requirements: For ear corn placed under a farm-storage loan, the moisture content must not exceed 20.5 percent if the corn is tendered for loan from time of harvest through February 1953; 19.0 percent if tendered for loan during March 1953; 17.5 percent if tendered for loan during April 1953; and 15.5 percent if tendered for loan during May 1953. For corn placed under a warehouse-storage loan, and for shelled corn placed under a farm-storage loan, the moisture content must not exceed 13.5 percent irrespective of when the corn is tendered for loan.

(e) Corn placed under loan must not grade "weevily."

(f) Corn delivered under a purchase agreement must grade No. 3 or better, or No. 4 on the factor of test weight only but otherwise No. 3 or better. Corn delivered from farm storage under a purchase agreement must not contain in excess of 17.5 percent moisture. Corn represented by warehouse receipts tendered to CCC under a purchase agreement must not contain in excess of 13.5 percent moisture and must not grade "weevily."

§ 601.1604 *Warehouse receipts.* Warehouse receipts, representing corn in approved warehouse storage to be placed under loan or delivered under a purchase agreement, must meet the requirements of this section:

(a) Warehouse receipts must be issued in the name of the producer, must be properly endorsed in blank so as to vest title in the holder, and must be receipts issued by a warehouse approved by CCC under the Uniform Grain Storage Agreement which indicate that the corn is insured, or must be receipts issued on warehouses operated by Eastern common carriers under tariffs approved by the Interstate Commerce Commission for which custodian agreements are in effect.

(b) Each warehouse receipt, or the warehouseman's supplemental certificate (in duplicate), properly identified with the warehouse receipt, must show: (1) Gross weight or bushels, (2) class, (3) grade, (4) test weight, (5) moisture, and (6) any other grading factor(s) when such factor(s), and not test weight or moisture, determine the grade. In areas where licensed inspectors are not available at terminal and subterminal warehouses, CCC will accept inspection certificates based on representative samples which have been forwarded to and graded by a licensed grain inspector.

(c) In the case of warehouse receipts issued for corn delivered by rail or barge, CCC will accept inbound weight and inspection certificates properly identified with the corn covered thereby in lieu of the information required by paragraph (b) of this section.

(d) A separate warehouse receipt must be submitted for each grade and class of corn.

(e) The warehouse receipt may be subject to liens for warehouse charges only to the extent indicated in § 601.1609.

§ 601.1605 *Determination of quantity.* (a) The quantity of corn placed under farm-storage loan may be determined either by weight or by measurement. The quantity of corn placed under a warehouse-storage loan or delivered under a farm-storage loan or under a purchase agreement shall be determined by weight.

(b) When determined by measurement, a bushel of ear corn shall be 2.5 cubic feet of ear corn testing not more than 15.5 percent in moisture content. An adjustment in the number of bushels of ear corn will be made for moisture content in excess of 15.5 percent in accordance with the following schedule:

Moisture content (percent):	*Adjustment factor (percent)*
15.6 to 16.5, both inclusive	98
16.6 to 17.5, both inclusive	96
17.6 to 18.5, both inclusive	94
18.6 to 19.5, both inclusive	92
19.6 to 20.5, both inclusive	90
Above 20.5	No loan

(c) A bushel of shelled corn, when determined by measurement, shall be 1.25 cubic feet of shelled corn testing not more than 13.5 percent in moisture content.

(d) In determining the quantity of sacked corn by weight, a deduction of ¾ of a pound for each sack will be made.

(e) Since dockage is not a grade factor in the case of corn, the quantity of corn will be determined without reference to dockage.

§ 601.1606 *Determination of quality.* The class, grade, grading factors, and all other quality factors shall be determined in accordance with the method set forth in the Official Grain Standards of the United States for Corn, whether or not such determinations are made on the basis of an official inspection.

§ 601.1607 *Maturity of loans and delivery prior to maturity.* (a) Loans mature on demand but not later than July 31, 1953.

(b) Corn may be delivered under purchase agreements and in satisfaction of farm storage loans after maturity in accordance with § 601.1518, 1952 CCC Grain Price Support Bulletin 1: *Provided, however*, That in areas where it is determined by the PMA State committee that producers are not in a position to store corn safely for the full storage period (for the reasons set forth in paragraph (d) of § 601.1602) the PMA State committee may establish an earlier delivery period for corn in farm storage under loans and purchase agreements which shall be the first 10 days of either April, May, June, or July, 1953. CCC will accept deliveries of corn during such 10-day period, provided the producer notifies the PMA county committee of his intention to deliver at least 10 days prior to the first day of the 10-day delivery period. The 10-day delivery period may be extended if it is determined by the county committee that more time is needed for the acceptance of deliveries.

(c) Corn under farm-storage loan may be delivered at any time prior to maturity with the approval of the county committee, if the farm is sold or there is

a change of tenancy, or if the corn is going out of condition, or threatened with damage by flood or other conditions which are beyond the control of the producer.

§ 601.1608 *Determination of support rates.* Basic county support rates for corn will be set forth in 1952 C. C. C. Grain Price Support Bulletin 1, Supplement 2, Corn. The support rate for corn placed under a loan shall be the applicable basic support rate adjusted in accordance with the provisions of this section.

(a) *County support rates.* (1) Both farm-storage and warehouse-storage loans will be made at the support rate established for the county in which the corn is stored.

(2) Basic support rates per bushel will be established for corn grading No. 3, except for moisture, or No. 4 on the factor of test weight only but otherwise grading No. 3 or better, except for moisture, for the respective States and counties.

(b) *Premiums and discounts*—(1) *Farm storage.* In the case of eligible corn delivered from farm storage under purchase agreements and in the case of farm-storage loans, the applicable premiums and discounts shown in the "Schedule of Premiums and Discounts," in this paragraph, except for eligible corn under loan grading "mixed," shall be applied to the basic rate at the time of settlement. In the case of eligible corn grading "mixed" placed under a farm-storage loan, the discount shall be applied to the basic rate at the time the loan is completed.

(2) *Warehouse storage.* In the case of warehouse-storage loans, the applicable premiums and discounts for eligible corn shown in the "Schedule of Premiums and Discounts" in this paragraph shall be applied to the basic support rate at the time the loan is completed. In the case of eligible corn represented by warehouse receipts tendered to CCC under a purchase agreement, the applicable premiums and discounts shall be applied to the basic support for the approved point of delivery at the time of settlement. The discounts for weevily and for moisture content are not applicable since corn in approved warehouse storage which grades weevily or contains in excess of 13.5 percent moisture is not eligible.

(3) *Schedule of premiums and discounts.*

PREMIUMS

Grade No.:	*Cents per bushel*
1	1
2	½

DISCOUNTS

Moisture content (percent):	*Cents per bushel*
0–14.0	0
14.1–15.5	1
15.6–16.0	2
16.1–16.5	3
16.6–17.0	4
17.1–17.5	5
Weevily	2
Mixed	2

§ 601.1609 *Warehouse charges.* (a) Warehouse receipts and the corn represented thereby stored in approved warehouses operating under the Uniform Grain Storage Agreement may be subject to liens for warehouse handling and storage charges at not to exceed the Uniform Grain Storage Agreement rates from the date the corn is deposited in the warehouse for storage.

(b) Where the date of deposit (the date of the warehouse receipt if the date of deposit is not shown) on warehouse receipts representing corn stored in warehouses operating under the Uniform Grain Storage Agreement is on or before July 31, 1953, the amount of the loan or purchase price shall be discounted by the applicable storage charges per bushel shown in the following table:

Date of deposit:	*Amount of deduction (cents per bushel)*
Prior to Aug. 6, 1952	13
Aug. 6–Sept. 14, inclusive	12
Sept. 15–Oct. 24, inclusive	11
Oct. 25–Dec. 3, inclusive	10
Dec. 4, 1952–Jan. 12, 1953, inclusive	9
Jan. 13–Feb. 21, inclusive	8
Feb. 22–Mar. 13, inclusive	7
Mar. 14–Apr. 2, inclusive	6
Apr. 3–Apr. 22, inclusive	5
Apr. 23–May 12, inclusive	4
May 13–June 1, inclusive	3
June 2–June 21, inclusive	2
June 22–July 11, inclusive	1
July 12–July 31, inclusive	0

(c) Warehouse receipts and the corn represented thereby stored in approved warehouses operated by Eastern common carriers may be subject to liens for warehouse elevation (receiving and delivering) and storage charges from the date of deposit at rates approved by the Interstate Commerce Commission.

(d) For corn stored in approved warehouses operated by Eastern common carriers, the amount of the loan or purchase price, except as provided in paragraph (c) (2), of § 601.1610, shall be discounted by the amount of the approved tariff rates for storage (not including elevation) which will accumulate from the date storage charges begin to the program maturity date. The county committee shall request the PMA commodity office to determine the amount of such charges.

§ 601.1610 *Settlement*—(a) *Farm-storage loans*—(1) *Settlement at basic rate.* Settlement on corn delivered to CCC under farm-storage loans grading No. 3, or better, or No. 4 on the factor of test weight only but otherwise grading No. 3, or better, shall be made at the support rate for the approved point of delivery for the grade and quality of the total quantity of corn delivered subject to premiums and discounts shown in the "Schedule of Premiums and Discounts" in paragraph (b) of § 601.1608.

(2) *Settlement value of other corn.* If the corn, upon delivery, grades sour or heating or otherwise does not meet the requirements set forth in the "Schedule of Premiums and Discounts" or is of a quality for which no support rate has been established, the settlement value shall be the support rate established for the grade and or quality of the corn placed under loan, less the difference, if any, at the time of delivery, between the market price of the grade and/or quality placed under loan and the market price of the corn delivered, as determined by CCC.

(b) *Warehouse-storage loans.* (1) In the case of warehouse receipts issued on a warehouse approved under the Uniform Grain Storage Agreement, if the warehouse loan is not redeemed and the warehouse receipt or the accompanying supplemental certificate contains a statement in substantially the following form, "Full storage charges, not including receiving charges, paid through July 31, 1953, $_____," a refund in an amount of the smaller of (i) the storage charges prepaid by the producer or (ii) the amount of the storage charges deducted at the time the loan was completed, will be made to the producer by the PMA county office.

(2) For corn stored in approved warehouses operated by Eastern common carriers, if the warehouse loan is not redeemed and the supplemental certificate and delivery order contains a statement in substantially the following form: "Full storage charges paid through July 31, 1953, $_____," a refund will be made to the producer by the PMA county office of the amount of storage deducted at the time the loan was completed plus any elevation charge which was prepaid by the producer.

(c) *Purchase agreement.* (1) (i) Corn delivered to CCC under a purchase agreement must meet the requirements of eligible corn as specified in paragraph (f) of § 601.1603. The purchase rate per bushel of eligible corn shall be the basic support rate established for the approved point of delivery subject to the discount of warehouse charges in accordance with § 601.1609, except as provided in subparagraph (2) of this paragraph, and subject to premiums and discounts as shown in the "Schedule of Premiums and Discounts" in paragraph (b) of § 601.1608.

(ii) In the case of warehouse receipts issued on a warehouse approved under the Uniform Grain Storage Agreement, CCC Form 25, if the warehouse receipt or the accompanying supplemental certificate representing corn stored in the warehouse contains a statement in substantially the following form, "Full storage charges, not including receiving charges, paid through July 31, 1953, $_____," the producer shall be given credit for the smaller of (a) the storage charges prepaid by the producer or (b) the amount of the warehouse-storage charges determined according to the time of deposit as specified in § 601.1609, at the time the settlement value of the corn delivered is determined.

(2) For corn stored in approved warehouses operated by Eastern common carriers, if the supplemental certificate and delivery order representing corn stored in the warehouse contains a statement in substantially the following form, "Full storage charges paid through July 31, 1953, $_____," no discount for storage shall be made from the support rate at the time the settlement value of the commodity delivered is determined. The producer shall be given credit for

the amount of any elevation charge prepaid at the time the settlement value of the corn delivered is determined, if he presents evidence showing such prepayment.

(d) *Charges for early delivery.* (1) If corn is delivered to CCC before July 31, 1953, in accordance with § 601.1607 (b), or in accordance with § 601.1607 (c), except as provided in subparagraph (2) of this paragraph, a charge shall be made against the producer at the time of settlement at the rate of 1/20 of a cent per bushel a day from the date delivery is accomplished, or from the final date for delivery shown in the delivery instructions issued by the county committee, whichever is earlier, through July 31, 1953, to compensate CCC for the carrying charges incurred because of early delivery.

(2) No such charge shall be made for early delivery when the delivery is made in accordance with § 601.1607 (c) because the corn is threatened with damage by flood or other conditions which are beyond the control of the producer, or when the delivery is made on demand by CCC and such demand is not due to negligence on the part of the producer.

(e) *Track loading.* A track-loading payment of 2 cents per bushel shall be made to the producer on corn delivered to CCC on track at a country point.

Issued this 16th day of July 1952.

PART 624—HONEY

SUBPART—1952 HONEY PRICE SUPPORT PROGRAM

The regulations issued by Commodity Credit Corporation and the Production and Marketing Administration published in 17 F. R. 3698 and 17 F. R. 4285 containing the requirements with respect to the 1952 Honey Price Support Program are hereby amended as follows:

The last sentence of § 624.301 *Administration*, with respect to the modifying or waiving of any of the provisions of the program by State and county committees is hereby amended as follows: "State and county committees and PMA commodity offices do not have authority to modify or waive any of the provisions of this subpart or any amendments or supplements hereto, except that the language of the forms specified for use in obtaining loans and purchase agreements may be changed by State committees when necessary in order to conform to State law."

(Sec. 4, 62 Stat. 1070 as amended; 15 U. S. C. Sup., 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 201, 401, 63 Stat. 1052, 1054; 15 U. S. C. Sup., 714c, 7 U. S. C. Sup., 1446, 1421)

TITLE 7—AGRICULTURE

Chapter I—Production and Marketing Administration (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 29—TOBACCO INSPECTION

SUBPART C—OFFICIAL STANDARD GRADES FOR FLUE-CURED TOBACCO (U. S. TYPES 11, 12, 13, AND 14)

OFFICIAL STANDARDS FOR FLUE-CURED TOBACCO

By virtue of the authority vested in the Secretary of Agriculture by The Tobacco Inspection Act, approved August 23, 1935 (49 Stat. 731; 7 U. S. C. 511 et seq.), I prescribe and promulgate the following grades for flue-cured tobacco of Types 11, 12, 13, and 14 to be known as the Official Standard Grades for Flue-cured Tobacco, to be in force and effect on July 21, 1952. These official standard grades shall supersede the present standard grades for flue-cured tobacco promulgated on August 7, 1936 (1 F. R. 1045), and amended November 28, 1947 (12 F. R. 8041).

It is hereby found that it is impractical, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule-making, and to postpone the effective date of these standards until 30 days after publication hereof in the FEDERAL REGISTER for the following reasons: (1) The marketing season for flue-cured tobacco is scheduled to open on the 21st day of July 1952, and it is imperative that this amendment be effective on said date; (2) that the Department's Price Support Program for flue-cured tobacco is to be based upon the revised grades issued herein; (3) there will be no hardship imposed upon the tobacco industry thereby; and (4) sufficient time exists under the circumstances for the industry to comply with the revised standards. Therefore, the revised Official Standards for Flue-cured Tobacco shall become effective on July 21, 1952.

The revised standards are as follows:

WRAPPER GRADES (A-GROUP)

§ 29.301 *General specifications.* All grades of the A group must be clean, sound, ripe, firm, strong, and over 18" long, must have an open weave, light to true color shade, clear to bright finish, and small to medium size and blending fibers, and must not exceed the tolerances specified with respect to injury.

GRADE DESCRIPTION, SPECIFICATIONS, AND TOLERANCES

U. S. Grade	
A1L	Choice Quality Wrapper in Lemon Color. Very silky, very fine texture, very elastic, oily, thin to medium body, spready, uniform. Tolerance, 30 percent leaves of a quality not lower than B3 or C3, and 5 percent injury of a nature affecting wrapper yield.
A1F	Choice Quality Wrapper in Orange Color. Very oily, medium to fleshy body, otherwise same as A1L.
A1R	Choice Quality Wrapper in Red Color. Rich in oil, fleshy to heavy body, otherwise same as A1L.
A2L	Fine Quality Wrapper Pickers in Lemon Color. Silky, fine texture, elastic, oily, thin to medium body, fairly spready, harmonizing. Tolerance, 50 percent leaves of a quality not lower than B3 or C3, and 10 percent injury of a nature affecting wrapper yield.
A2F	Fine Quality Wrapper Pickers in Orange Color. Very oily, medium to fleshy body, otherwise same as A2L.
A2R	Fine Quality Wrapper Pickers in Red Color. Rich in oil, fleshy to heavy body, otherwise same as A2L.

LEAF GRADES (B-GROUP)

§ 29.302 *General specifications.* All grades of the B group must be clean, sound, medium to heavy body, and must not exceed the tolerances specified with respect to waste and other injury. General tolerance, 20 percent undersized leaves.

GRADE DESCRIPTION, SPECIFICATIONS, AND TOLERANCES

U. S. Grade	
B1L	Choice Quality Leaf in Lemon Color. Very smooth, very good texture, oily, ripe, firm, medium body, strong, fairly spready, open weave, light color shade, very clear finish, blending fibers, uniform, over 20" long. Tolerance, 5 percent injury.
B1F	Choice Quality Leaf in Orange Color. Very oily, medium to fleshy body, otherwise same as B1L.
B1R	Choice Quality Leaf in Red Color. Rich in oil, fleshy body, otherwise same as B1L.
B2L	Fine Quality Leaf in Lemon Color. Smooth, good texture, oily, ripe, firm, medium body, strong, normal width, open weave, fairly light color shade, clear finish, emerging fibers, harmonizing, over 20" long. Tolerance, 10 percent injury.
B2F	Fine Quality Leaf in Orange Color. Very oily, medium to fleshy body, otherwise same as B2L.
B2R	Fine Quality Leaf in Red Color. Rich in oil, fleshy body, otherwise same as B2L.
B3L	Good Quality Leaf in Lemon Color. Fairly smooth, fair texture, oily, ripe, firm, medium body, fairly strong, normal width, fairly open weave, true color shade, fairly clear finish, similar, over 18" long. Tolerance, 15 percent injury.
B3F	Good Quality Leaf in Orange Color. Very oily, medium to fleshy body, otherwise same as B3L.
B3R	Good Quality Leaf in Red Color. Rich in oil, fleshy body, otherwise same as B3L.
B3S	Good Quality Leaf in Mahogany Color. Rich in oil, heavy body, otherwise same as B3L.
B4L	Fair Quality Leaf in Lemon Color. Unrough, fairly oily, fairly ripe, fairly firm, medium body, normal strength, not narrow, fairly true color shade, normal finish, unmixed. Tolerance, 20 percent total injury of which not over 5 percent may be waste or other badly injured tobacco.
B4F	Fair Quality Leaf in Orange Color. Medium to fleshy body, otherwise same as B4L.
B4R	Fair Quality Leaf in Red Color. Fleshy body, otherwise same as B4L.
B4S	Fair Quality Leaf in Mahogany Color. Heavy body, otherwise same as B4L.
B4D	Fair Quality Leaf in Dun or Walnut Color. Medium to heavy body, otherwise same as B4L.
B4K	Fair Quality Variegated Leaf. Average quality of B4 or better in variegated colors corresponding to the general shades of lemon, orange, or light red.
B4M	Fair Quality Mixed Leaf. Average quality of B4 or better.
B4G	Fair Quality Leaf in Green Color. Quality of B4, except maturity.
B5L	Low Quality Leaf in Lemon Color. Fairly ripe, medium body, not weak, not stringy, dusky color shade, dull finish, unmixed. Tolerance, 30 percent total injury of which not over 10 percent may be waste or other badly injured tobacco.
B5F	Low Quality Leaf in Orange Color. Medium to fleshy body, otherwise same as B5L.
B5R	Low Quality Leaf in Red Color. Fleshy body, otherwise same as B5L.
B5S	Low Quality Leaf in Mahogany Color. Heavy body, otherwise same as B5L.
B5D	Low Quality Leaf in Dun or Walnut Color. Medium to heavy body, otherwise same as B5L.
B5K	Low Quality Variegated leaf. Average quality of B5 or better in variegated colors corresponding to the general shades of lemon, orange, or light red.
B5M	Low Quality Mixed Leaf. Average quality of B5 or better.
B5G	Low Quality Leaf in Green Color. Quality of B5, except maturity.
B6L	Poor Quality Leaf in Lemon Color. Fairly ripe, medium body, not tender, dark color shade, dingy finish, unmixed. Tolerance, 40 percent total injury of which not over 20 percent may be waste or other badly injured tobacco.
B6F	Poor Quality Leaf in Orange Color. Medium to fleshy body, otherwise same as B6L.
B6R	Poor Quality Leaf in Red Color. Fleshy body, otherwise same as B6L.
B6S	Poor Quality Leaf in Mahogany Color. Heavy body, otherwise same as B6L.
B6D	Poor Quality Leaf in Dun or Walnut Color. Medium to heavy body, otherwise same as B6L.
B6K	Poor Quality Variegated Leaf. Average quality of B6 or better in variegated colors corresponding to the general shades of lemon, orange, or light red.
B6M	Poor Quality Mixed Leaf. Average quality of B6 or better.
B6G	Poor Quality Leaf in Green Color. Quality of B6, except maturity.

CUTTER GRADES (C-GROUP)

§ 29.303 *General specifications.* All grades of the C group must be clean, sound, thin to medium body, must have an open weave and small to medium size fibers, and must not exceed the tolerances specified with respect to waste and other injury. General tolerance, 20 percent under-sized leaves.

GRADE DESCRIPTION, SPECIFICATIONS, AND TOLERANCES

U. S. Grade	
C1L	Choice Quality Cutters in Lemon Color. Fairly silky, fine texture, oily, ripe, firm, thin body, fairly strong, broad, light color shade, very clear finish, blending fibers, uniform, over 20" long. Tolerance, 5 percent injury.
C1F	Choice Quality Cutters in Orange Color. Fairly thin to medium body, otherwise same as C1L.
C2L	Fine Quality Cutters in Lemon Color. Very smooth, very good texture, oily, ripe, firm, thin body, fairly strong, spready, light color shade, very clear finish, blending fibers, harmonizing, over 20" long. Tolerance, 10 percent injury.
C2F	Fine Quality Cutters in Orange Color. Fairly thin to medium body, otherwise same as C2L.
C3L	Good Quality Cutters in Lemon Color. Smooth, good texture, fairly oily, ripe, fairly firm, thin body, normal strength, fairly spready, fairly light color shade, clear finish, emerging fibers, similar over 18" long. Tolerance, 15 percent injury.
C3F	Good Quality Cutters in Orange Color. Fairly thin to medium body, otherwise same as C3L.
C3K	Good Quality Variegated Cutters. Average quality of C3 or better.
C3M	Good Quality Mixed Cutters. Average quality of C3 or better.
C4L	Fair Quality Cutters in Lemon Color. Smooth, fair texture, lean, ripe, not flimsy, thin body, normal strength, normal width, true color shade, fairly clear finish, unmixed. Tolerance, 20 percent total injury of which not over 5 percent may be waste or other badly injured tobacco.
C4F	Fair Quality Cutters in Orange Color. Fairly thin to medium body, otherwise same as C4L.

U. S. Grade	
C4K	Fair Quality Variegated Cutters. Average quality of C4 or better.
C4M	Fair Quality Mixed Cutters. Average quality of C4 or better.
C5L	Low Quality Cutters in Lemon Color. Fairly smooth, lean, fairly ripe, not flimsy, thin body, not weak, not narrow, fairly true color shade, normal finish, unmixed. Tolerance, 30 percent total injury of which not over 10 percent may be waste or other badly injured tobacco.
C5F	Low Quality Cutters in Orange Color. Fairly thin to medium body, otherwise same as C5L.
C5K	Low Quality Variegated Cutters. Average quality of C5 or better.
C5M	Low Quality Mixed Cutters. Average quality of C5 or better.

CUTTING LUG GRADES (X-GROUP)

§ 29.304 *General specifications.* All grades of the Cutting Lugs must be clean, sound, thin to medium body, and must not exceed the tolerances specified with respect to waste and other injury.

GRADE DESCRIPTION, SPECIFICATIONS, AND TOLERANCES

U. S. Grade	
X1L	Choice Quality Cutting Lugs in Lemon Color. Smooth, good texture, fairly oily, ripe, fairly firm, thin body, not weak, normal width, open weave, fairly light color shade, fairly clear finish, emerging fibers, similar. Tolerance, 20 percent total injury of which not over 5 percent may be waste or other badly injured tobacco.
X1F	Choice Quality Cutting Lugs in Orange Color. Fairly thin to medium body, otherwise same as X1L.
X2L	Fine Quality Cutting Lugs in Lemon Color. Smooth, fair texture, lean, ripe, not flimsy, thin body, not weak, not narrow, open weave, true color shade, normal finish, unmingled. Tolerance, 25 percent total injury of which not over 10 percent may be waste or other badly injured tobacco.
X2F	Fine Quality Cutting Lugs in Orange Color. Fairly thin to medium body, otherwise same as X2L.
X3L	Good Quality Cutting Lugs in Lemon Color. Fairly smooth, lean, fairly ripe, not flimsy, thin body, not tender, not stringy, fairly open weave, fairly true color shade, dull finish, unmixed. Tolerance, 40 percent total injury of which not over 20 percent may be waste or other badly injured tobacco.
X3F	Good Quality Cutting Lugs in Orange Color. Fairly thin to medium body, otherwise same as X3L.
X3K	Good Quality Variegated Cutting Lugs. Over 18" long, otherwise average quality of X3 or better.
X3M	Good Quality Mixed Cutting Lugs. Average quality of X3 or better.
X3G	Good Quality Cutting Lugs in Green Color. Quality of X3, except maturity.

GRANULATING LUG GRADES (X-GROUP CONTINUED)

§ 29.305 *General specifications.* All grades of Granulating Lugs must be clean, sound, tissuey to thin body, porous, and must not exceed the tolerances specified with respect to waste. Any tissuey to thin bodied tobacco in lemon, orange, or variegated colors which will not meet the specifications of the lowest grade of leaf, smoking-leaf, cutters, or cutting lugs and which does not contain over 40 percent of waste and is not defined as nondescript or scrap may be classified as granulating lugs or granulators.

GRADE DESCRIPTION, SPECIFICATIONS, AND TOLERANCES

U. S. Grade	
X4L	Fair Quality Granulators in Lemon Color. Unrough, fairly ripe, thin body, dusky color shade, cloudy finish, unmixed. Tolerance, 30 percent waste.
X4F	Fair Quality Granulators in Orange Color. Fairly thin to medium body, otherwise same as X4L.
X4K	Fair Quality Variegated Granulators. Over 16" long, otherwise average quality of X4 or better.
X4M	Fair Quality Mixed Granulators. Average quality of X4 or better.
X4G	Fair Quality Granulators in Green Color. Quality of X4, except maturity.
X5L	Low Quality Granulators in Lemon Color. Fairly ripe, thin body, dark color shade, dingy finish, unmixed. Tolerance, 40 percent waste.
X5F	Low Quality Granulators in Orange Color. Fairly thin to medium body, otherwise same as X5L.
X5K	Low Quality Variegated Granulators. Average quality of X5 or better.
X5M	Low Quality Mixed Granulators. Average quality of X5 or better.
X5G	Low Quality Granulators in Green Color. Quality of X5, except maturity.

NONDESCRIPT AND SCRAP (N & S GROUPS)

§ 29.306 *Nondescript (N & S groups).*

U. S. Grade	SPECIFICATIONS
N	Nondescript, as defined in § 29.339.

§ 29.307. *Scrap (N & S groups).*

U. S. Grade	SPECIFICATIONS
S	Scrap, as defined in § 29.351.

DEFINITIONS

§ 29.308 *Terms defined.* For the purposes of §§ 29.301 to 29.399, the terms appearing in §§ 29.309 to 29.385 shall be construed as explained.

§ 29.309 *Airdried.* The condition of unfermented tobacco as customarily prepared for storage under natural atmospheric conditions.

§ 29.310 *Body.* The thickness and density of leaf or weight per unit of surface.

§ 29.311 *Botched.* Any lot of unnested tobacco offered for inspection which has not been sorted (or graded) in a manner which is customary in the type district, or the grade of any tobacco which does not reasonably conform to the common and accepted practices in the type district of preparing tobacco for market, including: (a) Extreme mixtures, such as Lugs and Primings intermingled with Leaf, or lemon and orange colored tobacco intermingled with dark mahogany or walnut, or tobacco of very poor quality or badly injured tobacco intermingled with good quality tobacco which is not materially injured, et cetera; (b) any unsorted tobacco, or tobacco which has been sorted in an unskilled, careless, or bungling manner; (c) tobacco which clearly and obviously contains an abnormal quantity of foreign matter such as strings, sand, muddy, or extremely dirty leaves; (d) tobacco prepared in a disorderly or tangled manner, such as not being packed reasonably straight in layers or flakes with the butts of the leaves or the heads of the bundles in the same direction; and (e) tobacco tied with abnormally large or long heads so that it cannot be properly redried in the customary manner.

§ 29.312 *Chief.* The Chief of the Standards and Technical Research Division, Tobacco Branch, Production and Marketing Administration.

§ 29.313 *Class.* A major division of tobacco based on characteristics caused by varieties, soils, or climatic conditions, and the method of cultivation, harvesting, or curing.

§ 29.314 *Clean.* Normally free of dirt and other foreign matter.

§ 29.315 *Color.* A subdivision of a group based on the relative hues, saturations, and brilliances common to the group and on certain elements of quality, such as body and maturity, which are closely related to color.

§ 29.316 *Condition.* The state of tobacco in storage, or in relation to its preparation for storage, with reference to its manner of preparation or its degree of fermentation, such as Undried, Airdried, Steamdried, Sweating, Sweated, and Resweated.

§ 29.317 *Crude.* Any very immature leaf of which one-fifth or more of its surface has a positive green color; or any tobacco containing 30 percent or more crude leaves.

§ 29.318 *Cured.* Tobacco thoroughly dried of its sap by either natural or artificial processes.

§ 29.319 *Cutters (C).* A group of tobacco which is spready and very thin to medium in body as compared with the average width and body of the type and which has the characteristics of cutting lugs, except with respect to injury, finish, and length.

§ 29.320 *Damaged.* The effect of mold, must, rot, black-rot, or other fungous or bacterial diseases which attack tobacco in its cured state, including tobacco having the odor of mold, must, or rot.

§ 29.321 *Decayed.* Any tobacco which is damaged to the extent of 20 percent or more.

§ 29.322 *Dun or Walnut (D).* Tobacco which is chiefly composed of leaves having a very dull or dingy finish and a very dusky or dark shade of brown color and which is not crude, green, or mixed.

§ 29.323 *Flue-cured.* Tobacco cured under artificial atmospheric conditions by a process of regulating the heat and ventilation without allowing smoke or fumes from the fuel to come in contact with the tobacco; or tobacco cured by some other process which accomplishes the same results.

§ 29.324 *Foreign matter.* Any substance or material extraneous to tobacco, including dirt, sand, stalks, suckers, straw, strings, et cetera.

§ 29.325 *Form.* The stage of preparation of tobacco, such as Unstemmed and Stemmed.

§ 29.326 *Grade.* A subdivision of a type according to group and quality, and according to color when it is of sufficient importance to be treated as a separate factor.

§ 29.327 *Green (G).* (a) Any leaf of which one-fifth or more of its surface is predominantly green in color; or (b) any lot of tobacco containing 20 percent or more green leaves; or (c) any lot of tobacco which is not crude but which contains 20 percent of green and crude combined.

§ 29.328 *Greenish (V).* (a) Any leaf of which one-fifth or more of its surface has a decided greenish tinge or cast; or (b) any lot of tobacco containing 30 percent or more greenish leaves; or (c) any lot of tobacco which is not green but which contains 30 percent of green and greenish leaves combined.

§ 29.329 *Group.* A division of a type covering several closely related grades based on the general quality of the tobacco, including body, the percentage of injury, and other characteristics.

§ 29.330 *Injury.* Hurt or impairment from any cause except damage. Injured tobacco shall include dead, burnt, hailcut, or ragged tobacco; or tobacco that has been torn or broken, frozen or frosted, sunburned or scalded, scorched or fire-killed, bulk-burnt or steam-burnt, pole-burnt or house-burnt, bleached or bruised; or tobacco containing deformed leaves; or tobacco hurt by insects; or tobacco affected by wild-fire, rust, frog-eye, mosaic, frenching, sand-drown, or other similar diseases.

§ 29.331 *Leaf-scrap.* Unstemmed scrap, which is a by-product from handling unstemmed tobacco consisting of loose and tangled whole or broken leaves.

§ 29.332 *Lemon (L).* Tobacco which is chiefly yellow in color and which is not crude, green, mixed, or variegated.

§ 29.333 *Lot.* A pile, basket, bulk, bale, case, hogshead, tierce, package, or other definite unit.

§ 29.334 *Lugs (X).* A group of tobacco which in the better qualities consists of cutting lugs and in the lower qualities consists of granulated lugs. Cutting lugs are normally under 16" long and have the characteristics of cutters except for a somewhat narrower width, less injury and waste, a duller finish, and less tensile strength. Granulating lugs have a material amount of waste and injury of the kind characteristic of leaves grown near the ground and include variegated leaves which are too badly injured, discolored, or have too much waste or other badly injured tobacco to be classified as cutters or cutting lugs.

§ 29.335 *Mahogany or Second Red (S).* Tobacco which is chiefly of a dark red or mahogany color and which is not crude, green, or mixed.

§ 29.336 *Major.* The principal or leading kind of tobacco of which a lot consists; or the kind of tobacco which constitutes the largest percentage of a lot.

§ 29.337 *Mixed (M).* A lot of tobacco which contains 30 percent or more leaves of distinctly different quality or color from the major or run of the lot, and which has not been botched and which contains less than 30 percent of variegated leaves and less than 20 percent of green.

§ 29.338 *Nested.* Any tobacco which has been loaded, packed, or arranged in such a manner as to conceal foreign matter or tobacco of inferior grade, quality, or condition. Specifically, the grade "Nested" shall include: (a) Any lot of tobacco which contains damaged, injured, tangled, or other inferior tobacco, or an abnormal quantity of sand or other foreign matter, which cannot be readily detected upon inspection due to the way the lot is packed or arranged; (b) any lot of tied tobacco which contains foreign matter in the inner portions of the hands, or which contains foreign matter in the heads under the tie leaves; (c) any lot of tied tobacco in which the leaves on the outside of the hands are so placed or arranged as to conceal from view relatively inferior quality leaves on the inside of the hands, or which contains wet tobacco or tobacco of relatively lower quality in the heads under the tie leaves; (d) any lot of tobacco consisting of distinctly different grades, qualities, or conditions which is stacked or arranged in layers with the same kinds together so that the tobacco in the lower layer or layers is distinctly inferior in grade, quality, or condition from the tobacco in the top or upper layers.

§ 29.339 *Nondescript (N).* Except as may be designated by a special factor, nondescript shall include: (a) Any tobacco which does not meet the minimum specifications of the lowest grade of any other group; (b) any wet, semicured, or unsound tobacco; (c) any tobacco which has wasted or contains waste to the extent of 40 percent or more; or (d) any tobacco defined as botched, crude, decayed, off-type, or nested.

§ 29.340 *Off-type.* Any tobacco which cannot be properly classified in any other grade of the type normally sold on the markets of a given type due to its distinctly different characteristics; or any tobacco which for any reason is distinctly foreign to the grades of an established type. Specifically, "Off-type" shall cover any kind of tobacco which is not ordinarily sold on the markets at which it is offered for inspection and shall include any smutty or smoked tobacco, tobacco having an odor foreign to the type, or tobacco showing the effects of smoke or fumes from open fires.

§ 29.341 *Orange (F).* Tobacco which is chiefly orange in color and which is not crude, green, mixed, or variegated.

§ 29.342 *Order (Case).* The state of tobacco with respect to its moisture content.

§ 29.343 *Package.* A hogshead, tierce, case, bale, or other securely enclosed parcel or bundle.

§ 29.344 *Packing.* A lot of tobacco consisting of a certain number of packages submitted for sampling or inspection as one definite unit and represented to contain the same grade and kind of tobacco and having a common identification number or mark on each package.

§ 29.345 *Premature.* A low degree of maturity, but having the appearance of being ripe.

§ 29.346 *Primings (P).* A subgroup of lugs composed of very thin or tissuey, pale, silky, and premature leaves which are low in oil and wax and which have a dull or dingy finish.

§ 29.347 *Quality.* A division of group, forming the second factor of a grade, based upon the relative degree of one or more of the elements of quality in tobacco, construed in relation to the type as a whole unless otherwise specifically restricted, as in the element "Color shade" which is restricted to a given color.

§ 29.348 *Raw.* Freshly harvested tobacco, or tobacco as it appears between the time of harvesting and the beginning of the curing process.

§ 29.349 *Red (R).* Tobacco which is chiefly of a light or bright red color and which is not crude, green, mixed, or variegated.

§ 29.350 *Resweated.* The condition of tobacco which has passed through a second fermentation under abnormally high temperatures, or refermented with a relatively high percentage of moisture, including tobacco which has been dipped or reconditioned after its first fermentation and put through a forced or artificial sweat.

§ 29.351 *Scrap.* A by-product from handling tobacco in both the unstemmed and stemmed forms, consisting chiefly of loose, untied, and unstemmed leaves or the web portions of leaves, which accumulate in warehouses, packing and conditioning plants, and stemmeries; or tobacco which has been reduced to scrap by any process.

§ 29.352 *Semicured.* Tobacco in the process of being cured, or tobacco which is partially, but not thoroughly cured, including tobacco which contains fat-stems, wet-butts, swell-stems, or stems which have not been thoroughly dried in the curing process.

§ 29.353 *Side.* Any distinct characteristic of tobacco, or a certain phase of quality, color, or length as compared with some other phase of quality, color, or length.

§ 29.354 *Smoking-leaf (H).* A subgroup of leaf: Composed of relatively thin, nonelastic, mellow, very grainy, and porous leaves; being low in oil; having prominent ribs (considering the rib size in relation to the thickness of the leaf); and characterized by a somewhat duller finish than the corresponding colors of the leaf group. Some of the lower grades of smoking-leaf have a

considerable amount of injury of the kind normally found in very grainy or overripe tobacco.

§ 29.355 *Sound.* Free of damage.

§ 29.356 *Special factor.* A symbol or term authorized to be used with specified grades to designate a certain side or characteristic of importance, varying from or not covered by the specifications of the grades.

§ 29.357 *Steamdried.* The condition of unfermented tobacco as customarily prepared for storage by means of a redrying machine or other steam-conditioning equipment.

§ 29.358 *Stem.* A midrib of a tobacco leaf.

§ 29.359 *Stemmed.* A form of tobacco from which the stems or midribs have been removed, which may consist of either strips or web-scrap.

§ 29.360 *Stems.* A tobacco by-product composed of the midribs of tobacco leaves.

§ 29.361 *Strips.* The two whole sides of a tobacco leaf from which the stem has been removed; or a lot of tobacco composed of strips.

§ 29.362 *Subgrade.* Any grade modified by a special factor or subgroup symbol.

§ 29.363 *Subgroup.* A group formed by the substitution of a different group symbol to denote a modification of the specifications or to indicate a certain side or characteristic of the tobacco.

§ 29.364 *Sweated.* The condition of tobacco which has passed through one or more fermentations natural to tobacco packed with a normal percentage of moisture.

§ 29.365 *Sweating.* The condition of tobacco in the process of fermentation.

§ 29.366 *Tips.* A subgrade of leaf tobacco of which 25 percent or more of its leaves are under 16" in length. Tips normally consist of relatively narrow, sharp pointed, and heavy bodied leaves, under 16" long, which grow on the top or upper part of the plant but may consist of any short leaf tobacco having the characteristics of tips.

§ 29.367 *Tobacco.* Tobacco as it appears between the time it is cured and stripped from the stalk, or primed and cured, and the time it enters into the different manufacturing processes. The acts of stemming, sweating, and conditioning are not regarded as manufacturing processes. Tobacco, as used in this subpart, does not include any raw tobacco, manufactured products, stems which have been removed from leaves, cuttings, clippings, trimmings, or shorts (fine siftings).

§ 29.368 *Tobacco products.* Products manufactured from tobacco which are subject to internal revenue taxes, including: Cigarettes, cigars, and smoking, chewing, and snuff tobaccos.

§ 29.369 *Type.* A division of a class of tobacco having certain common characteristics and closely related grades. Tobacco which has the same characteristics and corresponding qualities, colors, and lengths, shall be treated as one type, regardless of any factors of historical or geographical nature which cannot be determined by an examination of the tobacco.

§ 29.370 *Type 11.* That type of flue-cured tobacco commonly known as Western Flue-cured or Old Belt and Middle Belt Flue-cured; and produced principally in the Piedmont sections of Virginia and North Carolina and the district extending eastward to the coastal plains region. That portion of this type known as Old Belt Flue-cured, normally characterized by a heavier body and darker color shade and produced principally in the Piedmont sections of Virginia and North Carolina, may be classified as Type 11a; and that portion of the type known as Middle Belt Flue-cured, normally characterized by a thinner body and lighter color shade and produced principally in a section lying between the Piedmont and coastal plains regions of Virginia and North Carolina, may be classified as Type 11b.

§ 29.371 *Type 12.* That type of flue-cured tobacco commonly known as Eastern Flue-cured, New Belt of North Carolina Flue-cured, or Eastern Carolina Flue-cured; and produced principally in the coastal plains section of North Carolina, north of the South River.

§ 29.372 *Type 13.* That type of flue-cured tobacco commonly known as South-eastern Flue-cured, South Carolina Flue-cured, or New Belt of South Carolina; and produced principally in the coastal plains section of South Carolina, and the southeastern counties of North Carolina, south of the South River.

§ 29.373 *Type 14.* That type of flue-cured tobacco commonly known as Southern Flue-cured or New Belt of Georgia, Florida, and Alabama; and produced principally in the southern section of Georgia and to some extent in Florida and Alabama.

§ 29.374 *Under-size.* Tobacco which is shorter than the minimum size established for a particular group or grade of a type.

§ 29.375 *Undried.* The condition of unfermented tobacco which has not been airdried or steamdried.

§ 29.376 *Uniformity.* One of the elements of quality in tobacco having reference to the consistency of a lot, as ordinarily sorted and prepared for market, with respect to other elements of quality or color. The following are the specifications for the several degrees of uniformity showing for each degree the percentage of a lot that may be of a distinctly different group, quality, or color from the major or principal kind of which a lot consists: (a) Alike or very uniform, less than 5 percent; (b) Uniform, less than 10 percent; (c) Harmonizing or fairly uniform, less than 15 percent; (d) Similar, less than 20 percent; (e) Unmingled, less than 25 percent; (f) Unmixed or mingled, less than 30 percent; and (g) Mixed, 30 percent or more. When uniformity with respect to quality is specified it includes uniformity with respect to group, but when uniformity with respect to color is specified it does not include uniformity with respect to group or quality.

§ 29.377 *Unsound (U).* Damaged under 20 percent.

§ 29.378 *Unstemmed.* A form of tobacco from which the stems or midribs have not been removed, including both whole-leaf and leaf-scrap.

§ 29.379 *Variegated (K).* Having a diversity of contrasting colors or tints, other than green, within a leaf; or leaves which are in part distinctly gray, mottled, bleached, stained or doty-faced; or leaves which in part have been badly discolored in the curing process by scalding, scorching, et cetera; or leaves which do not blend with the normal colors of lemon, orange, red, mahogany, or walnut established for the type. Any lot of tobacco containing 30 percent or more of such leaves is classified as variegated.

§ 29.380 *Waste.* That portion or portions of the web of tobacco leaves which has been lost or rendered unserviceable for use in tobacco products, including: (a) Portions which have decomposed or largely decomposed by field diseases, field firing, pole-burning, bulk-burning, or scorching; and (b) portions which are dead, lifeless, and do not have sufficient strength or stability to hold together in the normal manufacturing process due to excessive injury of any kind.

§ 29.381 *Web.* That portion of a tobacco leaf expanded from the midrib, as distinguished from the stem or midrib; or that portion of a tobacco leaf from which the midrib has been removed; or a lot of tobacco consisting of the web of tobacco leaves; or any unmanufactured tobacco which does not contain stems.

§ 29.382 *Web-scrap.* Stemmed scrap or stemless scrap which is a by-product from stemming tobacco or handling strips, consisting chiefly of portions of strips; or a lot of tobacco from which the stems have been removed by thrashing or other means which breaks the web or sides of the leaves into small pieces.

§29. 383 *Web-yield.* The ratio of the weight of granulated and clean web which is normally serviceable and useable in reputable tobacco products to the weight of the original unstemmed tobacco.

§ 29.384 *Wet (W).* Any sound tobacco containing excessive moisture to the extent that it is in an unsafe or doubtful keeping state for the condition or purpose the tobacco is to be used, handled, or stored. Wet shall apply to any semicured tobacco or other tobacco which is not damaged, but which is likely to damage on account of excessive moisture if treated in the customary manner or unless unusual precaution is taken.

§ 29.385 *Yield.* The potential quantity or percentage of a given product which can be produced, per unit, from a lot or packing of tobacco.

RULES

§ 29.386 *Rules.* The application of §§ 29.301 to 29.385 shall be in accordance with the rules appearing in §§ 29.387 to 29.399.

§ 29.387 *Rule 1.* Each grade shall be treated as a subdivision of a particular type and when the grade is stated in an inspection certificate, the type shall also be stated.

§ 29.388 *Rule 2.* The determination of grade shall be based upon a thorough examination of a lot of tobacco or an official sample of the lot.

§ 29.389 *Rule 3.* In determining the grade of a lot of tobacco, the lot as a whole shall be considered, and minor irregularities which do not affect over one percent of the tobacco shall be overlooked.

§ 29.390 *Rule 4.* In drawing an official sample from a hogshead or other package of tobacco, three or more breaks shall be made at such points and in such manner as the inspector or sampler may find necessary to determine the kinds of tobacco and the percentage of each kind contained in the lot. One break shall be made not more than twelve inches from the top of the package and one, not more than twelve inches from the bottom of the package and all breaks shall be made so that the tobacco contained in the center of the package is visible to the sampler. Tobacco shall be drawn from at least three of the breaks so made and, from these draws, a representative sample of not less than six hands shall be selected. The sample shall include tobacco of each different quality, color, length, and kind found in the lot in proportion to the quantities of each contained in the lot.

§ 29.391 *Rule 5.* Tobacco damaged under 20 percent shall be classed as unsound and treated as a subgrade by placing the special factor letter "U" after or above the grade mark. For example: A lot of unsound tobacco which otherwise meets the specifications of B4M shall be graded B4M–U.

§ 29.392 *Rule 6.* When a lot of tobacco, unmixed in color, is on the marginal line between two colors so that there is a question as to which is the predominant color, it shall be placed in the color with which the tobacco best corresponds with respect to body and maturity.

§ 29.393 *Rule 7.* Any lot of tobacco shall be regarded as meeting the specifications of a certain grade when the tobacco is not lower in any degree of quality than that stated in the specifications of such grade. The degree of uniformity specified for a particular grade governs the percentage of a lot which must meet the specifications with respect to other degrees of quality.

§ 29.394 *Rule 8.* Any lot of tobacco which clearly and fully meets the specifications of two or more grades shall be placed in the highest one of such grades; but any lot of tobacco which is on the marginal line between two or more grades so that the grade cannot be determined by applying other rules, shall be placed in the lowest grade in question.

§ 29.395 *Rule 9.* The grade assigned to any lot of tobacco shall be a true representation of the tobacco at the time of inspection and certification thereof.

§ 29.396 *Rule 10.* If at any time, it is found that a lot of tobacco does not comply with the description and specifications of the grade previously assigned, it shall not thereafter be represented as being of such grade.

§ 29.397 *Rule 11.* Any special factor symbol, approved for the purpose by the Chief of the Standards and Technical Research Division, Tobacco Branch, Production and Marketing Administration, may be used after a grade mark to show a peculiar side or characteristic of the tobacco. Interpretations on the application of these standards, the use of specifications, and the meaning of terms shall be in accordance with determinations or clarifications made by the Chief. The use of any grade may be restricted by the Chief, during any marketing season, when he finds that the grade is not needed or appears in insufficient volume to justify making the grade.

§ 29.398 *Rule 12.* All qualities of leaf in L, F, and R colors which have the characteristics of Smoking-leaf shall be made a subgroup of Leaf by substituting the letter "H" for the group letter "B" in the grade symbol.

§ 29.399 *Rule 13.* Lugs of the third, fourth, and fifth qualities in L, F, and G colors which have the characteristics of Primings shall be made a subgroup of Lugs by substituting the letter "P" for the group letter "X" in the grade symbol.

Issued at Washington, D. C., this 17th day of July 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

[F. R. Doc. 52-7866; Filed, July 18, 1952; 8:52 a. m.]

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

SUBPART B—UNITED STATES STANDARDS FOR GRADES OF PROCESSED FRUITS, VEGETABLES, AND OTHER PRODUCTS [1]

CANNED PLUMS; REVISION

On April 29, 1952 a notice of proposed rule making was published in the FEDERAL REGISTER (17 F. R. 3799) regarding a proposed revision of the United States Standards for Grades of Canned Plums. After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice, the following revised United States Standards for Grades of Canned Plums are hereby promulgated under the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act of 1953 (Pub. Law 451, 82d Cong., approved July 5, 1952).

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

§ 52.573 *Canned plums.* Canned plums (including prune plums) are the properly ripened fresh fruit of the plum tree (Prunus domestica), are prepared by stemming and washing, are packed in water with or without sweetening ingredients, may be packed with the addition of suitable ingredients for "dietetic pack", and are sufficiently processed by heat to assure preservation of the product in hermetically sealed containers.

(a) *Varieties of canned plums.* (1) Purple plum groups.

(2) Green gage plum groups.

(3) Yellow egg plum groups.

(b) *Styles of canned plums.* (1) "Whole" canned plums are whole, unpeeled, unpitted plums.

(2) "Halved" canned plums are unpeeled, pitted plums, cut or separated longitudinally into approximate halves.

(c) *Grades of canned plums.* (1) "U. S. Grade A" or "U. S. Fancy" is the quality of canned plums that possess similar varietal characteristics; that are practically free from defects; that possess a normal flavor and odor; and that are of such quality with respect to color, uniformity of size, and character as to score not less than 90 points when scored in accordance with the scoring system outlined in this section.

(2) "U. S. Grade B" or "U. S. Choice" is the quality of canned plums that possess similar varietal characteristics; that possess a reasonably good color; that are reasonably free from defects; that possess a normal flavor and odor; and that are of such quality with respect to uniformity of size and character as to score not less than 80 points when scored in accordance with the scoring system outlined in this section.

(3) "U. S. Grade C" or "U. S. Standard" is the quality of canned plums that possess similar varietal characteristics; that possess a fairly good color; that are fairly uniform in size; that are fairly free from defects; that possess a fairly good character; that possess a normal flavor and odor; and that score not less than 70 points when scored in accordance with the scoring system outlined in this section.

(4) "U. S. Grade D" is the quality of canned plums that possess similar varietal characteristics; that possess a fairly good color; that may or may not be fairly uniform in size; that are fairly free from defects except that there is no limit on crushed or broken units; that may or may not possess a fairly good character; and that possess a normal flavor and odor.

(5) "Substandard" is the quality of canned plums that fails to meet the requirements of either U. S. Grade C or U. S. Standard or U. S. Grade D, or both.

(d) *Recommended designations of liquid media and Brix measurements for canned plums.* "Cut-out" requirements for liquid media in canned plums are not incorporated in the grades of the finished product since sirup or any other liquid medium, as such, is not a factor of quality for the purposes of these grades. It is recommended that canned plums have the following "cut-out" Brix measurement for the applicable designation, which designations include, but are not limited to:

Designation	Brix measurement
"Extra heavy syrup"	26° or more but not more than 35°.
"Heavy syrup"	21° or more but less than 26°.
"Light syrup"	16° or more but less than 21°.
"In water"	Packed in water.

(e) *Recommended fill of container for canned plums.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container of canned plums be filled with plums as full as practicable without impairment of quality and that the product and packing medium occupy not less than 90 percent of the volume of the container.

(f) *Recommended minimum drained weight.* The minimum drained weight recommendations for the applicable styles in Table I and Table II of this section are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purposes of these grades. The drained weight of canned plums is determined by emptying the contents of the container, turning the pit cavities down in halves, upon a United States Standard No. 8 circular sieve of proper diameter containing 8 meshes to the inch (0.0937-inch±3%, square openings) so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and plums less the weight of the dry sieve. A sieve 8 inches in diameter is used for the equivalent of No. 3 size cans (404×414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the equivalent of the No. 3 size can.

(g) *Compliance with recommended drained weights.* Compliance with the recommended drained weights for canned plums is determined by averaging the drained weights from all the containers which are representative of a specific lot and such lot is considered as meeting the recommendations, for the applicable styles, if in:

(1) Whole style:

(i) The average of the drained weights from all of the containers meets the average of the recommended drained weights for the counts from the containers examined;

(ii) One-half or more of the containers meet the recommended drained weight for the respective count found; and

(iii) The drained weights from the containers which do not meet the recommended drained weight for the count found are within the range of variability for good commercial practice.

(2) Halved style:

(i) The average drained weight from all the containers meets the recommended drained weight;

(ii) One-half or more of the containers meet the recommended drained weight; and

(iii) The drained weights from the containers which do not meet the recommended drained weight are within the range of variability for good commercial practice.

TABLE I—RECOMMENDED MINIMUM DRAINED WEIGHTS FOR WHOLE CANNED PLUMS

Range of count of whole plums per container	In any syrup; or in any other liquid medium including declared "dietetic packs" whether or not packed "in water"						
	Metal containers					Glass containers	
	8 Z tall (211 x 304)	No. 1 tall (301 x 411)	No. 303 (303 x 406)	No. 2 (307 x 409)	No. 2½ (401 x 411)	No. 303	No. 2½
	Ounces	*Ounces*	*Ounces*	*Ounces*	*Ounces*	*Ounces*	*Ounces*
10 or less	4¼	9	9	10½	15½	9	15
11 to 20	4¼	9	9	10½	15⅝	9	15
17 to 22				11	16		15½
23 and over					16½		15½

Range of count of whole plums per container	Whole style, in No. 10 (603 x 700) cans	
	In any syrup; or in any other liquid medium including declared "dietetic packs" whether or not packed "in water"	Other than declared "dietetic packs" packed "in water"
Any count	60 ounces	65 ounces

TABLE II—RECOMMENDED MINIMUM DRAINED WEIGHTS FOR HALVED CANNED PLUMS

Container designation (metal, unless otherwise stated)	Container size (over-all dimensions)		Any grade in any syrup or other liquid medium
	Width	Height	
	Inches	*Inches*	*Ounces*
8 ounce tall	2¹³⁄₁₆	3⁸⁄₁₆	4¼
8 ounce glass			4¾
No. 1 tall	3¹⁄₁₆	4¹³⁄₁₆	9⅜
No. 303	3⅛	4⁵⁄₁₆	9¾
303 glass			9¾
No. 2	3⁷⁄₁₆	4⁷⁄₁₆	12
No. 2½	4⅛	4¹³⁄₁₆	16¼
No. 2½ glass			16
No. 10	6⅝	7	63

(h) *Ascertaining the grade.* (1) The grade of canned plums is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, uniformity of size, absence of defects, and character.

(2) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

Factors:	Points
(i) Color	20
(ii) Uniformity of size	20
(iii) Absence of defects	30
(iv) Character	30
Total score	100

(3) "Normal flavor and odor" means that the canned plums are free from objectionable flavors and objectionable odors of any kind.

(i) *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

(1) *Color.* The factor of color refers to the color of the background skin and any exposed flesh typical for the varietal group and to the intensity and brightness of such characteristic color. Characteristic mottling on the skin for the varietal group is considered as typical color and not as lacking in uniformity of color.

(i) Canned plums that possess a good color may be given a score of 18 to 20 points. "Good color" means that the plums possess a practically uniform, bright color typical of well-matured plums of a single varietal group which have been properly processed; that any exposed flesh is reasonably bright; and that not more than 10 percent by count of the units may possess a reasonably good color, including the over-all "dead-brown" color of canned purple plums. To score in this classification canned purple plums shall be surrounded by a practically clear and highly colored purple liquid.

(ii) If the canned plums possess a reasonably good color, a score of 16 or 17 points may be given. "Reasonably good color" means that the plums possess a reasonably uniform, reasonably bright color typical of reasonably well-matured plums of a single varietal group which have been properly processed; that any exposed flesh may be only fairly bright; and that not more than 15 percent by count of the units may possess a fairly good color. To score in this classification canned purple plums shall be surrounded by a reasonably clear and reasonably high-colored liquid.

(iii) If the canned plums possess a fairly good color, a score of 14 or 15 points may be given. Canned plums that fall into this classification shall not be graded above U. S. Grade C or Standard or U. S. Grade D, whichever is applicable, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the plums possess a color typical of at least fairly well-matured plums of a single varietal group which have been properly processed; that such characteristic color may be markedly variable including the over-all "dead-brown" color of canned purple plums but is not off color for any reason.

(iv) Canned plums that fail to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(2) *Uniformity of size.* Any plums of halved style that are not cleanly divided into halves shall be separated into two approximately equal halves before ascertaining uniformity of size.

(i) Canned plums that are practically uniform in size may be given a score of 18 to 20 points. "Practically uniform in size" means that:

(*a*) In containers with less than 20 units, the weight of the largest unit does not exceed the weight of the second smallest unit by more than 50 percent, or

(*b*) In containers with 20 or more units, in 95 percent by count of the units that are most uniform in weight, the weight of the largest unit does not exceed the weight of the smallest unit by more than 50 percent.

(ii) If the canned plums are reasonably uniform in size, a score of 16 or 17 points may be given. "Reasonably uniform in size" means that:

(*a*) In containers with less than 20 units, the weight of the largest unit does not exceed the weight of the second smallest unit by more than 75 percent, or

(*b*) In containers with 20 or more units, in 95 percent by count of the units that are most uniform in weight, the weight of the largest unit does not exceed the weight of the smallest unit by more than 75 percent.

(iii) If the canned plums are fairly uniform in size, a score of 14 or 15 points may be given. "Fairly uniform in size" means that:

(*a*) In containers with less than 20 units, the weight of the largest unit is not more than twice the weight of the second smallest unit, or

(*b*) In containers with 20 or more units, in 95 percent by count of the units that are most uniform in weight, the weight of the largest unit is not more than twice the weight of the smallest unit.

(iv) Canned plums that fail to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, whichever is applicable, regardless of the total score for the product (this is a limiting rule).

(3) *Absence of defects.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material; from crushed or broken units; from pits or loose pits for the applicable style; from damaged and seriously damaged units; and from any other defects which detract from the appearance or edibility of the product.

(i) A "unit", in whole style, means a whole or substantially whole plum and, in halved style, any whole or partially whole plum is separated into two approximately equal halves and each half therefrom is considered a "unit."

(ii) "Harmless extraneous material" means any vegetable substance (including, but not limited to, a leaf or stem or significant portions thereof) that is harmless.

(iii) "Crushed or broken" means that a unit bears marks of crushing or is otherwise crushed or broken not due to ripeness. In whole style, plums that possess broken skins or that are split to the pit cavity are not considered crushed or broken unless the entire pit cavity is exposed or the unit is mutilated to the extent that it is not intact as a whole or substantially whole plum. In halved style, halves of plums that are slightly split are not considered crushed or broken unless the unit is seriously mutilated.

(iv) A "pit" means a whole pit or any portion thereof. In whole style, only "loose pits" are considered as defects. In halved style, pits are considered as defects whether loose or attached to a unit.

(v) "Damaged" means any injury which, singly or in the aggregate on a unit or in a unit (except for internal gummosis), materially affects the appearance of the unit and includes, but is not limited to:

(*a*) Surface areas blemished by sunburn, scab, or other serious discoloration (exclusive of characteristic mottling) having an aggregate area exceeding that of a circle $^{3}/_{16}$ inch in diameter and not extending into the fruit tissue;

(*b*) Surface areas blemished by sunburn, scab, or other serious discoloration (exclusive of characteristic mottling) having an aggregate area equivalent of, or less than, that of a circle $^{3}/_{16}$ inch in diameter and extending into the fruit tissue so that the flesh is materially discolored or toughened;

(*c*) Abnormalities, such as "doubles" and growth cracks, but not "shriveled" areas;

(*d*) External gummosis.

(vi) "Seriously damaged" means damaged to the extent that the appearance or edibility of the unit is seriously affected.

(vii) Canned plums that are practically free from defects may be given a score of 27 to 30 points. "Practically free from defects" means that the canned plums are practically free from any defects not specifically mentioned that affect the appearance or edibility of the product and that for the applicable style not more than the following defects or defective units may be present:

(*a*) 1 small stem or 1 small leaf for each 64 ounces of net weight; and no harmless extraneous material;

(*b*) No crushed or broken units;

(*c*) 1 loose pit for each 32 ounces of net weight in whole style and no pits in halved style;

(*d*) A total of 10 percent by count of the units may be damaged and seriously damaged: *Provided*, That not more than 3 percent by count of the units may be seriously damaged. One unit in a single container is permitted to be damaged or one unit in a single container is permitted to be seriously damaged if any of such units exceed the respective allowances of 10 percent and 3 percent by count, provided that in all containers comprising the sample such damaged and seriously damaged units do not exceed an average of 10 percent by count of the total number of units or that such seriously damaged units do not exceed an average of 3 percent by count of the total number of units.

(viii) If the canned plums are reasonably free from defects, a score of 24 to 26 points may be given. Canned plums that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the canned plums are reasonably free from any defects not specifically mentioned that affect materially the appearance or edibility of the product and that for the applicable style not more than the following defects or defective units may be present:

(*a*) 1 small stem or 1 small leaf for each 32 ounces of net weight; and no other harmless extraneous material;

(*b*) 5 percent by count of the units may be crushed or broken;

(*c*) 1 loose pit for each 16 ounces of net weight in whole style and no pits in halved style; and

(*d*) A total of 15 percent by count of the units may be damaged and seriously damaged: *Provided*, That not more than 5 percent by count of the units may be seriously damaged. One unit in a single container is permitted to be damaged or one unit in a single container is permitted to be seriously damaged if any of such units exceed the respective allowances of 15 percent and 5 percent by count, provided that in all containers comprising the sample such damaged and seriously damaged units do not exceed an average of 15 percent by count of the total number of units or that such seriously damaged units do not exceed an average of 5 percent by count of the total number of units.

(ix) If the canned plums are fairly free from defects, a score of 21 to 23 points may be given. Canned plums that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the canned plums are fairly free from any defects not specifically mentioned that affect materially the appearance or edibility of the product and that for the applicable style not more than the following defects or defective units may be present:

(*a*) 1 small stem or 1 small leaf for each 16 ounces of net weight and 1 piece of other harmless extraneous material for each 96 ounces of net weight;

(*b*) 10 percent by count of the units may be crushed or broken;

(*c*) 3 loose pits for each 32 ounces of net weight in whole style and 1 pit for each 32 ounces of net weight in halved plums; and

(*d*) A total of 20 percent by count of the units may be damaged and seriously damaged: *Provided*, That not more than 10 percent by count of the units may be seriously damaged. One unit in a single container is permitted to be seriously damaged if such unit exceeds 10 percent by count, provided that in all containers comprising the sample such seriously damaged units do not exceed an average of 10 percent by count of the total number of units.

(x) Canned plums that fail to meet the requirements of subdivision (ix) of this subparagraph with respect to requirements in (*b*) of said subdivision (or only with respect to crushed or broken units) may be given a score of 0 to 20 points and shall not be graded

above U. S. Grade D, regardless of the total score for the product (this is a limiting rule).

(xi) Canned plums that fail to meet the requirements of subdivision (ix) of this subparagraph with respect to requirements other than (b) of said subdivision (or other than for crushed and broken units) may be given a score of 0 to 20 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(4) *Character.* The factor of character refers to the texture and condition of the flesh in relation to ripeness or maturity, to the tenderness and firmness of the canned plums, and to shriveled areas of the skin.

(i) Canned plums that possess a good character may be given a score of 27 to 30 points. "Good character" means that the units are thick-fleshed, are tender and may be soft but hold their apparent original conformation, and otherwise possess a good texture of both skin and flesh characteristic of canned plums that have been properly processed from well-ripened or well-matured plums; and that not more than a total of 10 percent by count of the canned plums may possess a reasonably good character or may possess shriveled areas that do not materially affect the appearance of the plum.

(ii) If the canned plums possess a reasonably good character, a score of 24 to 26 points may be given. "Reasonably good character" means that the units may be slightly lacking in thickness of flesh, may be variable in texture from soft to slightly firm, and otherwise possess a reasonably good texture of both skin and flesh characteristic of canned plums that have been properly processed from reasonably well-ripened or reasonably well-matured plums; and that not more than a total of 20 percent by count of the canned plums may possess a fairly good character or may possess shriveled areas that do not materially affect the appearance of the plum.

(iii) If the canned plums possess a fairly good character, a score of 21 to 23 points may be given. Canned plums that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" means that the units may be more than slightly lacking in thickness of flesh, possess a fairly good texture of both skin and flesh characteristic of canned plums that have been properly processed from fairly well-ripened or fairly well-matured plums, may be variable in texture from very soft to slightly tough but are not so soft as to show material disintegration, and may possess shriveled areas that materially affect, but do not seriously affect, the appearance of the canned plums.

(iv) Canned plums that fail to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 20 points and shall not be graded above U. S. Grade D or Substandard, whichever is applicable, regardless of the total score for the product (this is a limiting rule).

(j) *Tolerances for certification of officially drawn samples.* (1) When certifying samples that have been officially drawn and which represent a specific lot of canned plums, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(i) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(ii) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(iii) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

Chapter VI—Soil Conservation Service, Department of Agriculture

PART 600—FUNCTIONS AND PROCEDURE

SALE OF FARM UNITS

Pursuant to the provisions of section 3 (a) of the Administrative Procedure Act of June 11, 1946 (60 Stat. 237, 238; 5 U. S. C. 1002), and the authority vested in me by order dated June 28, 1945 (10 F. R. 7959), paragraph (d) of § 600.6 (7 CFR 600.6 (d)) of Chapter VI, Title 7, Code of Federal Regulations, is amended to read as follows:

§ 600.6 *Water conservation and utilization.* * * *

(d) Acquired project lands will be sold insofar as practicable in family-size farm units as determined by Regional Directors. Prior to the time project lands have been developed for irrigation and irrigation water is available, land acquired by the Government may be leased to qualified operators upon application to the project supervisor. After acquired lands have been developed for irrigation and irrigation water is available, Regional Directors will advertise the number of family-size farm units on projects which will be available for sale and the number which will be available for lease, with option to purchase, at any specified time, except that no advertisement will be made as to units to be sold to persons to whom commitments to purchase were made prior to September 11, 1946, and who have been approved by the Family Selection Committee, and units occupied by tenants who are veterans of World War II as defined in the Surplus Property Act of 1944 (58 Stat. 765, as amended, 50 U. S. C. App. 1611-1646), or who have served in the active service in the Armed Forces, which term includes the Army, Navy, Air Force, Marine Corps, and Coast Guard of the United States, for 90 days or more during the period beginning on June 27, 1950, and ending on such date as shall be determined by Presidential proclamation or concurrent resolution of the Congress, and have been discharged or released from such active service under conditions other than dishonorable and are not currently in the active service, if such tenants meet the requirements of purchasers, and wish to acquire the farm units on which they reside. For a period of 90 days after farm units have been advertised for sale or lease, preference in the sale or lease of such farm units will be given to qualified veterans as defined above. Application forms, for showing the applicant's qualifications, and information concerning the purchase of project farms may be obtained from the respective project supervisors or Regional Directors. Prospective tenants and purchasers must, insofar as practicable, be in need of a family-type farm; be citizens of the United States; have had previous experience in farming where the major portion of the family income was from the farm; have a satisfactory credit reputation; and own or be in a position to secure necessary equipment and livestock to operate the land for which application is being made. In addition, prospective purchasers must be free from permanent infectious diseases or disabilities that are likely to obstruct the fulfillment of their obligations incident to the purchase of the farm. Applicants will be considered and passed upon by a Family Selection Committee composed of seven persons residing in the community or county in which the project is located. The applicants will be notified of the action taken by the Family Selection Committee.

(Sec. 4, 49 Stat. 164, sec. 32, 50 Stat. 525, 56 Stat. 725; 7 U. S. C. 1011, 16 U. S. C. 590d)

Done at Washington, D. C., this 11th day of July 1952.

[SEAL] ROBT. M. SALTER,
Chief, Soil Conservation Service.

MISCELLANEOUS

723.426 Determination of acreage allotments and normal yields for farms (a) returned to agricultural production or (b) shifted from production of shade-grown cigar-leaf (type 61) wrapper tobacco to production of cigar-filler and binder (types 42-44, 51-55) tobacco.
723.427 Approval of determinations made under §§ 723.411 to 723.426.
723.428 Application for review.

AUTHORITY: §§ 723.411 to 723.428 issued under sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375. Interpret or apply secs. 301, 313, 363, 52 Stat. 38, 47, as amended, 63; 7 U. S. C. 1301, 1313, 1363.

GENERAL

§ 723.411 *Basis and purpose.* The regulations contained in §§ 723.411 to 723.428 are issued pursuant to the Agricultural Adjustment Act of 1938, as amended, and govern the establishment of 1953 farm acreage allotments and normal yields for cigar-filler and binder tobacco. The purpose of the regulations in §§ 723.411 to 723.428 is to provide the procedure for allocating, on an acreage basis, the State acreage allotment for cigar-filler and binder tobacco for the 1953-54 marketing year among farms and for determining normal yields. Prior to preparing the regulations in §§ 723.411 to 723.428, public notice (17 F. R. 4895) was given in accordance with the Administrative Procedure Act (5 U. S. C. 1003). The data, views, and recommendations pertaining to the regulations in §§ 723.411 to 723.428 which were submitted have been duly considered within the limits permitted by the Agricultural Adjustment Act of 1938, as amended.

§ 723.412 *Definitions.* As used in §§ 723.411 to 723.428, and in all instructions, forms, and documents in connection therewith the words and phrases defined in this section shall have the meanings herein assigned to them unless the context or subject matter otherwise requires.

(a) *Committees.* (1) "Community committee" means the group of persons elected within a community as the community committee of the Production and Marketing Administration to assist in administering the Production and Marketing Administration programs within the community.

(2) "County committee" means the group of persons elected within a county as the county committee of the Production and Marketing Administration to assist in administering the Production and Marketing Administration programs within the county.

(3) "State committee" means the group of persons designated as the State committee of the Production and Marketing Administration, charged with the responsibility of administering Production and Marketing Administration programs within the State.

(b) *Farm.* "Farm" means all adjacent or nearby farm land under the same ownership which is operated by one person, including also:

(1) Any other adjacent or nearby farm land which the county committee, in accordance with instructions issued by the Assistant Administrator for Production, Production and Marketing Administration, determines is operated by the same person as part of the same unit with respect to the rotation of crops and with workstock, farm machinery, and labor substantially separate from that for any other lands; and

(2) Any field-rented tract (whether operated by the same or another person) which, together with any other land included in the farm, constitutes a unit with respect to the rotation of crops.

A farm shall be regarded as located in the county in which the principal dwelling is situated, or if there is no dwelling thereon it shall be regarded as located in the county in which the major portion of the farm is located.

(c) *New farm.* "New farm" means a farm on which tobacco will be produced in 1953 for the first time since 1947.

(d) *Old farm.* "Old farm" means a farm on which tobacco was produced in one or more of the five years 1948 through 1952.

(e) *Cropland.* "Cropland" means farm land which in 1952 was tilled or was in regular crop rotation, excluding (1) bearing orchards and vineyards (except the acreage of cropland therein), (2) plowable noncrop open pasture, and (3) any land which constitutes or will constitute, if tillage is continued, a wind erosion hazard to the community.

(f) *Operator.* "Operator" means the person who is in charge of the supervision and conduct of the farming operations on the entire farm.

(g) *Person.* "Person" means an individual, partnership, association, corporation, estate or trust or other business enterprise or other legal entity, and whenever applicable, a State, a political subdivision of a State, or any agency thereof.

(h) *Tobacco.* "Tobacco" means (1) type 42 tobacco—that type of cigar-leaf tobacco commonly known as Gebhardt, Ohio Seedleaf, or Ohio Broadleaf, produced principally in the Miami Valley section of Ohio and extending into Indiana; (2) type 43 tobacco—that type of cigar-leaf tobacco commonly known as Zimmer, Spanish, or Zimmer Spanish, produced principally in the Miami Valley section of Ohio and extending into Indiana; (3) type 44 tobacco—that type of cigar-leaf tobacco commonly known as Dutch, Shoestring Dutch, or Little Dutch, produced principally in the Miami Valley section of Ohio; (4) type 51 tobacco—that type of cigar-leaf tobacco commonly known as Connecticut Valley Broadleaf or Connecticut Broadleaf, produced primarily in the Valley area of Connecticut; (5) type 52 tobacco—that type of cigar-leaf tobacco commonly known as Connecticut Valley Havana Seed, or Havana Seed of Connecticut and Massachusetts, produced primarily in the Connecticut Valley area

of Massachusetts and Connecticut; (6) type 53 tobacco—that type of cigar-leaf tobacco commonly known as York State Tobacco, or Havana Seed of New York and Pennsylvania, produced principally in the Big Flats section of New York, extending into Pennsylvania and in the Onondaga section of New York State; (7) type 54 tobacco—that type of cigar-leaf tobacco commonly known as southern Wisconsin cigar-leaf or southern Wisconsin binder type, produced principally south and east of the Wisconsin River; and (8) type 55 tobacco—that type of cigar-leaf tobacco commonly known as Northern Wisconsin cigar-leaf or Northern Wisconsin binder type, produced principally north and west of the Wisconsin River, as classified in Service and Regulatory Announcement No. 118 (7 CFR Part 30) of the Bureau of Agricultural Economics of the United States Department of Agriculture. Tobacco which has the same characteristics and corresponding qualities, colors, and lengths shall be treated as one type, regardless of any factors of historical or geographical nature which cannot be determined by an examination of the tobacco. The term "tobacco" shall include all leaves harvested, including trash.

§ 723.413 *Extent of calculations and rule of fractions.* All acreage allotments shall be rounded to the nearest one-tenth acre. Fractions of fifty-one thousandths of an acre or more shall be rounded upward, and fractions of five-hundredths of an acre or less shall be dropped. For example, 1.051 would be 1.1 and 1.050 would be 1.0.

§ 723.414 *Instructions and forms.* The Director, Tobacco Branch, Production and Marketing Administration, shall cause to be prepared and issued such forms as are necessary, and shall cause to be prepared such instructions as are necessary, for carrying out §§ 723.411 to 723.428. The forms and instructions shall be approved by, and the instructions shall be issued by, the Assistant Administrator for Production, Production and Marketing Administration.

§ 723.415 *Applicability of §§ 723.411 to 723.428.* Sections 723.411 to 723.428 shall govern the establishment of farm acreage allotments and normal yields for tobacco in connection with farm marketing quotas for the marketing year beginning October 1, 1953. The applicability of §§ 723.411 to 723.428 is contingent upon the proclamation of a national marketing quota for tobacco by the Secretary of Agriculture and the approval thereof by growers voting in a referendum pursuant to section 312 of the Agricultural Adjustment Act of 1938, as amended.

ACREAGE ALLOTMENTS AND NORMAL YIELDS FOR OLD FARMS
